Reserve Calendar.

Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

JAN 14 1926

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, January 5, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, January 12, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

### THE RESOLUTION:

(728-25-S)

WHEREAS, J. L. Hernon, for Mary U. Hoffman, owner, filed, July 9, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 48 West 22nd street, Borough of Manhattan; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated June 30, 1925, reads (Order No. 81574-LD):

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that the same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of the Labor Law, Section 271.

Among the defects noted on this fire escape are the following:

"(d) No stairway from lowest balcony to ground.

"(e) No safe passageway to the street from the termination.";

and

WHEREAS, the building is non-fireproof, six stories in height, 23 ft. by 98 ft. 9 in. in area at 1st story and 23 ft. by 88 ft. 9 in. in area above. OCCUPIED: 1st story, store; 2nd story and 3rd story, vacant; 4th story, manufacturing suits, 3 persons; 5th story, vacant; 6th story, manufacturing suits, 10 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in metal lath and cement plaster partitions on wood studs with fire doors at openings; an iron ladder to roof scuttle; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the roof of 1st story extension; with EGRESS from roof of 1st story extension by means of iron steps to the 2nd story fire escape balcony on building adjoining at south; ROOFS of adjoining buildings one story lower at east, three stories lower at west; and

WHEREAS, the petitioner claims that it would ruin the rental value of store space if forced to comply with the fire department order with regard to egress from termination of rear fire escapes; he proposes to directly connect the 2nd story balcony of rear fire escapes to the 2nd story fire escape balcony of the premises adjoining at south by a new section of balcony in lieu of complying with the order.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination of the fire escape and passageway, *on condition* that an approved fire escape be maintained on the rear of the building from the roof to balcony over 1st story extension, with egress therefrom by means of iron steps to adjoining extension roof to the east connecting with the iron balcony fire escape to the rear, with egress through the adjoining premises to the rear on 21st street, and that the occupancy of the building shall not exceed the legal capacity of the interior stairs.

774-25-S.

PETITIONER—Henry S. Lion, for H. B. Rubin, Inc., lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—501 Seventh avenue, Manhattan.

APPEARANCES—

For Petitioner: Henry S. Lion.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(774-25-S)

WHEREAS, Henry S. Lion, for H. B. Rubin, Inc., lessee, filed, July 27, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the

fire commissioner, affecting premises 501 Seventh avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 7, 1925, reads (Order No. 82007-LD):

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, 17 stories in height, 98 ft. 9 in. by 244 ft. in area; OCCUPIED tenant factory, about 75 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; a fire tower at the north side of the building; and

WHEREAS, the petitioner, who occupies 2nd story, claims that all wood partitions referred to in order, except those enclosing the show room and office adjacent thereto, have been removed; he proposes to back up all remaining wood partitions which extend from floor to ceiling, with plaster blocks 3 in. in thickness.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the show room and single private office space on the 37th street front, approximately 19 ft. deep and 85 ft. in length, *on condition* that there shall be not less than two doorways from this space to the open loft, with direct egress to both stairways, and that the partition shall be backed up on the loft side with approved fireproof construction in accordance with the requirements of the building code; sprinkler heads to be so maintained as to cover all parts of the floor.

794-25-S.

PETITIONER—Buchman & Kahn, for 79 Madison Avenue Corp., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—79-87 Madison avenue and 23-27 East 28th street, Manhattan.

APPEARANCES—

For Petitioner: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(794-25-S)

WHEREAS, Buchman & Kahn, for 79 Madison Avenue Corp., owner, filed, August 3, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 79-87 Madison avenue and 23-27 East 28th street, Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 13, 1925, reads:

"10. All windows should conform with the requirements of Section 264 of Labor Law. No pane of glass may exceed 720 square inches in area.";

and

WHEREAS, the building is fireproof, 16 stories in height, 98 ft. 9 in. by 150 ft. in area; OCCUPIED as offices and 25 per cent of area used for manufacturing purposes; about 118 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fire doors at openings; and

History Sem  
Lem  
Rough draft  
Dec 11, 1928

# MINUTES

WHEREAS, the petitioner proposes to install  $\frac{1}{4}$  in. plate glass windows on Madison avenue and 28th street fronts, the maximum size on 1st story 9 ft. by 9 ft. 6 in.; on 2nd and 3rd stories 7 ft. by 8 ft.; and

WHEREAS, the petitioner claims by complying strictly with the labor law he would detract from the architectural appearance of the building, and requests the board to permit sizes of glass as proposed.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front of the three lower stories, *on condition* that all openings shall be equipped with approved metal frames and sash glazed with polished plate glass not less than  $\frac{1}{4}$  in. in thickness, and that the requirements of the labor law shall be complied with in all other respects.

426-25-S.

PETITIONER—Samuel Rosenblum, for Charles E. Weyand & Co., Inc., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—22-26 Howard street and 5-7 Crosby street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon .....

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(426-25-S)

WHEREAS, Samuel Rosenblum, for Charles E. Weyand & Co., Inc., owner, filed, April 21, 1925, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 22-6 Howard street and 5-7 Crosby street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 26, 1924, reads:

"Order No. 68670-LD—

"1. Remove the sub-standard fire escape on the Crosby Street side and on the Howard Street side of building or reconstruct same as per Section 274 of the Labor Law and Rule 3A, as amended by the Board of Standards and Appeals, May 9th, 1924. Among the defects noted on this fire escape are the following: Windows on course are not fireproof nor self-closing.

"2. Reduce the area of wire glass in partitions enclosing interior stairway on Howard Street side of building on all stories, so that no single pane of glass exceeds 360 square inches in area and not more than 720 square inches on any one story, as per Section 271 of the Labor Law and Rule 505 of the Industrial Code as amended by the Board of Standards and Appeals April 3, 1923."

and

WHEREAS, the building is non-fireproof, six stories in height, approximately 75 ft. 1 in. by 116 ft.  $1\frac{1}{2}$  in. in area; OCCUPIED as a factory building, 61 persons above the 1st story; EQUIPPED with a sprinkler system and a fire alarm system. EXITS: An interior wooden stairway extending from entrance door to roof, enclosed in fireproof partitions which contain a wire glass sash light at each story, except the top story, also with fireproof sash doors at openings; a standard fire escape located in the north court, with egress to Crosby street; two sub-standard fire escapes located one on each street front; a horizontal exit on each

of the 2nd and 6th stories to No. 28 Howard street; ROOFS of adjoining buildings are six stories higher at east and 2 ft. lower at west; and

WHEREAS, the petitioner claims, relative to Item 1, that the sub-standard fire escapes are of substantial construction, conform to law except as to fireproof windows opening thereon, and being located on the two street fronts may serve a useful purpose; relative to Item 2, that the area of the wire glass light in stairhall partition on each story except the top story is only 1,716 sq. in.; that the total area of wire glass in stairhall enclosure averages 3,898 sq. in. on each story; that the building is provided with two legal means of exit in addition to the sub-standard fire escapes and horizontal exits; in view of the small occupancy and adequate exit facilities, he requests the board to accept the present exit conditions of the building as adequate without change.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the fire escapes in excess of other legal required exits, *on condition* that the sash of windows opening thereon shall be glazed with polished plate glass; that the building shall be equipped with an approved sprinkler and interior fire alarm system; and *granted*, as to Item No. 2, *on condition* that the transom in the existing door shall be not increased in area and shall be glazed with wire glass, and *granted* only so long as the premises are occupied and maintained in single tenancy.

557-25-S.

PETITIONER—Samuel Rosenblum, for Duman Textile Mills, lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—464 Liberty avenue, Brooklyn.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon .....

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(557-25-S)

WHEREAS, Samuel Rosenblum, for Duman Textile Mills, lessee, filed, May 29, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 464 Liberty avenue, Brooklyn; and

WHEREAS, the order of the fire commissioner reads:

"1. Arrange the iron bars on all windows on north, south, east and west sides of 1st story and basement so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Section 272 of Labor Law."

and

WHEREAS, the building is non-fireproof, two stories and basement in height, 100 ft. by 85 ft. in area. OCCUPIED: Basement, wet finishing of cloth, 1 person; 1st story, manufacture of knit goods, 50 persons; 2nd story, manufacture of undergarments, 55 persons. EXITS: Three interior non-fireproof stairways, extending from the 1st story to top story; enclosed in wood board partitions with wooden doors at openings; a fire escape on the south side of the building having metal covered doors at openings therein, extending from the 2nd story to the courtyard, with

# MINUTES

EGRESS from the termination of the fire escape by means of court to street; and

WHEREAS, there are approximately 34 barred windows in the basement and approximately 36 barred windows on the 1st story, and petitioner contends that the windows in the basement are 6 ft. above the floor; and that there are ample means of exit provided, there being five in the 1st story, and contends that the bars are necessary as a protection against burglary, and proposes to select one or two windows on each front on the 1st story and arrange the bars to open outwardly to afford additional egress.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the basement and 1st story, on condition that existing high set openings in the basement shall be of the transom type for ventilating purposes and so maintained, the sills of which shall be not less than 6 ft. above the cellar level, and on further condition that a direct exit from the rear westerly end of the basement shall be provided direct to the Liberty avenue grade level, and granted, so far as it affects the 1st story, on condition that not less than the existing five direct doorway exits shall be maintained as indicated on the plans filed in this petition.

537-25-S.

PETITIONER—Samuel Rosenblum, for 105-107 Fulton Street Co., Inc., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—105-107 Fulton street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher, of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(537-25-S)

WHEREAS, Samuel Rosenblum, for 105-107 Fulton St. Co., Inc., owner, filed, May 23, 1925, a petition, with the board of standards and appeals for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 105-7 Fulton street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 17, 1924, reads:

"Extend the interior stairway at the south side of building to the roof, as per Section 271 of the Labor Law, said extension and the landings and passages connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 3 ft. above the roof, as per Sec. 271 and 272 of the Labor Law and Rule 2 of the Industrial Code.";

and

WHEREAS, the building is non-fireproof, six stories in height, 41 ft. by 118 ft. 1 in., irregular in area;; OCCUPIED as a factory building, principally by jewelers setting diamonds, about 25 persons to each story on an average; EQUIPPED with a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, except the southerly stairs, which extends to 6th story; enclosed in fireproof partitions with fire doors at openings; ROOFS of adjoining buildings at east 11 ft. lower, at west on same level; and

WHEREAS, the petitioner proposes to cut an exit doorway from the southerly stairway at 6th story through

the easterly side wall of the building, thereby giving egress to the roof of building at east; he claims the two buildings are under one control; that the exit facilities are excellent in that the building runs through the block from street to street, with an entrance on each street, and requests the board to accept the proposed exit doorway in lieu of extending the south stairs to the roof.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the stairway at the north end of the building shall be carried to the roof and that a horizontal exit from a platform of the 6th story landing on the easterly stairway shall be provided to the roof of the adjoining premises to the east, the platform to the horizontal exit shall be not less than 44 in. in width and that a fireproof self-closing door of not less than 44 in. in width shall be provided to open outwardly; granted only so long as the conditions as to occupancy and use otherwise remain unchanged.

550-25-S.

PETITIONER—Samuel Rosenblum, for R. A. Rutherford Co., Inc., lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—225 Mercer street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(550-25-S)

WHEREAS, Samuel Rosenblum, for R. A. Rutherford Co., Inc., lessee, filed, May 27, 1925, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in order of fire commissioner, affecting premises 225 Mercer street, Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"1. Arrange the fire escape on the front of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law.

"Among the defects noted on this fire escape are the following: Windows on course not fireproof, nor self-closing. No counterbalanced stairway from lowest balcony to ground.

"2. Extend the interior stairway at the north side of building to the roof, as per Section 271 of the Labor Law.

"3. Provide an additional means of exit from the cellar, said exit to be located at the front of the building remote from existing stairway in accordance with the provisions of Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories in height, 20 ft. by 45 ft. in area; OCCUPIED for the manufacture of office partitions, 13 persons in the entire premises. EXITS: An interior open wooden stairway, extending from the 1st story to the top story, with iron ladder to scuttle in roof; a 60 degree fire escape on the front of the building, having unprotected openings along the course thereof, extending from the 3rd story balcony to the 2nd story balcony, with EGRESS from the termination of the fire escape by means of a drop ladder in guides to the street; ROOFS

# MINUTES

of adjoining buildings to the north the same height, to the south one story higher; and

WHEREAS, petitioner contends that the building is occupied by one tenant, that it is small in height and area and that, in view of these circumstances and also the light occupancy, requests that the existing means of exit be accepted.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 1, only so far as it affects the windows, *on condition* that a counterbalanced drop ladder in guides shall be provided; *granted*, as to Item No. 2, *on condition* that a fixed double rung iron ladder shall be provided from the top story loft to a scuttle in the roof; *granted*, as to Item No. 3, *on condition* that the cellar stairs shall be enclosed in fire resisting partitions with fireproof self-closing door at the cellar grade, and that an exit from the rear areaway shall be provided with steps to yard level, with egress through opening in fence to yard of adjoining premises on the south, and *on further condition* that the building shall be not increased in height, area or dimension and no open flame or heating apparatus shall be maintained in the basement and that an unobstructed passage shall be maintained throughout the cellar floor to the stairhall and rear exit.

693-25-S.

PETITIONER—Samuel Rosenblum, for Fairchild Aerial Camera Corp., lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—270-276 West 38th street and 554-568 Eighth avenue, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum and Ernest Robinson.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(693-25-S)

WHEREAS, Samuel Rosenblum, for Fairchild Aerial Camera Corp., lessee, filed, July 3, 1925, a petition, with the board of standards and appeals for variation from the requirements of the labor law, as cited in order (No. 80641-LD) of the fire commissioner, affecting premises 270-276 West 38th street and 554-568 Eighth avenue, Manhattan; and

WHEREAS, the order of the fire commissioner (No. 80641-LD), dated June 23, 1925, reads:

"1. Remove all partitions not built of incombustible material, as per Section 263 and 270 of the Labor Law."; and

WHEREAS, the building is fireproof, 21 stories in height, 133 ft. 3 $\frac{5}{8}$  in. by 98 ft. 8 $\frac{3}{4}$  in. in area at the 1st story and 133 ft. 3 $\frac{5}{8}$  in. by 90 ft. 11 $\frac{3}{4}$  in. in area above; OCCUPIED as a tenant factory, about 120 persons on each story; and EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway, extending from the 1st story to the roof; enclosed in fireproof partitions with fireproof doors at openings; also a fire tower; ROOFS of adjoining buildings five (5) stories lower at east, building under construction at south; and

WHEREAS, the petitioner occupying the 20th story claims the offices are enclosed with 7 ft. dwarf sash partitions; the wood partitions enclosing the drafting room extend to the ceiling; that non-fireproof sash partitions sub-dividing the dark room are in turn completely enclosed with fire-

proof partitions; he further contends it would be a great hardship if compelled to remove such partitions, as they are a necessity to his business, and in view of the fire protection afforded in this building, he requests the board to permit the non-fireproof partitions to remain on the 20th story without change.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the partitions on the 20th story, *on condition* that the dwarf partition on the street front of the 38th street frontage shall not exceed a height of 7 ft., the occupancy to be maintained as individual executive offices, with direct egress to the corridor leading directly to the stairs; and *granted*, as to the drafting room partitions, *on condition* that an open, unobstructed passage shall be maintained from the front to the rear portion, providing thereby two means of egress to both interior stairs and fire tower; *granted*, as to the developing room partitions, *on condition* that these partitions shall be enclosed in an enclosure of fireproof construction, and that the developing booths shall be enclosed in fireproof enclosures, any openings therein to be equipped with fireproof self-closing doors, the developing booth section to be ventilated to the outer air by exhaust ventilator; *granted* only so long as the conditions as to occupancy and use remain unchanged.

THE RESOLUTION:

(688-25-S)

WHEREAS, Samuel Rosenblum, for William S. Linkert, lessee, filed, July 1, 1925, a petition with the board of standards and appeals for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 114-16 West 56th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"Provide an outside iron balcony fire escape on the rear of the building conforming to Sec. 273 of the Labor Law, except that exit door shall be a fire door, with substantial steps to the sills, properly secured, when sill is more than 8 inches above the floor level. Where there is no safe egress from the roof, a goose-neck ladder shall be provided from top balcony to the roof."; and

WHEREAS, the building is non-fireproof, two stories in height, 50 ft. by 95 ft. in area. OCCUPIED: 1st story, garage; 2nd story, manufacturing stationery and trunks, 45 persons. EXITS: An interior wooden stairway, extending from the 1st story to 2nd story, enclosed in non-fireproof partitions with wooden doors at openings; two wooden ladders to roof scuttles; ROOFS of adjoining buildings same level at east, four stories higher at west; and

WHEREAS, the petitioner proposes to enclose the interior stairs at 1st story with fire retarding partitions and fire doors; to provide a party-wall balcony at rear of 2nd story, connecting with the roof of adjoining 1st story extension at east; and files a copy of letter of consent, signed by

# MINUTES

the secretary of adjoining owner; he requests the board to accept the proposed work as sufficient compliance with fire department Order No. 77355-LD.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that a balcony fire escape shall be provided throughout the entire rear of the 2nd story, with egress therefrom to adjoining premises to both east and west; that all openings on the course of the fire escape shall be made fireproof, with fireproof casement door and steps from each section on the 2nd story and that the balcony fire escape shall be provided on the under side with a metal flame sheet throughout and return on the front at least 36 in. high, the interior stairs in the 1st story to be enclosed in fire resisting material, with egress at the 1st story direct to street with self-closing fireproof door in accordance with the rules of the board of standards and appeals; and *granted* only so long as the conditions as to occupancy and use remain unchanged.

THE RESOLUTION:

(707-25-S)

WHEREAS, Messrs. Gordon, Weed and Young, for R. Hoe & Company, Inc., owner, filed, July 3, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 504-510 Grand street and 2-12 Sheriff street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 25, 1923, reads (Order No. 50227-LD):

"1. Provide egress to the street from the stairway at the north side of Building "A" by means of a passageway enclosed in fire resisting material, as per Section 271 of the Labor Law.";

and

WHEREAS, the building is of mill construction, six stories and basement in height, 50 ft. by 88 ft. in area at 1st story; OCCUPIED as a machine shop; about 30 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior iron stairway, extending from the 1st story to roof, enclosed in brick walls with fire doors at openings; a fire escape on the northeast side of the building, having fireproof openings along the course thereof, extending from roof to the yard; with EGRESS from the termination of the fire escape by means of yard to street; ROOFS of adjoining buildings 2 ft. lower at east, 23 ft. lower at north; and

WHEREAS, the petitioner claims, with regard to Item 1, that there is a distance of about 8 ft. from the bottom of the stairway to the inner courtyard which connects directly with the street; he requests the board to accept the existing condition.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that an open door to the courtyard shall be

maintained not more than 5 ft. 2 in. from the termination of the stair platform at the basement level.

THE RESOLUTION:

(708-25-S)

WHEREAS, R. Hoe & Co., Inc., owner, filed, July 3, 1925, a petition for a variation of the requirements of the labor law, as cited in order of fire commissioner, affecting premises 34-36 Sheriff street and 25-35 Columbia street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 50093-LD, dated September 15, 1923, reads:

"1. Provide a fireproof floor for balconies of the exterior enclosed fireproof stairway, west end of building, all stories, as per Sec. 266 of the Labor Law.";

and

WHEREAS, the building is fireproof, six stories and basement in height, 200 ft. 3 in. by 45 ft. 8 in. and 114 ft. 3¼ in., irregular in area at the 1st story; OCCUPIED as a machine shop; about 65 persons on each story; EQUIPPED with a sprinkler system and fire alarm signal system. EXITS: An interior fireproof stairway extending from the 1st story to the roof, enclosed in brick walls with fire doors at the openings, two fire towers, one being located at the southwest corner of each wing of the building; ROOFS of adjoining buildings 34 ft. lower at the southeast and southwest; and

WHEREAS, the petitioner claims that the balconies are not of sufficient strength to sustain a 4 in. concrete flooring; that all of the windows and doors opening on and under the balconies are fireproof and self-closing.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the platform of the balcony leading to the fire tower of Exit 3, *on condition* that the floor of the balcony shall be of open lattice metal or concrete slab.

## THE RESOLUTION:

(709-25-S)

WHEREAS, R. Hoe & Co., Inc., owner, filed, July 3, 1925, a petition for variation from the requirements of the labor law, as cited in order of fire commissioner, affecting premises block bounded by Grand, Sheriff, Broome and Columbia streets, Manhattan; and

WHEREAS, the order of the fire commissioner, 50226-LD and 50227-LD, reads:

"No. 50226-LD. (4) Provide adequate and safe means of egress from termination of exterior stairway to street."

"No. 50227-LD. (1) Provide egress to street from stairway at the north side of building "A" by means of passageway enclosed in fire resisting material.";

and  
WHEREAS, the premises consist of a plot of ground upon which is located the plant of R. Hoe & Co., Inc., Building "A" being on the corner of Grand and Sheriff streets; Building "C" being on the corner of Sheriff and Broome streets; the buildings being provided with exterior screened stairways, in addition to the interior enclosed fireproof stairway in Building "A" and horizontal exits in Building "C," the exterior stairways landing in an open yard with egress by gate 12 ft. 6 in. wide to Sheriff street, through a passageway 25 ft. long with a fireproof roof, heavy timbered floor and the passageways sprinklered; and

WHEREAS, it appears that under Cal. No. 248-24-S the board accepted this passageway from the inner court to the street as a means of egress, on condition that it should be sprinklered.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 50226 (4) and Order No. 50227 (1), *on condition* that an unobstructed passageway, sprinklered throughout, shall be maintained from every court, with direct egress to the street; and *granted* only so long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION:

(767-25-S)

WHEREAS, Samuel Rosenblum, for Hup Realty Company Inc., owner, filed, July 24, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 114-116 East 13th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 5, 1925, reads (Order No. 79414-LD):

"1. Arrange the exterior screened stairway on rear of building and the openings leading thereto so that same are in compliance with the provisions of Section 268 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law. See NOTE.

"Among the defects noted on this stairway are as follows:

"No fireproof passageway leading to the street from the termination.";

and

WHEREAS, the building is fireproof, 11 stories and pent house in height, 56 ft. by 92 ft. 10 in. in area; OCCUPIED as a tenant factory; about 25 persons on each story; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway extending from the 1st story to roof, enclosed in fireproof partitions, with fireproof doors at openings; an outside fireproof stairway on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 1st floor level, with no EGRESS from the termination of the same; ROOFS

# MINUTES

of adjoining buildings, eight stories lower at west; vacant lot at east; and

WHEREAS, the petitioner proposes to cut a doorway in east wall of adjoining building at 1st story rear, giving egress from termination of rear outside fireproof stairs through building No. 112 East 13th street, which is under the same ownership.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination of the rear fire escape, *on condition* that an iron balcony shall be provided at the 2nd story level for full width of fire escape, with bridge connecting to the premises at 113-117 Fourth avenue and extended to the roof of extension No. 111 East 12th street.

THE RESOLUTION:

(115-25-S)

WHEREAS, Julius Eckman, for Winco Realty Corporation, owner, filed, January 27, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 54 West 57th street and 59 West 56th street, Manhattan; and

WHEREAS, the orders of the fire commissioner, dated December 27, 1924, read:

"Order No. 70498-LD—

"1. Extend the interior stairway at the east side of 59 West 56th Street section of the building to the roof, as per Section 271 of the Labor Law.

"2. Arrange the fire escape on the south side of 54 West 57th Street section of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law.

"Among the defects noted on this fire escape are the following: No stairway from lowest balcony to the ground. No safe passageway to the street from the termination.

"3. Arrange the fire escape on the 59 West 56th Street section of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law.

"Among the defects noted on this fire escape are the following: No stairway from the top balcony to the roof. Windows on course not fireproof nor self-closing. No 60 degree stairway leading from 2nd to 3rd story. No balcony at 2nd story. No stairway from lowest balcony to ground. No safe passageway to the street from the termination."

"Order No. 70499-LD—

"1. Arrange the doors leading to the stairway on all stories upon which five or more persons are employed

so as to open outwardly without obstructing the stairway as per Section 271 of the Labor Law."

and

WHEREAS, the premises run through from 56th to 57th street and consist of two non-fireproof five-story buildings, each 25 ft. by 100 ft. in area; joined on the 1st story; the 56th street section being OCCUPIED: 1st story, beauty parlor, 10 persons; 2nd story, offices, 5 persons; upper stories, dwelling, 2 families on each story; the occupancy of the 57th street section, 1st story, beauty parlor, 10 persons; 2nd story, wig manufacturer, 18 persons; 3rd story, dressmaker, 20 persons; 4th story, offices, 15 persons. EXITS: 57th street section, an interior wooden stairway extending from the 1st story to the roof, enclosed in fire resisting partitions with fireproof doors at the openings; a fire escape on the rear of the building, with fireproof windows along the course thereof, extending from the main roof to fireproof roof of the 1st story. EXITS: 56th street section, an interior wooden stairway extending from the 1st story to the top story, enclosed in wood stud, lath and plaster partitions with wooden doors at the openings; a 60 degree fire escape with non-fireproof windows along the course thereof on the rear of the premises, extending from the top story to the roof of 2nd story extension, with gooseneck ladder to roof and also a gooseneck ladder to fireproof roof of 1st story extension, with EGRESS from the extension roof through buildings; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner proposes to provide a 60 degree iron stairway to counterbalanced scuttle in roof of the 56th street section of the premises and to provide a 60 degree iron stairway to roof in lieu of the existing gooseneck ladder in same building, and requests, otherwise, the acceptance of the existing means of egress.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 70498-LD, Item No. 1, *on condition* that a fixed double rung iron ladder shall be provided from the top story hall to a scuttle in the roof; *granted*, as to Item No. 2, only so far as it affects egress from the termination of the lowest balcony, *on condition* that a doorway shall be provided from the roof at the 2nd story level to the 57th street section, with fire resisting passageway provided in the 56th street section leading direct to a fire resisting stairway with exit direct to 56th street; *granted*, as to Item No. 3, *on condition* that a fire escape shall be provided on the rear of 56th street section with a 60 degree connecting stairs, with egress from termination on roof of 2nd story extension through 57th street or through fire resisting enclosed passageway leading direct to 56th street, *on condition* that the three (3) upper stories on the 56th street section shall be maintained for dwelling purposes only and that the windows on the 2nd story (industrial occupancy) shall be made fireproof; *granted* only so long as conditions as to occupancy and use remain unchanged; *denied* as to Order No. 70499.

## THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Guilfoyle..... 1

## THE RESOLUTION:

(755-23-S)

WHEREAS, William Huenerberg, for Mrs. Minnie Borger, owner, filed, June 15, 1923, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in order of the superintendent of buildings, affecting premises 1022 East 178th street, The Bronx; and

WHEREAS, the order of the superintendent of buildings reads:

"1. Counterbalanced stairway must be provided from lower balcony of front fire escape to street level.

"2. If means of egress may be had to adjoining roofs interior stairway must extend to roof.

"3. Windows on course of fire escape must be fire-proof.";

and

WHEREAS, the building is of frame construction, three stories in height, 25 ft. by 75 ft. in area. EXITS: One interior stairway extending from 1st story to top story, with iron ladder to scuttle in roof; stairway unenclosed; no fire escapes. ROOFS to the east 1 story lower and to the west 5 ft. lower. OCCUPIED: Cellar, store room; 1st story, store room and work room; 2nd story work room; 3rd story, work room; and

WHEREAS, petitioner contends that to install a counterbalanced stairway on the PROPOSED fire escape would block exit on the 1st story, and proposes installing instead a counterbalanced drop ladder in guides; and

WHEREAS, this petition was granted by the board at its meeting September 11, 1923, on certain conditions, and petitioner requested a modification of these conditions as to occupancy.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 1, *on condition* that two counterbalanced drop ladders in guides extending from lowest balcony of fire escape to street level shall be provided; *granted*, as to Item No. 2; and *granted*, as to Item No. 3, *on condition* that no gasoline shall be stored or maintained on the premises, and that the business conducted on the premises shall be restricted to automobile body building; and *granted on condition* that the occupancy shall not exceed 35 persons above the 1st story and that the interior stairway shall be enclosed in fire resisting partitions with self-closing fireproof doors at openings in accordance with the requirements of the labor law, and so long as conditions otherwise remain substantially unchanged.

## THE RESOLUTION:

(1418-22-S)

WHEREAS, Vetner W. Tandy, for Rollin Construction Company, owners, filed, November 23, 1922, a petition with the board of standards and appeals, for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1931-39 Broadway and 110-118 West 65th street, Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"1. Provide continuous safe and unobstructed passageways at least 3 feet wide throughout their length, leading directly to both required means of exit by cutting a door at least 3 feet wide through the dividing walls on all stories. \* \* \*.

"2. Provide additional means of exit from the cellar, said exit to be located on the east side of the building. \* \* \*.

"3. Provide an outside iron balcony fire escape on the north side of six-story building. \* \* \*.";

and

WHEREAS, the building is non-fireproof, four and six stories in height, divided into three sections, with a frontage of 116.2 ft. on Broadway and 100.5 ft. on 65th street. OCCUPIED: Basement, storage, 13 persons; 1st story, theatres, stores and restaurants, 976 persons; 2nd story, offices, restaurant and printing, etc., 116 persons; 3rd story, offices, studios and factory, 50 persons; 4th story, offices, mfg., 4 persons; 5th story, school and offices, 34 persons; 6th story, studios, 11 persons; the means of egress consisting of an interior stairway in each section extending from the 1st story to the roof, enclosed in fireproof partitions with fire doors at the openings; and

WHEREAS, this petition was granted by the board at its meeting January 23, 1923, on certain conditions, and petitioner requested a modification of these conditions as to time limit.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 1, *on condition* that a fireproof self-closing door be provided at the passageway leading to bridge between the four and six-story section of the building on the 2nd, 3rd and 4th stories, and that a public passageway constructed of fire-resisting material with self-closing fireproof doors at openings be provided on the rear portion of the 6th story, leading to proposed fire escape balcony as shown on plans filed in this petition; and *granted*, as to Item No. 2, *on condition* that the present stairway to hallway be maintained and the use of the southeast portion of cellar be limited to storage; and *granted*, as to Item No. 3, *on condition* that at the 5th window from the front in the west wall of six-story building a fire escape balcony be provided, with a 60-degree stairway to roof, and with a 60-degree stairway to the balcony now existing on the 5th story, and that a balcony be provided at the 7th window from the front in the west wall with 60-degree stairways to balconies at the 3rd and 4th story level as shown on plans filed with this petition, and that at the west end of the 65th street front on 4th story an unobstructed passageway from the public hall be maintained to roof of three-story section to the west; that a 6 ft. fire hook be provided in public hallways on 2nd, 3rd, 4th and 5th stories at doors leading to proposed fire escape, said doors to be provided with a plain glass panel; that exit signs and red lights be provided at all means of egress including the iron stairways to roof of four-story section, and that a 60-degree stairway be provided from roof of four-story section to roof of six-story section; and that this variation be *granted* only until September 1, 1927, at which time the building will be demolished, and that the school occupancy be discontinued on or before December 31, 1925.

326-24-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for William Fox, owner.

SUBJECT—Application for reopening—variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—64 University place, Manhattan.

APPEARANCES—

For Petitioner: H. E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Resolution modified.

THE VOTE TO MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(326-24-S)

WHEREAS, Croker Natl. Fire Prev. Eng. Co., for William Fox, owner, filed, March 3, 1924, a petition, with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 64 University place, Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 1, 1923, reads:

"1. Provide safe and unobstructed egress from the termination of fire escape by means of an open court or a fireproof passageway at least 3 ft. throughout leading to the street, as per Section 271 of the labor law.";

and

WHEREAS, the building is non-fireproof, seven stories in height, 21 ft. 9 in. by 103 ft. 9 in. in area at 1st story and 21 ft. 9 in. by 90 ft. in area above; OCCUPIED as a tenant factory; EQUIPPED with a fire alarm signal system. EXITS: One interior wooden stairway extending from 1st story to top story with iron ladder to scuttle in roof enclosed in fire retarded partition with fire doors at openings; a fire escape on the rear of the building, with fireproof windows along the course, extending from roof to a counterbalanced stair to adjoining yard; with EGRESS from yard by means of a fire escape on building to south; ROOF of building to south is three stories lower, to north is one story lower; and

WHEREAS, petitioner contends additional egress from yard may be had through adjoining building to south, and contends that the existing means of egress from the yard are ample; and

WHEREAS, this petition was granted by the board at its meeting May 27, 1924, on certain conditions, and petitioner requested a modification of these conditions as to egress from termination of fire escape.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects egress from termination, on condition that a balcony and 45 degree stairs shall be provided from lowest balcony to premises to the north, with egress through plain glass openings through adjoining premises; that a drop ladder in guides shall be provided from lowest balcony of premises to the north, terminating in yard of premises to rear; iron shutters on the plain glass openings on adjoining premises to be removed.

563-25-S

PETITIONER—G. F. Pelham, architect, for William F. Doyle, for Bisjo Realty Corporation, owner.

SUBJECT—Application for modification—variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—263-271 West 38th street, Manhattan.

APPEARANCES—

For Petitioner: B. M. Sylvan.

ACTION OF BOARD—Petition granted; resolution modified.

CONDITIONS—As specified in resolution.

THE VOTE TO MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Fire Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(563-25-S)

WHEREAS, G. F. Pelham, substituted for William F. Doyle, for Bisjo Realty Corporation, owner, filed, June 1, 1925, a petition for variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 263-271 West 38th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated May 15, 1925, reads:

"1. 'Proposed windows should comply with Section 264 of Labor Law and Rule 503 of Industrial Code.'

"2. All windows must be self-closing as per Rule 503 of the Industrial Code.";

and

WHEREAS, the building is fireproof, 17 stories in height, 102 ft. by 98 ft. in area at 1st story and 102 ft. by 88 ft. in area above. OCCUPIED: 1st story, stores; upper stories, lofts, offices and show rooms and 25 per cent manufacturing; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; ROOFS of adjoining buildings to west 130 ft. lower, to east 130 ft. lower; and

WHEREAS, the petitioner contends that the windows on the 38th street front of the building do not constitute an exposure from the opposite premises as the street is 60 ft. wide; and

WHEREAS, the petition was granted by the board at its meeting October 13, 1925, as to Item No. 2, on condition that the labor law requirements shall be complied with in all other respects, and owner requests, through his architect, a reopening and modification as to Item No. 1, the show windows on the 1st and 2nd stories street front of the premises.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and the petition be and it hereby is granted, as to Item No. 2, only so far as it affects the windows on the front of the building, other than those opening on the passageway, fire tower, or corridor; and granted, as to Item No. 1, only so far as it affects the windows on the first two stories on the street front, on condition that all openings shall be equipped with approved metal frames and sash, glazed with polished plate glass not less than 1/4 in. in thickness, and that the requirements of the labor law shall be complied with in all other respects.

1475-24-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for L. Schepp Co., owner.

SUBJECT—Application for modification—variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—165-169 Duane street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted, modifying resolution.

CONDITIONS—As specified in resolution.

Negative ..... 0  
Absent: Commissioner Guilfoyle..... 1

## THE RESOLUTION:

(1475-24-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for L. Schepp Co., owner, filed, December 15, 1924, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 165-9 Duane street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 26, 1924, reads:

"Order No. 68693-LD:

"1. Enclose the interior stairway at west side of division wall at centre of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 feet above the roof, constructed as per Section 271 of the Labor Law \* \* \*.

"2. Remove the substandard fire escape on the east and west sides of building or reconstruct same in accordance with Section 274 of the Labor Law except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided.

"3. Provide an additional required means of exit on each floor of the building, remote from existing stairway located at west side of division wall at centre of building, preferably located at the north side of building, in accordance with the requirements of Section 271 of the Labor Law.";

and

WHEREAS, the building is separated into two sections by a fore and aft brick wall with openings therein on all stories excepting the 1st, 3rd and 5th stories, and is non-fireproof, ten stories in height, 100 ft. 6 in. by 77 ft. 10 in. in area; OCCUPIED for drying, shredding and packing cocoanut and also for the storage of shoes on the 4th and 5th stories, 78 persons above the 1st story; EQUIPPED with a sprinkler system. EXITS: Two interior wooden stairways, the westerly one extending from the 1st to the top story and the easterly one extending from the 1st story to the roof, partly enclosed in wooden partitions with wooden doors at the openings, a sub-standard fire escape on the Hudson street front and also one on the Staple street front of the building; ROOFS of adjoining buildings are 6 ft. lower; and

WHEREAS, this petition was granted by the board at its meeting February 24, 1925, on certain conditions, and petitioner requested a modification of these conditions as to stairway enclosures 1st story; and

WHEREAS, petitioner proposes to cut openings in the division wall on the 3rd and 5th stories and to provide fireproof doors at all openings in the wall from the 2nd to the 10th story, inclusive; and proposes also to change to 45 degrees the pitch of the connecting stairs between the fire

escape balconies and also to raise the railings on the said balconies to a height of 4 ft. 6 in.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 2, *on condition* that the fire escapes shall be brought up to standard; *granted*, as to Item No. 3, *on condition* that the stairhall enclosure in the easterly section shall be enclosed in fire retarding partitions throughout, in accordance with the rules of the board of standards and appeals, except that the stairway may terminate at 1st story in rear of elevator with self-closing fireproof door at 1st story termination; that the stairhalls in each section of building shall be enclosed throughout; *denied* as to Item No. 1.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—783 Elton avenue, The Bronx.

APPEARANCES—

For Appellant: None.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Flanagan, Connell and Fire Chief Kenlon .....

Negative .....

Absent: Commissioner Guilfoyle.....

THE RESOLUTION:

(297-25-A)

WHEREAS, Dr. Alfred J. Moore, for Mrs. A. J. Moore, owner, filed, March 18, 1925, an appeal from a decision of the fire commissioner, affecting premises 783 Elton avenue, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated February 25, 1925, reads:

"You are hereby notified that an inspection of premises 783 Elton Avenue, Bronx, used for the storage and use of fuel oil, shows that the following must be done before permit requested by you can be issued:

"1. Provide easy access to outside of each fuel oil storage tank for inspection, as per Rule 7, Section 1 of the Fuel Oil Rules.

"4. Discontinue the use of all fuel oil carrying piping less than one-half inch in diameter, as per Rule 8, Section 2-a of the Fuel Oil Rules.

"8. Provide a shut-off valve in the suction line as near the supply tank as practicable, as per Rule 9, Section a of the Fuel Oil Rules.

"9. Provide a shut-off valve in each branch line near each fuel oil burner, as per Rule 9, Section b of the Fuel Oil Rules.

"11. Provide an emergency remote control for fuel oil pumps and locate same outside of the boiler room, as per Rule 11, Section c of the Fuel Oil Rules.

"12. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals, as per Rule 12 of the Fuel Oil Rules.

"16. Discontinue use of auxiliary storage tank between main storage tank and burners, Grade A system.

"17. Locate fuel oil pumps above the elevation of the top of fuel oil storage tank or tanks, as per Rule 11, Section e of the Fuel Oil Rules."

and

WHEREAS, the building is non-fireproof, two stories and basement in height, 25 ft. by 50 ft. in area; OCCUPIED as a private dwelling; and

WHEREAS, the appellant has installed a fuel oil heating system in the cellar of 500 gallons outside storage tank,

# MINUTES

55 gallons auxiliary inside supply tank, a Powerlight oilheat burner, using Grade B oil; and

WHEREAS, the appellant claims that Items 1, 4, 8, 9, 11, 16 and 17 do not apply in this particular case; re: to Item 12, that the Powerlight oilheat burner is now before the board for approval under Cal. No. 628-23-SA; that the installation has been in use during the past three winters, and requests an inspection by a committee of board to determine its safety; and

WHEREAS, no one appeared when this case was called.

*Resolved*, that the appeal be and it hereby is *dismissed* for lack of prosecution.

477-25-A.

APPELLANT—Robert Norton, for G. Norton, owner.  
SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—35-10 Far Rockaway boulevard, Borough of Queens.

APPEARANCES—

For Appellant: Robert Norton.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Connell, Flanagan and Fire Chief Kenlon ..... 4

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(477-25-A)

WHEREAS, Robert Norton, lessee, filed, May 6, 1925, an appeal from an order of the fire commissioner, affecting premises 35-10 Far Rockaway boulevard, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated October 21, 1924, reads (Order No. 90850-LC):

"1. Remove the present gasoline pump from the curb as this department has no power to issue a permit for this pump beyond the lot line of your property.";

and

WHEREAS, the premises consists of a one-story non-fireproof building, about 40 ft. by 400 ft.; OCCUPIED as a showroom for automobiles, located within a business use district; a gasoline pump is installed about 8 ft. from the Far Rockaway boulevard front, known as the type supplied by the Standard Oil Company; and

WHEREAS, the appellant contends that the pump is entirely within the property line; that this same matter was brought before the court and dismissed on the ground that the pump was on private property.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

581-25-A.

APPELLANT—George M. Wood, for Robert C. Schock, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—514-516 West 57th street, Manhattan.

APPEARANCES—

For Appellant: George M. Wood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Flanagan, Connell and Fire Chief Kenlon ..... 4

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(581-25-A)

WHEREAS, George M. Wood, for Robert C. Schock, owner, filed, June 5, 1925, an appeal from a decision of the fire commissioner, affecting premises 514-16 West 57th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated January 7, 1925, reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east and west sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, six stories in height, 52 ft. by 118 ft. in area; OCCUPIED as a tenant factory, 28 persons throughout the building; and

WHEREAS, the appellant claims that there are four windows at each story on west side affected by fire department Order No. 69999-F; that the windows on east side of building are acceptable to the fire department; that the exposure at west side is a fireproof building; he requests the board to rescind the order on the ground that there appears to be no fire hazard.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1010-25-A.

APPELLANT—Feature Novelty Co., Inc., for Robert W. Boenig, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—56 Greenpoint avenue, Brooklyn.

APPEARANCES—

For Appellant: None.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Flanagan, Connell and Fire Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(1010-25-A)

WHEREAS, Feature Novelty Co., Inc., for Robert W. Boenig, owner, filed, October 2, 1925, an appeal from decision of the fire commissioner, affecting premises 56 Greenpoint avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated January 8, 1924, reads:

"You are hereby notified that an inspection of the above premises, used for the storage of nitro-cellulose, shows that the following must be done before the permit requested by you can be issued:

"2. Enclose all stairways in accordance with the provisions of Articles 8 and 18 of Chapter 5 of the Code of Ordinances. Sec. 232-2-j.

"4. Provide an automatic sprinkler system supplied from both approved gravity tank supply and an approved pressure tank supply (except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems in conformity with the provisions of this rule as in force up to Dec. 1, 1921).";

and

WHEREAS, the premises consist of a two-story non-fireproof building, 25 ft. by 100 ft. in area, and a one-story non-fireproof building, 90 ft. by 37 ft. in area, located on the rear of the lot. OCCUPANCY of front building: 1st story, vacant at present; 2nd story, manufacturer of celluloid eye-

# MINUTES

glass frames, 5 persons; and the rear building OCCUPIED as a junk shop; and

WHEREAS, the appellant contends that, in view of lease on the premises expires on February 25, 1926, hardship would result if compelled to provide the sprinkler system and to enclose the stairways, and requests permission to store 40 pounds of celluloid until February 25, 1926; and

WHEREAS, no one appeared when this case was called.

*Resolved*, that the appeal be and it hereby is *dismissed* for lack of prosecution.

1014-25-A.

APPELLANT—William F. Doyle, for Brooklyn Fire Brick Works, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—87-97 Van Dyke street, Brooklyn.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Flanagan, Connell and Fire Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(1014-25-A)

WHEREAS, William F. Doyle, for Brooklyn Fire Brick Works, owner, filed, October 2, 1925, an appeal from decision of the fire commissioner, affecting premises 87-97 Van Dyke street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated July 28, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

WHEREAS, the building is non-fireproof, two stories (25 ft.) in height, having a frontage of 300 ft. on Van Dyke street, 200 ft. on Richards street and 255 ft. on Beard street (an approximate area of 58,000 sq. ft.), divided into two approximately equal sections by a 12 in. brick wall; OCCUPIED for the manufacture of fire brick, 65 persons in entire premises; and

WHEREAS, the appellant contends that all materials used in the premises are non-combustible; that the building faces on three street fronts, is low in height and that there is a night watchman employed on the premises.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension, and *granted* only so long as the use and occupancy remain unchanged, namely, the manufacture of fire brick.

1016-25-A.

APPELLANT—Carl A. Braun, lessee.

SUBJECT—Appeal from order of fire commissioner.

THE RESOLUTION:

(1016-25-A)

WHEREAS, Carl A. Braun, for Pattison & Schroeder Realty Co., owner, filed, October 3, 1925, an appeal from an order of the fire commissioner, affecting premises 164 William street, Manhattan; and

WHEREAS, the order of the fire commissioner, No. 81421-F, dated July 7, 1925, reads:

"1. Provide iron shutters at all openings in the exterior wall above the 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at rear of building or other approved protection as per section 375, Art. 18, Chap. 5, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, five stories in height, 24 ft. by 65 ft. in area at the 1st story and 24 ft. by 55 ft. in area above; OCCUPIED for the storage of furniture, 3 persons; and

WHEREAS, there are four openings in the rear wall on each story above the 1st story within 30 ft. of openings in a building adjoining to the north; and

WHEREAS, appellant contends that the windows in the adjoining building, forming the exposure, are protected with iron shutters and also that a similar order (No. 64447-F) was rescinded by the fire department in October, 1918.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1166-25-A.

APPELLANT—T. A. Dempsey, for Department of Plant and Structures, City of New York, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—374-386 Winthrop street, Brooklyn.

APPEARANCES—

For Appellant: F. B. McDuffee.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Flanagan, Connell and Fire Chief

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(1166-25-A)

WHEREAS, T. A. Dempsey, representing the Department of Plant and Structures, for The City of New York, owner, filed, November 12, 1925, an appeal from a decision of the fire commissioner affecting premises 374-386 Winthrop street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered September 9, 1925, reads:

"1. As area of building is over 20,000 square feet, provide a gravity tank of at least 3,500 gallons capacity elevated 20 feet above main roof with appurtenances, etc., as per rules No. 8 and No. 12 of the Board of Standards and Appeals.";

and

# MINUTES

WHEREAS, the building is non-fireproof, one story (19 feet) in height, 105 feet by 244.83 feet in area; OCCUPIED as a housing station (garage) for the Department of street cleaning; and

WHEREAS, the appellant contends that the building faces three streets with a fire hydrant on each street; that there is an effective 4-inch standpipe system now installed; that the water main in New York avenue is 8 inches and fed two ways; that the building is provided with ample fire protection.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the installation of the gravity tank, *on condition* that the standpipe equipment shall be installed in accordance with the rules of the board of standards and appeals in all other respects.

874-25-A.

APPELLANT—James Kearney, for Brusstar Const. Co., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—Bronx River, between Lafayette street and Spofford avenue, The Bronx.

APPEARANCES—

For Appellant: James Kearney.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition. CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Flanagan, Connell and Fire Chief

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(874-25-A)

WHEREAS, James Kearney, for Brusstar Const. Co., owner, filed, August 27, 1925, an appeal from a decision of the fire commissioner, affecting premises situate on the Bronx River between Lafayette street and Spofford avenue, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated August 14, 1925, reads:

"10. Asphalt tanks must be buried as per Code of Ordinances, Chapter 10. Examination continued when additional information is received."

"21. Pumps must not be located more than 10 ft. below top of tanks.";

and

WHEREAS, the premises consist of a large plot of ground fronting 451 feet along the Bronx River bulkhead line by 450 feet in depth; containing a boiler, drying and melting tank; two (2) asphalt tanks, each of 20 feet diameter by 25 feet in height, 60,000 gallons capacity; a fuel oil tank of 40,000 gallons capacity; all in course of construction. OCCUPIED and used in connection with road construction and maintenance business; and

WHEREAS, the appellant proposes to erect the two asphalt tanks above ground; to locate the fuel oil pump at ground level and also provide an anti-syphon valve in connection therewith; and

WHEREAS, the appellant contends the premises are filled-in swamp lands; that the physical conditions of the ground make it impossible to bury the asphalt tanks; that to comply strictly with the fuel oil rules re: to pump would necessarily cause the pump to be set in an inaccessible position of seven (7) feet above level, making the operation and inspection difficult.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 10, *on condition* that a dike wall of reinforced concrete shall be constructed, enclosing the asphalt tanks, providing a reservoir equal to 50 per cent of the

capacity of tanks; and that the use of the tanks shall be restricted to asphalt cement storage; as to Item 21, *on condition* that the discharge line shall be equipped with an anti-syphon trap; and that the installation otherwise shall comply with the fuel oil rules of the board of standards and appeals in all other respects.

793-25-A.

APPELLANT—John J. Gilmartin, for D. C. Dominick, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—138-140 Greene street, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition. CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Flanagan, Connell and Fire Chief

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION:

(793-25-A)

WHEREAS, John J. Gilmartin, for D. C. Dominick, owner, filed, August 3, 1925, an appeal from an order of the fire commissioner, affecting premises 138-140 Greene street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 10, 1925, reads (Order No. 79442-F):

"1. Install a standpipe system with risers 4 inches in diameter \* \* \* within main stairway enclosure \* \* \*";

and

WHEREAS, the building is non-fireproof, six stories (88 ft. 6 in.) in height, 38 ft. by 86 ft. in area at 1st story and 38 ft. by 80 ft. above. OCCUPIED: 1st story, manufacturing paper boxes, 15 persons; 2nd story, manufacturing leather bags, 10 persons; 3rd story, printing, 10 persons; 4th story, manufacturing hats, 20 persons; 5th story, manufacturing underwear, 20 persons; 6th story, manufacturing hats, 20 persons; and

WHEREAS, the appellant claims that the building is provided with a wide stairway, also a fire escape on the street front, which would assist firemen in the performance of their work; and he further contends that the building is slightly over the height limit of 85 ft. under which standpipes are not required.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that a one-source sprinkler system in accordance with the rules of the board of standards and appeals shall be provided; and that the work of installation of sprinkler system shall be commenced within ninety (90) days from the date of this action.

658-25-A.

APPELLANT—M. M. Belding, owner.

SUBJECT—Application for reopening—appeal from order of fire commissioner.

PREMISES AFFECTED—116 East 88th street, Manhattan.

APPEARANCES—

For Appellant: John J. Hayden.

ACTION OF BOARD—Appeal reopened and modification granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Flanagan, Connell and Fire Chief

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

# MINUTES

## THE RESOLUTION:

(658-25-A)

WHEREAS, M. M. Belding, owner, filed, June 25, 1925, an appeal with the board of standards and appeals from an order of the fire commissioner, affecting premises 116 East 88th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 6, 1925, reads (Order No. 29785-LC):

"1. Separate boiler from remainder of building by unpierced wall of solid masonry at least 8 inches in thickness. Entrance to boiler room to be from exterior of building only. Chapter 10, Section 159-1, Code of Ordinances.";

and

WHEREAS the building is non-fireproof, three stories in height, 25 ft. 6 2-3 in. by 95 ft. 9 in. and 25 ft. 6 2-3 in. by 64 ft. 8 in. above. OCCUPIED: 1st story, private garage; 2nd story, 1 bedroom; 3rd story, apartment; and

WHEREAS, appellant contends that to separate the boiler room would involve the removal of the present heater room, the construction of another at the rear of the building, the erection of a smoke flue from the ground to sufficient height to secure proper draft, and the reconstruction of the entire heating plant, installed within the last five years; and

WHEREAS, this appeal was denied by the board at its meeting October 20, 1925, and appellant requested a reopening of the case, which request was granted by vote of the board.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the present doorway within the garage area be built up solid; that an opening be provided at the southerly side of the heating room, opening into the rear section of basement area; equipped with self-closing fireproof door; that the present archway opening between the front and rear portions of the garage area be built up and equipped with a door not more than three (3) ft. wide, self-closing and fireproof, opening to the rear; and that no gasoline storage equipment shall be maintained on the premises.

## CASES DISMISSED.

### APPEALS FROM ADMINISTRATIVE ORDERS.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing, but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty.

(778-25-A)

Filed July 27, 1925—Premises 119 West 48th street, Manhattan. Order of fire commissioner. Appellant, Ira Schwartz. Dismissed for lack of prosecution.

(835-25-A)

Filed August 17, 1925—Premises 203-205 West 40th street, Manhattan. Order of fire commissioner. Appellant, Ernest Stern. Dismissed for lack of prosecution.

### THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Flanagan, Connell and Fire Chief Kenlon .....	4
Negative .....	0
Absent: Commissioner Guilfoyle.....	1

### THE RESOLUTION:

WHEREAS, the foregoing appellants have filed appeals with the board of standards and appeals from orders affecting the premises in question; and

WHEREAS, the appellants have failed to complete the papers, though duly notified to do so.

*Resolved*, that the foregoing appeals be and they hereby are *dismissed* for lack of prosecution.

## BUILDING ZONE CASES.

423-25-BZ.

APPLICANT—Samuel Schlau, for Isabel Burger, owner.

SUBJECT—Application (re: decision of tenement house commissioner) to permit in an "F" area district the erection of a building the area of which is in excess of that permitted in such district.

PREMISES AFFECTED—123-02 and 123-08 Rockaway Beach boulevard, Rockaway Park, Borough of Queens.

### APPEARANCES—

For Applicant: William White.

For Opposition: Adolph Mischlich.

ACTION OF BOARD—Application laid over to January 19, 1926, at 10 a. m.

114-25-BZ.

APPLICANT—Jenks & Rogers, for Kennor Realty Co., owner.

SUBJECT—Application (re: decision of superintendent of buildings) under section 21 of the building zone resolution to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—342-352 Coney Island avenue, Brooklyn.

### APPEARANCES—

For Applicant: John H. McCooey, Jr.

For Opposition: Philip Scharf.

ACTION OF BOARD—Application laid over to January 19, 1926, at 10 a. m., for inspection and report by a committee of the board.

599-25-BZ.

APPLICANT—Eugene DeRosa, for Maxlam Theatre Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings) under section 7-c of the building zone resolution to permit in a residence district extending from a business district the erection and maintenance of a building to be used for business and theatre purposes.

PREMISES AFFECTED—Southeast corner of Sheridan avenue and East 167th street, The Bronx.

### APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application laid over to January 19, 1926, at 10 a. m., for inspection and report by a committee of the board.

796-25-BZ.

APPLICANT—Thomas O'Rourke Gallagher, for Esther Wieser, et al., owners.

SUBJECT—Application (re: decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of five (5) attached residence buildings, the first story to be used for store purposes.

PREMISES AFFECTED—7116-7124 Bay Parkway, Brooklyn.

### APPEARANCES—

For Applicant: Thomas O'Rourke Gallagher.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

# MINUTES

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Flanagan, Connell and Fire Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Guilfoyle..... 1

## THE RESOLUTION:

(796-25-BZ)

WHEREAS, Thomas O'Rourke Gallagher, for Esther Wieser, et al., owner, filed, August 3, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of five attached residence buildings, the 1st story to be used for store purposes; premises 7116-7124 Bay parkway, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 29, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bay parkway, 71st street and 72nd street are all in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered May 13, 1925, reads:

"1. Business cannot be extended into residential district contrary to Art. 2, Sect. 3 of Bldg. Zone Res. Therefore denied.";

and

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 100 ft. and a depth of 62 ft. and 100 ft., irregular; to be occupied as stores and apartments; and

WHEREAS, this property was in a business use district at the time of the issuance of the building permit and the entire avenue frontage between the same intersecting streets, otherwise, is occupied by business use on the ground floor, the board deemed that applicant had established a basis of appeal under section 21 on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the use of the 1st story, *on condition* that the use and occupancy be limited to the conduct of retail mercantile stores; that there shall be no signs exposed on the front of the structure; that any advertising shall be restricted to the plate glass show windows; that the show window of the corner store shall not return on 72nd street to a depth of more than twelve (12) feet, and the remainder of the 72nd street frontage shall be finished with face brick and architectural terra cotta or stone trimmings, with window openings of double hung type and doors for the use of conforming occupancy; that there shall be no advertising or signs of any nature or description displayed on the 72nd street frontage, and *on further condition* that the occupancy otherwise throughout the premises shall be restricted to conforming use.

900-25-BZ.

APPLICANT—William F. Doyle, for Dornhage Realty Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings) under section 21 of the building zone resolution to permit the extension from a business district into a residence district of a proposed building to be used as a theatre and also as stores.

PREMISES AFFECTED—Southeast corner of Jerome avenue and East 199th street, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Flanagan, Connell and Fire Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Guilfoyle..... 1

## THE RESOLUTION:

(900-25-BZ)

WHEREAS, William F. Doyle, for Dornhage Realty Corporation, owner, filed, September 3, 1925, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed building to be used as a theatre and also as stores; premises southeast corner of Jerome avenue and East 199th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 29, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; that Grand concourse is in a residence district, and that East 199th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 1, 1925, reads:

"1. Proposed erection of theatre building in business district extending into a residence district is contrary to provisions of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, one story (45 ft.) in height, with a frontage of 246 ft. on Jerome avenue and 192.43 ft. on East 199th street; to be occupied as a theatre and also as stores, the easterly portion of proposed building extending from 21 to 92 ft. in to the residence district; and

WHEREAS, the board concluded that there would be practical difficulty and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the business structure, within the residence area, be restricted to a one-story structure in height; that an open and unobstructed court be maintained at the southerly end of the building with direct egress to the Jerome avenue front, which shall also serve for the use of the employees and operation of the theatre; that the conduct and operation of the theatre be limited to motion picture use; that the remainder of the plot on Jerome avenue and 199th street be developed with structures of a conforming use; that the front elevation on 199th street and Jerome avenue, other than the store show windows, shall be finished with face brick and architectural terra cotta or stone trimmings; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months.

## CASES DISMISSED.

### BUILDING ZONE APPLICATIONS.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing, but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(713-25-BZ)

Filed July 6, 1925—Premises northeast corner of Beach 35th street and Far Rockaway boulevard, Edgemere, Borough of Queens. Decision of superintendent of buildings. Applicant, Joseph H. Cornell. Dismissed for lack of prosecution.

# MINUTES

(830-25-BZ)

Filed August 13, 1925—Premises 3455-3457 Bailey avenue, The Bronx. Decision of superintendent of buildings. Applicant, A. Tannenbaum. Dismissed for lack of prosecution.

(839-25-BZ)

Filed August 18, 1925—Premises 1751-1765 67th street, Brooklyn. Decision of superintendent of buildings. Applicant, Jacob Lubroth. Dismissed for lack of prosecution.

(842-25-BZ)

Filed August 18, 1925—Premises 22-36 Caton place, Brooklyn. Decision of superintendent of buildings. Applicant, Nathan D. Shapiro. Dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell and Flanagan and Fire Chief Kenlon .....	4
Negative .....	0
Absent: Commissioner Guilfoyle.....	1

## THE RESOLUTION:

WHEREAS, the foregoing applicants have filed applications with the board of standards and appeals from orders affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing applications be and they hereby are dismissed for lack of prosecution.

## AREA FIXED

(1147-25-BZ)

The chairman presented and read a communication from Charles P. Canella, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 436-446 New York avenue, Brooklyn.

The following area was approved by the board:

Both sides of New York avenue from Empire boulevard to a point 400 feet north of proposed garage; the south side of Montgomery street from New York avenue to a point 150 feet west of New York avenue; also the premises at rear south, consisting of lots 63 and 64, which represent 50 feet within the area affected.

Adjourned, 5:30 p. m.

JAMES O'CONNOR, Secretary.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### RULE 1. PERMIT.

(a) **Prohibition.** No person shall smoke, or carry a lighted cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and of the lessee or lessees of the building containing such factory or factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall direct, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable blank forms to be furnished by the fire commissioner.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed upon expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

### RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;  
Boiler making;  
Brick, terra cotta or artificial stone works;  
Forge shops;  
Foundries;  
Iron, steel, brass or copper works;  
Machine shops;  
Smelting;  
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed;

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

- 594-19-A—Pier 8, North River, Manhattan.
- 595-19-A—Pier 44, East River, Manhattan.
- 877-19-A—Pier 14, North River, Manhattan.
- 878-19-A—Pier 15, North River, Manhattan.
- 879-19-A—Pier 15, North River, Manhattan.
- 880-19-A—Pier 28, East River, Manhattan.
- 881-19-A—Pier 1 (Old), North River, Manhattan.
- 882-19-A—Pier 27, North River, Manhattan.
- 883-19-A—Pier 29, North River, Manhattan.
- 884-19-A—Pier 30, North River, Manhattan.
- 885-19-A—Pier 78, North River, Manhattan.
- 886-19-A—Pier 42, North River, Manhattan.
- 890-19-A—Pier 70, East River, Manhattan.
- 937-19-A—Piers 37 and 38, East River, Manhattan.
- 948-19-A—Pier 121, foot of West 131st street, North River, Manhattan. (Order No. 95587-F.)
- 949-19-A—Pier 121, foot of West 131st street, North River, Manhattan. (Order No. 95586-F.)
- 950-19-A—Pier 121, foot of West 131st street, North River, Manhattan. (Order No. 95585-F.)
- 981-19-A—Piers 22-25, East River, Manhattan.
- 1003-19-A—Pier 28, North River, Manhattan.
- 31-20-A—Pier 13, East River, foot of Wall street, Manhattan.
- 265-20-A—Pier 46, East River, foot of Van Brunt street, Brooklyn.
- 266-20-A—Pier 39, East River, foot of Van Dyke street, Brooklyn.
- 267-20-A—Pier 31, East River, s. w. s. Atlantic Basin, Brooklyn.
- 268-20-A—Pier 36, East River, foot of Pioneer street, Brooklyn.
- 269-20-A—Pier 35, East River, n. e. s. Atlantic Basin, Brooklyn.
- 270-20-A—Pier 34, East River, foot of Hamilton street, Brooklyn.
- 271-20-A—Pier 27, East River, foot of Baltic street, Brooklyn.
- 272-20-A—Pier 17, East River, foot of Joralemon street, Brooklyn.
- 273-20-A—Pier 19, East River, foot of Clark street, Brooklyn.
- 318-20-A—Pier between North 4th and 5th streets, East River, Brooklyn.
- 352-20-A—Pier 3, Wallabout basin, foot of Washington and E streets, Brooklyn.
- 353-20-A—Pier 2, Wallabout basin, foot of Washington and F streets, Brooklyn.
- 383-20-A—Pier 20, East River, Manhattan.
- 420-20-A—Pier 5, between Poplar and Middagh streets, Brooklyn.
- 421-20-A—Pier 22, foot of Atlantic avenue, Brooklyn.
- 422-20-A—Pier 29, foot of Harrison street, Brooklyn.

- 423-20-A—Pier 32, foot of Degraw street, Brooklyn.
- 471-20-A—Pier between North 4th and 5th streets, Brooklyn.
- 907-21-A—East side South street, foot of Dover street, Manhattan.
- 1205-21-A—Pier No. 21, East River, east side South street, foot of Dover street, Manhattan.
- 1302-21-A—Pier 15, East River, Manhattan.
- 1541-21-A—Pier 3, between Main and Dock streets, Brooklyn.
- 1542-21-A—Pier 3, between Main and Dock Streets, Brooklyn.
- 1543-21-A—Pier 2, between Main and Dock streets, Brooklyn.
- 1544-21-A—Pier 2, between Main and Dock streets, Brooklyn.
- 1545-21-A—Pier 2, between Main and Dock streets, Brooklyn.

## BOARD OF STANDARDS AND APPEALS.

### APPLIANCES SUBMITTED FOR APPROVAL.

- 53-21-S—Angle Hose Valve.
- 1372-21-S—Ford Fire Line Reducing Valve, approval of.
- 1636-21-SA—Gilbert & Barker Oil Burner.
- 337-22-S—Elkhard Brass Company, Siamese Connection, approval of.
- 357-22-S—Quinn Acme Crude Oil Burner, approval of.
- 392-22-S—The Surface-Combustion Company Low Pressure Gas and Oil Burner, approval of.
- 447-22-S—Howard Water Pressure Reducing Devices, approval of.
- 610-22-S—Crocker Gas Valve, approval of.
- 799-22-S—Kennell Gas Cut-Off Valve, approval of.
- 957-22-S—Burnwell Mechanical Burner, approval of.
- 1104-22-S—Dean Fuel Oil Pump, approval of.
- 1105-22-S—Combustion Fuel Oil Burner, approval of.
- 1173-22-S—Anti-Syphon Valve, approval of.
- 1230-22-S—Thermostats for Automatic Fire Alarm Systems, approval of.
- 1249-22-S—Coen Oil Burner, approval of.
- 1274-22-S—Rodriguez Oil Burner, approval of.
- 1391-22-S—Dempsey High & Low Pressure Fuel Oil Burner, approval of.
- 1526-22-S—Delaney Fuel Oil Burner, approval of.
- 57-23-SA—Collin Patent Automatic Gas Cut-Off Valve, approval of.
- 92-23-SA—Surface Combustion Low Pressure Fuel Oil Burner, approval of.
- 124-23-SA—Master Gas Shut-Off Valve, approval of.
- 125-23-SA—Packless Gas Shut-Off Valve, approval of.
- 127-23-SA—S. & K. Gas Shut-Off Valve, approval of.
- 232-23-SA—Manual and Thermal Gas Cut-Off Valve.
- 275-23-SA—Wm. E. Toelle Manual & Automatic Gas Shut-Off Valve, approval of.
- 279-23-SA—Heil Standard 200 Gal. Truck Tank.
- 297-23-SA—"Automatic" Deluge Valve, approval of.
- 345-23-SA—Cornell Falat Oil Burner, approval of.
- 392-23-SA—"Billow" Class G. R. Oil Burner, approval of.

# RESERVE CALENDAR

- 393-23-SA—"Billow" Class C. R. F. Oil Burner, approval of.
- 397-23-SA—Cornell No. 1 Type "A" Oil Burner, approval of.
- 443-23-SA—Automatic Gas Shut-Off, approval of.
- 525-23-SA—Tilman-White Gas Cut-Off Valve, approval of.
- 544-23-SA—Domestic Fuel Oil Burner, approval of.
- 888-23-SA—Lewis Oil Burner, approval of.
- 898-23-SA—Enco Type 700 Steam Atomizing Burner, approval of.
- 952-23-SA—Automatic Gas Cut-Off, approval of (Brooklyn Co.).
- 960-23-SA—Crescent Combustion Fuel Oil Burner, approval of.
- 1046-23-SA—Frankfort Type "P" Low Pressure Oil Burner, approval of.
- 1050-23-SA—Marsh Fuel Oil Burner and Pump, approval of.
- 1146-23-SA—Pennsylvania Globe Oil Burner, approval of.
- 1169-23-SA—Warren Fuel Oil Pumps & Heater Sets, approval of.
- 1176-23-SA—Ziegler Oil Burner, approval of.
- 1246-23-SA—Ludlow Gas Cut-Off Valve, approval of.
- 1339-23-SA—National Light Service Oil Pump, approval of.
- 1346-23-SA—Heatiator Oil Burner, approval of.
- 1358-23-SA—Worthington Oil Burner, approval of.
- 1361-23-SA—Todd Residence Fuel Oil Burner, approval of.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

### DIRECTORY

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

##### Commissioners

HENRY L. CONNELL

JOSEPH FLANAGAN

JOHN GUILFOYLE

CHIEF JOHN KENLON

JAMES O'CONNOR, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—Worth 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board

### CONTENTS

This issue of the Bulletin contains, in the order given—

- Docket.
- Call of Clerk's Calendar.
- The Trial Calendar.
- Notices in Building Zone Cases.
- Minutes of Regular Meeting, January 5, 1926, at 10 a. m.
- Minutes of Regular Meeting, January 5, 1926, at 2 p. m.
- Minutes of Special Meeting, January 6, 1926, at 2 p. m.
- Rules.
- Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, January 12, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, January 19, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

### THE RESOLUTION:

(857-25-A)

WHEREAS, George M. Wood, for Pryibil Realty Corporation, owner, filed, August 24, 1925, an appeal from an order of the fire commissioner, affecting premises 520-524 West 41st street, Manhattan; and

WHEREAS, the order of the fire commissioner, No. 80167-F, dated June 17, 1925, reads:

"Provide iron shutters at all openings in the exterior wall above the 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at south side of building, or other approved protection as per Sec. 375, Art. 18, Chap. 5, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, five stories in height, 75 ft. 3 in. by 75 ft. 3 in. in area; OCCUPIED as a factory building, about 6 persons on each story; and

WHEREAS, the appellant claims that there are only two (2) windows affected on each of the 4th and 5th stories at south side of the building; that the building is equipped with a fire alarm system; that there is no existing fire hazard on either premises.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

THE RESOLUTION:

(584-25-A)

WHEREAS, Corona Preserve Fruit Company, lessee, filed, May 20, 1925, an appeal from an order of the fire commissioner, affecting premises 46-52 Columbia street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 8, 1925, reads (Order No. 70431-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, three stories (33 ft.) in height, 129 ft. 5 in. by 100 ft. 4 in. in area. OCCUPIED: 1st story, storage; 2nd story, manufacturing, 8 persons; 3rd story, storage; and

WHEREAS, the appellant proposes to change the occupancy of manufacturing from the 2nd story to the 3rd story, and cut an exit in rear wall leading to roof of adjoining building; and

WHEREAS, the appellant claims that the floor area is 11,623 square feet; that the building is located on the corner, easily accessible; that the occupancy is very small.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, so long as conditions as to occupancy and use remain substantially unchanged.

584-22-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Ohrbach's Affiliated Stores, Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—46 East 14th street and 49 East 13th street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(584-22-A)

WHEREAS, Croker National Fire Prevention Eng. Co., for Ohrbach's Affiliated Stores, Inc., lessee, filed, April 22, 1925, an amendment to this appeal from an order of the fire commissioner, affecting premises 46 East 14th street, 49 East 13th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 26524-F, reads:

"1. Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements,

cellars and roofs), placed within main stairway enclosure; each outlet to be provided with sufficient feet of 2½ in. standard hose attached thereto \* \* \*";

and

WHEREAS, the building is non-fireproof, six stories (87 ft. 9 in.) in height, 32 ft. by 206 ft. in area. OCCUPIED: 1st story, store, 30 persons; 2nd story, manufacturing, 15 persons; 3rd story, stockroom, 5 persons; 4th story, cutting, 15 persons; 5th story, cutting, 10 persons; 6th story, manufacturing, 37 persons; pent-house, manufacturing, 8 persons; MEANS OF EGRESS consisting of two interior stairways extending from the 1st story to the roof, enclosed in stud partitions, with wood lath and plaster on stair side and metal lath and plaster on loft side, with fireproof doors at openings; and

WHEREAS, under date of June 27, 1922, this appeal was denied by the board of appeals; since then the original lease has expired, the appeal reopened on December 15, 1925, by the board of standards and appeals under a new lessee and different occupancy as stated above; and

WHEREAS, the appellant proposes to install an approved sprinkler system; and

WHEREAS, the appellant contends that the building will then be provided with adequate fire protection; that the building is actually only 88 ft. 4 in. in height, also that the building faces two streets.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises shall be equipped with a sprinkler system; and that the pent-house shall be restricted to the use and occupancy of mechanical equipment in the operation of the premises, such as tanks, pumps and the like.

189-24-A.

APPELLANT—Taylor & Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—680 Morgan avenue, Brooklyn.

APPEARANCES—

For Appellant: Leonard Boyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(189-24-A)

WHEREAS, Taylor & Co., Inc., owner, filed, February 7, 1924, an appeal from decision of the fire commissioner, affecting premises 680 Morgan avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 17, 1924, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. \* \* \*";

and

WHEREAS, the building, facing on three streets, is non-fireproof, one story (approximately 22 ft.) and a small portion, in the center of the premises, two stories (approximately 28 ft.) in height; 220 ft. by 200 ft. (approximately 44,000 sq. ft.) in area; OCCUPIED as an iron foundry, 300 persons; and

WHEREAS, appellant contends that the building is patrolled by a night watchman; that there is a 2 in. standpipe connection in the building; that there are fifteen fire extin-

# MINUTES

guishers and also fire buckets of water located throughout the building.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be extended in height, area or dimension; and *granted* so long as present occupancy and use, namely, the conduct and operation of iron foundry, shall remain substantially unchanged.

158-25-A.

APPELLANT—J. Burmeister, for L. & W. Amusement Co., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—150 Beach 116th street, Rockaway Park, Borough of Queens.

APPEARANCES—

For Appellant: J. Burmeister.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(158-25-A)

WHEREAS, J. Burmeister, for L. & W. Amusement Company, owner, filed, February 6, 1925, an appeal with the board of appeals from a decision of the fire commissioner, affecting premises 150 Beach 116th street, Rockaway Park, Borough of Queens; and

WHEREAS, the order of the fire commissioner, No. 1795-24, dated February 2, 1925, reads:

"5. Pumps must be installed in duplicate where fire protection is dependent on the use of fuel oil for heating or steam.

"11. The arrangement of pump, burner and piping at same is not as approved by the Board of Standards and Appeals.";

and

WHEREAS, the building is non-fireproof, two stories in height, 80 ft. by 200 ft. in area. OCCUPIED: 1st story, theatre and stores, 1,000 persons; 2nd story, club rooms, 25 persons; and

WHEREAS, the appellant contends re: to Item 5, that the building is equipped with two boilers, one is fired by an oil burner, the other always ready to be fired with coal; that the building is not dependent on the use of fuel oil for heating or steam; re: to Item 11, that the pump was approved by the board July 15, 1924, under Cal. No. 918-22-SA, and was part of the burner; the pump has been removed from the burner and placed on the wall of the boiler room.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 11, only *on condition* that the fuel oil burning installation shall be equipped with an approved burner and an approved fuel oil pump, installed in accordance with the fuel oil rules of the board of standards and appeals; and that the decision of the fire commissioner, as to Item 5, be and it hereby is *affirmed*, and the appeal as to this item be *denied*.

THE RESOLUTION:

(280-25-A)

WHEREAS, Edward P. Doyle, for Rhinelander Real Estate Company, owner, filed, March 12, 1925, an appeal from an order of the fire commissioner, affecting premises 163 Sixth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 26, 1925, reads (Order No. 63903-F):

"1. Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the Rules of the Board of Standards and Appeals, adopted January 11th, 1924. Said valve to be attached to the gas supply pipes on the inside of the building at a point where said pipes enter the building and before they reach the gas meters, which valve shall shut off the gas automatically when subjected to direct contact with fire and shall also be connected with a conspicuous and conveniently accessible control box at a place on the exterior of the building so arranged as to allow the gas supply to be shut off by the officers of the Fire Department immediately, whenever the necessity arises. Section 20a, Chapter 12, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, three stories in height, 20 ft. by 100 ft. in area. OCCUPIED: 1st story, store; 2nd story, manufacturing furs, 4 persons; 3rd story, dwelling, 4 persons; two gas meters in the cellar of 5 and 10 lights capacity; gas is used for lighting, heating and cooking; and

WHEREAS, the appellant claims that there is a gas shut-off on the sidewalk; that the building is small and no danger of explosion or accumulation of gas exists in the cellar of this building.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

THE RESOLUTION:

(300-25-A)

WHEREAS, Edward P. Doyle, for By-Way Holding Company, Inc., lessee, filed, March 18, 1925, an appeal from an order of the fire commissioner, affecting premises 543 Broadway and 114 Mercer street, Borough of Manhattan; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated February 4, 1925, reads (Order No. 71305-F):

"1. Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the Rules of the Board of Standards and Appeals, adopted January 11, 1924. Said valve to be attached to the gas supply pipes on the inside of the building at a point where said pipes enter the building and before they reach the gas meters, which valve shall shut off the gas automatically when subjected to direct contact with fire and shall also be connected with a conspicuous and conveniently accessible control box at a place on the exterior of the building so arranged as to allow the gas supply to be shut off by the officers of the Fire Department immediately whenever the necessity arises. Section 20a, Chapter 12, Code of Ordinances."

and

WHEREAS, the building is fireproof, ten stories in height, 25 ft. by 200 ft. in area; OCCUPIED as a factory building, manufacturing clothing principally; about 20 persons on each story; the main gas meter of 100 lights capacity is located in the cellar; gas used for manufacturing purposes on all stories; and

WHEREAS, the appellant contends that the installation of a gas shut-off valve would not add to the safety of anyone in the case of fire; that it is not his duty to protect anyone against gas until the gas becomes his property; that the regulation of the use of gas should be made by the public service commission, which alone has jurisdiction.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

THE RESOLUTION:

(995-25-A)

WHEREAS, Charles H. Schumann, for Fredericka Schneer, owner, filed, September 29, 1925, an appeal from a decision of the fire commissioner, affecting premises 785 East 135th street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated August 25, 1925, reads:

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof."

and

WHEREAS, the premises consist of a non-fireproof building facing on two street fronts, two stories (23 ft. 6 in.) in height, 51 ft. by 201 ft. 2 in. (approximately 10,300 sq. ft.) in area, connected by bridges to a building to east and a series of one and two-story sheds (occupied principally as boiler room) lying to the west of the main building, making a total area of approximately 13,300 sq. ft.; and

WHEREAS, the appellant contends that the premises are amply provided with exits; that the building is low in height and accessible on three sides to the fire department; that a night watchman is employed and that numerous city fire hydrants are in the immediate vicinity.

*Resolved*, that the decision of the fire commissioner be

and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the existing structure be not increased in height, area or dimension; that all horizontal openings between main building and adjoining extensions shall either be built up with masonry or equipped with self-closing fireproof doors; and *granted* only so long as the present operation of business use and occupancy of premises remains unchanged.

THE RESOLUTION:

(968-25-A)

WHEREAS, Rudolph P. Miller, for Point Holding Corporation, owner, filed, September 18, 1925, an appeal from decision of the fire commissioner, affecting premises south side of Second avenue (14th road) at 9th street (118th street), College Point, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated August 31, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, placed within main stairway enclosure."

and

WHEREAS, the building is frame, one story (15 ft.) in height (there being a two-story (25 ft.) in height portion fronting Second avenue) and 197 ft. by 197 ft. in area; separated by walls of 8 in. hollow tile (with openings therein protected by approved fire doors) into four sub-areas; the maximum being 137 ft. by 197 ft. (26,989 sq. ft.) in area and the areas of the remainder being, respectively, approximately 5,900 sq. ft., 4,500 sq. ft. and 1,500 sq. ft. in area. OCCUPIED: 1st story, metal working and also wood working (door manufacturer), 50 persons; 2nd story, offices, 5 persons; and

WHEREAS, the appellant contends that the mixing room of the paint shop, the glueing room of the woodworking plant and the transformer room are all separated from the remainder of the premises by means of masonry walls with fire doors at openings; that the premises are amply provided with skylights; that a watchman service is provided and that on the 1st story there are seven doors leading to the street.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimensions; the woodworking and painting section to be separated from rest of premises by masonry walls, and that the woodworking department shall be separated from the painting department by a terra cotta or brick wall not less than 8 in. in thickness, unpierced throughout its entire height and length.

## THE RESOLUTION:

(948-25-BZ)

WHEREAS, William F. Doyle, for David Fishman, owner, filed, September 15, 1925, an application, under the building zone resolution, to permit in a 1½ times height district the erection of the street walls of a building to a height exceeding the limit set by the zone resolution; premises 101-115 East 83rd street and 981-983 Park avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 5, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that the property is in a 1½ times height and residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 2, 1925, reads:

"1. The portion of this building more than 150 ft. east of Park Avenue should have lawful setbacks above

a height of 90 ft. (Bldg. Zone Res.) as for a 1½ times district.";

and

WHEREAS, the proposed building is of fireproof construction, 15 stories (150 ft.) in height, with a frontage of 175 ft. 6 2-3 in. on East 83rd street and 76 ft. 11½ in. on Park avenue; to be occupied as apartment house; and

WHEREAS, the board concluded that applicant had established his basis of appeal under section 21 on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the height district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the street walls shall not exceed a height of one hundred and fifty (150) ft. on the street fronts; that the requirements of the building zone resolution shall be complied with in all other respects; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

950-25-BZ.

**APPLICANT**—C. A. Sandblom, for Weingarten Construction Co., owner.

**SUBJECT**—Application (re: decision of superintendent of buildings) under section 7-b of the building zone resolution to permit in a residence district extending from a business district the erection and maintenance of a motion picture theatre.

**PREMISES AFFECTED**—464-486 New Lots avenue, Brooklyn.

## APPEARANCES—

For Applicant: Isidore Oshlag.

For Opposition: None.

**ACTION OF BOARD**—Application granted on condition.

## THE RESOLUTION:

(950-25-BZ)

WHEREAS, C. A. Sandblom, for Weingarten Construction Company, owner, filed, September 15, 1925, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a motion picture theatre; premises 464-486 New Lots avenue, south side, between Bradford street and Wyona street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 5, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that New Lots avenue is in a business district; that Wyona street is in a residence district, and that Bradford street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 9, 1925, reads:

"Proposition contrary to the Zone Resolution. Art. II, Sec. 3.

"The erection of a motion picture theatre extending into a residential district.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 200 ft. and a depth of 106 ft. 7¼ in.; to be occupied as a motion picture theatre; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7-b of the building zone resolution and also that there would be practical difficulties

# MINUTES

and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the southerly gable wall shall be unpierced throughout its entire height and length; that the exterior face of the rear wall shall be finished with light-colored face brick; that there shall be no advertising display of any nature or description within the residence use area; that the use of any openings within the residence area shall be restricted to emergency exits as required by the code, emptying into courts within the property lines of the premises; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

974-25-BZ.

APPLICANT—Eric O. Holmgren, for Cripple Bush Realty Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings) under section 7-c of the building zone resolution to permit the extension of a proposed building to be used for stores and also as a moving picture theatre from a business district into a residence district.

PREMISES AFFECTED—South side of Broadway, 203 ft. west of Forest avenue, Little Neck, Borough of Queens.

APPEARANCES—

For Applicant: Eric O. Holmgren, Conrad Reubin and Irving Brown.

For Opposition: None.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

THE RESOLUTION:

(974-25-BZ)

WHEREAS, Eric O. Holmgren, for Cripple Bush Realty Corporation, owner, filed, September 19, 1925, an application, under the building zone resolution, to permit the extension of a proposed building to be used for stores and also as a moving picture theatre, from a business district into a residence district; premises south side of Broadway, 203 ft. west of Forest avenue, Little Neck, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 5, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district; that Pembroke avenue is in a residence district, and that Little Neck road is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 1, 1925, reads:

"Your application for a permit on the above location has been rejected for the following reasons:

"Erection of a theatre which extends into a residence district is prohibited by the Zone Law.";

and

WHEREAS, the proposed building is to be partly non-fireproof and the theatre proper fireproof construction, one and two stories in height, with a frontage of 125 ft. and a depth of 197 ft.; to be occupied as stores and moving picture theatre; and

WHEREAS, the board deemed that the applicant was not entitled to relief under section 7-c of the building zone resolution, and that there would not be practical difficulties and unnecessary hardship in carrying out the strict letter of the zoning resolution.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

## BOARD OF STANDARDS AND APPEALS

### REGULAR MEETING.

TUESDAY AFTERNOON, JANUARY 5, 1926.

Present: Chairman Walsh, Commissioners Connell, Guilfoyle and Chief Kenlon.

### PETITIONS FOR VARIATIONS.

809-25-S.

PETITIONER—29 West 50th Street Corp., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—29 West 50th street, Manhattan.

APPEARANCES—

For Petitioner: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition laid over to January 19, 1926, at 2 p. m., on written request of petitioner.

775-25-S.

PETITIONER—Henry S. Lion, for Sherr Bros., lessees.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—501 Seventh avenue, Manhattan.

APPEARANCES—

For Petitioner: Henry S. Lion.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners Connell, Guilfoyle and Chief Kenlon .... 4  
Absent: Commissioner Flanagan ..... 1

## THE RESOLUTION:

(775-25-S)

WHEREAS, Henry S. Lion, for Gilbur Corp., owner, filed, July 27, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 501 Seventh avenue, Borough of Manhattan; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated July 7, 1925, reads:

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law."

and

WHEREAS, the building is fireproof, 17 stories in height, 98 ft. 9 in. by 244 ft. in area; OCCUPIED, tenant factory; about 75 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire tower at north center side of the building; and

WHEREAS, the petitioner, who occupies the westerly half of 12th story, contends that his floor space is divided by dwarf wood partitions 7 ft. in height; that there is no manufacturing done in the rooms, and requests the board to permit the wood partitions as erected to remain in place.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

856-25-S.

PETITIONER—William H. Meyer, for Clement H. Smith, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—1968 Prospect avenue, rear, Bronx.

APPEARANCES—

For Petitioner: William H. Meyer.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Flanagan ..... 1

THE RESOLUTION:

(856-25-S)

WHEREAS, William H. Meyer, for Clement H. Smith, owner, filed, August 21, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 1968 Prospect avenue, rear, Borough of Bronx; and

WHEREAS, the order of the fire commissioner, dated August 3, 1925, reads:

"Inspection shows the following to be necessary to make the above premises comply with the requirements of the Labor Law:

"1. Provide an interior stairway at the north and at the south side of building, built of incombustible material at least 44 in. in width, to serve as required means of exits, extending from 1st to 2nd story, with safe passageway to the street. \* \* \*"

"The stairways, including the landings, platforms and passageways connecting therewith, must be enclosed on all sides with partitions of fireproof material extending continuously from the lowest story to which stairway extends to three feet above the roof, \* \* \*";

and

WHEREAS, the building is non-fireproof, located on the rear of the lot, two stories in height, 32 ft. by 75 ft. in area; OCCUPIED as a factory building; 25 persons on each story. EXITS: An open exterior wooden stairway, extending from the 1st story to 2nd story; ROOFS of adjoining buildings: No adjoining buildings; and

WHEREAS, the petitioner proposes to cut an additional exit door from 2nd story at northwest corner of building and provide an exterior iron stairway 4 ft. wide leading to the ground with a gooseneck ladder extending to the roof; he contends the building and occupancy is small and files a copy of certificate of occupancy No. 25-1916, permitting light manufacturing in the building.

Resolved, that the board of standards and appeals does

hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that an exterior iron stairs shall be provided in the 10 ft. court at the north end, additional to the existing wooden stairs, both stairs to be enclosed with corrugated metal, equipped with glazed sash on the run of the stairs and on the platform; egress to be provided and maintained from the termination of the stairs at grade level by means of an open, unobstructed court leading direct to street; granted so long as conditions remain unchanged and that the building be not increased in height, area or dimension.

862-25-S.

PETITIONER—G. A. & H. Boehm, for No. 124 West 47th Street Co., Inc., owner.

SUBJECT—Variation of labor law as cited in decision of fire commissioner.

PREMISES AFFECTED—197-199-201 Greene street, Manhattan.

APPEARANCES—

For Petitioner: George A. Boehm.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition in part and denied in part.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Flanagan ..... 1

THE RESOLUTION:

(862-25-S)

WHEREAS, G. A. & H. Boehm, for No. 124 West 47th Street Company, Inc., owner, filed, August 25, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 197 and 199-201 Greene street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner read:

Order No. 79453-LD—

"Inspection shows the following to be necessary to make the above premises comply with the requirements of the Labor Law.

"1. Arrange the horizontal balconies at rear of building on the 2nd, 3rd, 4th & 6th stories, so as to conform with the provisions of Section 267 of the Labor Law. Among the defects noted on these balconies are as follows: Kalamein doors with plain glass panels opening on same. Window openings within 30 ft. of open balconies in the connected buildings not encased in metal frames and sashes and provided with wire glass, or provide a second means of exit on the 2nd, 3rd, 4th & 6th stories by constructing horizontal exits having openings not less than 44 in. wide in the division wall between buildings, said openings to be protected by fire doors as per Section 267 of the Labor Law or carry out a proper alternative method of complying with the requirements of the Labor Law, Section 271.

"2. Provide an additional means of exit from the cellar and sub-cellar, said exit to be located at the south side of building remote from existing exit, in accordance with the provisions of Section 271 of the Labor Law."

Order No. 79456-LD—

"Inspection shows the following to be necessary to make the above premises comply with the requirements of the Labor Law:

"1. Provide an additional means of exit from the cellar and sub-cellar, said exit to be located at the north side of building remote from existing exit, in accordance with the provisions of Section 271 of the Labor Law.

"2. Arrange the open horizontal balconies at rear of the building on the 2nd, 3rd, 4th & 6th stories so as to conform with Section 267 of the Labor Law.

# MINUTES

Among the defects noted on these balconies are as follows: Kalamein doors with plain glass panels opening on same. Window openings within 30 ft. of open balconies in the connected buildings not encased in metal frames and sashes and provided with wire glass.

"Provide a second means of exit on the 2nd, 3rd, 4th & 6th stories by constructing horizontal exits having openings not less than 44 in. wide in the division wall between buildings, said openings to be protected by fire doors as per Section 267 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.";

and

WHEREAS, the premises consists of two non-fireproof buildings, six stories in height, 73 ft. 11 in. by 95 ft. in total area at the 1st story and 73 ft. 11 in. by 87 ft. 6 in. in area above. OCCUPIED: 1st story, stores; 2nd to 6th story, inclusive, manufacturing, 30 persons on each story of each building; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway in each building extending from the 1st story to the roof, enclosed in fireproof partitions with fireproof doors at the openings, and an open interior stairway from cellar to 1st story in each building; a horizontal exit through party wall at first story with a fireproof sliding door on either side; an open outside party wall balcony at rear of each story above the 1st story; and

WHEREAS, the petitioner claims that both the department of labor and the bureau of buildings approved the exits of this building as they were in 1916; that it would be an unnecessary hardship if compelled to reconstruct these exits.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 2 (Order No. 79453) and as to Item No. 1 (Order No. 79456), *on condition* that a horizontal exit shall be provided in the subdividing fore and aft wall at the rear of the cellar and sub-cellar, opening to be equipped with self-closing fireproof door; that the stairways in the cellars and sub-cellars shall be enclosed in fire-resisting material, with self-closing fireproof doors; *granted* only so long as conditions as to occupancy and use otherwise remain unchanged; and *denied*, as to Item No. 1 (Order No. 79453) and Item No. 2 (Order No. 79456).

878-25-S.

PETITIONER—William F. Doyle, for 1412 Broadway, Inc., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—1410-12 Broadway, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

For Administration: None.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Guilfoyle and Chief Kenlon.. 4

Negative ..... 0

Absent: Commissioner Flanagan ..... 1

THE RESOLUTION:

(878-25-S)

WHEREAS, William F. Doyle, for 1412 Broadway, Inc., owner, filed, August 28, 1925, a petition for variation of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 1410-1412 Broadway, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 20, 1925, reads:

"2. No pane of glass must exceed 720 square inches in area. Section 264-7c of Labor Law.";

and

WHEREAS, the building is fireproof, 24 stories in height, 161 ft. 8¼ in. by 76 ft. 10½ in. and 98 ft. 9 in., irregular, in area; OCCUPIED as a factory building; about 100 persons on each story; EQUIPPED with a fire alarm signal system; and

WHEREAS, the petitioner proposes to install plate glass windows on the street fronts, the maximum integral area of glass at 1st story, 90 sq. ft.; 2nd story, 42 sq. ft.; 3rd story, 40.5 sq. ft.; 4th story, 38.3 sq. ft.; he contends that by complying with the strict letter of the labor law the architectural effect of the building would be marred.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front of the four (4) lower stories, *on condition* that all openings shall be equipped with approved metal frames and sash, glazed with ¼ in. polished plate glass; and *on further condition* that the requirements of the labor law shall be complied with in all other respects.

885-25-S.

PETITIONER—William F. Doyle, for 570 Seventh Ave. Corp., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—570-576 Seventh avenue, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

For Administration: None.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Guilfoyle and Chief Kenlon.. 4

Negative ..... 0

Absent: Commissioner Flanagan ..... 1

THE RESOLUTION:

(885-25-S)

WHEREAS, William F. Doyle, for 570 Seventh Ave. Corp., owner, filed, August 31, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 570-576 Seventh avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated August 17, 1925, reads:

"13. Windows which will not be provided with self-closing device must comply in all respects with rules adopted by Board of Appeals under date of January 11, 1921. Calendar No. 478-20-S.";

and

WHEREAS, the building is fireproof, 20 stories in height, 72 ft. 8¼ in. by 99 ft. 11¾ in. in area; OCCUPIED as a factory building; EQUIPPED with a sprinkler system; and

WHEREAS, the petitioner proposes to eliminate the self-closing devices on all windows except where they form an exposure and are within 30 ft. from any other opening in any other building and not in the same plane with said opening, or, when said opening is not more than 50 ft. above a neighboring roof; he contends the building is fireproof, that the 1st story will be used for stores, the 2nd to 20th stories will be occupied by offices or showrooms, with possible manufacturing.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the windows on the street front, up to and inclusive of the 12th story, *on condition* that the requirements of the labor law shall be complied with in all other respects.

Adjourned 5.10 p. m. To be continued at special hearing on Wednesday, January 6, 1926, at 2 p. m.

JAMES O'CONNOR, Secretary.

THE RESOLUTION:

(365-25-S)

WHEREAS, Emil Guterman, for Yetmar Realty Corporation, owner, filed, April 3, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 2139 Third avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 22, 1925, reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. \* \* \*. SEE NOTE.

"NOTE: Among the defects noted on this fire escape are the following: No balcony on 2nd story. No 60 degree stairway continuing from 3rd story balcony to 2nd story. No safe egress to street from 2nd story.

"2. Extend the interior stairway at the north side of building to the roof, as per Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 100 ft. in area at 1st story and 25 ft. by 60 ft. in area above. OCCUPIED: 1st story, store; 2nd story, tailor, 10 persons; 3rd story, tailor, 5 persons; 4th story, vacant at present. EXITS: An interior non-fireproof stairway, extending from the 1st story to top story; enclosed in wood stud, lath and plaster partitions with wooden doors at openings; on the rear of the building a party wall fire escape balcony on the 4th story (connecting by stair to roof) and also on the 3rd story, connecting with the fire escape on the adjoining building, which is under the same ownership; with egress from the fire escape on

the adjoining building by means of counterbalanced stair to East 117th street; openings along the course of the fire escape are fireproof; and

WHEREAS, petitioner contends that a second means of egress from the 2nd story may be had through door leading to roof of one-story extensions to ladder leading to street; and proposes to enlarge the scuttle opening in roof and to provide a stationary iron ladder leading thereto and to provide, also, on the 2nd story an opening in the party wall leading to the adjoining building, said opening protected with fireproof self-closing door.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item No. 1, on condition that a balcony fire escape shall be provided with connecting stairs of not less than 60 degrees on the rear of building for the 3rd and 4th stories extending across the entire rear of the adjoining premises to the north connecting with counterbalanced stairway to the sidewalk level, and that a horizontal exit shall be provided at the 2nd story floor level connecting with adjoining premises to the north, and that a casement opening equipped with fireproof door shall be provided on the rear of the 2nd story to the roof of extension with iron steps to roof of the adjoining one-story extension to the north from which there shall be provided and maintained a portable iron ladder for egress from said extension roof to street; granted, as to Item No. 2, on condition that a fixed double-rung iron ladder shall be provided from the top story hall to scuttle in roof, the scuttle to be not less than 2 ft. by 2 ft. 6 in. in area; the hatchway between the ceiling and roof to be not less than 9 sq. ft. in area; and on further condition that the building shall not be occupied by more than 24 persons above the 1st story.

489-25-S.

PETITIONER—Emil Guterman, for Picker Service Building, Inc., owner.

THE RESOLUTION:

(489-25-S)

WHEREAS, Emil Guterman, for Picker Service Building, Inc., owner, filed, May 8, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 686-8 Lexington avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 27, 1925, reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 ft. throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law."

and

# MINUTES

WHEREAS, the building is non-fireproof, five stories in height, 33 ft. 4 in. by 86 ft. in area. OCCUPIED: 1st story, storage; 2nd story, stores, 3 persons; 3rd story, silversmith, 10 persons; 4th story, manufacturing, ex-ray outfits, 25 persons; 5th story, manufacturing, dresses, 20 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in brick walls with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the first story rear fire escape balcony; with EGRESS from the termination of the fire escape by means of stairs to yard adjoining at south; ROOFS of adjoining buildings 12 stories higher at north, same level at south; and

WHEREAS, the petitioner contends that he is also the owner of the premises adjoining at south, where permanent egress is maintained through the yard; he also proposes to provide additional gates in fence to adjoining yards.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the rear fire escape, on condition that an iron stairway shall be provided from the lowest balcony to the yard level of the adjoining premises to the south, in the same ownership; with egress through premises to Lexington avenue; and that a door shall be provided in the fence to the yard of adjoining premises to the west, with egress therefrom to 56th street; and granted so long as conditions as to occupancy and use otherwise remain substantially unchanged.

521-25-S.

PETITIONER—Corona Preserve Fruit Company, lessee.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—46-52 Columbia street, Brooklyn.

APPEARANCES—

For Petitioner: George W. Eweler.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Guilfoyle, Flanagan and Chief

Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(521-25-S)

WHEREAS, Corona Preserve Fruit Company, lessee, filed, June 15, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 46-52 Columbia street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner read: Order No. 76753-LD—

"1. Arrange the stationary metal bars on windows on 1st and 2nd stories, northeast sides of building, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Section 272 of the Labor Law."

Order No. 78941-LD—

"1. Arrange the fire escape on the north side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method

of complying with the requirements of Sec. 271 of the Labor Law.

"(1) No 60 degree connecting stairway between balconies. (2) No counterbalanced stairway from the lowest balcony to the street. (3) Windows on course not fireproof, not self-closing.

"2. Remove the substandard fire escape on the east side of the building or reconstruct same as per Sec. 274 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted May 9, 1924. Among the defects noted are the following:

"(1) No 60 degree connecting stairways between balconies. (2) No stairway from the lowest balcony to street. (3) Windows on course not fireproof, not self-closing."

and

WHEREAS, the building is non-fireproof, three stories in height, 125 ft. 9 in. by 100 ft. 4 in. in area. OCCUPIED: 1st story, storage; 2nd story, manufacturing, 8 persons; 3rd story, storage. EXITS: An open wooden interior stairs, extending from 1st story to 3rd story; two substandard fire escapes, one on each of the north and east street fronts of the building, extending from the 2nd to 3rd story, having non-fireproof openings on the course thereof, with no means of egress from the 2nd story balcony to the sidewalk; ROOFS of adjoining buildings 13 ft. lower at west, 8 ft. lower at south; and

WHEREAS, the petitioner claims that there are 12 windows in east elevation and 6 windows in north elevation which are barred; he proposes to remove bars from windows, opening on the fire escapes; to transfer the manufacturing occupancy from the 2nd story to the 3rd story; to cut an exit door in rear wall leading to roof of adjoining building; to provide each of the two fire escapes on the street fronts with vertical connecting ladders from the 2nd story to 3rd story, a drop ladder from the 2nd story balcony to sidewalk, also a gooseneck ladder from the 3rd story balcony to roof; he contends that the building is of mill construction, has a small occupancy and used mainly for warehouse purposes.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 78941, on condition that both existing fire escapes on each street front shall be equipped with 60 degree connecting stairways with counterbalanced drop ladder in guides from the lowest balcony to the ground; and that the occupancy of the premises shall be limited to 9 persons above 1st story, not more than 3 of which shall occupy the 3rd story, and that the building shall not be increased in height, area or dimensions; and denied as to Order No. 76753, Item 1.

460-25-S.

PETITIONER—Theodore B. Barringer, owner.

THE RESOLUTION:

(460-25-S)

WHEREAS, Theodore B. Barringer, owner, filed, April 30, 1925, a petition with the board of standards and appeals for

# MINUTES

a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 3291 Third avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 74716-LD, dated March 28, 1925, reads:

"1. Arrange the fire escape on the front of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.

"Among the defects noted is the following:

"No counterbalanced stairway from 2nd story balcony to ground.";

and

WHEREAS, the building is non-fireproof, three stories in height, 25 ft. by 80 ft. in area at 1st story and 25 ft. by 72 ft. in area above. OCCUPIED: 1st story, store; 2nd story, manufacture of dresses, 21 persons; 3rd story, manufacture of coats, 12 persons. EXITS: An interior non-fireproof stairway, extending from the 1st story to roof, enclosed in fire-resisting partitions with kalamein and wire-glass doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from top story, with gooseneck ladder to roof, to the 1st story balcony, with counterbalanced drop ladder to street; ROOFS of adjoining buildings to south 7 ft. 6 in lower, to north 8 ft. higher; and

WHEREAS, petitioner contends, in view of the small occupancy, that the counterbalanced ladder affords an adequate means of egress to the street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the lowest balcony of the fire escape, on condition that counterbalanced drop ladder in guides shall be provided and that the fire escape shall otherwise comply with the requirements of the labor law.

659-25-S.

PETITIONER—Emery Roth, for Church of The Holy Innocents, owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—135-139 West 36th street and 122-126 West 37th street, Manhattan.

APPEARANCES—

For Petitioner: Julian Roth.

For Administration: None.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION:

(659-25-S)

WHEREAS, Emery Roth, for Church of the Holy Innocents, owner, filed, June 25, 1925, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises 135-139 West 36th street and 122-126 West 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated April 14, 1925, reads:

"20. All windows including show windows should conform to Section 264 of Labor Law and Rule 503 of Industrial Code. Show panes not over 720 square inches and not over 48 in. in any dimension.";

and

WHEREAS, the building is fireproof, 20 stories in height, 59 ft. 7 in. by 77 ft. 4 in. in area. OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent manufacturing; approximately 70 persons per story; and

WHEREAS, there are openings in the street walls of the building, on the 1st, 2nd and 3rd stories, glazed with plate glass, the maximum area of the glass being: on the 1st story, 120 sq. ft.; 2nd story, 40 sq. ft., and on the 3rd story, 40 sq. ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law, as to the area of the glass, would destroy the intended use of the three lowest stories and would also affect the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the three lower stories on the street front, on condition that all openings shall be equipped with approved metal frames and sash, glazed with 1/4 in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(860-25-S)

WHEREAS, Morris Rosenberg, for Aimwell Realty Corp., owner, filed, August 24, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises 13-19 University place, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated July 22, 1925, read:

No. 83259-LD—"1. Arrange main entrance doors and door to 1st story south to open outwardly, as per Sec. 271 of the Labor Law."

No. 83257-LD—"1. Provide an additional means of exit from the cellar, said exit to be located at north, south and west sides of building.";

and

WHEREAS, the building is non-fireproof, six stories in height, 118 ft. 6 in. by 75 ft. 6 in. in area. OCCUPIED: Cellar, storage, 1 person; 1st story, sponging cloth, 30 persons; 2nd story, manufacturing, hats, 30 persons; 3rd story, manufacturing, clothing, 30 persons; 4th story, manufacturing, hats, 30 persons; 5th story, manufacturing, clothing, 30 persons; 6th story, manufacturing, picture frames, 30 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior iron and slate stairway, extending from 1st story to roof; enclosed in brick walls, with fireproof doors at all openings; an open interior stairway from cellar to 1st story; two fire escapes on front of the building, extending from top story to 2nd story, with counterbalanced ladder to sidewalk; ROOFS of adjoining building 4 ft. lower at south; and

WHEREAS, the petitioner proposes, re: to Order 83259-LD, to secure the double front doors by a chain and lock against

# MINUTES

the wall during working hours, and to comply with rest of the order; he contends, re: Order 83257-LD, that there are two engineer's ladders from cellar leading to the street, also that the cellar is used strictly for storage and no one employed there.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 83257, Item No. 1, *on condition* that fixed iron stairs shall be provided from cellar to hatchway at sidewalk, equipped with hinged cover at street level (2 ft. by 3 ft.) at both the University place and the 8th street fronts; and *denied* as to Order No. 83259, Item No. 1.

Negative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Absent .....	0

THE RESOLUTION:

(899-25-S)

WHEREAS, Robert Teichman, for Est. of Sol. M. Swartz, owner, filed, September 3, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 121-3 Greene street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 83795-LD, dated August 15, 1925, reads:

"1. Provide safe and unobstructed egress from the lowest termination of the fire escape at rear of building, by constructing a fireproof passageway with an unobstructed width of at least three feet throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law.

"2. Remove the sub-standard fire escape on the front of the building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals adopted May 9th, 1924. Among the defects noted are the following:

"1. Windows on course not fireproof, self-closing.

"2. No 60 degree connecting stairs.

"3. No drop ladder in guides from lowest balcony to ground."

and

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 92 ft. in area at 1st story and 50 ft. by 85 ft. in area above. OCCUPIED: 1st story, shipping, 41 persons; 2nd story, manufacturing dolls, 13 persons; 3rd story, manufacturing dolls, 45 persons; 4th story, manufacturing hat-blocks, 16 persons; 5th story, manufacturing dolls, 18 persons; 6th story, manufacturing dolls, 27 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from 1st story to top story, enclosed in partitions of stud-metal lath and  $\frac{3}{4}$  in. of Portland cement mortar, with fireproof doors at all openings; a fire escape on the rear of the building,

having fireproof openings on the course thereof, extending from the roof to the yard of adjoining building at west; ROOFS of adjoining buildings 12 ft. lower at north and south; and

WHEREAS, the petitioner claims, re: Item 1 of the order, that egress from rear fire escape is to adjoining yard at west and through buildings to Prince and Wooster streets; that to construct a fireproof passageway would cause unnecessary hardship; petitioner requests that the exits be accepted by the board without any further change.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION:

(911-25-S)

WHEREAS, Oscar Stern, representing Polhemus & Coffin, for Arthur Greenbaum, Inc., owner, filed, September 9, 1925, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises 232 Madison avenue and 15-17 East 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated August 31, 1925, reads:

"This amendment is disapproved with the following objections:

"18. No window pane may exceed 720 sq. in. in area. L. L., Section 264-7."

and

WHEREAS, the building is fireproof, 16 stories in height, 150 ft. by 98 ft. 9 in. in area. OCCUPIED: 1st story, stores; upper stories, offices, showrooms and 25 per cent manufacturing; approximately 110 persons per story; and

WHEREAS, there are openings on the 1st, mezzanine and 2nd stories, in the Madison avenue and also the East 37th street walls of the building glazed with plate glass, the maximum area of the glass on the respective stories being: 1st story, 6,720 sq. in.; mezzanine, 2,856 sq. in.; 2nd story, 5,152 sq. in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law, as to the area of the glass, would destroy the intended use of the stories in question and would also affect the architectural effect of the building.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows of street front on 1st and 2nd stories, *on condition* that openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; and that the labor law requirements shall be complied with throughout in all other respects.

## THE RESOLUTION:

(770-25-S)

WHEREAS, Charles H. Richter, for Adlers Monument and Granite Works, lessee, filed, July 25, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 148 East 57th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 20, 1925, reads (Order No. 75781-LD):

"Provide an outside iron balcony fire escape on the rear of the building conforming to Section 273 of the Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills, properly secured, when sill is more than 8 in. above the floor level. Where there is no safe egress from the roof, a gooseneck ladder shall be provided from the top balcony to the roof. Unobstructed egress from the foot of the fire escape shall be as required by Sec. 273 of the Labor Law, or to open adjoining yard, with egress to the street, or carry out a proper alternative method of complying with Rule 3 of the Board of Standards and Appeals adopted July 29th, 1924."

and

WHEREAS, the building is non-fireproof, two stories in height, 18 ft. by 99 ft. in area at 1st story; OCCUPIED as a factory, 15 persons on the 2nd story. EXITS: An interior wooden stairway, extending from the 1st story to 2nd story; enclosed in lath and plaster partitions with wooden doors at openings; ROOFS of adjoining buildings same level; and

WHEREAS, the petitioner proposes to construct a party wall balcony at front on 2nd story connecting with fire escape balcony of premises adjoining at the west, which is under the same ownership; furthermore, he claims that there are practical difficulties in providing a standard fire escape on the rear with egress from the same; that the front part of 2nd story is the only part occupied, and requests the board to accept his proposition in lieu of complying with fire escape Order No. 75781-LD; and

WHEREAS, this petition was granted by the board at its meeting November 24, 1925, on certain conditions, and petitioner requested a modification of the conditions so as to omit the party wall connections.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the manufacturing use shall be confined to a space within 35 ft. of the street front; that a fire escape balcony shall be provided on front of building, 2nd story, with steps from floor of room to window sill and casement window opening to fire escape and a counterbalanced drop ladder in guides from balcony to street; and granted only so long as both structures remain in single ownership; and only so long as conditions as to occupancy and use remain substantially unchanged and this building be not increased in height or area.

Negative ..... 5  
Absent ..... 0

## THE RESOLUTION:

(265-25-S) \*

WHEREAS, Abraham J. Halpern, for the Dian Building Corp., owner, filed, March 9, 1925, a petition with the board of standards and appeals for a variation of the requirements of the labor law, as cited in order of the superintendent of buildings, affecting premises 233-235 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated February 3, 1925, reads:

"12. Panels of plate glass for front first and second story windows should not exceed 720 sq. in."; and

WHEREAS, the building is fireproof, nine stories in height, 50 ft. by 100 ft. in area; OCCUPIED as a tenant factory; approximately 30 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to the roof; there are openings in the front of building on the 1st and 2nd stories, glazed with 1/4 in. plate glass; the maximum area of the glass in the 1st story being 10 ft. 3 in. by 4 ft. 6 in., and the maximum area of the glass on the 2nd story being 10 ft. 4 in. by 6 ft.; and

WHEREAS, petitioner contends that a strict compliance with the law as to the area of the glass would destroy the proposed use of these two stories and would affect the architectural appearance of the building; and

WHEREAS, this petition was dismissed for lack of prosecution November 20, 1925, and restored to calendar by vote of the board.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on street fronts on the two lower stories, on condition that the openings shall be equipped with approved metal frames and sash, glazed with 1/4 in. polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

## CORRECTION.\*

The minutes of the meeting of the board of standards and appeals held Tuesday morning, December 29, 1925, as they appeared in Bulletin No. 1, Vol. XI, are hereby corrected to read as follows:

### THE RESOLUTION:

(1475-24-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for L. Schepp Co., owner, filed, December 15, 1924, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 165-9 Duane street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 26, 1924, reads:

"Order No. 68693-LD:

"1. Enclose the interior stairway at west side of division wall at centre of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 feet above the roof, constructed as per Section 271 of the Labor Law \* \* \*.

"2. Remove the substandard fire escape on the east and west sides of building or reconstruct same in accordance with Section 274 of the Labor Law except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided.

"3. Provide an additional required means of exit on each floor of the building, remote from existing stairway located at west side of division wall at centre of building, preferably located at the north side of build-

\*Correction—Words "the easterly" omitted in 6th line of last paragraph and words "both" substituted; letter "s" added to word "section" and to "stairway" and word "in both sections" added line 9 of last paragraph and words "that \* \* \* throughout" omitted lines 11 and 12.

ing, in accordance with the requirements of Section 271 of the Labor Law.";

and

WHEREAS, the building is separated into two sections by a fore and aft brick wall with openings therein on all stories excepting the 1st, 3rd and 5th stories, and is non-fireproof, ten stories in height, 100 ft. 6 in. by 77 ft. 10 in. in area; OCCUPIED for drying, shredding and packing coconut and also for the storage of shoes on the 4th and 5th stories, 78 persons above the 1st story; EQUIPPED with a sprinkler system. EXITS: Two interior wooden stairways, the westerly one extending from the 1st to the top story and the easterly one extending from the 1st story to the roof, partly enclosed in wooden partitions with wooden doors at the openings, a sub-standard fire escape on the Hudson street front and also one on the Staple street front of the building; ROOFS of adjoining buildings are 6 ft. lower; and

WHEREAS, this petition was granted by the board at its meeting February 24, 1925, on certain conditions, and petitioner requested a modification of these conditions as to stairway enclosures 1st story; and

WHEREAS, petitioner proposes to cut openings in the division wall on the 3rd and 5th stories and to provide fireproof doors at all openings in the wall from the 2nd to the 10th story, inclusive; and proposes also to change to 45 degrees the pitch of the connecting stairs between the fire escape balconies and also to raise the railings on the said balconies to a height of 4 ft. 6 in.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item No. 2, on condition that the fire escapes shall be brought up to standard; granted, as to Item No. 3, on condition that the stairhall enclosure in both sections shall be enclosed in fire retarding partitions throughout, in accordance with the rules of the board of standards and appeals, except that the stairways in both sections may terminate at 1st story in rear of elevator with self-closing fireproof door at 1st story termination; denied as to Item No. 1.

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 18A, properly filled out.

If he desires additional copies for his own convenience in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth ( $1/200$ ) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $7/8$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $1/4$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $1/2$ ) inch plaster boards, or three-eighths ( $3/8$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $1/4$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $3/4$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $3/4$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $7/8$ ) inch wood sheathing, one-half ( $1/2$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $7/8$ ) inch wood sheathing, two thicknesses of one-quarter ( $1/4$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

### DIRECTORY

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

##### Commissioners

HENRY L. CONNELL

JOSEPH FLANAGAN

JOHN GUILFOYLE

CHIEF JOHN KENLON

JAMES O'CONNOR, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—Worth 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, January 12, 1926, at 10 a. m.

Minutes of Regular Meeting, January 12, 1926, at 2 p. m.

Rules.

Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, January 19, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, January 26, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## CALL OF CLERK'S CALENDAR. BUILDING ZONE CASES.

*Tuesday, January 19, 1926, at 2 p. m.*

651-25-BZ.

APPLICANT—John M. Baker, for William Hirsh, owner.  
PREMISES—North side of Rockaway boulevard, 78 ft.  
west of 90th street, Woodhaven, Borough of  
Queens.

APPLICATION, under section 21 of the building zone  
resolution,

TO PERMIT in a business district the erection and main-  
tenance of a garage for the storage of more than  
five (5) motor vehicles.

826-25-BZ.

APPLICANT—Charles D. Cords, for Thrift Service Sta-  
tions, Inc., lessee.

PREMISES—3002-3012 Avenue N, Brooklyn.

APPLICATION, under section 21 of the building zone  
resolution,

TO PERMIT partly in a residence district and partly in  
a business district the erection and maintenance of  
a gasoline selling station.

1067-25-BZ.

APPLICANT—John A. Sharp, for J. A. S. Realty Corp.,  
owner.

PREMISES—West side of Broadway, 327 ft. north of  
West 240th street, The Bronx.

APPLICATION, under section 21 of the building zone  
resolution,

TO PERMIT in a business district the erection and main-  
tenance of a garage for the storage of more than  
five (5) motor vehicles.

1098-25-BZ.

APPLICANT—F. S. McGowan, for O. L. Williams Realty  
Co., Inc., owner.

PREMISES—Northeast corner of East 242nd street and  
White Plains road, The Bronx.

APPLICATION, under section 21 of the building zone  
resolution,

TO PERMIT in a business district the erection and main-  
tenance of a gasoline service station.

1213-25-BZ.

APPLICANT—Morris L. Kaufman, for Isidore Resnikoff,  
owner.

PREMISES—4001-4011 Fourteenth avenue, Brooklyn.

APPLICATION, under section 7 (b-c) of the building  
zone resolution,

TO PERMIT in a residence district extending from a busi-  
ness district the erection and maintenance of a the-  
atre and store building.

1011-25-BZ.

APPLICANT—Henry J. Nurick, for Cobrink Furniture  
Co., lessee.

PREMISES—339 8th street, Brooklyn.

APPLICATION, under section 21 of the building zone  
resolution,

TO PERMIT in a residence district the conversion of oc-  
cupancy of a building used as a church to a ware-  
house.

1022-25-BZ.

APPLICANT—Daniel Luftman, owner.

PREMISES—72 East 108th street, Manhattan.

APPLICATION, under section 21 of the building zone  
resolution,

TO PERMIT in a residence district the use as a restaurant  
of the basement floor of a building.

## APPEALS FROM ADMINISTRATIVE ORDERS.

## BUILDING ZONE APPLICATIONS.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, January 19, 1926*, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

CAL. NO. 903-25-BZ—Application, September 4, 1925, under the building zone resolution, of McCooley and Conroy, applicants, on behalf of N. & H. Building Company, Inc., owner, to permit in a business district the change of occupancy of the 2nd story from auto accessories to a garage for the storage of more than five (5) motor vehicles; premises 823-829 Classon avenue, Borough of Brooklyn.

CAL. NO. 375-23-BZ—Application, October 20, 1925, under section 7c of the building zone resolution, of Thomas W. Lamb, architect, on behalf of B. F. Keith New York Theatres Company, owner, to permit in a residence district extending from a business district the erection and maintenance of a building for theatre purposes (previously withdrawn); premises 109 East Fordham road, The Bronx.

CAL. NO. 1018-25-BZ—Application, October 5, 1925, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of George Potts, owner, to permit in a residence district the erection of a garage for more than five (5) motor vehicles; premises 120-130 Terrace place, Brooklyn.

CAL. NO. 855-25-BZ—Application, August 26, 1925, under section 21 of the building zone resolution, of Max Geidel and Ernest Henke, applicants, on behalf of Ernest Henke and Henrietta Geidel, owners, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles and also a gasoline selling station; premises southeast corner of Page street and Hylan boulevard, Tottenville, Richmond.

CAL. NO. 965-25-BZ—Application, September 17, 1925, under section 21 of the building zone resolution, of Angelo Justo, applicant and owner, to permit in a residence district

the erection and maintenance of a building to be used for business purposes; premises 758 East 213th street, The Bronx.

CAL. NO. 1004-25-BZ—Application, October 1, 1925, under section 21 of the building zone resolution, of C. N. Whinston and Bro., architects, on behalf of Mah Realty Holding Corp., owner, to permit in a residence district the change of occupancy of the first story of an existing apartment building from dwelling use to stores; premises 2399 Grand concourse, The Bronx.

CAL. NO. 1042-25-BZ—Application, October 13, 1925, under section 21 of the building zone resolution, of Edward P. Doyle, applicant, on behalf of Morris Lassinsky, owner, to permit in a business district the erection and maintenance of a building to be used as a factory; premises northeast corner of Pennsylvania avenue and Pitkin avenue, Brooklyn.

CAL. NO. 1044-25-BZ—Application, October 13, 1925, under section 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Carmine Dargenio, owner, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 975-977 Second avenue, Astoria, Borough of Queens.

CAL. NO. 423-25-BZ—Application, April 20, 1925, under the building zone resolution, of Samuel Schlauf, applicant, on behalf of Isabel Burger, owner, to permit in an "F" area district the erection of a building, the area of which is in excess of that permitted in such district; premises 123-02 and 123-08 Rockaway Beach boulevard, Rockaway Park, Borough of Queens.

CAL. NO. 114-25-BZ—Application, January 26, 1925, under section 21 of the building zone resolution, of Jenks & Rogers, on behalf of Kennor Realty Corp., owner, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 342-352 Coney Island avenue, Brooklyn.

CAL. NO. 599-25-BZ—Application, June 10, 1925, under section 7c of the building zone resolution, of Eugene De Rosa, architect, on behalf of Maxlan Theatre Corp., owner, to permit in a residence district extending from a business district the erection and maintenance of a building to be used for business and theatre purposes; premises southeast corner of Sheridan avenue and East 167th street, The Bronx.

CAL. NO. 1522-24-BZ—Application, November 24, 1925, under section 21 of the building zone resolution, of Edward P. Doyle, applicant, on behalf of Hugo Seidenberg, owner, to permit in a residence district the maintenance of a building used for store purposes on the 1st story (previously

# CALENDAR

withdrawn); premises 129-02 Newport avenue, Belle Harbor, Borough of Queens.

CAL. NO. 1051-25-BZ—Application, October 15, 1925, under section 21 of the building zone resolution, of Henry S. Churchill and Charles B. Meyers, architects, on behalf of Leo H. Wise, owner, to permit in a 1½ times height district the erection of the street wall of a portion of a building to a height in excess of the limitation imposed by the building zone resolution; premises 28-32 East 63rd street, Manhattan.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

#### THE RESOLUTION:

(435-25-A)

WHEREAS, Edward P. Doyle, for Louis Schrag, owner, filed, April 22, 1925, an appeal from decision of the fire commissioner, affecting premises No. 151 West 21st street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 20, 1925, reads:

"1. Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the Rules of the Board of Standards and Appeals, adopted January 11th, 1924. Said valve to be attached to the gas supply pipes on the inside of the building at a point where said pipes enter the building and before they reach the gas meters, which valve shall shut off the gas automatically when subjected to direct contact with fire and shall also be connected with a conspicuous and conveniently accessible control box at a place on the exterior of the building so arranged as to allow the gas supply to be shut off by the officers of the Fire

# MINUTES

Department immediately, whenever the necessity arises. Section 20a, Chapter 12, Code of Ordinances.”;

and

WHEREAS, the building is non-fireproof, five stories in height, 19 ft. 5 in. by 50 ft. in area. OCCUPIED: 1st story, stores; 2nd story, manufacturing, cigars, 5 persons; 3rd story, pleating, 4 persons; 4th story, embroidery, 4 persons; 5th story, vacant; gas is used for heating, lighting and cooking purposes; the five existing gas meters range from 3 to 10 lights capacity; and

WHEREAS, the appellant contends that the installation of a gas shut-off valve would not add to the safety of anyone in the case of fire; that it is not his duty to protect anyone against gas until the gas becomes his property; that the regulation of the use of gas should be made by the public service commission, which alone has jurisdiction.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

600-25-A.

APPELLANT—A. J. MacManus, for 2094 Second Ave. Realty Corp., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—2094 Second avenue, Manhattan.

APPEARANCES—

For Appellant: William White, Bernard Herzbrun.  
For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(600-25-A)

WHEREAS, A. J. MacManus, for 2094 Second Avenue Realty Corp., owner, filed, June 10, 1925, an appeal from decision of the fire commissioner, affecting premises 2094 Second avenue, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated April 21, 1925, reads:

“4. Provide a hose outlet with sufficient 2½ in. approved hose to protect manager's office in attic plan.

“5. Provide a gravity tank 20 ft. above main roof as per Chapter 5, Section 524, Section 3, Code of Ordinances.

“6. Provide a fire pump to be installed as per Rule No. 38.”;

and

WHEREAS, the building is fireproof, two stories (31 ft.) in height, 125 ft. by 100 ft. in area. OCCUPIED: 1st story, moving picture theatre (1,154 seats) and approximately 12 per cent of the lot as stores; 2nd story, offices and open air roof garden, (1,000 seats); and

WHEREAS, appellant contends that the manager's office is remote from the auditorium and is not used by the public; that the building is to be used only as a moving picture theatre, no movable scenery or dressing rooms; that the stores and offices are separated from the theatre by masonry walls and proposes to provide—for the standpipe system—a 4 in. connection to the street main in East 108th street, and appellant has filed a letter from the department of water supply, gas and electricity that the city main in East 108th street is 6 in. in diameter, is fed two ways and that the water pressure in same is 41 pounds per sq. in.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is

*granted*, as to Item No. 5, on condition that a direct 4 in. street connection shall be made to the city main, fed two ways; *granted*, as to Item No. 6, on condition that an approved Booster pump shall be installed; and *granted* only so long as the premises are maintained and restricted to the conduct and operation of a moving picture theatre; *denied* as to Item No. 4.

616-25-A.

APPELLANT—Robinson Bros., for David Robinson, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—656 Montrose avenue, Brooklyn.

APPEARANCES—

For Appellant: Benjamin Scharps, John G. Metzner, Henry C. Brucker.

For Administration: None.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(616-25-A)

WHEREAS, Robinson Bros., for David Robinson, owner, filed, June 13, 1925, an appeal from decision of the fire commissioner, affecting premises No. 656 Montrose avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 24, 1925, reads:

“You are hereby notified that an inspection of the above premises, used for the storage of acids, etc., shows that the following must be done before the permit requested by you can be issued:

FORTHWITH

“1. Install a 4 in. standpipe in accordance with requirements of Section 5, Chapter 5, Code of Ordinances. Plans and specifications to be filed with and approved by the Fire Department before the work of installing standpipe has commenced.”;

and

WHEREAS, the premises consist of a two-story frame building, 30 ft. in height and 100 ft. by 52 ft. in area, and also to the rear two one-story frame buildings, respectively 86 ft. by 36 ft. and 60 ft. by 30 ft. in area; the total area of the buildings being approximately 10,000 sq. ft. OCCUPIED: 1st story, manufacture and storage of flour paste and also for the storage of 30 carboys of muriatic acid, 5 persons; 2nd story, storage of empty iron drums and wooden boxes, 2 persons; and

WHEREAS, appellant contends that the premises are located 450 ft. from the nearest city fire hydrant, but that the buildings are protected by a 2 in. standpipe, connected to a 75 gallon per minute pump; and that there is also a 1,000 gallon emergency tank on the 2nd story of the building.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building, as now subdivided, remains substantially unchanged; and that the size, area and dimension of the building be not increased.

735-25-A.

APPELLANT—John Mercogliano, owner.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—Northwest corner of 84th street and 102nd avenue, Woodhaven, Queens.

## THE RESOLUTION:

(735-25-A)

WHEREAS, John Mercogliano, owner, filed, July 13, 1925, an appeal from orders of the fire commissioner, affecting premises on northwest corner of 84th street and 102nd avenue, Borough of Queens; and

WHEREAS, the orders of the fire commissioner, dated August 8, 1924, read:

No. 59735-F—

"1. Install an automatic dry pipe sprinkler system throughout entire building, used for the storage and manufacture of paper boxes, having at least one source of water supply \* \* \*."

No. 59736-F—

"1. Install a standpipe system with risers 4 in. in diameter \* \* \*";

and

WHEREAS, the building is non-fireproof, one story and basement (14 ft.) in height, 100 ft. by 100 ft. in area. OCCUPIED: Basement, storage of paper boxes; 1st story, manufacturing, paper boxes, 40 persons; and

WHEREAS, the appellant claims the building has ample exits; that it faces two streets; that there are two fire hydrants within 50 ft. of the building; that the present occupancy has existed during the past six years; he contends that the standpipe order, No. 59736-F, does not apply in that the building is but 14 ft. in height.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal be and it hereby is *granted*, so long as the building be not increased in height, area or dimension, and that not less than four (4) 2½ gallon approved fire extinguishers be installed and maintained in the basement story.

922-25-A.

APPELLANT—Helmle & Corbett, for Sperry Gyroscope Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—36-48 Flatbush avenue extension, Brooklyn.

## APPEARANCES—

For Appellant: William H. MacMurray.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(922-25-A)

WHEREAS, Helmle & Corbett, for Sperry Gyroscope Co., owner, filed, September 10, 1925, an appeal from decision of the fire commissioner, affecting premises No. 36-48 Flatbush avenue extension, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 10, 1925, reads:

"Sub-division 2A of Section 232, Chapter 10, Code of Ordinances, provides that no permit for the storage or manufacture of nitro-cellulose products except as heretofore provided shall be issued for any building which is situated within 50 ft. of the nearest wall of any building occupied as a school, theatre or other place of public amusement or assembly.

"1. You are therefore ordered to remove all nitro-cellulose from the premises and to discontinue the further storage of nitro-cellulose on the premises.";

and

WHEREAS, the building is fireproof, eleven stories in height, 110 ft. by 234 ft. in area. OCCUPIED: Offices and tenant factories, approximately 900 persons above the 1st story; and

WHEREAS, appellant contends that the church or place of public assembly is located across the street and 47 ft. from the building in question and that the 10th story of the building, upon which the celluloid is used, is 190 ft. from the nearest wall of the church.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the conditions stipulated under appeal known as Cal. No. 1481-23-A, affecting these premises, be complied with and maintained in all other respects.

1007-25-A.

APPELLANT—William F. Regan, for Moses Rosen, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—72-78 Walworth street, Brooklyn.

## APPEARANCES—

For Appellant: William F. Regan.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(1007-25-A)

WHEREAS, William F. Regan, for Moses Rosen, owner, filed, October 1, 1925, an appeal from order of the fire commissioner, affecting premises No. 72-78 Walworth street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 11, 1925, reads:

"You are hereby notified that an inspection of the above premises used as a Storage Garage shows that the following must be done before the permit requested by you can be issued:

"7. Install standpipe 4 inches in diameter tested to withstand a pressure of 300 lbs. Plans and specifications in duplicate must be filed with and approved by this Department before the above work may be commenced.";

and

WHEREAS, the building is non-fireproof, one story (13 ft. 6 in.) in height, 105 ft. by 98 ft. (approximately 10,300 sq. ft.) in area; OCCUPIED as a storage garage, 4 persons; and

WHEREAS, appellant contends that the building faces on two street fronts; is low in height; amply provided with

# MINUTES

exits, and exceeds but slightly the limiting area requiring standpipes.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that a 2½ in. standpipe equipment supplied direct from the city water main with not less than a 2 in. tap be installed with outlets on the two center columns with 2½ in. outlets and not less than 50 ft. of hose at each outlet; and *granted on further condition* that the building shall not be increased in height, area or dimension.

1009-25-A.

APPELLANT—Lillian Goldstein, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—2146 Hughes avenue, Bronx.

APPEARANCES—

For Appellant: Dr. William Goldstein, Mr. Kaufman.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(1009-25-A)

WHEREAS, Lillian Goldstein, owner, filed, October 2, 1925, an appeal from decision of the fire commissioner, affecting premises 2146 Hughes avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated September 12, 1925, reads:

"1. Have Plan No. 2025-24 approved by this department.

"2. Provide a hydrostatic test of fuel oil storage tank of at least 30 pounds per square inch for all welded and at least 25 pounds per square inch for all riveted tanks, as per Rule 7, Section 1-b of the Fuel Oil Rules.

"6. Provide an automatic shut-off to prevent abnormal flow of fuel oil to the burners as per Rule 22-a of the Fuel Oil Rules.

"7. Provide a hydrostatic test of not less than one hundred pounds per square inch for all Grade B fuel oil carrying piping as per Rule 25, Section 2 of the Fuel Oil Rules.

"8. Provide an easily accessible shut-off valve near each burner as per Rule 25, Section 2 of the Fuel Oil Rules.

"9. Provide a remote control for shutting off the supply of oil to the burner in case of an abnormal discharge, as per Rule 26-c of the Fuel Oil Rules.

"12. Provide fuel oil pump or pumps of a type approved by the Board of Standards and Appeals."

and

WHEREAS, the building is frame, 2½ stories in height, 20 ft. by 35 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, there has been installed a fuel oil burning system consisting of a 500 gallon fuel oil storage tank, a 60 gallon auxiliary tank, a Powerlight oil heat burner, a Blackmar approved pump and also the necessary valves and piping to make a complete installation; and

WHEREAS, appellant proposes, in re: Item No. 1, to answer all objections and have the plan approved; in re: Item No. 2, requests the acceptance of an affidavit that the storage tank has undergone a shop test in accordance with the

fuel oil rules; in re: Item No. 6, contends that a shut-off is provided with the burner; in re: Item No. 7, contends that all piping is standard full weight wrought iron; in re: Item No. 8, contends that a shut-off valve is provided near the burner; in re: Item No. 9, contends that the Blackmar pump used is manually operated and that a remote control is impossible; in re: Item No. 12, contends that the pump used, a Blackmar rotary hand pump, has been approved by the board.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item No. 2, *on condition* that a certificate of factory test shall be filed with the fire commissioner, and *granted* as to Item No. 7, *on condition* that standard wrought iron pipe shall be used throughout the equipment and that the fuel oil burning equipment shall comply with the rules of the board in all other respects.

1031-25-A.

APPELLANT—Valvoline Oil Company, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—125 ft. from shore, nearest Manhattan Beach, opposite Dooley street, in Sheepshead Bay, Brooklyn.

APPEARANCES—

For Appellant: Frank P. Reilly, Mr. Simpson.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

(1031-25-A)

WHEREAS, Valvoline Oil Company, owner, filed, October 7, 1925, an appeal from decision of the fire commissioner, affecting premises Sheepshead Bay, 125 ft. from shore, near Manhattan Beach, opposite Dooley street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 17, 1925, reads:

"With reference to your application for a permit to store petroleum and shale oil at the above location, I regret to inform you that I am without power to grant such a permit for the reason that Sub. Div. 2 of Section 111, Chapter 10, Code of Ordinances, provides that a special permit may be issued authorizing the storage of petroleum and shale oil and the liquid products thereof and of coal tar in barges of steel or other approved construction.

"The use of a wooden barge for the storage of petroleum products is a violation of the above mentioned section.

"You are therefore ordered to forthwith remove all petroleum and shale oil and the liquid products thereof from the wooden barge located in Sheepshead Bay opposite Dooley St., Bklyn., and discontinue the further storage of petroleum and the liquid products on the said wooden barge."

and

WHEREAS, the structure in question is a wooden barge, 87 ft. long, 30 ft. wide and 7 ft. deep; the barge being anchored 125 ft. off shore in Sheepshead Bay; and

WHEREAS, appellant contends that the exterior of the structure is entirely covered to the water line and partially covered below the water line by No. 16 gauge sheet iron; that the dock is concreted and absolutely no wood is ex-

# MINUTES

posed on the boat above the water line; that the company maintains not more than 3,000 gallons in each tank of gasoline, although the total capacity is 10,450 gallons, and that this is only in the summer season; that only 1,500 gallons of fuel oil and 500 gallons of kerosene are carried; that the approval of the United States Government has been procured for the maintenance of the barge at the point in question.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the location of the barge shall be as directed under permit issued by the Federal authorities having jurisdiction, and that the exterior of the barge shall be covered with steel not less than 16 gauge, the deck to be covered with reinforced concrete, and that the total capacity of gasoline stored at any one time shall not exceed the quantity stipulated in this appeal, namely, 3,000 gallons for each tank, and that the oil storage shall be maintained on or above the deck of barge.

377-25-A.

APPELLANT—Kaye, McDavitt & Scholer, for Pathe Phonograph & Radio Corporation, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—18-32 Grand avenue, Brooklyn.

APPEARANCES—

For Appellant: Harold L. Fierman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(377-25-A)

WHEREAS, Kaye, McDavitt & Scholer, for Pathe Phonograph & Radio Corp., owner, filed, April 8, 1925, an appeal from an order of the fire commissioner, affecting premises 28-32 Grand avenue, Brooklyn; and

WHEREAS, the order of the fire commissioner, No. 72706-F, dated March 12, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter \* \* \*";

and

WHEREAS, the building is fireproof, reinforced concrete, seven stories in height (81 ft.), 134 ft. by 91 ft. in area; OCCUPIED as a phonograph factory; equipped with a sprinkler system and a standpipe system, extending from the roof to the 1st story, with a 2,500-gallon reserve; and

WHEREAS, appellant contends that the order refers to Building No. 2 only, although the order reads Buildings No. 2 and 4, and contends that the present equipment is adequate; and

WHEREAS, these two (2) units are but a part of a group of buildings, equipped with a standpipe and sprinkler equipment.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that these separate units of the structure shall be not increased in height, area or dimension, and shall be equipped with an approved standard two (2) source sprinkler system.

889-25-A.

APPELLANT—Hemmerdinger Estate Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—South side of Dry Harbor road, 80 ft. from L. I. R. R., Glendale, Queens.

APPEARANCES—

For Appellant: Herman L. Weiser.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(889-25-A)

WHEREAS, Hemmerdinger Estate Corp., owner, filed, September 1, 1925, an appeal from an order of the fire commissioner, affecting premises south side of Dry Harbor road 80 ft. from the Long Island Railroad, Glendale, Borough of Queens; and

WHEREAS, the order of the fire commissioner, No. 80048-F, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per sq. in. extending from cellar to roof, with necessary check valves, and 2½ in. regulation Fire Department outlets on each story (including basement, cellar and roofs) placed within main stairway enclosure \* \* \*";

and

WHEREAS, the building is non-fireproof, four stories (50 ft.) in height, 100 ft. by 200 ft., about 20,000 sq. ft. in area; OCCUPIED as a factory building; about 25 persons on each story; and

WHEREAS, the appellant claims the building is of mill construction, equipped with a sprinkler system, supplied by a roof tank of 50,000 gallons capacity; also an underground tank of 120,000 gallons capacity; that there are 350 gallons of chemical extinguishing fluid and three watchmen kept on the premises.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the horizontal exit at the 1st story shall be equipped with an approved fireproof door; that an approved standard sprinkler system shall be installed and maintained throughout the entire building; and *granted* only so long as the conditions as to occupancy and use remain substantially unchanged.

945-25-A.

APPELLANT—Thomas W. Lamb, for Wm. Fox Realty Co., Inc., owner.

SUBJECT—Request for reopening—Re: appeal from decision of superintendent of buildings.

PREMISES AFFECTED—126-138 East 14th street and 123-135 East 13th street, Manhattan.

APPEARANCES—

For Appellant: Thomas W. Lamb.

For Administration: Assistant Engineer Gardner of bureau of buildings.

ACTION OF BOARD—Appeal reopened and restored to calendar and granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND MODIFY—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(945-25-A)

WHEREAS, Thomas W. Lamb, for the Wm. Fox Realty Company, Inc., owner, filed, September 15, 1925, an appeal with the board of standards and appeals from a decision of the superintendent of buildings, affecting premises 126-138 East 14th street and 123-135 East 13th street, Borough of Manhattan; and

WHEREAS, the original decision of the superintendent of buildings, dated September 11, 1925, was affirmed, and appellant filed a new decision of the superintendent of buildings, dated January 6, 1926, reading:

# MINUTES

"7. Proposed auditorium extending over 14th Street building is unlawful.";

and

WHEREAS, the appellant has filed plans and applications with the superintendent of buildings, proposing to erect a fireproof theatre building, six stories (100 ft.) in height, 45 ft. 9 in. by 206 ft. 6 in.; 3,647 seats total capacity; the new theatre building to surround and extend over the existing two-story non-fireproof store and office building facing 14th street, about 100 ft. by 68 ft.; the theatre portion to be entirely separated by brick walls and concrete floor arches, 12 in. in thickness, from the store portion; and

WHEREAS, this appeal was denied by the board at its meeting October 27, 1925, the question of exit being involved, and appellant submitted a new plan to the superintendent of buildings and the superintendent of buildings has approved the exits and the matter now submitted to the board is as to the proposed auditorium extension over the store portion on 14th street; and

WHEREAS, the question before the board is consideration of the existing stores on the frontage of the property in relation to the erection of proposed theatre.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the existing business structure be separated from the proposed theatre by walls of approved masonry not less than 12 in. in thickness, unpierced throughout their entire height and length; that the said business structure throughout shall be of fireproof construction and that the roof slab of same shall be of reinforced concrete, not less than 12 in. in depth; that the existing business structure shall not be increased in height, area or dimensions, and shall be equipped throughout with a standard approved wet sprinkler system; that the use and occupancy of the business portion of the structure shall be non-hazardous as to classification, and shall be restricted to business and retail stores.

THE RESOLUTION:

(1306-24-A)

WHEREAS, Yankauer & Davidson, for Marino L. Pomares, and others, owners, filed, November 6, 1924, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 276, 278, 280, 286, 288, 294, 296, 300, 318, 320, 324, 328, 332, 336, 338 and 340 Chauncey street, Astoria, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated October 21, 1924, reads:

"Order No. 90870-LC:

"With reference to your application dated February 26th, 1924, for a permit to maintain a garage at the above location, I regret to inform you that I am without power to grant such a permit for the reason that Section 154, Chap. 10, Code of Ordinances,

provides that a permit shall not be issued for a garage in a building in which more than two (2) stories above the garage are used as living apartments.

"You are therefore ordered to remove all automobiles from the premises and discontinue the maintenance of a garage on the premises.";

and

WHEREAS, the premises consist of a number of buildings located on Chauncey street, each non-fireproof, three stories and basement in height, 18 ft. by 34 ft. in area. OCCUPIED: Basement, boiler room and garage; upper stories as a dwelling; and

WHEREAS, appellant submitted a certificate of occupancy permitting the use of the premises as a garage and dwelling, issued by the bureau of buildings; and contends that to comply with the orders of the fire commissioner would be a hardship; and

WHEREAS, this appeal was granted by the board at its meeting March 31, 1925, on certain conditions, and appellant requested a modification of these conditions as to fire escapes.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that a fire escape platform, not less than 3 ft. by 3 ft. in area, embracing at least one window on the two upper stories, connected by iron ladders, be provided, with fixed iron ladder from the lowest balcony to the exterior stoop at the rear of the premises; that a doorway exit be provided at the rear of the building on the 1st story to an exterior stoop with stairs to yard.

## THE RESOLUTION:

(182-23-BZ)

WHEREAS, George A. McWilliams, for McWilliams Realty Company, owner, filed, February 9, 1923, an application, under the building zone resolution, to permit partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of five (5) pleasure motor vehicles; premises 1240 Castleton avenue, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 12, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Castleton avenue is in a business district; that Dongan street is in a residence district, and that Taylor street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 8, 1925, reads:

"Your application, N. B. 1621-1925, filed Sept. 4th, for the construction of a five-car garage at E. S. Dongan St., 85 ft. S. Castleton Ave., W. N. B., is hereby disapproved, said location being in a residence zone."

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 29 ft. and a depth of 50 ft.; to be occupied as a garage for the storage of five (5) pleasure motor vehicles; and

WHEREAS, this application was dismissed for lack of prosecution December 18, 1923, and reopened by vote of the board; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 7-b of the building zone resolution and that he failed to establish practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of a theatre extending into a residential district. \* \* \*";

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, located on a plot with a frontage of 108.15 ft. and a depth of 160 ft. 6 in. and 119 ft. 3 in., irregular; to be occupied for store and theatre purposes; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7-c of the building zone resolution, and also that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the occupancy of the premises for motion picture theatre building and business use shall be restricted to and not exceed a depth of 129 ft. southerly from the corner formed by the intersection of Kings highway and East 18th street; the rear wall running parallel with Kings highway; that there shall be no opening from the theatre structure on the East 18th street front of any nature or description other than doorways required by the building code as emergency exits, which doors shall remain closed at all times; that there shall be a return brick pier of not less than 12 in. on Kings highway at the corner formed by the intersection of East 18th street and Kings highway; that the remaining parcel of this property, approximately 41 ft., more or less, fronting on East 18th street shall be developed for conforming use, private dwelling, and said structure shall be erected at the same time as the proposed motion picture theatre, and the frame and roof shall be enclosed before the first tier of beams of the theatre is installed; that there shall be no advertis-

ing, billboards, signs or display of any nature or description permitted on the East 18th street front of said proposed theatre structure; that the street frontage shall be finished in face brick or natural stone, with architectural terra cotta or stone trimmings; that the exterior of the rear (southerly) wall shall be finished in light-colored face brick; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months.

1021-25-BZ.

APPLICANT—William F. Doyle, for Daniel P. Devaney, owner.

SUBJECT—Application (re: decision of fire commissioner), under section 21 of the building zone resolution, to permit in a business district the installation and maintenance of a gasoline selling station.

THE RESOLUTION:

(1021-25-BZ)

WHEREAS, William F. Doyle, for Daniel P. Devaney, owner, filed, October 5, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station; premises east side Coney Island avenue, 315 ft. south of Avenue N, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 12, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Coney Island avenue is in a business district; that East 12th street and Avenue N are in a residence district; and

WHEREAS, the decision of the fire commissioner reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Appeals.";

and

WHEREAS, the premises consist of a plot of ground, 50 ft. by 100 ft., upon which it is proposed to erect and maintain a gasoline selling station, consisting of a small building located near the center of the plot, and also gasoline tanks and pumps; and

WHEREAS, the board deemed that the applicant failed to prove practical difficulties or unnecessary hardship in the way of carrying out the strict letter of the building zone resolution.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

THE RESOLUTION.

(1052-25-BZ)

WHEREAS, Edward P. Doyle, for Herman Lieberman, owner, filed, October 16, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 56-58 Kosciusko street, south side, 374 ft. 10 in. west of Nostrand avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 12, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kosciusko street is in a residence district; that Nostrand avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 30, 1925 (App. 18002-1925), reads:

"The following objections have been filed by the examiners: Proposition contrary to the Zone Resolution, Art. II, Sec. 3. The erection of a public garage in a residence district;"

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 50 ft. and a depth of 100 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, the board deemed there would be practical difficulties and unnecessary hardship in carrying out the strict letter of the building zone resolution, and that applicant was entitled to relief under section 21 of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that

the application be and it hereby is *granted on condition* that the building be restricted to a one-story structure above grade; that any portion of the structure below grade shall be restricted to the maintenance and conduct of a boiler or heating plant for the premises; that the rear and gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings; that there shall be no advertising signs or display permitted on the premises other than one projecting electric sign, indicating the title of the garage; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

67-25-BZ.

APPLICANT—William J. Russell, for Thomas C. Corvan, owner.

SUBJECT—Application (re: order of fire commissioner), under sections 7a and 21 of the building zone resolution, to permit in a business district the maintenance of a motor vehicle repair shop throughout the entire building.

PREMISES AFFECTED—127-129 West 53rd street, Manhattan.

THE RESOLUTION:

(67-25-BZ)

WHEREAS, William J. Russell, for Thomas G. Corvan, owner, filed, January 16, 1925, an application, under the building zone resolution, to permit in a business district the maintenance of a motor vehicle repair shop throughout the building; premises 127-129 West 53rd street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 12, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 53rd street, West 54th street and Sixth avenue are all in business districts; and

WHEREAS, the order of the fire commissioner, dated December 5, 1923, reads:

"1. Discontinue the use of the 5th story for repair shop purposes and cellar for factory purposes (painting of auto bodies) as said use is contrary to certificate of occupancy No. 5485, also discontinue the use of machinery on 2nd and 3rd floors in excess of stipulation of decision of Board of Appeals, Calendar No. 1073-22 Section under which certificate of occupancy was issued. Section 774, Greater New York Charter;"

and

WHEREAS, the existing building is of fireproof construction, five stories in height, with a frontage of 35 ft. and a depth of 90 ft.; to be occupied as motor vehicle repair shop throughout the building; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7-a of the building zone resolution, and that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

# MINUTES

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that any repairs conducted on the premises shall be restricted to manual operation, and there shall be no motor-driven machinery used in the conduct of the business other than a  $\frac{1}{8}$  horsepower portable drill.

562-21-BZ.

APPLICANT—Alfred J. Boulton, for Joseph Petrucci, owner.

SUBJECT—Application for reopening (re: order of fire commissioner), to permit in a residence district the maintenance of a garage for more than five (5) motor vehicles.

PREMISES AFFECTED—418-420 Midwood street, Brooklyn.

APPEARANCES—

For Applicant: Alfred J. Boulton.

THE RESOLUTION:

(562-21-BZ)

WHEREAS, Joseph Petrucci, owner, filed, May 6, 1921, with the board of appeals, an application under the building zone resolution, to permit in a residence district the maintenance of a garage for more than 5 motor vehicles; premises 418-420 Midwood avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application

by the board of appeals at its special meeting July 19, 1921, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Midwood avenue and Rutland avenue are residence districts; and

WHEREAS, the order of the fire commissioner, No. 60288-LC, 1920, dated October 26, 1920, reads:

"Maintenance of your garage is a violation of Section 3 of art. 2 of the Building Zone Resolution of the Board of Estimate and Apportionment of the City of New York, adopted July 25, 1926, inasmuch as motor vehicles stored are for sale, for rent, or for hire, or are subject to charges for storage or used for commercial purposes.

"You are, therefore, ordered to remove from premises all motor vehicles stored, for sale, rent or hire, or subject to charges for storage, or automobiles stored by others than the occupants of residence on the lot of which the garage is an accessory.";

and

WHEREAS, the premises consist of a plot of ground in a residence district, on the rear of which on July 25, 1916, there existed a garage for more than 5 motor vehicles, the garage was extended to the front of the lot in 1918, the present building being non-fireproof, one story in height, 20 ft. by 90 ft. in area; and

WHEREAS, this application was granted by the board at its meeting, July 12, 1921, and June 12, 1923, for a period of 2 years, and applicant requested an extension of the permit for a further period of 2 years.

*Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* for the temporary use of the premises as a garage for a period not to exceed two years from this date.

Adjourned 3.50 p. m.

JAMES O'CONNOR, *Secretary*.

THE RESOLUTION:

(574-25-S)

WHEREAS, Arbuckle Brothers, owner, filed, June 2, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 249-251 Plymouth street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 24, 1924, reads (Order No. 61523-LD):

"1. Provide an outside iron balcony fire escape on the front of building with balconies 4 ft. in width, connected by stairways not less than 22 in. wide, placed at an incline of not more than 45 degrees, extending from the ground to the highest story, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

"2. Extend the interior stairway at the south side of building to the roof, as per Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, three stories in height, 65 ft. by 100 ft. in area; OCCUPIED as a storage house for machinery, patterns and spare parts; 21 persons employed, 1st story, repairing bags; no one regularly employed above 1st story; EQUIPPED with a fire alarm signal system. EXITS: An open interior wooden stairway, extending from the 2nd story to 3rd story; access to 2nd story is had through horizontal opening from building adjoining at north; ROOFS of adjoining buildings same level at north and west; and

WHEREAS, the petitioner contends the building is used solely for storage; that the exits are adequate under such conditions.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition, as to Item 1, that a balcony fire escape shall be provided at the 2nd and 3rd stories with 60 degree connecting stairs and a portable drop ladder from the lowest balcony to the ground; as to Item 2, on condition that a fixed double-rung iron ladder shall be provided from the top story to scuttle in roof; and granted so long as conditions as to occupancy and use shall remain unchanged.

591-25-S.

PETITIONER—Samuel Rosenblum, for Development Leasehold Corp., lessee.

SUBJECT—Variation of labor law as cited in orders of fire commissioner and decision of superintendent of buildings.

Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(591-25-S)

WHEREAS, Samuel Rosenblum, for Development Leasehold Corp., lessee, filed, June 8, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner and the decision of the superintendent of buildings, affecting premises No. 205-7 East 117th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, No. 82098-LD, dated July 9, 1925, and No. 86770-LD, dated November 5, 1925, read:

(82098-LD) Re: Premises 207 East 117th street, Man.

"1. Extend the interior stairway at the east side of building to the roof, as per Section 271 of the Labor Law.

"2. Provide an outside iron balcony fire escape on rear of the building with balconies 4 ft. in width connected by stairways not less than 22 in. wide, placed at an incline of not more than 45 degrees, extending from ground to roof, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law."

(86770-LD) Re: Premises 205 East 117th Street, Man.

"1. Provide an outside iron balcony fire escape on the rear of building with balconies 4 ft. in width connected by stairways not less than 22 in. wide, placed at an incline of not more than 45 degrees, extending from ground to roof, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

"2. Extend the interior stairway at the east side of the building to the roof, as per Section 271 of the Labor Law."

and

WHEREAS, the decision of the superintendent of buildings, dated June 4, 1925, reads:

"4. Fire escapes must be built as required by Section 273 of the Labor Law."

and

WHEREAS, the premises consist of two non-fireproof buildings, each four stories in height, 21 ft. by 48 ft. in area at 1st and 2nd stories, and 21 ft. by 40 ft. in area above. Building No. 205, OCCUPIED, 1st story, manufacturing, shades, 4 persons; 2nd story, manufacturing, embroidery, 11 persons; 3rd and 4th stories, dwelling, 4 persons on each story; Building No. 207, 1st story, manufacturing, mattresses, 3 persons; 2nd story, manufacturing, dresses, 12 persons; 3rd and 4th stories, dwelling, 4 persons on each story. EXITS: An interior wooden stairway in each building, extending from the 1st story to top story; enclosed in wood lath and plastered partitions with wooden doors at openings; an iron ladder to roof scuttle in No. 205, a wooden ladder to roof scuttle in No. 207; ROOFS of adjoining buildings same height at east, one story higher at west; and

WHEREAS, the petitioner proposes to provide an iron ladder to roof scuttle in Building No. 207, to erect a party wall fire escape on rear of buildings, with 60 degree connecting stairs, a gooseneck ladder to roof and a stationary iron stairway to yard; he contends that safe egress from yard may be had to adjoining yards at east and west as there is no dividing fence; he requests the board to accept the above exit conditions in lieu of complying with fire department orders No. 86770-LD and No. 82098-LD, Items 1 and 2, also with the decision of the superintendent of buildings, Item 4, relating to the same subject matter.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* (Order No. 82098), Item 1, that fixed double-rung iron ladder shall be provided to scuttle in roof; as to Item 2, *on condition* that party-wall fire escape shall be provided throughout the rear of the premises with connecting stairs of not less than 60 degrees; that the openings on the factory portion of the structure shall be equipped with fireproof windows, with egress from the yard to the adjoining yard, both to the east and west; and with egress from yard of adjoining premises to yards further east; as to Order No. 86770, Item 1, *granted on condition* that party-wall fire escape shall be provided with not less than 60 degree connecting stairs, with windows on course of factory portion made fireproof and self-closing; with egress to yard and adjoining yards to the east and west; with egress from the adjoining yard to the street; as to Item 2, *on condition* that fixed double-rung iron ladder shall be provided from the top story hall to scuttle in roof; and as to Objection 4 of decision of superintendent of buildings, *granted on condition* that the stipulations set forth in connection with fire department orders Nos. 82098 and 86770, as modified, shall be complied with; *on further condition* that the use and occupancy shall remain unchanged.

## THE RESOLUTION:

(712-25-S)

WHEREAS, Schwartz & Godick, for 45 East 30th Street Corp., owner, filed, July 6, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 39 East 30th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 18, 1925, reads:

"1. Arrange bars on windows, rear of building, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Section 272 of the Labor Law."

and

WHEREAS, the building is non-fireproof, four stories in height, 20 ft. by 100 ft. in area at 1st story and 20 ft. by 90 ft. in area above. OCCUPIED: 1st story, store; upper stories, tenant factories, approximately 25 persons per story, petitioner occupying the 3rd story for the manufacture of dresses, 25 persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions, with metal clad doors at openings; a fire escape on the rear of the building, having fireproof windows along the course thereof, extending from the top story to the roof of 1st story extension; with EGRESS from termination of fire escape by means of adjoining extension roofs and also through building at rear to street; and

WHEREAS, there are two barred windows on the course of the fire escape on the 3rd story; and

WHEREAS, petitioner contends that there is a fireproof

# MINUTES

door leading to the fire escape; that the windows are fixed sash and pivoted; that the top of the fixed partition is 43 in. above the floor level and the area of the opening in the pivoted portion is too small for anyone to go through to the fire escape.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

PETITIONER—Samuel Schlau, for Codington Co., owner.  
SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—630 Sixth avenue, Manhattan.

APPEARANCES—

For Petitioner: Samuel Schlau.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle and Assistant Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(1002-25-S)

WHEREAS, Samuel Schlau, for Codington Co., owner, filed, September 30, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 630 Sixth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 22, 1925, reads (83970-LD):

"1. Enclose the interior stairway at south side of building serving as a required means of exit on all sides with partitions of fire resisting material extending continuously from the floor of the 1st story to the underside of the floor above, including all exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors \* \* \*.

"2. Arrange the fire escapes on the front of the building and the openings leading thereto and the windows opening on the course thereof so that same are in accordance with the provisions of Sections 273 and 274 of the Labor Law \* \* \*.

"SEE NOTE: Among the defects noted on this fire escape are the following: Windows on course not fireproof nor self-closing. No counterbalanced stairway from lowest balcony to ground."

and

WHEREAS, the building is non-fireproof, four stories in height, 24 ft. 8 in. by 60 ft. in area. OCCUPIED: 1st story, restaurant; 2nd story, front, sign painter, 3 persons; rear, employment agency, 2 persons; 3rd story, front, hat manufacturer, 4 persons; rear, novelties, 4 persons; 4th story, front, embroidery, 3 persons; rear, vacant at present. EXITS: An interior non-fireproof stairway, extending from the 1st story to roof; enclosed in 26 gauge metal lath and  $\frac{3}{4}$  in. Portland cement plaster partitions (excluding soffit) on 1st story; and above, enclosed in wood stud, lath and plaster partitions with wood doors at opening; a fire escape on the front of the building having non-fireproof openings along the course thereof, extending from the top story to the 1st story with counterbalanced sliding drop ladder to street; ROOFS of adjoining buildings to north same level, to south 10 ft. lower; and

WHEREAS, petitioner proposes, in re: to the stairway, to cover with sheet iron the soffit of the stairs leading from the 1st to 2nd story and, also, to make the windows along the course of the fire escape fireproof and self-closing, and contends that a counterbalanced stairway would obstruct the entrance to and also mar the appearance of the store.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 2, only so far as it affects counterbalanced stairs, *on condition* that a counterbalanced drop ladder in guides shall be provided from the lowest balcony to the street; and that the petition as to Item 1 be and it hereby is *denied*.

THE RESOLUTION:

(1019-25-S)

WHEREAS, William F. Doyle, for Kermacoe Realty Co., owner, filed, October 5, 1925, a petition for variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 257-267 West 39th street, Manhattan; and

WHEREAS, the decision of the superintendent of buildings, Application No. 131-25, dated September 3, 1925, reads:

"Fireproof windows should be constructed as per rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, 16 stories in height, 126 ft. 6 in. by 100 ft. in area; OCCUPIED, offices, show-rooms and manufacturing; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; and

WHEREAS, the petitioner proposes to eliminate the self-closing devices on all windows, except where they form an exposure and are within 30 ft. from any other opening in any other building and not in the same plane with said opening or when said opening is not more than 50 ft. above a neighboring roof; under such conditions he requests that this petition be granted.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows below the 12th story (inclusive), not within 30 ft. horizontally or 50 ft. vertically of adjoining exposures, or on the course of fire escapes, elevator shafts or stairways, *on condition* that the requirements of the labor law shall be complied with in all other respects.

## THE RESOLUTION:

(1020-25-S)

WHEREAS, William F. Doyle, for Brooklyn Fire Brick Works, owner, filed, October 5, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 87-97 Van Dyke street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 14, 1925, reads (Order No. 82593-LD):

"1. Provide an additional means of exit from 2nd story, pattern shop at west side of building as per rule 3 of the Board of Standards and Appeals adopted July 29, 1924.";

and

WHEREAS, the building is non-fireproof, two stories in height, 200 ft. by 225 ft. and 330 ft., irregular in area. OCCUPIED: 1st story, brick manufacturing, 60 persons; 2nd story, pattern shop, 5 persons. EXITS: An open interior wooden stairway, extending from the 1st story to 2nd story; no adjoining buildings; and

WHEREAS, the petitioner contends that the occupancy of 2nd story is very small; that there is nothing combustible in the building; under such conditions he requests the board to accept the existing exits as sufficient.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that an iron balcony at the front of building, embracing not less than three (3) windows, with a portable ladder, hung on the balcony, shall be provided.

## THE RESOLUTION:

(1043-25-S)

WHEREAS, Isaac Dublier, owner, filed, October 13, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 131 West 21st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 12, 1925, reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at north side of building, by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street \* \* \*.";

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 98 ft. in area at 1st story and 25 ft. by 82 ft. in area above; OCCUPIED for the manufacture of

embroidery, 50 persons above the 1st story; EQUIPPED with a fire alarm signal system. EXITS: An interior non-fireproof stairway, extending from the 1st story to roof; enclosed in fire resisting partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the yard; with EGRESS from the termination of the fire escape by means of open yards at rear; ROOFS of adjoining buildings to east 6 ft. lower, to west 100 ft. higher; and

WHEREAS, petitioner contends that the fence between the yard of the premises in question and the yard of the premises to the east has been removed and that permission to use the adjoining yard and building affording egress to street was filed with the bureau of buildings and a certificate of occupancy issued.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and the petition be and it hereby is granted on condition that open and unobstructed egress shall be maintained from the termination of fire escapes between the two premises, with egress from the adjoining premises at east to the street; and granted so long as conditions as to use and occupancy otherwise shall remain unchanged.

## THE RESOLUTION:

(1055-25-S)

WHEREAS, Philip Strobel & Sons, Inc., lessee, filed, October 16, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 40-42 Elizabeth street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 7, 1925 (Order No. 76679-LD), reads:

"1. Extend the interior stairway at the south side of building to the roof, as per Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories in height, 50 ft. by 90 ft. in area; OCCUPIED for the manufacture of furniture; cellar, planing, 3 persons; 1st story, mill work, 9 persons; 2nd story, woodworking, 13 persons; 3rd story, finishing, 6 persons; 4th story, assembling, 3 persons; 5th story, storage only; EQUIPPED with a fire alarm signal system. EXITS: Two interior wooden stairways, extending from the 1st story to top story, a double-rung ladder to roof scuttle (the northerly stairway extends to roof); enclosed in wooden partitions on 1st story only, open above; a fire escape on the front of the building, having non-fireproof openings along the course thereof, extending from top story to 2nd story, with drop ladder to sidewalk; ROOFS of adjoining buildings same level at north, one story lower at south; and

WHEREAS, the petitioner contends that egress to roof is adequate in that the northerly stairway extends to the roof, and a double-rung ladder extends to roof scuttle over the southerly stairway.

# MINUTES

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the interior stairway, top story, southerly side, *on condition* that one interior stairway shall be continued to roof in accordance with section 271; that a fixed double-rung iron ladder shall be provided from top story to scuttle in roof; and *granted* so long as conditions as to occupancy and use shall remain unchanged.

THE RESOLUTION:

(1056-25-S)

WHEREAS, Levy & Berger, for Joseph H. Kliegman, owner, filed, October 16, 1925, a petition for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 237 DeKalb avenue, Brooklyn; and

WHEREAS, the order of the fire commissioner, No. 76082-LD, dated April 23, 1925, reads:

"Provide safe and unobstructed egress from the lower termination of the fire escape at rear side of building by constructing a fireproof passageway with an unobstructed width of at least 3 ft. throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Sec. 273, Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories in height, 20 ft. by 61 ft. 8½ in. in area at the 1st story and 20 ft. by 40 ft. in area above; OCCUPIED as a laundry; total of 19 persons in the entire building. EXITS: An open interior wooden stairway, extending from the 1st story to roof; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the 2nd story balcony, which extends over the roof of 1st story, rear extension, and stationary stairway 24 in. wide leading down to yard level, with no legal means of egress from termination of fire escape to the street; ROOF of adjoining buildings on the same level; and

WHEREAS, the petitioner contends that there is a gate in the fence leading to adjoining yard at the west; that the exits are adequate, and requests the board to accept the existing exits as sufficient without change.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination of fire escapes at rear, *on condition* that fire escapes otherwise shall comply with the labor law, and that egress shall be provided to the yard of adjoining tenement house to the west, with egress therefrom direct to street; and *granted* so long as conditions as to occupancy and use shall remain substantially unchanged.

from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises No. 62-72 West 47th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated October 17, 1925, reads:

"11. No window pane may exceed 720 square inches in area. Sash not stationary—should be self-closing. Section 264 Labor Law and Rule 503 Industrial Code."; and

WHEREAS, the building is fireproof, 16 stories in height, 118 ft. by 100 ft. 5 in. in area; OCCUPIED as offices and 25 per cent manufacturing; about 95 persons on each story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to install  $\frac{1}{4}$  in. plate glass windows at street front, 1st and 2nd stories, part stationary and part pivoted, the maximum size of glass at 1st story to be 9 ft. by 12 ft. 6 in.; at 2nd story 5 ft. by 12 ft. 6 in.; he claims that all other windows will comply with the labor law; that the architectural design of the front would be materially affected if smaller glass was used on the two lower stories.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects windows on street front on two lower stories, on condition that the openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; and that the labor law requirements shall be complied with in all other respects.

THE RESOLUTION:

(1082-25-S)

WHEREAS, George and Edward Blum, for 64-70 West 48th Street Corp., owner, filed, October 23, 1925, a petition for variation from the requirements of the labor law, as cited in decision of superintendent of buildings, affecting premises 64-70 West 48th street, Manhattan; and

WHEREAS, the decision of the superintendent of buildings, No. 371, dated October 17, 1925, reads:

"This amendment is disapproved with the following objection:

"3. Panes of glass having a greater area than 720 sq. in. are unlawful. Sec. 264 Labor Law, Rule 503 Industrial Code."; and

WHEREAS, the building is fireproof, 16 stories in height, 83 ft. 4 in. by 100 ft. 4 $\frac{1}{2}$  in. in area; OCCUPIED as offices and 25 per cent manufacturing; about 70 persons on each story; and EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; and

WHEREAS, the petitioner proposes to install  $\frac{1}{4}$  in. plate glass windows on the street front; the maximum size of glass on the 1st story to be 11 ft. by 13 ft., on the 2nd story to be 6 ft. 10 $\frac{3}{4}$  in. by 7 ft. 4 in.; he claims that all other windows will comply with the labor law; that the architectural design of the building would be destroyed if compelled to divide the glass windows into small sections on the first two stories at the front.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the street front of the two lower stories, on condition that the opening shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(1084-25-S)

WHEREAS, John Cox, Jr., for Clark Equipment Co., owner, filed, October 23, 1925, a petition for variation from the requirements of the labor law, as cited in decision of superintendent of buildings, affecting premises 109-115 West End avenue, Manhattan; and

WHEREAS, the decision of the superintendent of buildings, App. No. 2236, dated October 19, 1925, reads:

"1. Two means of exit must be provided remote from each other. Sec. 270."; and

WHEREAS, the building is fireproof, two stories in height, 100 ft. 6 in. by 100 ft. in area. OCCUPIED: 1st story, manufacturing of car springs, 30 persons; the occupancy of 2nd story not decided upon. EXITS: An interior fireproof stairway, extending from the 1st story to the 2nd story, enclosed in fireproof partitions with fireproof doors at openings; a fireproof ramp extending from the 1st story to the 2nd story; ROOFS of adjoining buildings two stories higher at south, same height at west; and

WHEREAS, the petitioner proposes to provide an exit door 2 ft. by 6 ft. from furnace room to street, with an iron stairs extending to sidewalk level, and he contends the existing ramp is an adequate second means of egress from the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects 2nd story, on condition that a fireproof stairway enclosure shall be provided and maintained in addition to the existing ramp from 2nd story, with direct egress to street; that an iron balcony shall be provided from the furnace room on the 65th street side of structure, with fixed iron stairs to the sidewalk, not more than 18 in. in width, additional to a fireproof doorway opening from furnace room to the floor area; and that a fixed iron stair shall be provided from the boiler room to 1st story, in addition to exit to street.

THE RESOLUTION:

(1085-25-S)

WHEREAS, Samuel Rosenblum, for Rutzler Realty Company, owner, filed, October 23, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 404-8 East 49th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 7, 1925, reads (Order No. 83587-LD):

"1. Provide an outside iron balcony fire escape on the front of building with balconies 4 ft. in width connected by stairways not less than 22 in. wide, placed at an incline of not more than 45 degrees, extending from the ground to the highest story, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law."

and

WHEREAS, the building is fireproof, three stories in height, 75 ft. by 100 ft. 5 in. in area at 1st story and 75 ft. by 94 ft. 5 in. in area above. OCCUPIED: 1st story, pipe cutting, 15 persons; 2nd story, machine shop, 12 persons; 3rd story, manufacturing extracts, 5 persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fireproof ramp at rear of the building, having fireproof doors at all openings, extending from 1st story to the top story; ROOFS of adjoining buildings 2 stories lower at east, 10 ft. higher at west; and

WHEREAS, the petitioner contends that the exits are adequate; that the ramp was certified to the fire department by the labor department prior to the year 1916; that it was practically accepted as a stairway from the fact that no orders were issued before 1925; and, in view of the above facts, he requests the board to accept the existing exits as sufficient without further change.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, so long as ramp at rear of building shall be maintained free and unencumbered, on condition that an additional self-closing fireproof door shall be provided at the westerly end of the cross partition on the top story, between the front and rear sections; and granted so long as the present use and occupancy shall remain substantially unchanged.

1091-25-S.

PETITIONER—John J. Gilmartin, for Louis F. Rhoades, et al, owners.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—9 North Moore street, Manhattan.

APPEARANCES—

For Petitioner: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle and Assistant Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(1091-25-S)

WHEREAS, John J. Gilmartin, for Louis F. Rhoades, et al., owner, filed, October 26, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 9 North Moore street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 10, 1925, reads (Order No. 84971-LD):

"1. Enclose the interior stairway at the west side of building, serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 feet above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"2. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following:

"Windows on course not fireproof, self-closing. No steps from floor to sills opening on balconies. Not screened to a height of 4 ft. 6 in. No 45 degree connecting stairways. No counterbalanced stairway from lowest balcony to ground. No fireproof passageway to street."

and

WHEREAS, the building is non-fireproof, six stories in height, 24 ft. by 72 ft. in area at 1st story and 24 ft. by 67 ft. in area above; OCCUPIED for the manufacture of mirrors, 13 persons above the 1st story. EXITS: An interior wooden stairway, extending from the 1st story to roof; enclosed in wooden lath and plastered partitions with wooden doors at openings; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from main roof to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of a bridge connecting with the rear 2nd story balcony on No. 10 Beach street, thence a drop ladder to vacant lot adjoining at west; ROOFS of adjoining buildings 30 ft. lower at east, vacant lot at west; and

WHEREAS, the petitioners contends that there is no inflammable or combustible materials on the premises; that there are only 16 persons in the entire building, and, therefore, request the board to modify fire department order No. 84971-LD, Items 1 and 2.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 2, only so far as it affects windows on top floor and egress from the termination at the 2nd story, on condition that a connecting bridge shall be provided at the termination of the fire escape, connecting with the balcony fire escape of premises directly at rear, No. 10 Beach street, with counterbalanced drop ladder in guides from the lowest balcony of the Beach street fire escape to the open lot or

# MINUTES

parking space to the west, formed by intersection of Hudson and North Moore streets; and *granted* so long as conditions as to occupancy and use remain unchanged; as to Item 1, the petition be and it hereby is *denied*.

1145-25-S.

PETITIONER—George E. Strehan, for 8-10 West 37th Street Corp., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—8-10 West 37th street, Manhattan.

APPEARANCES—

For Petitioner: George E. Strehan and Thomas P. Field.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE—

Affirmative: Commissioner Guilfoyle and Assistant Chief Martin ..... 2

Negative: Chairman Walsh, Commissioners Connell and Flanagan ..... 3

Absent ..... 0

THE RESOLUTION:

(1145-25-S)

WHEREAS, George E. Strehan, for 8-10 West 37th Street Corporation, owner, filed, November 6, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 8-10 West 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings (N. B. 671-1923), dated October 31, 1925, reads:

"10. The means of egress are inadequate. Two lawful means of egress should be provided from each floor area. One stairway should be an exterior enclosed fireproof stairway. Every door leading to or opening on a stairway should swing outwardly and be 3 ft. 8 in. wide. All required stairways should extend to roof. Sec. 270 Labor Law.

"11. All structural steel should be encased in 2 inches of concrete. Section 264 Labor Law.

"12. All interior trim should be of incombustible materials. Section 264 Labor Law.

"13. All windows should conform to Section 264.

"16. The means of ventilating toilet compartments is unlawful (Sections 131 and 133 Industrial Code).";

and

WHEREAS, the building is to be fireproof, ten stories (118 ft. 6 in.), 40 ft. 11 in. by 98 ft. 9 in. in area 1st story and 40 ft. 11 in. by 87 ft. 9 in. above. OCCUPIED: 1st story, stores; upper stories, showrooms, offices and proposed occupancy of 25 per cent manufacturing, 80 persons per story; EQUIPPED with sprinkler system; the MEANS OF EGRESS consisting of an interior enclosed fireproof stairway from the 1st story to the roof; an exterior stairway on rear of building, with mezzanine fireproof passageway connecting with interior stairway at 1st story; the ROOF of adjoining building to the east is 35 ft. lower, to the west is 20 ft. higher; and

WHEREAS, the petitioner contends that the building is provided with interior trim of incombustible material; that the structure is only 18 ft. over the height limit, where an exterior enclosed fireproof stairway is required by the labor law; that there is an exterior open iron stairway; that only a 25 per cent occupancy factory is asked for; that structural steel columns and girders are encased in 2. in of concrete as required by the labor law, but that the intermediate floor beams have only 1½ in.; that the building is fully sprinklered; that all windows in the building conform to the labor law, except the show windows on 1st story; that the means of ventilating toilet compartment is by means of vent shaft with mechanical exhaust at the top.

*Resolved*, that the decision of the superintendent of build-

ings be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(650-25-S)

WHEREAS, Louis Sonnenberg, for Manhattan Stationery Company, Inc. (Louis Sonnenberg, president), owner, filed, June 23, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in order of fire commissioner, affecting premises No. 18 East 23rd street, Manhattan; and

WHEREAS, the order of the fire commissioner, No. 76040-LD, reads:

"1. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law \* \* \*.

"Among defects noted are the following:

"No balcony at 2nd story.

"No stationary or counterbalanced stair to ground.

"No fireproof passageway to street from termination.

"Windows on course of fire escape not self-closing.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 98 ft. in area at the 1st story and 25 ft. by 68 ft. above. OCCUPIED: 1st story, stationery salesrooms, 5 persons; 2nd story, office and stationery stock room, 5 persons; 3rd story, occupied by owner for printing, 10 persons; 4th story, rear, office and salesroom for smoking pipes, 1 person; front, vacant at present; 5th story, manufacturing jewelry, 13 persons; and EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fire-resisting partitions with fire doors at openings, a 60 degree fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the 3rd story balcony, with egress from the termination of the fire escape by means of an iron balcony and stair to the extension roof of the building to the east; ROOFS of adjoining building to east same level, to west 12 ft. higher; and

WHEREAS, petitioner contends, in view of the small area and also light occupancy of premises, that the existing means of exit are adequate.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and the petition be and it hereby is *granted on condition* that a 60 degree connecting balcony fire escape shall be provided on front of building with counterbalanced drop ladder in guides from termination of lowest balcony; and that the fire escapes shall conform in all other respects with Section 271 of the labor law.

THE RESOLUTION:

(870-25-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for F. DePeyster Foster, trustee, owner, filed, August 27, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 495 West Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 20, 1925, reads (Order No. 77986-LD):

"3. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"NOTE:—Among the defects noted on this fire escape are the following:

"Windows on course not self-closing. Kalamein covering on doors and windows opening on course corroded and eaten away both on inside and outside. Needs painting. No safe passageway to the street from the termination.";

and

WHEREAS, the building is non-fireproof, six stories in height, 23 ft. 10 in. by 94 ft. 8 in. in area. OCCUPIED: 1st story, stores; 2nd story, manufacturing dolls, 7 persons; 3rd story, manufacturing mirrors, 5 persons; 4th story, electro-plating, 4 persons; 5th and 6th stories, manufacturing trimmings, 5 persons on each story. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in terra cotta block partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 2nd story; with no legal means of EGRESS from the termination of the fire escape to the street; ROOFS of adjoining buildings 3 stories lower at south; 5 ft. lower at north; and

WHEREAS, the petitioner claims that all items of the labor law have been complied with except the providing of a fireproof passageway to the street; he contends that there is a stairway from the termination of rear fire escapes at 2nd story leading into the yard of adjoining premises at north; that there is a gate in the fence of said adjoining premises leading to another premises at north; that there is also a stairway from the termination of rear fire escapes at 2nd story connecting with premises adjoining at south and to rear fire escapes on premises which face on West Houston street; that the occupancy is very light.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of fire escapes at rear, on condition that fixed iron stairs shall be provided from lowest balcony to the yard of adjoining premises to the north, with egress therefrom to street.

THE RESOLUTION:

(914-25-S)

WHEREAS, the Sanitas Company, Inc., owner, filed, September 9, 1925, a petition for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises No. 33 Keap street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 6, 1925, reads (Order No. 83526-LD):

"1. Extend the interior stairway at east side from 2nd to 3rd story as per Section 271 of the Labor Law.";

and  
WHEREAS, the premises consist of a non-fireproof building, three stories in height, 25 ft. by 75 ft. in area, and a one-story non-fireproof extension to the south, 15 ft. by 75 ft. in area; OCCUPIED for the manufacture of pine tar products; 1st story, 2 persons; 2nd story, 8 persons; 3rd story, used for storage, no occupancy. EXITS: An interior wooden stairway at the westerly end of the building, extending from the 1st to 3rd story (with ladder to scuttle in roof), enclosed in wooden partitions with wooden doors at openings; and also a wooden stairway at the easterly side of the building, extending from the 1st to 2nd stories, enclosed in wooden partitions with wooden doors at openings; and

WHEREAS, petitioner contends, in view of the small size of the building and the limited occupancy, that the existing means of egress are adequate.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION:

(1069-25-S)

WHEREAS, George and Edward Blum, for 26th Street and 8th Avenue Corp., owner, filed, October 20, 1925, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises 255-259 West 26th street, 322-326 Eighth avenue, Borough of Manhattan; and

# MINUTES

WHEREAS, the decision of the superintendent of buildings, dated October 15, 1925, reads:

"1. Window panes may not exceed 720 square inches in area—Labor Law—Section 264-7.";

and  
WHEREAS, the building is fireproof, 20 stories in height, 71 ft. 4 in. by 125 ft. in area. OCCUPIED: 1st story, stores and offices; upper stories, offices, show rooms and 25 per cent manufacture, approximately 100 persons per story; and

WHEREAS, there are openings on the Eighth avenue and also in 26th street, in the street walls of the building on the 1st, 2nd and 3rd stories, glazed with  $\frac{1}{4}$  in. plate glass; the maximum area of the glass being, 1st story, 17 ft. by 11 ft. 4 in.; 2nd story, 14 ft. 6 in. by 9 ft.; 3rd story, 7 ft. 6 in. by 7 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lowest three stories and would also affect the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects windows on street front of the three (3) lower stories, on condition that openings shall be provided with approved metal frames and sash and glazed with  $\frac{1}{4}$  in. polished plate glass; and that the requirements of the labor law in all other respects shall be complied with.

THE RESOLUTION:

(1151-23-S)

WHEREAS, William G. Willis, for La Contento Cigar Co., Inc., lessee, filed, October 5, 1923, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 921 Third avenue, Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 14, 1923, reads:

"1. Arrange the fire escape on the rear of building \* \* \*.

"Among the defects noted on this fire escape are the following:

"Windows on course not fireproof, not self-closing.

"Stairs are not 50 degrees.

"No stairway from top balcony to roof.

"No passageway from termination of fire escape to street.

"2. Extend the interior stairway at the north side of building to the roof, \* \* \*.

"3. Provide an additional required means of exit on the first floor of building, preferably located at the rear of building, in accordance with the requirements of Sec. 271 of the Labor Law.";

and

WHEREAS, the building is frame and brick, four stories in height, 20 ft. by 104 ft. in area in the 1st story and 20 ft. by 50 ft. above. OCCUPIED: 1st story, cigar mfr., 10 persons; 2nd story, frame gilder and leather worker (novelties), 2 persons; 3rd story, dwelling, 4 persons; 4th story, dwelling, 2 persons; the means of egress consists of an interior stairway, extending from the 1st story to the 4th story, with scuttle and ladder to roof, enclosed in fireproof partitions in the 1st and 2nd stories and lath and plaster partitions above, with wood doors at the openings, a party wall fire escape on the rear of the building connecting with adjoining building to the south with a gooseneck ladder from the top balcony to the roof and with gooseneck ladder from extension roof in the 2nd story to the yard level, with egress from yard through gate in fence to adjoining premises; and

WHEREAS, petitioner contends that the 3rd and 4th stories are occupied as dwellings; that there is an iron stair to scuttle in the roof, and requests the acceptance of the means of egress; and

WHEREAS, this petition was granted by the board at its meeting December 18, 1923, on certain conditions, and petitioner requested a modification of these conditions as to location of means of egress from termination of fire escape.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that egress from the termination of fire escape shall be by means of a doorway to the adjoining premises to the north; that there shall be no factory manufacturing use or occupancy above the 2nd story, and that the factory occupancy shall be discontinued on or before October 1, 1927.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held Wednesday afternoon, November 5, 1924, as they appeared in Bulletin No. 46, Vol. IX, are hereby corrected to read as follows:

### THE RESOLUTION:

(1051-24-S)

WHEREAS, James W. Byrnes, for Wichert, Inc., owner, filed, August 19, 1924, a petition, with the board of standards and appeals, for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 54-60 Schenectady avenue and 1720-34 Atlantic avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 25, 1924, reads:

"1. Arrange the fire escape on the east side of building and the openings leading thereto \* \* \*.

"NOTE: Among the defects noted on this fire escape are the following:

"Windows on course not fireproof nor self-closing. No balcony at 2nd story. No stairway to ground. Does not extend to roof.

"2. Provide an additional means of exit from the cellar, said exit to be located at the east side of the building in accordance with the provisions of Section 271 of the Labor Law.

"3. Extend the interior stairway at the southwest side of building to the roof, as per Section 271 of the Labor Law, said extension and the landings and passageways connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 3 ft. above the roof, as per Section 271 and 272 of the Labor Law and Rule 2 of the Industrial Code.

"4. Remove the substandard fire escape at the north, south and the one that extends from the 4th to the 5th story at east side of building or reconstruct in accordance

with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to the ground may be provided. Fire escapes shall be maintained structurally safe and properly painted. No sign of any character shall be placed at openings leading to these sub-standard fire escapes."

and

WHEREAS, the building is non-fireproof, five stories in height, 140 ft. by 60 ft. in area; OCCUPIED, tenant factory, 193 persons in the entire building; the building being equipped with a sprinkler system and a fire alarm signal system; the means of egress consisting of an interior stairway extending from the 1st story to the top story with scuttle and ladder to roof, enclosed in fireproof partitions, with fire doors at the openings; a fire escape on the westerly side of the building with bridge to adjoining building at the 2nd story and stationary stair to ground; a sub-standard fire escape on the Atlantic avenue and one on the Pacific street side of the building; the means of egress from the cellar consisting of ladder to sidewalk on Schenectady avenue and two portable ladders in the areas on Atlantic avenue; and

WHEREAS, petitioner proposes to remove bridge at the 2nd story and to fireproof the windows along the course of the fire escape and to provide flame plate under stairs and to provide gooseneck ladder from top balcony to roof, owing to the fact that the chimney interferes with the stair and landing, and requests to be permitted to retain the sub-standard fire escapes, which he contends are in safe condition.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted* as to Item No. 1 so far as it affects the egress from the top story balcony to the roof, *on condition* that a gooseneck ladder shall be provided from the top story balcony to the roof; *granted* as to Item No. 2 *on condition* that a fixed double rung iron ladder shall be provided from the cellar on the west end of the building to the yard, with egress therefrom through alleyway direct to Atlantic avenue; *denied* as to Items No. 3 and No. 4.

\*Correction—Words "denied as to Items No. 3 and No. 4" added to the end of the resolution.

# FUEL OIL RULES

## CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS.

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, and January 18, 1924.

### Rule 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

## GRADE A FUEL OIL.

### Rule 2. Manner of Storage for Grade A Fuel Oil.

Fuel oil, to be used for commercial, heating and power purposes, shall be at all times contained in metal tanks with all openings or connections through the tops of the tanks.

### Rule 3. General Location of Tanks for Grade A Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

### Rule 4. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

#### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

#### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

#### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

#### Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions.

# FUEL OIL RULES

Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 5. Material and Construction of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free from physical imperfections, such as, laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced entirely by means of rods or bars,

these members should not be spaced greater than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

### Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 5.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{3}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more

# FUEL OIL RULES

than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

### Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Grade A Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-c, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

# FUEL OIL RULES

## Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

## Section 3. Tests for Piping.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

## Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) Fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the

same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

# FUEL OIL RULES

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 12. Burners for Grade A Fuel Oil

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals.

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.

## GRADE B FUEL OIL.

## Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes where stored, shall be at all times contained in closed metal tanks.

## Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.

## Rule 22. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

## Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).

## Rule 25. Piping for Grade B Fuel Oil.

### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding material.

# FUEL OIL RULES

rials. Hose shall be no longer than necessary.

## Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

## Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

## Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

## Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.

## Rule 26. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) See Rule 9 (a) for construction of valves.

(c) A remote control for shutting off the supply of oil to the burners shall be provided.

(d) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure.

## Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.

## Rule 28. Pilot Light.

Automatic systems shall be so designed that the flame cannot be extinguished by operation of the automatic control valve. A pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

## Rule 29. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature of which the oil burning device to be installed is capable.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 30. Fire Protection.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster board or other approved incombustible material. Above the

furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal, or three-fourths ( $\frac{3}{4}$ ) of an inch of Portland cement plaster on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 31. Instruction Cards.

See Rule 14.

## Rule 32. Installation.

See Rule 16.

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

## Rule 34. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 35. Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

WILLIAM E. WALSH, *Chairman.*

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in these rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

Commissioners

HENRY L. CONNELL

JOSEPH FLANAGAN

JOHN GUILFOYLE

CHIEF JOHN KENLON

JAMES O'CONNOR, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—Worth 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board

### CONTENTS

This issue of the Bulletin contains, in the order given—

- Docket.
- Call of Clerk's Calendar.
- The Trial Calendar.
- Notices in Building Zone Cases.
- Minutes of Regular Meeting, January 19, 1926, at 10 a. m.
- Minutes of Regular Meeting, January 19, 1926, at 2 p. m.
- Corrections.
- Rules.
- Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, January 26, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, February 2, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## CALL OF CLERK'S CALENDAR. BUILDING ZONE CASES.

*Tuesday, January 26, 1926, at 2 p. m.*

923-25-BZ.  
 APPLICANT—McCooley and Conroy, for Peter Rinelli, owner.  
 PREMISES—Southeast corner of Bay parkway and 85th street, Brooklyn.  
 APPLICATION, under section 21 of the building zone resolution,  
 TO PERMIT in a residence district the erection of a two-story building to be used for stores on 1st story and for offices on the 2nd story.

979-25-BZ.  
 APPLICANT—McCooley & Conway, for A. E. De Baun, owner.  
 PREMISES—144-18 Hillside avenue, Jamaica, Borough of Queens.

APPLICATION, under sections 21 and 7g of the building zone resolution,

TO PERMIT partly in a residence district and partly in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

982-25-BZ.

APPLICANT—Jacob Katz, for Highway Development Co., owner.

PREMISES—East side of Kings highway, 406.34 ft. north of Foster avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline selling station.

1134-25-BZ.

APPLICANT—Edward P. Doyle, for Morris Levine, owner.

PREMISES—290-292 Ellery street and 861-863 Park avenue, Brooklyn.

APPLICATION, under section 7e of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

1164-25-BZ.

APPLICANT—Logan Billingsley, for Jerome Avenue Exhibition Co., Inc., owner.

PREMISES—West side of Jerome avenue, 144 ft. north of East 176th street, Bronx.

APPLICATION, under sections 7c and 21 of the building zone resolution.

TO PERMIT in a residence district extending from a business district the erection and maintenance of a theater building.

1213-25-BZ.

APPLICANT—Morris L. Kaufman, for Isidore Resnikoff, owner.

PREMISES—4001-4011 Fourteenth avenue, Brooklyn.

APPLICATION, under section 7 (b-c) of the building zone resolution,

TO PERMIT in a residence district extending from a business district the erection and maintenance of a theatre and store building.

## APPEALS FROM ADMINISTRATIVE ORDERS.

*Tuesday, January 26, 1926, at 10 a. m.*

1033-25-A—177-183 East 123rd street, Manhattan.

1047-25-A—150 Broadway, Manhattan.

1112-25-A—83-101 North Third street, Brooklyn.

424-25-A—Northwest corner of Garrison street and Flushing avenue, Maspeth, Queens.

941-25-A—422-430 East 53rd street, Manhattan.

524-25-A—134 West 23rd street, Manhattan.

525-25-A—146 West 23rd street, Manhattan.

526-25-A—153 West 21st street, Manhattan.

692-25-A—2152 Metropolitan avenue, Middle Village, Borough of Queens.

507-25-A—60 Grand street, Manhattan.

508-25-A—64 Grand street, Manhattan.

715-25-A—237 Central avenue, Far Rockaway, Borough of Queens.

# CALENDAR

## BUILDING ZONE APPLICATIONS.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, January 26, 1926*, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

AL. NO. 605-25-BZ—Application, June 11, 1925, under section 21 of the building zone resolution, of Alfred J. Boulton, applicant, on behalf of Hyman Kornreich, owner, to permit in a residence district the erection and maintenance of a building to be used as stores on the 1st story and as dwellings above; premises southeast corner of Dahill road and Ditmas avenue, Brooklyn.

AL. NO. 852-25-BZ—Application, August 21, 1925, under section 21 of the building zone resolution, of Magnuson and Kleinert, architects, on behalf of J. Michaels, Inc., owner, to permit in a residence district the erection and maintenance of a building for business purposes; premises 322 Warren street, Brooklyn.

AL. NO. 970-25-BZ—Application, September 18, 1925, under section 7-e of the building zone resolution, of Henry J. Nurick, architect, on behalf of Herman Weinberg, owner, to permit in a business district the addition of a second story to an existing one-story garage for the storage of more than five (5) motor vehicles; premises 803-811 DeKalb avenue, Brooklyn.

AL. NO. 991-25-BZ—Application, September 28, 1925, under section 21 of the building zone resolution, of William F. Doyle, applicant on behalf of Fordham Triangle Realty Co., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises east side of Jerome avenue, 50 ft. north of 200th street, The Bronx.

AL. NO. 1015-25-BZ—Application, October 2, 1925, under section 7-e of the building zone resolution, of Robert Teichman, architect, on behalf of The 138 West 99th Street Corp., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 136-142 West 99th street, Manhattan.

AL. NO. 1041-25-BZ—Application, October 13, 1925, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Dr. Morris L. Levine, owner, to permit in a business district the change of occupancy of warehouse to a garage for the storage of more than five (5) motor vehicles; premises 178-184 Scholes street, southwest corner of Humboldt street, Brooklyn.

AL. NO. 755-25-BZ—Application, July 20, 1925, under section 7g of the building zone resolution, of Max Cohn, architect, on behalf of Aniello Nappi, owner, to permit in a business district the change of occupancy of a building used for the storage of barrels to a garage for the storage of more than five (5) motor vehicles;

premises 870-872 Metropolitan avenue, Brooklyn.

CAL. NO. 808-25-BZ—Application, August 5, 1925, under section 21 of the building zone resolution, of Abraham H. Schwartz, applicant, on behalf of Homack Construction Corp., owner, to permit in a residence district extending from a business district the erection and maintenance of a building for store and theatre purposes; premises 12 to 24 East Roosevelt avenue, Corona, Borough of Queens.

CAL. NO. 965-25-BZ—Application, September 17, 1925, under section 21 of the building zone resolution, of Angelo Justo, applicant and owner, to permit in a residence district the erection and maintenance of a building to be used for business purposes; premises 758 East 213th street, The Bronx.

CAL. NO. 1004-25-BZ—Application, October 1, 1925, under section 21 of the building zone resolution, of C. N. Whinston and Bro., architects, on behalf of Mah Realty Holding Corp., owner, to permit in a residence district the change of occupancy of the first story of an existing apartment building from dwelling use to stores; premises 2399 Grand concourse, The Bronx.

WILLIAM E. WALSH, *Chairman.*

## APPEALS FROM ADMINISTRATIVE ORDERS.

*Tuesday, January 26, 1926, at 2 p. m.*

721-25-A—60-62 West 116th street and 75-79 West 115th street, Manhattan.

812-25-A—Southeast corner of Hobson avenue, at intersection of L. I. R. R., Laurel Hill, Borough of Queens.

832-25-A—226 East 144th street, The Bronx.

905-25-A—288 Cooper street and 307-315 Moffat street, Brooklyn.

959-25-A—36-48 Flatbush avenue extension, Brooklyn.

966-25-A—South side of Kenmore road, 72 ft. west of Douglas road, Douglaston, Borough of Queens.

1025-25-A—21532-42 Jericho turnpike, Queens Village, Borough of Queens.

1093-25-A—East side of Outlet street at Oakwood Beach, Richmond.

1100-25-A—9 North Moore street, Manhattan.

1175-24-A—628-642 West 45th street, Manhattan.

969-24-A—126 Franklin street and 220-224 West Broadway, Manhattan.

295-25-A—533-537 West 48th street, Manhattan.

## THE RESOLUTION:

(1034-25-A)

WHEREAS, Louis Maurer, owner, filed, October 9, 1925, an appeal from order of the fire commissioner, affecting remises No. 404 West 43rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 12, 1925, reads (Order No. 31157-LC):

"1. Encase the inside storage tank with four-inch terra cotta or eight inches of approved masonry, as per Rule 19, Section 1-a of the Fuel Oil Rules.

"2. Provide an auxiliary fuel oil tank of not less than No. 14 U. S. Gauge metal, as per Rule 20-b of the Fuel Oil Rules.

"3. Remove the auxiliary supply tank or storage tank that is located within ten feet of any fire or flame, as per Rule 22-b of the Fuel Oil Rules.

"5. Provide a hydrostatic test of not less than 100 pounds per square inch for all Grade B fuel oil carrying piping, as per Rule 25, Section 2 of the Fuel Oil Rules.

"7. Provide a remote control for shutting off the supply of oil to the burner in case of an abnormal discharge, as per Rule 26-o of the Fuel Oil Rules.

"8. Provide a pilot light for each automatic Fuel Oil Burning system of an adequate intensity, in each combustion chamber, so arranged as not to be easily extinguished, as per Rule 28 of the Fuel Oil Rules.

"13. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 30 pounds per square inch for all welded tanks, as per Fuel Oil Rules."

WHEREAS, the building is non-fireproof, three stories in height, 18 ft. 7 in. by 48 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, there has been installed a fuel oil burning system, consisting of a 200 gallon fuel oil storage tank, a 100 gallon auxiliary, a Powerlight oil heat burner and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant proposes to encase the storage tank with 4 in. of terra cotta; in re: Item 2, contends that the auxiliary tank is No. 14 gauge metal; in re: Item 3, contends that the tank is located over 10 ft. from the furnace; in re: Item 5, contends that all piping is standard wrought iron; in re: Item 8, contends that the burner is non-automatic and burns without a pilot light; and in re: Item 13, requests the acceptance of an affidavit indicating that a shop test, in conformity with the rules, has been made.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal, as to Item 5, be and it hereby is *granted on condition* that the fuel oil installation shall be equipped with standard wrought iron pipe throughout; as to Item 7, *on condition* that a valve shall be provided between storage tank and auxiliary tank; as to Item 13, *on condition* that a certificate of factory test shall be filed with fire commissioner; and *further*, that the fuel oil installation shall comply with the rules in all other respects; as to Items 1, 2, 3 and 8, the appeal be and it hereby is *denied*.

1063-25-A.

APPELLANT—George Krause, for Knickerbocker 42nd Street Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—1462-1470 Broadway, Manhattan.

APPEARANCES—

For Appellant: George Krause.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners	
Connell, Flanagan, Guilfoyle and Chief	
Kenlon .....	5
Absent .....	0

## THE RESOLUTION:

(1063-25-A)

WHEREAS, George Krause, for Knickerbocker 42nd St. Corp., owner, filed, October 19, 1925, an appeal from order of the fire commissioner, affecting premises No. 1462-70 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 12, 1925, reads (Order No. 31152-LC):

"1. Close up with brick all openings inside of tank enclosure;"

and

WHEREAS, the building is fireproof, 15 stories in height, 100 ft. by 175 ft. in area; OCCUPIED as an office building; and

WHEREAS, a fuel oil burning system has been installed consisting of a 6,500 gallon fuel oil storage tank, burners, valves and piping to make a complete installation; the storage tank being located in a vault below the sidewalk and covered with 2 ft. of sand fill; and

WHEREAS, appellant contends that immediately after the installation of the tank (in an old coal vault) that there were no openings inside the tank enclosure, but that the insurance company ordered openings in the enclosure to afford the escape of gases, and that openings were provided, and appellant contends further that the tank is now properly installed.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1080-25-A.

APPELLANT—Samuel Rosenblum, for Reenoip Realty Co., owner.

SUBJECT—Appeal from orders of fire commissioner.  
PREMISES AFFECTED—149-63 Pioneer street and 144-58 King street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners	
Connell, Flanagan, Guilfoyle and	
Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(1080-25-A)

WHEREAS, Samuel Rosenblum, for Reenoip Realty Co., owner, filed, October 22, 1925, an appeal with the board of standards and appeals from orders of the fire commissioner, affecting premises 149-63 Pioneer street and 144-58 King street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, No. 79937-F, dated June 19, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ in. standard hose attached thereto;"

and Order No. 79937-F, same date, reads:

# MINUTES

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at west side of building, or other approved protection, as per Sec. 375, Art. 18, Chap. 5 of the Code of Ordinances.";

and

WHEREAS, the premises consists of four brick and frame non-fireproof buildings, designated on plans as A, B, C and D; one story in height, except Building C, which is three stories (40 ft. 7 in.) in height; 200 ft. by 200 ft. over all, with an interior court at centre, about 91 ft. by 100 ft.; floor area of Building A is about 6,168 sq. ft.; Building B, about 4,356 sq. ft.; Building C, about 14,700 sq. ft.; Building D, about 2,890 sq. ft.; Buildings A, B and C have communicating door openings; Building D is isolated, with no connecting openings. OCCUPIED: Entire plant is used as machine shop and iron works, 19 persons in all; and

WHEREAS, the appellant contends, re: Order No. 79937-F, that these buildings are filled with old iron, and to provide a standpipe equipment would cause a great hardship; that there is no hazardous condition; re: Order No. 79938-F, that the window openings affected in this order are on the 2nd tier of windows in a clerestory portion of the building, also that this building is 40 ft. 7 in. in height, where these windows appear on the west side.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal, as to Order No. 79937-F, Item 1, be and it hereby is *granted on condition* that the structure as now subdivided shall not be increased in height, area or dimension; as to Order No. 79938, Item 1, *granted on condition* and only so long as the adjoining structure remains unchanged; the height of adjoining building being but one story, the exposure sidewall of which is unpierced throughout its entire height and length; and *further be it resolved* that the appeal is *granted* only so long as the operation and conduct of business maintained on these premises under appeal remain unchanged.

1081-25-A.

APPELLANT—Samuel Rosenblum, for F. H. & J. M. White, owner.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—111-19 North Third street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(1081-25-A)

WHEREAS, Samuel Rosenblum, for F. H. and J. M. White, owners, filed, October 22, 1925, an appeal from orders of the fire commissioner, affecting premises 111-19 North 3rd street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated October 2, 1925, read:

Order No. 85184-F—

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings, and which are not more than 50 ft. above a neighboring

roof at north and west sides of building, or other approved protection, as per Sec. 375, Art. 18, Chap. 5 of the Code of Ordinances.";

Order No. 85185-F—

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ in. standard hose attached thereto.";

and

WHEREAS, the premises consist of six non-fireproof buildings, designated on plans as A, B, C, D, E and F, one story (12 to 20 ft.) in height, except Building C, which is four stories (46 ft. 10 in.) in height, and Building D, three stories (30 ft. 9 in.) in height; 162 ft. by 125 ft. 6 in. over all; floor area of Building A, about 2,050 sq. ft.; Building B, about 2,600 sq. ft.; Building C, about 6,650 sq. ft.; Building D, about 2,300 sq. ft.; Building E, about 5,000 sq. ft.; and Building F, about 1,400 sq. ft. OCCUPIED: 1st story, offices, packing, manufacturing brass goods, 23 persons; 2nd story, offices, manufacturing brass goods, 11 persons; 3rd and 4th stories, manufacturing mattresses, 31 persons on the two floors; and

WHEREAS, there are 17 windows in the westerly wall and 15 windows in the northerly wall affected by Order No. 85184-F; appellant contends that the exposure at west is a factory building, 25 ft. 7 in. away; that the exposure at north is not direct, but is the roof of a one-story extension diagonally at west; and re: Order No. 85185-F, that there is no floor area except the 1st story, where standpipes would be required under the law; that the entire building is adequately provided with an automatic sprinkler system, having three sources of supply.

Resolved, that the orders of the fire commissioner be and they hereby are *modified*, and the appeal, as to Order No. 85184, Item 1, be and it hereby is *granted*, so long as the entire premises shall remain in single ownership and one operation; as to Order No. 85185, Item 1, *granted*, so long as structure as now subdivided shall remain in one ownership; that same shall not be increased in height or area; and that the entire premises shall be equipped throughout with approved wet sprinkler system in accordance with the rules of the board.

1087-25-A.

APPELLANT—Louis Levinner, for Aalef Holding Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—40 East 21st street, Manhattan.

APPEARANCES—

THE RESOLUTION:

(1087-25-A)

WHEREAS, Louis Levinner, secretary for Aalef Holding Corporation, filed, October 24, 1925, an appeal from an order of the fire commissioner, affecting premises No. 40 East 21st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 23, 1925, reads (Order No. 84916-F):

# MINUTES

"1. Properly repair the standpipe system and comply with the following:

"A. Provide reserve of 3500 gallons.

"B. Raise tank to 20 ft. above top outlet.

"C. Provide O. S. and Y. gate valves at check at top.

"E. Provide a siamese 18 in. to 24 in. from ground at 90 degree angle. Section 581, Chapter 5, Code of Ordinances and Rules of the Board of Standards and Appeals."

WHEREAS, the building is fireproof, 11 stories (125 ft.) eight, 25 ft. by 85 ft. in area; OCCUPIED as a factory building, 25 persons on each story; and

WHEREAS, the appellant contends that the present gravity tank on roof is 3,000 gallons capacity, connected with both standpipes and house supply; that it is elevated 10 ft. above highest standpipe outlet; and he proposes to arrange a 5000 gallons reserve solely for standpipe use; to provide fire extinguishers at top story in lieu of complying with Items A and B; he further contends re: to Items C and E, that the present condition of the standpipe system existed since its installation.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1092-25-A.

APPELLANT—Louis A. Woellmer, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—1261 76th street, Brooklyn.

APPEARANCES—

For Appellant: Louis A. Woellmer.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(1092-25-A)

WHEREAS, Louis A. Woellmer, owner, filed, October 26, 1925, an appeal from a decision of the fire commissioner, affecting premises 1261 76th street, Borough of Brooklyn;

WHEREAS, the decision of the fire commissioner, rendered October 6, 1925, reads (Alt. App. No. 2177-1924):

"1. Supply tanks of this type are considered as inside storage tanks, and must conform to the requirements of Rule 19."

WHEREAS, the building is of frame construction, three stories in height, 18 ft. by 37 ft. in area; OCCUPIED as private residence; and

WHEREAS, the appellant has installed a fuel oil heating system in his residence, using a 55 gallon tank in the cellar for the sole supply.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, only so far as it affects a single tank storage not more than 55 gallon capacity, on condition that the oil burning system shall comply with the rules in all respects.

894-25-A.

APPELLANT—Emil Guterman, for Ben. Litvin & Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—1470 Pitkin avenue, Brooklyn.

APPEARANCES—

For Appellant: Emil Guterman.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal denied.

THE RESOLUTION:

(619-25-A)

WHEREAS, Emil Guterman, for Ben Litvin & Co., owner, filed, June 15, 1925, an appeal from order of the fire commissioner, affecting premises No. 1470 Pitkin avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 29, 1925, reads (Order No. 96081-C):

"2. Provide a covering of approved fire retarding material on ceiling of 1st story as per approved plans. Plan 1203-23.

"3. Provide a covering of approved fire retarding material on stairway enclosure, 1st story, as per approved Plan 1203-23.

"4. Provide a covering of approved fire retarding material on ceiling cellar level as provided in Plans 1203-23."

and

WHEREAS, the building is non-fireproof, three stories in height, 20 ft. by 55 ft. in area. OCCUPIED: 1st story, automobile accessory and gasoline service station; upper stories, offices and dwellings; there being a 550 gallon gasoline storage tank encased in 12 in. of concrete buried 2 ft. below the cellar floor, with fill box at curb and pump placed outside of the front show window of store; and

WHEREAS, appellant contends that a metal covering has been placed on the 1st story ceiling; that no gasoline is handled within the building, and proposes to encase in 4 in. of concrete all piping in cellar.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

894-25-A.

APPELLANT—Michael W. Just, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—192 Flatbush Avenue Extension, also 137 Duffield street, Brooklyn.

THE RESOLUTION:

(894-25-A)

WHEREAS, Michael W. Just, owner, filed, September 1, 1925, an appeal from an order of the fire commissioner, affecting premises No. 192 Flatbush avenue extension, also 137 Duffield street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 14, 1925, reads (Order No. 82603-F):

# MINUTES

"1. Install an automatic dry pipe sprinkler system for entire building used for the storage and manufacture of paper boxes, having at least one source of water supply, arranged and equipped as provided in the Rules for Fire Extinguishing Appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, two stories (24 ft.) in height, on an average of 25 ft. by 100 ft. in area. OCCUPIED: Cellar, storage, 2 persons; 1st story, office, 5 persons; 2nd story, manufacturing paper boxes, 12 persons; and

WHEREAS, the appellant contends the building is narrow, extending through the block from Flatbush avenue extension to Duffield street; also that the occupancy is small.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height or area and so long as it extends unobstructed from street to street; and that the labor law requirements as to exits shall be complied with and maintained.

THE RESOLUTION:

(843-25-A)

WHEREAS, Frank Amiano, for Chauncey O. Middlebrock, owner, filed, August 19, 1925, an appeal from an order of the fire commissioner, affecting premises 4568-4570-4572 White Plains road, The Bronx; and

WHEREAS, the order of the fire commissioner, No. 30620-LC, dated July 29, 1925, reads:

"Remove all motor vehicles, the fuel tanks of which are not empty and discontinue the use of the premises as a garage.";

and

WHEREAS, the building is of frame construction, 1½ stories in height, 20 ft. by 30 ft. in area; OCCUPIED as a garage for the storage of five (5) motor vehicles in a business use district; and

WHEREAS, the appellant contends that the building has been used as a garage since 1914, prior to 1914 it was used as a stable, and has filed an affidavit to that effect.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the interior of garage on 1st story shall be fire retarded in accordance with the rules of the board of standards and appeals; and that not more than five (5) cars shall be stored on the premises, three (3) of which shall be the property of the owner of the building, used in the conduct of his business.

THE RESOLUTION:

(989-25-A)

WHEREAS, Charles Heckman, for Wallace & Co., owner, filed, September 26, 1925, an appeal from decision of the fire commissioner, affecting premises 280-84 Park avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated September 1, 1925, reads:

"1. Install an automatic dry pipe sprinkler system on the 1st and 2nd stories, used for the storage and manufacture of paper boxes, having at least one source of water supply, arranged and equipped as provided in the Rules for Fire Extinguishing appliances adopted by the Board of Standards and Appeals.";

and

WHEREAS, the premises consist of a non-fireproof building, two stories and attic in height, 50 ft. by 50 ft. in area, and also a one-story extension to the south. OCCUPIED: 1st story, storage of cardboard, 3 persons; 2nd story, manufacturer of paper boxes, 25 persons; attic, vacant; and

WHEREAS, the appellant, who is the tenant, contends that the building is amply provided with exits; that the owner refuses to install the system; that he leases the premises on a month to month tenancy and that the providing of the sprinkler system would be a hardship and would result in the confiscation of the business.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height or area; and that the storage of cardboard stock shall be restricted to 1st story.

THE RESOLUTION:

(1042-25-BZ)

WHEREAS, Edward P. Doyle, for Morris Lassinsky, owner, filed, October 13, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a building to be used as a factory; premises northeast corner of Pennsylvania avenue and Pitkin avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 19, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Pennsylvania avenue is in a business district; that Pitkin avenue is in a business district; that New Jersey avenue is in a residence district, and that Sheffield avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 26, 1925, reads:

"Proposed four story building to be located in a business district and to be used exclusively for factory purposes is contrary to Art. II, par. 4c of the Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, four stories in height, with a frontage of 125 ft. and a depth of 100 ft.; to be occupied in whole as a factory; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

423-25-BZ.

APPLICANT—Samuel Schlau, for Isabel Burger, owner.  
SUBJECT—Application (re: appeal from decision of tenement house commissioner) to permit in an "F" area district the erection of a building the area of which is in excess of that permitted in such district.

PREMISES AFFECTED—123-02 and 123-08 Rockaway Beach boulevard, Rockaway Park, Borough of Queens.

APPEARANCES—

For Applicant: Edward H. Burger and Samuel Schlau.

For Opposition: Frederick T. Davies, T. J. Connolly and E. W. Sullivan.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(423-25-BZ)

WHEREAS, Samuel Schlau, for Isabel Burger, owner, filed, April 20, 1925, an application, under the building zone resolution, to permit in an "F" area district the erection of an apartment house, the area of which is in excess of that permitted in such a district; premises 123-02 to 123-08 Rockaway Beach boulevard, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 19, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that both Rockaway Beach boulevard and Beach 123rd street are in residence use and "F" area districts; and

WHEREAS, the decision of the tenement house commissioner, rendered March 30, 1925, reads:

"The plans and specifications submitted by you for the erection of one tenement house located at Rockaway Beach boulevard, N. W. corner 123rd St., have been disapproved this day for the following reasons:

"Objection No. 19 not removed. As district has been changed to an F area district, building must be made to conform to requirements of this district. Zone Resolutions."

and

WHEREAS, the proposed building is to be of non-fireproof construction, six stories in height, with a frontage of 74 ft. and a depth of 74 ft.; to be occupied as apartments; and

WHEREAS, the board concluded that applicant is entitled to relief and the zoning resolution precludes retroaction under section 24, having filed plans prior to the change of zone from an "E" to an "F" district, and that there would be unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the area district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building be limited in height to four stories above grade, restricted in use and occupancy specifically to that permitted in a residence use district; that the building shall set back from the building line of the Rockaway Beach boulevard and from Beach 123rd street not less than fifteen (15) ft.; that an open court, running the full depth of the plot, of not less than eleven (11) ft. in width shall be maintained on the westerly side of the premises; and that an open court of not less than eleven (11) ft. in width for the full extent of the plot shall be maintained on the northerly end of the property; that the exterior surface of the rear and gable walls shall be finished in light-colored face brick; that the facade of the building on the two street fronts shall be finished with face brick or natural cut stone and natural stone or architectural terra cotta trimmings; that a return drawing of the proposed elevations shall be made to this board for approval, before submitting same to the tenement house commissioner for approval; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1522-24-BZ.

APPLICANT—Edward P. Doyle, applicant, on behalf of Hugo Seidenberg, owner.

## THE RESOLUTION:

(1051-25-BZ)

WHEREAS, Henry S. Churchill and Charles B. Meyers, for Leo H. Wise, owner, filed, October 15, 1925, an application, under the building zone resolution, to permit in a 1½ times height district the erection of the street wall of a portion of a building to a height in excess of the limitation imposed by the building zone resolution; premises 28-30-32 East 63rd street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 19, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that the premises in question is in a 1½ times height district, residence use; and

WHEREAS, the decision of the superintendent of buildings, rendered September 16, 1925, in acting on N. B. 540-1925, reads:

"1. Provide lawful setbacks at front of building to conform with the requirements of Article 3 of the Building Zone Resolution."

and

WHEREAS, the building is to be of fireproof construction, 16 stories in height, with a frontage of 58 ft. 6 in. and a depth of 90 ft.; to be occupied as non-housekeeping apartments; the building being 83 ft. 6 in. from corner of Madison avenue (20 ft. wide); for 16 ft. 6 in. of front height permitted is 120 ft.; for remainder permitted height is 90 ft. based on width of street and 4 ft. 1 in. additional due to excess height of adjoining building; total 94 ft. 1 in.; and

WHEREAS, the board concluded that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the height regulations.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

WHEREAS, William F. Doyle, for Joseph Golding, owner, filed, October 26, 1925, an application, under the building

# MINUTES

zone resolution, to permit in a 1½ times height district the erection of the street walls of a building to a height exceeding the limit set by the zone resolution; premises 1178-88 Madison avenue and 16-18 East 87th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 19, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that the premises in question are in a 1½ times height district; and

WHEREAS, the decision of the tenement house commissioner, rendered October 13, 1925, reads:

"It has been brought to my attention that N. B. Plan 69-25, filed in this department on May 27th, 1925, and amended on July 13th, 1925, shows a condition which is contrary to the Zoning Resolution, in that the height exceeds the limit set by Sections 8 and 9 of the said resolution.

"I have therefore to inform you that the approval issued to you on July 31, 1925, is hereby revoked.";

and

WHEREAS, the proposed fireproof apartment house has a frontage of 201 ft. 4½ in. on Madison avenue, and 113 ft. 4 in. on East 87th street. It is proposed to erect the entire Madison avenue street walls of the building to a height of 150 ft. and continue this height (150 ft.) for a distance of 31 ft. east of Madison avenue on the East 87th street front; the remainder of the East 87th street front will conform with the zone resolution; and

WHEREAS, the proposed structure embraces the entire street front on Madison avenue from 86th street a distance of 100 ft. to 87th street and is involved by three height districts; and

WHEREAS, the board concluded that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the height district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the upper thirty (30) ft. at the corner formed by the intersection of Madison avenue and 87th street for a depth not exceeding 31 ft. 4 in. on the 87th street frontage,

on condition that the requirements of the building zone resolution shall be complied with in all other respects.

828-25-BZ.

APPLICANT—Alfred H. Eccles, for Henry Gerken owner.

SUBJECT—Approval of plans (application re: decision of superintendent of buildings), under section 21 of building zone resolution, to permit in a business district the erection of a garage for more than five (5) motor vehicles.

PREMISES AFFECTED—Southeast corner of Second avenue and Newtown avenue, Astoria, Borough of Queens.

APPEARANCES—None.

ACTION OF BOARD—Plans approved as in compliance with resolution of the board as to facade.

THE VOTE TO APPROVE PLANS AS TO FACADE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle and Assistant Chief Martin

Negative

Absent

## AREA FIXED.

(1288-25-BZ)

The chairman presented and read a communication from Schreiber, Collins, Myers & Butcher, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises northwest corner of Newtown avenue and Second avenue, Astoria, Queens.

The following area was approved by the board:

Both sides of Newtown avenue from a point 200 ft. south of Second avenue to a point 400 ft. north of proposed garage; both sides of Second avenue from a point 200 ft. south of Newtown avenue to a point 400 ft. north of premises in question; both sides of Winslow place for its full length; also the east side of Carver street from Newtown avenue to a point 145 ft. north of Newtown avenue.

Adjourned 2.30 p. m.

JAMES O'CONNOR, Secretary.

PETITIONER—Samuel Cohen, for Rector Catering Co., Inc., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—161 Bowery, Manhattan.

APPEARANCES—

For Petitioner: Max Seigel.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Guilfoyle and Chief Kenlon

Negative

Absent: Commissioner Flanagan

## THE RESOLUTION:

(576-25-S)

WHEREAS, Samuel Cohen, for Rector Catering Co., Inc., owner, filed, June 4, 1925, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises No. 161 Bowery, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated March 25, 1925, reads:

"1. Fire escape on rear does not extend to roof and there is no fireproof passage from the termination of same to street.

"5. Windows in north and south walls which are not more than 30 ft. distant in a horizontal plane from windows in an adjoining and those not more than 50 ft. above adjoining roofs are not fireproof.

"7. In basement there is a carpenter shop from which there is no second means of exit."

and

WHEREAS, the building is non-fireproof, seven stories in height, 23 ft. 4 in. by 116 ft. in area at 1st story and 23 ft. 4 in. by 106 ft. in area above. OCCUPIED: Cellar, carpenter shop, 2 persons; 1st story, store; 2nd story, manufacturer, syrups, 2 persons; 3rd and 4th stories, storage only; 5th story, manufacturer, instruments, 14 persons; 6th story, manufacturer, saws, 8 persons; 7th story, manufacturer, badges, 6 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the cellar to roof; enclosed in fire retarded partitions with fireproof doors at openings; a fire escape on the rear of the building; a gooseneck ladder to roof; having fireproof openings along the course thereof, extending from top story to the 2nd story balcony; with no legal means of EGRESS from the termination of the fire escape to the street; ROOFS of adjoining buildings 10 ft. lower at north, 35 ft. lower at south; and

WHEREAS, the petitioner contends that there are 25 windows in south wall and 8 windows in north wall affected under Item 5, and that all these windows are provided with iron shutters; as to Item 7, that the cellar occupancy is very small; as to Item 1, that there are connecting stairs from rear 2nd story balcony to fire escapes on rear of the building adjoining at east.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 1, only so far as it affects the egress from the termination of the fire escape, *on condition* that the fire escape balcony at the 2nd story level shall be connected with iron stairs to the building immediately to the rear, with egress therefrom to the street, and that the fire escape otherwise shall comply with the requirements of the labor law; *granted*, as to Item No. 5, only so far as it affects the windows in the four (4) upper stories of the southerly gable wall; and *granted*, as to Item No. 7, *on condition* that stairs, direct to the street, shall be provided at the front of the cellar in addition to the interior stairs; the interior cellar stairs shall be enclosed in fire retarding material in accordance with the rules of the board of standards and appeals with fireproof self-closing doors at the openings; that the occupancy of the cellar shall not exceed more than two persons; and that the occupancy of the entire premises shall not exceed thirty (30) persons.

787-25-S.

PETITIONER—J. L. Hernon, for Harris, Vought & Co., lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

# MINUTES

PREMISES AFFECTED—6-8 East 46th street, Manhattan.

## APPEARANCES—

For Petitioner: J. L. Hernon and John H. Scheier.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(787-25-S)

WHEREAS, J. L. Hernon, for Harris, Vought & Co., lessee, filed a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 6 and 8 East 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 82224-LD, dated July 30, 1925, reads:

"Item 1. Arrange the fire escape on the east side of building and the openings leading thereto and the windows opening on the course thereof, so that the same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law \* \* \*.

"Among the defects are noted:

"1. Connecting stairs not at an angle of 60 degrees.

"2. No fireproof passage leading from termination to street.

"Item 2. Remove the sub-standard fire escape on the west side of the building or reconstruct same as per Sec. 274 of the Labor Law \* \* \*.

"Among the defects is noted the following:

"1. Windows on course not fireproof, self-closing;"

and

WHEREAS, the building is non-fireproof, six stories and pent house in height, 40 ft. 8 in. by 100 ft. 5 in. in area. OCCUPIED: 1st story, stores; 2nd story, men's clothing, 9 persons; 3rd story, tailors, 15 persons; 4th story, vacant; 5th story, manufacturing ladies' clothing, 22 persons; offices and dressmaking, 15 persons; pent house, office, 5 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in wire lath and cement plaster partitions with fireproof doors at openings; two fire escapes, one in each of the east and west yard courts of the building, having fireproof openings along the course thereof, except 2nd and 3rd stories of westerly fire escape, extending from roof to the yard court level; no egress from the termination of the fire escapes to the street; the connecting stairs of easterly fire escapes are not at an angle of 60 degrees; ROOFS of adjoining buildings same level at east and west; and

WHEREAS, the petitioner contends that the easterly fire escape is connected at each story to the fire escapes on rear of adjoining building; that the westerly fire escape is connected at 2nd story to roof of one-story extension of building adjoining at west; and that fire drills are conducted monthly.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the termination, *on condition* that the balcony at the 2nd story west fire escape shall be connected with iron stairs to the party wall fire escapes of premises to the west, and that the east fire escape shall be connected from 2nd to 5th story to the fire escapes on building to east.

821-25-S.

PETITIONER—Samuel Rosenblum, for Vinegrad & Kaye of 11th floor, lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—247-255 West 38th street, Manhattan.

## APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....  
Negative .....  
Absent .....

## THE RESOLUTION:

(821-25-S)

WHEREAS, Samuel Rosenblum, for Vinegrad & Kaye, lessee, filed, August 10, 1925, a petition with the board of standards and appeals for a variation from the requirements of the labor law, as cited in order of the fire commissioner, No. 82171-LD, affecting premises 247-255 West 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 9, 1925, reads:

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law;"

and

WHEREAS, the building is fireproof, 17 stories in height, 85 ft. 6 3/8 in. by 98 ft. 8 3/4 in. in area; OCCUPIED as a factory, about 100 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system, also standpipes. EXITS: Two interior fireproof stairways extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner, occupant of the 11th story, contends that the non-fireproof partitions are only temporary, that they are constructed of plaster boards on studs.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the partition of the showroom and office located at the southerly end of the structure, in front of the elevator shaft (elevator vestibule), *on condition* that two exits direct to the street shall be maintained from the open loft; that partitions shall be built of fire resisting material, studs and plaster board, or cement mortar, on expanded metal wire lath.

864-25-S.

PETITIONER—Messrs. Shampan & Shampan, for David Zuckerman, owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—236-242 West 26th street, Manhattan.

## THE RESOLUTION:

(864-25-S)

WHEREAS, Shampan and Shampan, for David Zuckerman owner, filed, August 26, 1925, a petition for variation from the requirements of the labor law, as cited in the decision

# MINUTES

of the superintendent of buildings, affecting premises 236-242 West 26th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered April 23, 1925, reads (N. B. 99-1925):

"11. Panes in glass in front windows may not exceed 720 square inches. Labor Law, Sec. 264."; and

WHEREAS, the building is fireproof, 12 stories in height, 84 ft. 7 $\frac{3}{4}$  in. by 98 ft. 9 in. in area; OCCUPIED as a factory building, 135 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to install  $\frac{1}{4}$  in. plate glass windows on the street front, the maximum size of glass to be used at 1st story 7 ft. by 10 ft., at 2nd story 9 ft. 1 in. by 7 ft. 11 in.; he contends that the architectural design would be destroyed if compelled to divide the glass into smaller panes.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the two lower stories of the street front, on condition that openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the labor law requirements shall be complied with in all other respects.

946-25-S.

PETITIONER—Charles A. Platt, for Vincent Astor, owner.

SUBJECT—Variation of labor law as cited in decisions of the superintendent of buildings.

PREMISES AFFECTED—326-334 Fifth avenue, Manhattan.

APPEARANCES—

For Petitioner: J. D. Marder.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(946-25-S)

WHEREAS, Charles A. Platt, for Vincent Astor, owner, filed a petition, September 15, 1925, for variation from the requirements of the labor law, as cited in decisions of the superintendent of buildings, affecting premises 326-334 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decisions of the superintendent of buildings, dated August 24, 1925, read:

"This amendment is disapproved with the following objections due to amendment:

"10—No light must exceed 720 sq. inches in area. Sec. 264-7C. The frames holding the glass must not exceed 5 ft. x 9 in. between supports. Rule 503 Industrial Code.

"11—All doors must swing outwardly. Sec. 270-5 Labor Law."

"12—Wood flooring is contrary to Section 264, Subdiv. 6, Labor Law."; and

WHEREAS, the building is fireproof, 14 stories and pent house in height, 115 ft. 9 in. by 100 ft. in area; OCCUPIED as office and 25 per cent manufacturing; 90 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fire-

proof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to install  $\frac{1}{4}$  in. plate glass windows on the street front, the maximum size of glass used at 2nd story 6 ft. 2 in. by 9 ft. 7 in.; at 3rd story 5 ft. 6 in. by 8 ft. 11 in.; the 1st story will have large fixed store windows with the doors swinging inward; he contends that the stores will not be used for manufacturing purposes; that the design of the building would be destroyed if forced to use glass windows of smaller area; the petitioner further proposes to lay a single hardwood flooring on top of the concrete fill, over the southerly half of the 4th story floor, to be used as a showroom for carpets and rugs.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Objection No. 10, only so far as it affects the windows on the three lower stories, street front, on condition that all openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; and that the labor law requirements shall be complied with in all other respects; granted, as to Objection No. 11, in so far as it affects the doors of the store or retail shops of the 1st story at the street front; granted, as to Objection No. 12, only so far as it affects the rear half of the floor area of the 4th story, on condition that wood flooring of heart-faced maple or quartered oak shall be laid directly on cement floor finish of reinforced concrete arches, with no interstices or air space between.

THE RESOLUTION:

(916-25-S)

WHEREAS, Helmle & Corbett, for Sperry Gyroscope Company, owner, filed September 9, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 36-48 Flatbush avenue extension, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 26, 1925 (Order No. 74580-LD), reads:

"1. Provide a second means of exit on the 2nd story at south side of building from that portion occupied by printing establishment by constructing horizontal exit having opening not less than 44 in. wide in the west wall, said opening to be protected by fire doors, as per Section 267 of the Labor Law \* \* \*.

"2. Provide a second means of exit on the 3rd story at north side of building from that portion occupied by photo-engraver, by constructing horizontal exit having opening not less than 44 in. wide in the west wall, said opening to be protected by fire doors as per Section 267 of the Labor Law \* \* \*."; and

WHEREAS, the building is fireproof, 11 stories in height, 110 ft. by 256 ft. in area; OCCUPIED as offices and tenant factories, 900 persons above the 1st story; a portion of the south side of the 2nd story being occupied by a

# MINUTES

printing establishment, 4 persons; and a portion of the north side of the 3rd story being occupied by a photo-engraver, 17 persons; EQUIPPED with a sprinkler system. EXITS: Four interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; ROOFS of adjoining buildings 10 stories lower; and

WHEREAS, there are two openings, protected by fire doors, leading from the printing establishment on the 2nd story; the westerly door being 44 in. wide, leading to Stair No. 2; and the easterly door being 34 in. wide, leading to Stair No. 1; and there are two means of exit from the space on the 3rd story occupied by photo-engraver—one, at the west, 47 in. wide, leading to Stair No. 2; and one, 60 in. wide, leading to Stairs No. 1 and No. 3.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Items No. 1 and No. 2, on condition that the floors, as now subdivided, shall remain unchanged and that all doors leading to the exits shall be made to swing in the line of travel; that one additional door shall be provided in the fore and aft partition at the Flatbush avenue extension front between the street wall and the first column on 3rd story.

THE RESOLUTION:

(917-25-S)

WHEREAS, Helmle & Corbett, for Sperry Gyroscope Company, owner, filed, September 9, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 36-48 Flatbush avenue extension, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 26, 1925, reads (Order No. 74582-LD):

"1. Remove panic bolts on entrance doors to stairway enclosures on 1st story, as per Section 272 of the Labor Law.";

and

WHEREAS, the building is fireproof, 11 stories in height, 110 ft. by 256 ft. in area. OCCUPIED: Offices and tenant factories, approximately 900 persons above the 1st story; EQUIPPED with a sprinkler system. EXITS: Four interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; three exits on Chapel street and one on Flatbush avenue extension; ROOFS of adjoining buildings 10 stories lower; and

WHEREAS, petitioner contends that the insides of the four entrance doors are provided with panic bolts and to remove them would permit unauthorized persons to enter the building.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION:

(921-25-S)

WHEREAS, Samuel Rosenblum, for Hardman Peck & Co., owner, filed, September 9, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 546-8 West 52nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 9, 1925, reads (Order No. 82093-LD):

"3. Arrange the fire escape on the rear of the building near westerly end and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law \* \* \*. See Note.

"Note: Among the defects noted on this fire escape are the following: Windows on course not fireproof nor self-closing. \* \* \* No stairway from top balcony to roof. \* \* \* No safe passageway to the street from the termination.";

and

WHEREAS, the building is non-fireproof, four stories in height, 50 ft. by 100 ft. 5 in. in area at 1st story and 50 ft. by 70 ft. in area above; separated in two sections by a fore and aft brick wall with openings on each story; these are also connections, protected with fireproof doors on the 2nd and 4th stories to the adjoining building to the east, under the same ownership; OCCUPIED as a piano factory, 23 persons above the 1st story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior non-fireproof stairway, extending from the 1st story to top story (with iron ladder to scuttle in roof); enclosed in wooden partitions with wooden doors at openings; two fire escapes on the rear of the building, having unprotected opening along the courses thereof, both extending from the top story (gooseneck ladder to roof) to the roof of the 1st story extension; and also a substandard fire escape on the front of the building, extending from the top story balcony to the 2nd story balcony, with drop ladder to street; ROOFS of adjoining buildings to west 3 stories lower, to east 2 stories higher; and

WHEREAS, petitioner, in accordance with orders from the fire department, proposes to remove the fire escape on the

# MINUTES

front of the building and also the easterly rear fire escape, and proposes to replace the double rung ladders on the westerly rear fire escape with regulation 60 degree stairs and to provide, also, at the rear of the roof of the 1st story extension, an iron stair to the yard at the rear; yard being under same control and management as premises in question.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the fire escape, on condition that the fire escape shall comply with the labor law requirements in all other respects and that the fire escape on the rear of the premises shall be constructed in accordance with the labor law other than egress from the termination, which fire escape shall be carried to the ground of the property to the rear, with egress direct to 51st street open and unobstructed (the property in the same ownership); that the underside of the 1st story extension shall be fire retarded throughout where not now fire-retarded.

(947-25-S)

WHEREAS, Julius Eckmann, for City Real Estate Company, owner, filed, September 15, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 422-424 East 4th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 29, 1925 (Order No. 81464-LD), reads:

"1. Remove the sub-standard fire escape on the front of the building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, amended May 9th, 1924.

"Among the defects noted on this fire escape are the following:

"Windows on course not fireproof nor self-closing. No stairway at least 22 in. in width or drop ladder in guides from lowest balcony to ground. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same."

and

WHEREAS, the building is non-fireproof, seven stories in height, 40 ft. by 90 ft. in area. OCCUPIED: 1st story, wagon builder, 5 persons; upper stories, tenant factories (mostly clothing), 40 persons per story; EQUIPPED with a fire alarm signal system. EXITS: An interior non-fireproof stairway, extending from the 1st story to roof; enclosed in fire resisting partitions with fireproof doors at openings; a 36 in. exterior iron stairway on the rear of the building, having fireproof windows along the course thereof, extending from the roof to the yard; with egress through fireproof passageway to street; a 60 degree sub-standard fire escape on the front of the building, with non-fireproof openings along the course thereof, extending from

the top story balcony to the 2nd story balcony with drop ladder to street; ROOFS of adjoining buildings at east and west are 60 ft. lower; and

WHEREAS, petitioner proposes to install, on the front fire escape, a drop ladder in guides, and contends that the fire escape is in good condition, and, in the event of fire, would be an assistance to the fire department.

*Resolved*, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

990-25-S.

PETITIONER—Charles Heckman, for Wallace & Co., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—280-284 Park avenue, Brooklyn.

APPEARANCES—

For Petitioner: Samuel Rosenblum and Charles Heckman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan, Guilfoyle and Assistant Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(990-25-S)

WHEREAS, Charles Heckman, for Wallace & Co., owner, filed, September 26, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 280-84 Park avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 25, 1925, reads (Order No. 84088-LD):

"1. Extend the interior stairway at the northeast corner and at the southwest corner of the building from the 2nd to 3rd story, as per Section 271 of the Labor Law.

"2. Provide suitable means of reaching the roof, as per a resolution of the Board of Appeals adopted April 10th, 1917. This resolution provides that the requirement for extension of stairways to the roof will be waived in cases where no safe egress can be had from the roof to adjoining buildings, but further requires that there shall be a fixed iron ladder through scuttle to the roof, a gooseneck ladder from an outside stairway or fire escape or other suitable means of reaching the roof, as per Sec. 271 of the Labor Law.

"3. Enclose the interior stairway at the northeast corner and southwest corner of the building, serving as a required means of exit on all sides, with partitions of fire resisting material extending continuously from the floor to the 1st story to the underside of the floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors constructed as per Sec. 271 of the Labor Law. \* \* \*";

and

WHEREAS, the premises consist of a non-fireproof building, three stories in height, 50 ft. by 50 ft. in area (the 3rd or attic story being approximately 15 ft. by 50 ft. in area), and also two one-story non-fireproof extensions, approximately 30 ft. by 50 ft. (irregular) in area on the Hall street frontage; one of the extensions being occupied as a garage and the other for storage purposes; the entire premises being OCCUPIED for the manufacture of paper boxes, 40 tons of paper stock on the premises; 1st story,

# MINUTES

3 persons; 2nd story, 25 persons; 3rd story, not used and having no occupants. EXITS: Two open wooden stairways extending from the 1st to the 2nd story. ROOFS of adjoining premises: A two-story building to south of the one-story garage portion of the premises; and

WHEREAS, petitioner proposes to reduce the paper stock from 40 tons to between 15 and 20 tons; to provide a goose neck ladder leading from the roof of the office portion of the one-story extension and also to line the two stairways, soffits and sides with two thicknesses of plaster boards with a 1 in. air space between same.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Items 1 and 3, on condition that the stairs shall be enclosed in accordance with the rule 4 stairway enclosure rules of the board of standards and appeals; granted, as to Item No. 2, on condition that a fixed double rung iron ladder shall be provided from the top story loft to scuttle in roof; granted so long as the conditions as to occupancy and use remain unchanged.

1029-25-S.

PETITIONER—Marc Eidlitz & Son, Inc., for Adolph Kuttroff, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—20-24 North Moore street, Manhattan.

APPEARANCES—

For Petitioner: Joal D. Marder and G. G. Lauregus.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(1029-25-S)

WHEREAS, Marc Eidlitz & Son, Inc., for Adolph Kuttroff, owner, filed, October 6, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 20-24 North Moore street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 1, 1925 (Order No. 81644-LD), reads:

"1. Reduce the area of wire glass in doors and partitions enclosing interior stairway so that no single pane of glass exceed 360 square inches in area and not more than 720 square inches on any one story, as per Rule 505 of the Industrial Code as amended by the Board of Standards and Appeals April 3rd, 1923.";

and

WHEREAS, the building is fireproof, nine stories in height, 71 ft. 8 in. by 84 ft. in area; OCCUPIED for the manufacture and storage of aniline dyes; 1st story, 10 persons; 2nd to 9th story, 2 persons per story. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in 4 in. terra cotta partitions with fireproof doors at openings; an exterior screened stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to a passageway on the 2nd story; with EGRESS from the termination of the fire escape by means of roof of adjoining building to street; and

WHEREAS, there are on each story wire glass panels 1 ft. 8 in. by 2 ft. 6 in. in area in the doors leading to the stair-

way enclosure and also fixed sash windows, glazed with ft. 6 in. by 4 ft. wire glass, between the stair enclosure and the elevator shaft; ROOFS of adjoining buildings west 8 stories lower, to east 4 stories lower; and

WHEREAS, petitioner contends that there are only 16 persons above the 1st story, and requests acceptance of the wire glass in view of the existing exits.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the factory use and occupancy shall be discontinued on or before March 1, 1926.

THE RESOLUTION:

(476-25-S)

WHEREAS, John J. Gilmartin, on behalf of Nathan A. Krischer, for Mollie R. Krischer, owner, filed, May 1925, a petition for variation from the requirements of labor law, as cited in the order of the fire commissioner affecting premises No. 4077-4085 Park avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated April 7, 1925, reads (Order No. 75312-LD):

"1. Remove the sub-standard fire escapes on East and South and West sides of building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals adopted May 1, 1924. Among the defects noted on these fire escapes are the following: 1. Windows on course not fireproof self-closing. No safe egress from termination of fire escape on West side to street.";

and

WHEREAS, the building is non-fireproof, five stories in height, 100 ft. by 80 ft. in area. OCCUPIED for the manufacture of iron shop, 18 persons; 1st, 2nd and 5th stories vacant; 3rd story, locksmiths, 3 persons; 4th story, repairs, 6 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior iron frame stairways, extending from the 1st story to roof; enclosed in brick walls with fireproof doors at openings; three sub-standard fire escapes, one rear and two on front of the building, having non-fireproof openings at the course thereof, extending from top story to the 2nd story and drop ladder to sidewalk; with no EGRESS from the termination of the westerly fire escape; ROOFS of adjoining buildings 30 ft. lower at north and west; and

WHEREAS, the petitioner contends that the present fire escapes may serve a useful purpose; that he has expended large amount of money on painting; that the fire escapes were erected under orders from the superintendent of buildings and are in good condition.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted.

# MINUTES

so far as it affects the windows not on the course in open shaft or stairway, *on condition* that the fire escapes on the Park avenue and Etna place front shall comply with the labor law otherwise in all respects; and *granted*, so far as it affects egress from the termination of the easterly fire escape, *on condition* that a portable iron ladder shall be provided and maintained at the front of the termination of fire escape on extension roof with hooks leading to the parapet wall at Etna place; and *granted on condition* that not less than two interior legal means of exit, as required by the industrial code, shall be provided and maintained.

## THE RESOLUTION:

(498-25-S)

WHEREAS, The Salvation Army, owner, filed, May 13, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 533-37 West 48th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 4, 1924, reads (Order No. 69297-LD):

"2. Reduce the area of wire glass within the easterly and westerly stairway enclosures on each story to not more than 720 square inches and no pane to exceed 60 square inches as per Section 271 of the Labor Law, and Rule 505 of the Board of Standards and Appeals."

WHEREAS, the building is fireproof, seven stories in height, 25 ft. by 90 ft. in area. OCCUPIED: 1st story, garage, and baling room, 10 persons; 2nd story, office, stores and storage, 14 persons; 3rd story, chapel and living rooms, 10 persons; 4th story, dormitory, 7 persons; 5th story, laundry and officers' quarters, 4 persons; 6th story, tailor and furniture repair shop, 4 persons; 7th story, carpenter and master shop, 6 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors and openings; a fire escape on the rear of the building having fireproof openings along the course thereof, extending from 1st story to the yard level, a gooseneck ladder to roof; ACCESS from the termination of the fire escape by means of fireproof passageway; ROOFS of adjoining buildings 25 feet lower at east and west; and

WHEREAS, the petitioner claims the average amount of glass in easterly stairhall at each story is 2,571 sq. in., the maximum size panes range from 717 to 1,596 sq. in., in the westerly stairhall at each story is 1,704 sq. in., the maximum size panes range from 610 to 975 sq. in.; that the occupancy of the building is the same as in the year of 1907; that the building is occupied and conducted by the Salvation Army, a religious corporation authorized by a special act of the legislature, and that the fire department order No. 69297-LD does not apply to this particular building.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

## THE RESOLUTION:

(902-25-S)

WHEREAS, Frank H. Bulley, for May H. Bulley and Lillie H. Crary, owners, filed, September 4, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises 355 Adams street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 17, 1925, reads (Order No. 83830-LD):

"1. Enclose the interior stairway at north side of building serving as a required means of exit on all sides with partitions of fire resisting material extending continuously from the floor of the 1st story to the underside of the floor above, including any exposed stair soffits, landings and passageways, openings shall be provided with approved self-closing fire doors, constructed as per Section 271 of the Labor Law and Rule 2 of the Board of Standards and Appeals, revised and adopted July 29th, 1924, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

"NOTE:—Plans for all structural changes should be filed in the Bureau of Buildings, as required by Chapter 503, Laws of 1916."

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 50 ft. in area. OCCUPIED: 1st story, restaurant, 4 persons; 2nd story, art school, 10 persons; 3rd story, vacant; 4th story, pattern shop, 7 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story; enclosed in match board partitions with wooden doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from 2nd story to the top story, a gooseneck ladder to roof and a counterbalanced drop ladder to sidewalk; ROOFS of adjoining buildings 15 ft. lower at north and south; and

WHEREAS, the petitioner contends the exits are adequate; that the school on 2nd story is occupied only between the hours 7.30 and 10 p. m.; and that it is contemplated to demolish the building within 18 months.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the existing enclosure shall be covered on both sides and soffit of stair from 1st and 2nd story with "V" ribbed metal wire lath and cement mortar; and *granted* so long as conditions as to use and occupancy remain unchanged and that the occupancy shall not exceed 25 persons above the 1st story.

THE RESOLUTION:

(500-24-S)

WHEREAS, G. A. Schonewald, for The Bedell Company, owner, filed, April 8, 1924, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 26-28 West 35th street and 17 West 34th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, Order No. 56246-LD, dated March 20, 1924, reads:

"1. Provide an outside iron balcony fire escape on the front of the 34th Street side of the building with balconies 4 ft. in width connected by stairways not less than 22 in. wide, placed at an incline not more than 45 degrees extending from the ground to the highest story, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

"2. Provide a second means of exit on the 3rd and 4th stories of the 35th Street section of the building by constructing horizontal exit, having opening not less than 44 in. wide in the division wall between 26-28 and 30 West 35th Street, said openings to be protected by fire doors as per Section 267 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. Defect in present horizontal exit on the 4th story is that same is only 32½ in. in width and the one on the 3rd story has an opening 8 ft. 10 in. in width, being in excess of 10 in. in width as allowed by Section 265, Subd. 5 of the Labor Law."

and

WHEREAS, the premises consists of a non-fireproof building extending through the block at the 1st story from 34th street to 35th street; section No. 17 West 34th street is five stories in height, 25 ft. by 64 ft. in area above the 1st story. OCCUPIED: 1st story, salesroom, 6 persons; 2nd story, salesroom, 4 persons; 3rd story, mercantile, 6 persons; 4th story, vacant; 5th story, mercantile, 6 persons. EXITS: An interior fireproof stairway, extending from the 1st story to the roof, enclosed in fireproof partitions, with fireproof doors at openings; a fire escape balcony at the rear of 2nd story connecting with fire escape on the rear of section No. 26-28 West 35th street; the section No. 26-28 West 35th street is four stories in height, 40 ft. by 92 ft. 3 in. in area above the 1st story. OCCUPIED: 1st story, salesroom, 6 persons; 2nd and 3rd stories, salesrooms, 8 persons each story; 4th story, manufacturing, 45 persons; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway, extending from 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fireproof enclosed stairway at rear from 3rd story to 4th story, connecting with a rear fire escape extending from rear of 3rd story to 2nd story balcony, which extends

over 1st story roof to the rear of section No. 17 West 34th street at 2nd story, having fireproof openings on the course thereof; with no legal means of egress from the termination of the fire escapes to the street; a horizontal exit at 3rd story, 8 ft. 10 in wide, also at 4th story, 32½ in. in width, leading to building adjoining at west; ROOFS of adjoining buildings 3 stories higher at east, 7 stories higher at west; and

WHEREAS, the petitioner contends that there is no manufacturing done on the premises, except on the 4th story of section No. 26-28 West 35th street; that the present exits are adequate; that he has filed a certificate of occupancy, No. 868-1918, for section No. 26-28 West 35th street; and

WHEREAS, the building is to be demolished and replaced by a new modern fireproof structure.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the building shall be operated and maintained in accordance with the certificate of occupancy now in force; and granted, as to the 34th street section, on condition that there shall be not more than two persons engaged in the manufacturing occupancy.

THE RESOLUTION:

(456-25-S)

WHEREAS, Emil Guterman, for Ernest Kresse, owner,  
d, April 29, 1925, a petition for variation from the re-  
quirements of the labor law, as cited in an order of the  
commissioner, affecting premises 320-30 Van Buren  
street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April  
1925, reads:

"1. Extend stairway at northeast end of building  
from 2nd to 1st story and provide safe passageway  
to street from termination as per Section 271 of the  
Labor Law.

"2. Extend the interior stairway at north side cen-  
ter of two-story building to roof, as per Section 271  
of the Labor Law."

WHEREAS, the premises consist of a plot of ground 80  
by 100 ft. in area, upon which is located a three-story  
fireproof building and two two-story non-fireproof  
buildings, all interconnected on each story by means of hori-  
zontal openings, some of the openings being protected by  
closing sliding doors; OCCUPIED for the manufac-  
ture of wood heels, 1st story, wood storage and mill, 10  
persons; 2nd story, office, shipping and factory, 18 persons;  
3rd story, storage, no occupancy; EQUIPPED with a  
sprinkler system. EXITS: One interior wooden stairway,  
closed in fire resisting partitions, extending from the 1st  
2nd story of the westerly two-story building; an interior  
wooden stairway in the rear of the three-story section, ex-  
tending from the 2nd to the 3rd story; a fire escape on  
westerly side of the three-story building, with fireproof  
ladders along the course thereof, extending from the roof  
to the side yard, with egress through same to street; and

WHEREAS, petitioner proposes to provide, in the two-story  
portion of the building, a fixed iron ladder leading to a  
platform in the roof, and, in view of the light occupancy, re-  
quests that the existing means of egress be accepted.

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* from the requirements of the la-  
bor law, and that the petition be and it hereby is *granted*,  
to Item No. 1, on condition that a horizontal exit shall

be provided in the easterly wall at the 3rd story leading to  
the roof of the two-story extension, and that a wet sprinkler  
system shall be maintained in accordance with the rules of  
the board of standards and appeals, and that the use and  
occupancy shall remain substantially unchanged; *denied* as  
to Item No. 2.

## APPLIANCES SUBMITTED FOR APPROVAL.

62-24-SA.

PETITIONER—William F. Doyle.

SUBJECT—Application for reopening—approval of  
Kleen Heet Oil Burner.

APPEARANCES—

For Petitioner: William F. Doyle.

tion amended.

THE VOTE TO REOPEN AND AMEND RESOLU-  
TION—

Affirmative: Chairman Walsh, Commission-  
ers Connell, Flanagan, Guilfoyle and

Assistant Chief Martin..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(62-24-SA)

WHEREAS, Wm. F. Doyle filed, January 16, 1924, a peti-  
tion with the board of standards and appeals for approval  
of the device known as the Kleen Heet Oil Burner; and

WHEREAS, a committee of the board inspected this device  
in operation at 139 Kosciusko street, Brooklyn, and recom-  
mended the device for approval:

Cal. No. 62-24-A.

Approval of the Kleen Heet Fuel Oil Burner.

June 25, 1924.

## REPORT OF COMMITTEE:

A committee of the board, consisting of Chairman  
Walsh, Fire Chief Kenlon and Mr. Holland, visited  
the premises No. 139 Kosciusko street, Brooklyn, and  
inspected the Kleen Heet Burner in operation.

The burner consists of a cast steel fire pot, a com-  
bustion chamber, operating with a pump and fan set  
and using Grade B fuel oil.

Setting the burner on the grate bars would tend to  
develop direct or impinging flame and excess tempera-  
ture to the effect of oxidizing the boiler plates or  
tubes, therefore, the burner should not be set on or  
at the grate bar level.

The committee recommends the approval of the  
Kleen Heet fuel oil burner pump and fan set for use  
with Grade B fuel oil.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
JAMES P. HOLLAND.

and

WHEREAS, this device was approved by the board at its  
meeting July 29, 1924, for use with Grade B oil, and pe-  
titioner requests an amendment to permit the device to  
be used with Grade A oil also.

*Resolved*, that the board of standards and appeals does  
hereby *approve* the device known as Kleen Heet fuel oil  
burner, pump, fan set for use with Grade A and B fuel  
oil in domestic installations, when installed in accordance  
with the recommendation of the committee and the fuel oil  
rules of the board of standards and appeals.

Adjourned 6.40 p. m.

JAMES O'CONNOR, Secretary.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday morning, October 27, 1925, as they appeared in Bulletin No. 42, Vol. X, are hereby corrected to read as follows:

### THE RESOLUTION:

(225-25-BZ)

WHEREAS, Thomas O'Rourke Gallagher, for Mymaud Construction Company, owner, filed, February 25, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises southwest corner of Metropolitan avenue and 125th street, Middle Village, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 27, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Metropolitan avenue is in a

*\*Correction—Name "O'Rourke" substituted for "Burke" in first line and words "residence" changed to "business" in 14th line of resolution.*

business district and that 125th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 4, 1925, reads:

"The erection of a public garage in a business district is prohibited by the Zone Law.";

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 183 ft. 9 in. on Metropolitan avenue and 86 ft. 10 in. on 125th street; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed, notwithstanding support of basis of appeal under section 7-e, the existence of one comparatively small non-conforming use did not warrant further invasion of this business district by an extension public garage, 183 ft. 9 in. by 86 ft. 10 in., in view of new and modern private residential development opposite and down both side streets, together with overwhelming protest of affected property owners.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

WHEREAS, Kaye, McDavitt & Scholer, for Pathe Pho-

*\*Correction—No. "28" changed to No. "18" in line 4 of resolution.*

nograph & Radio Corp., owner, filed, April 8, 1925, an appeal from an order of the fire commissioner, affecting premises 18-32 Grand avenue, Brooklyn; and

WHEREAS, the order of the fire commissioner, No. 72706-F, dated March 12, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter \* \* \*";

and

WHEREAS, the building is fireproof, reinforced concrete, seven stories in height (81 ft.), 134 ft. by 91 ft. in area; OCCUPIED as a phonograph factory; equipped with a sprinkler system and a standpipe system, extending from the roof to the 1st story, with a 2,500 gallon reserve; and

WHEREAS, appellant contends that the order refers to Building No. 2 only, although the order reads Buildings No. 2 and 4, and contends that the present equipment is adequate; and

WHEREAS, these two (2) units are but a part of a group of buildings, equipped with a standpipe and sprinkler equipment.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that these separate units of the structure shall be not increased in height, area or dimension, and shall be equipped with an approved standard two (2) source sprinkler system.

# FUEL OIL RULES

## CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS.

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, and January 18, 1924.

### Rule 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

## GRADE A FUEL OIL.

### Rule 2. Manner of Storage for Grade A Fuel Oil.

Fuel oil, to be used for commercial, heating and power purposes, shall be at all times contained in metal tanks with all openings or connections through the tops of the tanks.

### Rule 3. General Location of Tanks for Grade A Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

### Rule 4. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

#### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

#### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

#### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

#### Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions.

# FUEL OIL RULES

Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 5. Material and Construction of Tanks for the Storage of Grade A Fuel Oil.

Section 1. Cylindrical Tanks (except vertical tanks located outside of buildings above ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free from physical imperfections, such as, laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced entirely by means of rods or bars,

these members should not be spaced greater than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Both shell and roof plates shall have single lap riveted seams. Shell plates shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

### Section 4. Welding.

(a) Where welding is to be used for a part or for entire tank, the tank shall be fabricated as required under Rule 5.

(b) All welded seams of plates shall be lapped and butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding. Both inside and outside welds shall be of 45 degree fillet.

Where a butt joint is used, it shall be of the 90 degree double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{3}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the butt welds for tanks of 1,100 gallon capacity or less and over 48 inches in diameter, shall be of the 90 degree single V type welded entirely through and reinforced not more

# FUEL OIL RULES

one-quarter of the shell thickness. For tanks of 1,100 gallon capacity the head welds shall be of the deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings welded longitudinal joints of adjacent sections shall be butt joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity less than 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welds shall be done in such a manner as to develop the full strength of the braces; in other words, the brace will break before the connection will let go. Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 11 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand (10,000) gallons outside of buildings shall be equipped with a system of steam pipes, blanket gas or other approved system for use in case of fire, arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

### Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Grade A Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

# FUEL OIL RULES

## Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

## Section 3. Tests for Piping.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

## Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) Fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the

same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

# FUEL OIL RULES

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 12. Burners for Grade A Fuel Oil

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals.

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.

## GRADE B FUEL OIL.

## Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes where stored, shall be at all times contained in closed metal tanks.

## Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.

## Rule 22. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

## Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).

## Rule 25. Piping for Grade B Fuel Oil.

### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding mate-

# FUEL OIL RULES

rials. Hose shall be no longer than necessary.

## Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

## Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

## Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

## Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.

## Rule 26. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) See Rule 9 (a) for construction of valves.

(c) A remote control for shutting off the supply of oil to the burners shall be provided.

(d) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure.

## Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.

## Rule 28. Pilot Light.

Automatic systems shall be so designed that the flame cannot be extinguished by operation of the automatic control valve. A pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

## Rule 29. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature of which the oil burning device to be installed is capable.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 30. Fire Protection.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster board or other approved incombustible material. Above the

furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal or three-fourths ( $\frac{3}{4}$ ) of an inch of Portland cement plaster on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 31. Instruction Cards.

See Rule 14.

## Rule 32. Installation.

See Rule 16.

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in building occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

## Rule 34. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or for systems, are prohibited.

## Rule 35. Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies for the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

WILLIAM E. WALSH, Chairman

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, three cents each, postage to be added if the forms are to be supplied by mail.

# RULES

## FIRE ESCAPE RULES OF THE BOARD OF STANDARDS AND APPEALS, ADOPTED JULY 2, 1918, CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED MAY 9, 1924, CAL. NO. 414-24-SR.

**Rule 1.** In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ( $\frac{1}{2}$ ) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ( $1\frac{1}{2}$ ) in mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire windows leading to balconies may be at window sill level if the steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto.

(c) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

**Rule 2.** A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

**Rule 3.** When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for sub-standard fire escapes in subdivision a.

(d) Horizontal Bridges.—Horizontal bridges and party wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

WILLIAM E. WALSH, *Chairman.*

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1 $\frac{1}{2}$ -3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2 $\frac{1}{2}$ -5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person, or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plaintiff's failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of the failure of the appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

Commissioners

HENRY L. CONNELL

JOSEPH FLANAGAN

JOHN GUILFOYLE

CHIEF JOHN KENLON

JAMES O'CONNOR, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Telephone—Worth 0184.

Office Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board

### CONTENTS

This issue of the Bulletin contains, in the order in—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, January 26, 1926, at 10 a. m.

Minutes of Regular Meeting, January 26, 1926, at 2 p. m.

Correction.

Rules.

Reserve Calendar.

Annual Report.

Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, February 2, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, February 9, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman,

### BUILDING ZONE CASES.

*Tuesday, February 2, 1926, at 2 p. m.*

972-25-BZ.	APPLICANT—James Fenimore, owner. PREMISES—767-793 East New York avenue, Brooklyn. APPLICATION, under section 7e of the building zone resolution, TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.
1033-25-BZ.	APPLICANT—Gardiner Conroy, for Fangusta Real Corp., owner. PREMISES—878-892 East New York avenue, Brooklyn. APPLICATION, under sections 21 and 7e of the building zone resolution, TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.
1079-25-BZ.	APPLICANT—Philip Freshman, for John De Angelo owner. PREMISES—6418-6424 Fort Hamilton parkway, Brooklyn. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles and also a gasoline service station.
1291-25-BZ.	APPLICANT—Schwartz and Gross, for 22 East 7 Street, Inc., owner. PREMISES—20-28 East 76th street, Manhattan. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a 1½ times district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

## THE RESOLUTION:

(1033-25-A)

WHEREAS, Louis A. Sheinert, for K. & K. Garage, Inc., Benjamin Katz, president, filed, October 9, 1925, an appeal from a decision of the fire commissioner, affecting premises 177-183 East 123rd street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered September 25, 1925, reads (N. B. Application No. 1716-24): "No. 1. Sump pit and electric pump used in connection with oil separator may not be permitted."; and

# MINUTES

WHEREAS, the building is fireproof, three stories and basement in height, 74 ft. by 100 ft. in area at 1st story and 74 ft. by 90 ft. in area above; OCCUPIED as a public garage; and

WHEREAS, there has been located in the basement a sump pit for the drainage of that story; sump being connected to an electric pump which automatically discharges the water from the sump pit into the oil separator; and

WHEREAS, appellant contends that owing to the sewer being located at an elevation above the cellar floor, it is impossible to provide any other means of drainage, and the omission of the sump pit would destroy the use of this story for garage use.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the pump shall be set not less than 5 ft. above the grade of the cellar floor and shall be entirely enclosed in accordance with the regulations of the bureau of fire prevention and that the sump for the accumulation of oil residue be not connected direct to house sewer.

1047-25-A.

APPELLANT—Rogers Peet Company, for 150 Broadway Corporation, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—150 Broadway, Manhattan.

APPEARANCES—

For Appellant: William A. Finn.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

THE RESOLUTION:

(1047-25-A)

WHEREAS, Rogers Peet Company, for 150 Broadway Corporation, owner, filed, October 15, 1925, an appeal from an order of the fire commissioner, affecting premises 150 Broadway, northeast corner of Liberty street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"Section 81, Subdivision 4-c of Article 5 of Chapter 10, Code of Ordinances, prohibits the issuance of a permit for the storage and sale of ammunition in any premises where cigars, cigarettes, or tobaccos are stored or kept for sale; and whereas: building in part is used for the storage and sale of cigars and cigarettes.

"You are therefore hereby ordered to:

"1. Discontinue the storage of ammunition in excess of 200 small arms cartridges. Section 81-4, Chapter 10, Code of Ordinances.";

and

WHEREAS, the building is fireproof, 23 stories in height, 96 ft. by 135 ft. in area. OCCUPIED: Basement, 1st story and rear of the 2nd story, clothing and sporting goods sales space; the remainder of the building being used as offices, approximately 75 persons per story; a portion of the rear of the 2nd story being used for the sale of ammunition, stored in metal-lined drawers, the cigar stand in question being located at the front of the 1st story; and

WHEREAS, appellant contends that the cigar stand is located in the lobby of the building and that the ammunition is 94 ft. distant and also located on the story above.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

THE RESOLUTION:

(1112-25-A)

WHEREAS, The United States Printing & Lithograph Co. owner, filed, October 28, 1925, an appeal from an order of the fire commissioner, affecting premises 83-101 North 3rd street and 209-210 Wythe avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 2, 1925, reads (Order No. 85864-F):

"1. Install a standpipe system with risers 4 inches in diameter in Building No. 2, tested to withstand pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building, known as Building No. 2, is one of three, separated from each other by fore and aft walls with fireproof horizontal exits therein on each story. Building No. 2 is non-fireproof, five stories (approximately 12,000 sq. ft.) in height, 97 ft. 4 in. by 125 ft. (approximately 12,000 sq. ft.) in area; OCCUPIED as a printing and lithographing establishment, a total occupancy of 99 persons in entire building; EQUIPPED with a two-source automatic sprinkler system, supplied by two 30,000 gallon gravity tanks and also with a fire pump connected to a 60,000 gallon reserve tank; and

WHEREAS, appellant contends that the building is amply provided with fire extinguishing appliances and also with exits.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension and that the floor areas now subdivided, with a continuous bearing wall of approved masonry from cellar to roof shall be maintained, any openings therein to be equipped with fireproof self-closing doors that a two (2) source sprinkler system shall be maintained and *granted* only so long as conditions as to occupancy and use shall remain substantially unchanged.

## THE RESOLUTION:

(431-25-A)

WHEREAS, O'Connor & Bain, for Lotos Oil & Distributing Corp., owner, filed, April 21, 1925, an appeal with the board of appeals, from an order of the fire commissioner, affecting premises 218th to 220th street and Harlem River, Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 1925, reads:

"5. All storage tanks comprising or forming a part of an oil storage plant shall be buried so that the tops thereof shall be at least two feet below the grade level.";

WHEREAS, the premises consist of a plot of ground, lying between Ninth avenue and Harlem River, 320 ft. by 110 ft. in area, upon which is located the oil storage and distributing plant of the Lotos Oil and Distributing Corp., consisting of an office, a pump house and also twelve (12) 5,000 gallon storage tanks, each 11 ft. in diameter and 11 ft. long, used for the storage of gasoline; the tanks being located in a concrete enclosure of sufficient area and height to accommodate the liquid capacity of said tanks; the tops of tanks are located approximately 6 ft. above ground level; and

WHEREAS, appellant contends that, due to the nature of the soil and the height of the water table, it would be a hardship to comply with the order of the fire commissioner.

Cal. No. 421-25-A. June 8th, 1925.

PREMISES: 218th to 220th Street & Harlem River, Manhattan.

## REPORT OF COMMITTEE:

A committee of the Board consisting of Chairman Walsh, Fire Chief Kenlon, Messrs. Holland and Connell visited the above premises on June 8th, 1925.

The appeal is before the Board on an order of the Fire Commissioner requiring the burial of oil storage tanks. The appellant seeks relief from the entire burial of the tanks for the reasons that the ground is on the banks of the Harlem River and if compelled to bury same they would be below tide level. The property is now occupied with temporary wooden shacks and one story frame structures set on discarded scows.

The entire west side of 9th Avenue (north of the 3rd Avenue car barns on 217th Street) is vacant, so there is no improvement that would be in any way impaired or adversely affected by any means or hazard.

The plans before us on this appeal, propose the installation of twelve steel tanks, installed horizontally; the natural grade is approximately six feet above tide water.

The committee recommends that the proposed installation be separated into batteries of not more than three tanks to each battery and that the tanks be set approximately half-way (diameter) below grade and that the enclosure walls shall be built of reinforced concrete, carried to the top of the tanks, and all enclosures and tanks to be filled and covered over with earth; the fill to extend not less than three feet above the top of the tanks, and that a reinforced concrete wall shall be erected outside the tank installation enclosure; these outside enclosure walls to be not less than 10 ft. high, the earth fill to be sloped from the top to the inside of the exterior enclosure walls at bottom; the tanks so installed to be equipped in accordance with the rules of the Fire Department and the ordinances in all other respects; a yard hydrant with anti-freezing valves and siamese connection to be provided at the end of the dock, connected to and supplied from approved pumps hooked up to the city water mains, and that a revolving water line nozzle shall be provided, one to each battery enclosure of three (3) tanks, and that an approved liquid fire-fighting medium shall be provided and maintained operative from an independent pump house, the pump house to be isolated from the tank enclosure and to be constructed fireproof. It is further

recommended that the sub-dividing wall between each battery of tanks shall be carried up at least 6 ft. above the top of the earth fill of the tanks, the ends of these walls to be returned on a rack of 45 degrees at opposite ends, and that a return of the drawings shall be made to this Board for approval, in compliance with the foregoing report.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
HENRY L. CONNELL,  
JAMES P. HOLLAND.

and

WHEREAS, this appeal was granted by the board at its meetings June 9, 1925, and November 24, 1925, on certain conditions, and appellant requested a modification of these conditions.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the equipment shall be installed in accordance with the recommendations of the report of the committee of inspection, except that the siamese connection at end of dock can be omitted and the entire premises be enclosed in a wall of reinforced concrete or approved masonry, the exterior of front wall facing the street to be finished with face brick; and that return drawings shall be made to this board in accordance with such report for approval before submitting same to the fire department for consideration. The necessary permits required by law to be obtained and work executed to completion without suspension or unnecessary delay.

483-25-A.

APPELLANT—Mallery Fuelgas Corporation, for New York University, owner.

SUBJECT—Application for extension of time—appeal from decision of fire commissioner.

PREMISES AFFECTED—West side of University avenue, corner of East 181st street, The Bronx.

APPEARANCES—

For Appellant: W. J. Buxton.

ACTION OF BOARD—Granted 90-day extension of permit.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND EXTEND PERMIT FOR 90 DAYS—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle....	4
Negative .....	0
Absent: Chief Kenlon .....	1

## THE RESOLUTION:

(483-25-A)

WHEREAS, Mallery Fuelgas Corporation, for New York University, owner, filed, May 7, 1925, an appeal, from a decision of the fire commissioner, affecting premises on the west side of University avenue, corner of East 181st street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered April 30, 1925, reads:

"1. Auxiliary fuel oil tanks under pressure contrary to Rule No. 17.";

and

WHEREAS, the building is fireproof, one story in height, 68 ft. by 56 ft. in area; OCCUPIED as a boiler room connected with New York University building, 5 persons employed; EQUIPPED with a fuel oil burning system, using the Mallery Automatic Gas Producer, there being two auxiliary tanks on the control, each tank of 10 gallons capacity, one for regular use and one held in reserve for emergency; and

WHEREAS, it appears that the Mallery Fuelgas Corporation has a petition for the approval of their device (filed as Champion Gas Producer under Cal. No. 1491-23-SA—on for reopening), which has not yet been acted upon by the board, and appellant contends that the installation is made for experimental purposes in conjunction with the School of Engineering; and

# MINUTES

WHEREAS, this appeal was granted by the board at its meeting October 9, 1925, for a temporary period, and appellant requests an extension of time.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary period of ninety (90) days for experimental purposes, *on condition* that the installation shall comply substantially with the fuel oil rules now in force in all respects.

## BUILDING ZONE CASES.

970-25-BZ.

APPLICANT—Henry J. Nurick, for Herman Weinberg, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7e of the building zone resolution, to permit in a business district the addition of a second story to an existing one-story garage for the storage of more than five (5) motor vehicles.

## THE RESOLUTION:

(852-25-BZ)

WHEREAS, Magnuson & Kleinert, for J. Michaels, Inc.,  
owner, filed, August 21, 1925, an application, under the  
building zone resolution, to permit in a residence district the  
erection and maintenance of a building for business occu-  
pancy; premises 322 Warren street, Borough of Brooklyn;  
and

WHEREAS, a public hearing was held on this application  
by the board of standards and appeals, at its regular meet-  
ing, January 26, 1926, after due notice by publication in the  
Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-  
ing zone resolution show that Warren street is in a resi-  
dence district; that Baltic street is in a residence district,  
and Smith street is in a business district; and

WHEREAS, the decision of the superintendent of buildings,  
rendered July 29, 1925, reads:

"Proposition contrary to the Zone Resolution, Art.  
II, Sec. 3.

"The erection of a warehouse in a residence district.";  
and

WHEREAS, the proposed building is to be of fireproof  
construction, four stories in height, with a frontage of 75  
ft. and a depth of 100 ft. (90 ft. above 1st story); to be  
occupied as a furniture storage warehouse; and

WHEREAS, the board deemed that the applicant was en-  
titled to relief under section 21 of the building zone reso-  
lution on the ground that the property was in the posses-  
sion of the applicant many years prior to the enactment  
of the zoning resolution, and the board also deemed that  
the application comes within the rules of exception pro-  
vided for under section 7a and 7c.

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* in the application of the use dis-  
trict regulations of the building zone resolution, and that  
the application be and it hereby is *granted on condition* that  
the building shall be limited to a four (4) story structure  
above grade; that a rear yard of not less than 10 ft. depth  
for the entire width of the property shall be provided in  
accordance with the zoning resolution; that the front ele-  
vation shall be finished with face brick, architectural terra  
cotta or stone trimmings; that the westerly gable wall shall  
be unpierced throughout its entire height and length; that  
an enclosed stair hall shall be located at the extreme westerly  
end of this proposed structure, directly at the street front;  
that the elevator installed shall be located at the extreme  
easterly end of this proposed structure, and that the use  
and operation of this structure shall be restricted to the  
use and occupancy and conduct of the business adjoining  
to the east, in conjunction with the operation of a retail  
furniture business; this application is *granted* specifically  
*on condition* that there shall be no material stored, loaded  
or unloaded on the sidewalk of this premises outside the  
building line; that there shall be no advertising sign of any  
nature or description permitted on the front of this build-  
ing; all permits necessary for the prosecution of the work  
shall be obtained within nine (9) months and the building  
completed within eighteen (18) months from the date of  
this action.

## THE RESOLUTION:

(1015-25-BZ)

WHEREAS, Robert Teichman, for The 138 West 99th Street Corp., owner, filed, October 2, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 136-142 West 99th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 26, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 99th street, West 98th street and Columbus avenue are all in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered September 23, 1925, reads:

"No. 3. Garage for more than five cars is unlawful in a business district."

and

WHEREAS, the proposed building is of fireproof construction, six stories and basement in height, with a frontage of 100 ft. and a depth of 88 ft. 4 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the premises under appeal is at present occupied by five-story double tenement houses; and

WHEREAS, the board concluded that applicant was not entitled to relief under section 7e of the building zone resolution, and that there would not be practical difficulty or unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the decision of the superintendent of buildings be and the same hereby is affirmed, and that the application be and it hereby is denied.

1004-25-BZ.

APPLICANT—C. N. Whinston & Bros., for Mah Realty Holding Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the change of occupancy of the 1st story of an existing apartment building from dwelling use to stores.

## THE RESOLUTION:

(1004-25-BZ)

WHEREAS, C. N. Whinston & Bro., for Mah Realty Holding Corporation, owner, filed, October 1, 1925, an application, under the building zone resolution, to permit in a residence district the change of occupancy of the 1st story of an existing apartment building from dwelling use to stores; premises 2399 Grand Concourse, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 26, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that the westerly side of Grand Concourse from East 184th street to a point 330 ft. northerly therefrom is in a residence district, and that the remainder of Grand Concourse is in a business district; and

WHEREAS, the decision of the superintendent of buildings rendered September 29, 1925, reads:

"1. Proposed alteration and conversion of dwelling in residence district to be used partly for business purposes is contrary to provision of Building Zone Resolution."

and

WHEREAS, the existing building is of non-fireproof construction, five stories in height, with a frontage of 50 ft. and a depth of 67 ft.; to be occupied as stores and apartments; and

WHEREAS, the board concluded that there would be practical difficulty and unnecessary hardship in the way of carrying out the strict letter of the building zone resolution;

Resolved, that the board of standards and appeals hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects the 1st or street story of these premises, on condition that the premises otherwise throughout shall be used and maintained for dwelling occupancy; that the use operation of the stores shall be restricted to retail mercantile business; that there shall be no delicatessen or fish store occupancy on any part of the premises; that all permits necessary for the prosecution of the work shall be obtained within ninety days and the work completed within six months from the date of this action.

## AMENDED AREA FIXED.

(1147-25-BZ)

The chairman presented and read a communication from Charles P. Canella, requesting the board to fix amended area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 436-446 New York Avenue, Brooklyn.

The following amended area was approved by the board:

Both sides of New York Avenue from East 100th Street to a point 100 feet north of Montgomerie Street; also the property in the rear and for a distance of 50 feet from any part of the premises in question.

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

#### THE RESOLUTION:

(721-25-A)

WHEREAS, Eugene deRosa, for Regun Amusement Company, Inc., lessee, filed, July 8, 1925, an appeal from a decision of the fire commissioner, affecting premises 60-62 West 116th street and 75-79 West 115th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered June 26, 1925 (N. B. Application No. 294-25), reads:

"4. Provide a regulation 4 in. standpipe system with primary supply from a 3500 gallon gravity tank, the bottom of which must be at least 20 ft. above the roof of the roof garden. Show the standpipe risers and hose stations to be near the side exits at the N. W. and S. E. corner in lieu of at the middle.

"5. Provide for the standpipe equipment an auxiliary supply consisting of a 250 gallon per minute automatic pump with 25 horsepower electric motor suctioning from a 5000 gallon steel tank. Show location of this fire pump and suction tank completely with their proper connections, valves, etc., to the standpipe system."

and

WHEREAS, the building (facing on two street fronts) is fireproof, one story and roof garden in height, 38 ft. by 201 ft. 10 in. in area (approximately 7,600 sq. ft.); OCCUPIED as a moving picture theatre with auditorium and roof garden; seating capacity of auditorium being 930 persons and of the roof garden 860 persons; at certain periods both the auditorium and the roof garden are in operation at the same time; and

WHEREAS, appellant contends that the walls of the building would not support a roof tank, and proposes to install a standpipe system composed of two 4 in. standpipe risers, one on each side of auditorium and roof garden, with outlets on each story, and 100 ft. of approved hose at each outlet; the system to be connected with the city main in 116th street; appellant contends, further, that the city main has a hydrostatic pressure of 36 pounds per sq. in. and is fed two ways.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, as to Objection 4, only so far as it affects the installation of the gravity tank, on condition that two (2) 4 in. standpipe systems connected to city main on both street fronts, shall be provided; as to Objection 5, on condition and only so long as a pressure in street mains of not less than 40 pounds per sq. in. static pressure shall be maintained; that the height of roof grade shall not exceed an average of 23 ft. above the sidewalk level; and on condition that the use and occupancy of the building shall be restricted to the conditions of the certificate of occupancy now in force.

812-25-A.

APPELLANT—W. H. Hubbard, Jr., for Nichols Copper Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—Southeast corner of Hobson avenue and Long Island R. R., Borough of Queens.

#### APPEARANCES—

For Appellant: W. H. Hubbard, Jr.

For Administration: Inspector Lenihan of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

#### THE VOTE—

#### THE RESOLUTION:

(812-25-A)

WHEREAS, W. H. Hubbard, Jr., for Nichols Copper Co., owner, filed, August 7, 1925, an appeal from an order of the fire commissioner, affecting premises southeast corner of Hobson avenue and Long Island Railroad, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 18, 1925, reads (Order No. 97030-LC):

"You are hereby notified that an inspection of the

# MINUTES

above premises, used for the storage of fuel oil, shows that the following must be done before the permit requested by you can be issued:

## FORTHWITH

"1. Install a 4 in. standpipe in buildings 5 and 6 (Anode Buildings) and in Building 3 (the Wire Bar Refinery), plans and specifications to be filed and approved by the Fire Department before work is commenced. Sec. 581, Chapter 5, C. O., N. Y.;"

and

WHEREAS, the premises consists of a large plot of ground containing a number of buildings, those designated on plans as numbers 3, 5 and 6 and affected by the fire department order No. 97030-LC, are non-fireproof, one story, 74 ft., 39 ft. and 47 ft. 6½ in. in height, respectively; floor areas about 8,736, 9,600 and 26,266 sq. ft., respectively. OCCUPIED as a copper works; Building No. 3, 25 persons; Buildings Nos. 5 and 6, 65 persons; Buildings Nos. 5 and 6 have six communicating openings, each 10 ft. in width; and

WHEREAS, the appellant contends that Building No. 3 is of all metal construction and does not come within the code requirements for buildings of "10,000 square feet in area and 85 feet in height"; that premises is equipped with a fire fighting system with pumps maintaining 60 pounds pressure.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the buildings shall not be increased in height, area or dimension; that the present yard hydrant system shall be maintained; and *granted* so long as the present use and operation of the premises remain substantially unchanged.

832-25-A.

APPELLANT—Croker National Fire Prevention Engineering Company, for Estate of Kate C. Clark, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—226 East 144th street, The Bronx.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

THE RESOLUTION:

(832-25-A)

WHEREAS, Croker Nat'l Fire Prev. Eng. Co., for Estate of Kate C. Clark, owner, filed, August 13, 1925, an appeal from the order of the fire commissioner, affecting premises No. 226 East 144th street, Borough of Bronx; and

WHEREAS, the order of the fire commissioner, dated February 27, 1925, reads (Order No. 72413-F):

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east, south and west sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5, of the Code of Ordinances.;"

and

WHEREAS, the building is non-fireproof, five stories in height, 50 ft. by 93 ft. in area. OCCUPIED: Manufacturing metal cabinets, 25 persons on each story; and

WHEREAS, the appellant claims there are 24 openings at west, 22 openings at east and 24 openings at south affected by fire department order No. 72413-F; he contends that the exposures referred to at south and west are caused by the

roof of the basement, which is a part of the same building in question; in regard to the east side, he proposes to provide iron shutters on the windows which come directly above the adjoining roofs.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that all windows over the abutting 3rd story building, also on the course of the fire escape stair on rear of building and shaftway, shall be protected in accordance with the regulations.

THE RESOLUTION:

(905-25-A)

WHEREAS, James W. Byrnes, for Mary Minkoff, owner, filed, September 4, 1925, an appeal from an order of the fire commissioner, affecting premises 307-315 Moffat street and 288 Cooper street, Brooklyn; and

WHEREAS, the order of the fire commissioner, No. 8042-F, dated June 26, 1925, reads:

"1. Install an automatic dry pipe sprinkler throughout entire building, used for the storage and manufacture of paper boxes \* \* \*;"

and

WHEREAS, the building is non-fireproof, one story (15 ft. in height, 100 ft. by 100 ft., with an extension 20 ft. 100 ft. leading to Cooper street. OCCUPIED: Manufacturing paper boxes, total of 50 persons; and

WHEREAS, the appellant contends that the building is equipped with siamese connections and standpipes, connected with the street water main, having two 2½ in. outlets with 75 ft. of hose at each outlet, also a 2½ gallon fire extinguisher and fire pails; he proposes to install additional 2 gallon fire extinguishers.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that 2½ in. standpipe, street connection shall be maintained; so long as the structure shall not be increased in height or area; that the premises shall be maintained without cellar; and that all storage of cardboard stock shall be kept on 1st floor.

## THE RESOLUTION:

(959-25-A)

WHEREAS, Helmle & Corbett, for Sperry Gyroscope Co., owner, filed, September 16, 1925, an appeal with the board of standards and appeals from orders of the fire commissioner, affecting premises 36-48 Flatbush avenue extension, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner read:

Order No. 74583-LF, dated March 26, 1925—

"1. Provide a two way 3 inch siamese connection for the sprinkler supply with double clapper valves and caps and signs, to be placed on Flatbush Avenue Extension front of building, not less than 18 inches nor more than 2 feet above the sidewalk, and in a horizontal position accessible to the Fire Department, Sec. 20, Ch. 12, Code of Ordinances.

"2. Reduce the height of hose outlets on standpipe risers on all stories so that same will be not less than 5 feet or more than 6 feet above the floor or landing. Sec. 20, Ch. 12, Code of Ordinances, and Rules of the Board of Standards and Appeals.

"3. Provide a 2½ inch outlet with proper valves, for standpipe line located in stairhall at west end of building on roof. Sec. 20, Ch. 12, Code of Ordinances.

"4. Provide ½ inch ball drips for standpipe lines inside of building, at lowest level between check valves and outside siamese connections. Sec. 20, Ch. 12, Code of Ordinances.

"5. Provide an emergency drain for standpipe tanks not less than 4 inches in diameter connected directly to the bottom of the tank or to the standpipe supply line above the roof, and terminating not less than 30 inches nor more than 4 feet above the roof, in a horizontal run. Emergency drain shall be provided with a 4 inch quick opening gate valve located in a readily accessible position not more than 4 feet above the roof. Sec. 20, Ch. 12, Code of Ordinances.

"6. Arrange the house water supply pipe so that same will connect with tanks on the outside thereof above the 3500 gallon mark only. Sec. 20, Ch. 12, Code of Ordinances."

Order No. 74584-F, dated March 31, 1925—

"1. Raise standpipe tanks to 20 feet above the highest outlet and properly support same, as per Section 20, Ch. 12, Code of Ordinances and Rules of the Board of Standards and Appeals."

and

WHEREAS, the building is fireproof, 11 stories (150 ft.) in height, having a frontage of 177 ft. 10 in. on Chapel street, 110 ft. on Flatbush avenue extension, and 234 ft. 11 in. on Concord street, approximately 25,000 sq. ft. in area; OCCUPIED as a tenant factory, approximately 800 persons above the 1st story; and

WHEREAS, a standpipe system has been installed, with tanks on roof, located 2 ft. 7 in. above the roof level, the highest outlet (in pent house) being located above the bottom of the tank; two siameses on Chapel street and also two on Concord street; two 4 in. risers with outlets on each story located 6 ft. 2 in. to 6 ft. 10 in. above the floor level; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system, and in re: Item No. 5, contends that a gate valve has been installed in the emergency drain, but that it is not a "quick opening" valve; and contends, further, that the existing fire extinguishing equipment in the building is adequate.

Resolved, that the order of the fire commissioner, No. 74583-LF, be and it hereby is *modified*, and the appeal as to Item 1 of this order be and it hereby is *granted on condition* that not less than four siamese connections shall be maintained (two on Concord street and two on Chapel street); as to Item 2, *on condition* that all standpipe outlets above 6 ft. height shall be extended with wrought iron elbow and nipple to a height not more than 5 ft. 8 in. above floor level by an extension of regulation size, properly braced

with strap bracket to standpipe line, equipped with 2½ in. hose; *denied*, as to Items 3, 4, 5 and 6; that the order of the fire commissioner, No. 74584-F, be and it hereby is *modified*, and the appeal as to Item 1 of this order be and it hereby is *granted on condition* that not less than two existing tanks shall be cross-connected and maintained exclusively for standpipe supply.

1025-25-A.

APPELLANT—Ernest M. Morrison, for Citizens Community House, Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—215-32-42 Jericho turnpike, Queens Village, Borough of Queens.

APPEARANCES—

For Appellant: Ernest M. Morrison and John Schroll.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle.... 4

Negative: Chief Kenlon..... 1

Absent ..... 0

THE RESOLUTION:

(1025-25-A)

WHEREAS, Ernest M. Morrison, for Citizens Community House, Inc., owner, filed, October 5, 1925, an appeal from the order of the fire commissioner, affecting premises No. 215-32-42 Jericho turnpike, Queens Village, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 26, 1925, reads:

"2. Provide a tank of 3500 gallon capacity with all appurtenances, bottom to be 20 feet above the roof.

"3. Tank must be fed at 65 gallons per minute."

and

WHEREAS, the premises consist of a plot of ground upon which are located two fireproof buildings, the easterly building being occupied for two stores and also as a moving picture theatre having a seating capacity of 1,073 persons and being one story and mezzanine in height, 75 ft. by 134 ft. (approximately 10,000 sq. ft.) in area; there being two exits on the 1st story, in the westerly wall of the theatre building, into a fireproof passageway in the westerly building; and

WHEREAS, appellant contends that the stores are separated by unpierced fireproof walls from the theatre; and contends, further, that the existing standpipe system is connected to an 8 in. city water main in the street, said main having a hydrostatic pressure of 60 pounds per square inch and is fed two ways.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* so long as the building shall not be increased in height, area or dimension and shall be restricted to operation and conduct of a moving picture theatre only, *on condition* that standpipe equipment shall be installed, supplied from the street main with 4 in. connection; and that the street pressure shall be not less than 55 pounds.

Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1093-25-A)

WHEREAS, John A. Lynch, president, Borough of Richmond, for City of New York, owner, filed, October 26, 1925, an appeal with the board of standards and appeals from a decision of the fire commissioner, affecting premises Outlet street, Oakwood Beach, Borough of Richmond; and

WHEREAS, the decision of the fire commissioner, dated October 26, 1925, re: N. B. Application No. 1719-25, reads:

"2. Method of using gasoline and devices must be approved by the Board of Standards and Appeals.

"3. Tank must be located 2 ft. below lowest level within radius of 10 ft.

"4. Tanks must be encased in 12 in. of Portland cement concrete 1-2½-5 mix, independent of any well.

"5. Vents must extend to a point 10 ft. above roof and from any exposure.";

and

WHEREAS, the premises consists of a plot of ground on the east side of the sewer outlet, about 300 ft. northwest of the shore line at Oakwood Beach, upon which it is proposed to erect a concrete non-fireproof sewage treatment and pumping plant, one story and tower in height, 42 ft. 6 in. by 42 ft. 6 in. in area; a 275 gallon gasoline storage tank is to be buried 2 ft. 6 in. below the sidewalk level and 6 ft. outside the front (southwest) wall of the building with a vent pipe extending 4 ft. above the nearest part of the tower roof; and

WHEREAS, the appellant contends that it is impractical to bury the tank as required by the rule, in that the floor of the pump-well will be 26 ft. below the filled-in ground surrounding the building; that it would be difficult to provide proper supports for a vent pipe extending 10 ft. above the highest part of the tower roof; he proposes to adopt the Stewart vacuum system for automatically supplying gasoline to the engine, and refers the board to Cal. No. 477-21-A, granted under similar conditions.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the gasoline engine supply be automatically operated by a recognized standard vacuum system.

## THE RESOLUTION:

(1100-25-A)

WHEREAS, John J. Gilmartin, for Louis F. Rhoades, et al., owners, filed, October 26, 1925, an appeal from an order of the fire commissioner, affecting premises No. 9 North Moore street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 2, 1925, reads (Order No. 84973-F):

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east side of building \* \* \*";

and

WHEREAS, the building is non-fireproof, six stories in height, 24 ft. by 72 ft. in area at 1st story and 24 ft. by 67 ft. in area above; OCCUPIED for the manufacture of plate glass products (mirrors, table tops, etc.), 13 persons above the 1st story; and

WHEREAS, there are four (4) windows in the easterly wall, on the 5th and 6th stories of the building, within 50 ft. of the roof of a neighboring three-story building to the east; and

WHEREAS, appellant contends that the building, constituting the exposure, is used by the street cleaning department and occupied solely for the storage of street cleaning apparatus, scrapers, shovels, etc.

Resolved, that the order of the fire commissioner, No. 84973-F, Item I, be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so long as the present use and occupancy remain unchanged and the adjoining exposure to the east is maintained for non-inflammable storage occupancy.

## THE RESOLUTION:

(295-25-A)

WHEREAS, The Salvation Army, owner, filed, March 1, 1925, an appeal from an order of the fire commissioner affecting premises 533-537 West 48th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 22, 1924, reads (Order No. 26482-LC):

"Referring to your application, dated October 8, 1924, for a permit to maintain a non-storage garage at the foregoing address, I regret to inform you that your application for such permit is disapproved for the following reasons:

"1. The 4th and 5th stories are used as a dwelling. Note—Dwelling occupancy must be confined to not more than two floors immediately above the garage and other occupancy is permitted to intervene between garage and the dwelling. Sec. 154, Chapter 10, Code of Ordinances.

"2. Boiler is not separated from the remainder of the building by unpierced fireproof walls of solid masonry of at least 8 in. in thickness or its equivalent. Sec. 159-1, Chapter 10, Code of Ordinances.";

and

WHEREAS, the building is fireproof, 7 stories in height, 75 ft. by 90 ft. in area. OCCUPIED: 1st story, garage, office and baling room, 10 persons; 2nd story, office, storage and storage, 14 persons; 3rd story, chapel and living room, 4 persons; 4th story, dormitory, 7 persons; 5th story, laundry and dry and officers' quarters, 4 persons; 6th story, tailor

# MINUTES

furniture repair shop, 4 persons; 7th story, carpenter and upholstery shop, 6 persons; and

WHEREAS, the appellant contends that the building is occupied by the Salvation Army, a religious corporation created by special act of legislature; that, with regard to Item 1, chapter 10, section 154 of the code of ordinances does not apply to this institution; with regard to Item 2, that the boiler room is enclosed with fireproof walls, 12 in. in thickness, and with fireproof self-closing doors at all openings.

Resolved, that the order of the fire commissioner, No. 26482-LC, Items 1 and 2, be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

THE RESOLUTION:

(169-25-A)

WHEREAS, The Salvation Army, for The Salvation Army, owner, filed, February 10, 1925, an appeal from decision of the fire commissioner, affecting premises 533-537 West 48th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 29, 1924, reads:

"1. Remove all combustible fibre from these premises."

and

WHEREAS, the building is fireproof, seven stories in height, 15 ft. by 90 ft. in area. OCCUPIED: 1st story, garage, office and baling, 10 persons; 2nd story, offices, stores and storage, 14 persons; 3rd story, chapel and living rooms, 4 persons; 4th story, dormitory, 7 persons; 5th story, laundry and officers' quarters, 4 persons; 6th story, tailor and furniture repair shop, 4 persons; 7th story, carpenter and upholstery shop, 6 persons; and

WHEREAS, the appellant contends that the building is occupied by The Salvation Army, a religious corporation created by special act of the legislature; that there is not more than one carload of combustible fibre stored on the 1st story of the premises at any time; that it would be impossible to remove the combustible fibre without closing down the institution.

Resolved, that the order of the fire commissioner, dated October 29, 1924, Item 1, be and the same hereby is *affirmed*, and the appeal be and it hereby is *denied*.

APPELLANT—James C. McGuire, Jr., for Fifth Avenue Coach Company, owner.

SUBJECT—Application for reopening—appeal from decision of fire commissioner.

PREMISES AFFECTED—605-619 West 132nd street, Manhattan.

APPEARANCES—

For Appellant: Francis Seaman.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal reopened and restored to calendar and withdrawn at request of appellant to comply with original order of fire commissioner.

THE VOTE TO REOPEN AND TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners  
Connell, Flanagan and Guilfoyle and

Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(645-25-A)

WHEREAS, James McGuire, for the Fifth Avenue Coach Company, owner, filed, July 23, 1925, an appeal from a decision of the fire commissioner, affecting premises 605-619 West 132nd street, Manhattan; and

WHEREAS, the decision of the fire commissioner, App. No. 1212-22, dated June 11, 1925, reads:

"The amount of water in the gravity in excess of 25,000 gallons shall have to be specified by the Board of Standards and Appeals."

and

WHEREAS, the building is fireproof, with stone concrete floor arches, three stories and basement in height, 400 ft. by 199 ft. 10 in. in area; OCCUPIED as a garage and factory (the 3rd story being in process of construction at the present time), basement, 75 persons; 1st story, 100 persons; 2nd story, 100 persons; 3rd story, 400 persons; and

WHEREAS, the appellant proposes to install a 40,000 gallon gravity tank connected by an 8 in. dead riser to the underground cross connections, which in turn are connected with sprinkler risers and to four 6 in. header lines direct to the 6 in. street mains, properly metered and checked; there is also a 100,000 gallon underground reserve reservoir, separately water supplied, connected with the sprinkler system through a 1,000 gallon per minute fire pump, and appellant requests the board to approve the 40,000 gallon gravity tank as adequate in accordance with section 5 of the sprinkler rules; and

WHEREAS, a variation was granted by the board at its meeting November 17, 1925, on conditions prescribed. Appellant requested a reopening of the case to seek the omission of a quick-opening line and control valve and rearrangement of his tank storage; and

WHEREAS, the rearrangement of proposed tanks would come within the provisions of rules of the board, further consideration was unnecessary; and

WHEREAS, in view of the foregoing facts, the appellant on restoration of case to calendar requested permission to withdraw the appeal of original filing to comply with regulations.

Resolved, that the appeal be and it hereby is *withdrawn*.

## BUILDING ZONE CASES.

114-25-BZ.

APPLICANT—Jenks & Rogers, for Kenner Realty Co., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

For Applicant: John H. McCooey, Jr.

For Opposition: Philip Scharf.

ACTION OF BOARD—Application laid over to February 9, 1926, on request.

599-29-BZ.

APPLICANT—Eugene De Rosa, for Maxlam Theatre Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7c of the building zone resolution, to permit in a residence district extending from a business district the erection

# MINUTES

and maintenance of a building to be used for business and theatre purposes.  
PREMISES AFFECTED—Southeast corner of Sheridan avenue and East 167th street, The Bronx.  
APPEARANCES—  
For Applicant: Martin J. Ort.  
For Opposition: None.  
ACTION OF BOARD—Application laid over to February 2, 1926, at 10 a. m., on request of applicant's representative.

## NOTICE.

The following resolution as to the sale of pamphlets was adopted:

### THE VOTE TO FIX PRICE OF PAMPHLETS OF BOARD—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle and Assistant Chief Martin ..... 5

Negative ..... 0  
Absent ..... 0

### THE RESOLUTION:

WHEREAS, the demand for copies of rules adopted by this board and issued in pamphlet form has very greatly increased; and

WHEREAS, this greatly increased demand has necessitated printing new editions so frequently as to cause a tremendous increase in cost in excess of our budget allowance for printing.

*Resolved*, that on and after February 1, 1926, copies of all rules adopted by this board and issued in pamphlet form shall be charged for at the rate of five cents per copy delivered, and seven cents to cover postage if mailed.

Adjourned 5.30 p. m.

JAMES O'CONNOR, *Secretary*.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, December 22, 1925, as they appeared in Bulletin No. 50, Vol. 10, are hereby corrected to read as follows:

### THE RESOLUTION:

(368-25-S)

WHEREAS, Croker Natl. Fire Prev. Eng. Co., for Estate of Paul J. Byck, lessee, filed, April 4, 1925, a petition with the board of standards and appeals from an order of the fire commissioner, affecting premises 582 Fifth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 11, 1924, reads:

"Order No. 67732-LD:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof, so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law. \* \* \*

"NOTE:—Among the defects noted on this fire escape are the following:

"No safe passageway to street from termination. No 60 degree stairways connecting balconies. No openings 2 ft. by 6 ft. provided. No steps provided from floor to sills of openings.

"2. Provide additional means of exit from the front portion of the 2nd story, and from the front and rear portion of the cellar, remote from the existing exit, in accordance with the requirements of Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, six stories and basement in height, 25 ft. by 100 ft. in area at 1st and 2nd stories; 25 ft. by 90 ft. in area at 3rd story; and 25 ft. by 65 ft. 6 in. in area above. OCCUPIED: Cellar,

\*Correction—Word "openings" changed to "windows" in lines 40 and 62 and word "north" changed to "south" in line 65 and word "only" omitted in line 59.

front, stock room; rear, locker room; 1st floor, front, store, 7 persons; rear, bank, 15 persons; 2nd floor, front, jeweler, 4 persons; rear, bank, 7 persons; 3rd floor, gowns and hats, 4 persons; 4th floor, shoes, 8 persons; 5th floor, tailor, 4 persons; 6th floor, photographer, 3 persons. EXITS: An interior non-fireproof stairway, extending from the 1st story to roof, enclosed in fire retarded partitions, with fire doors at openings; horizontal openings in the basement, 1st and 2nd stories, leading to the bank building to the south; a fire escape on the rear of the building having fireproof windows along the course thereof, extending from the main roof to the roof of the 1st story extension; with EGRESS from the termination of the fire escape by means of fire escape balcony of the building to the north; ROOFS of adjoining buildings to north 7 ft. higher; to south 4 stories higher; and

WHEREAS, petitioner contends that it would be a hardship to remove the existing fireproof double-hung windows and to provide the 2 ft. by 6 ft. openings leading to the fire escape; that the existing means of egress from the termination of the fire escapes are adequate; that owing to the bank occupancy at the rear of basement and 1st and 2nd stories, it is not possible to provide additional exits from these stories through those portions, but proposed to provide in the front of basement an engineer's ladder leading to the sidewalk.

*Resolved*, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted so far as it affects egress from the termination, on condition that the existing fire escape shall be connected with the second story balcony of the adjoining fire escape to the north, all windows on the course to be made fire proof and self-closing; granted, as to Item No. 2, on condition that not less than two approved horizontal exits shall be provided to the adjoining property to the south at the second story level, and granted on condition that all factory use and occupancy shall be vacated and discontinued on or about February 1, 1927, and granted only so long as the existing conditions, until that date, remain unchanged.

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, three cents each, postage to be added if the forms are to be supplied by mail.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### RULE 1. PERMIT.

(a) **Prohibition.** No person shall smoke, or carry a lighted cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and of the lessee or lessees of the building containing such factory or factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall direct, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable blank forms to be furnished by the fire commissioner.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed upon expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

### RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;  
Boiler making;  
Brick, terra cotta or artificial stone works;  
Forge shops;  
Foundries;  
Iron, steel, brass or copper works;  
Machine shops;  
Smelting;  
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed; waste materials are deposited in fireproof receptacles.

(3) All waste paper and other inflammable

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

*Amended Resolution Adopted by the Board of Appeals,  
March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## ELECTRICAL CODE ON SALE.

Copies of the Electrical Code are now on sale at the Distributing Division of the City Record Office, 125 Worth street. Price, 30c; by mail, 35c.

# FUEL OIL RULES

## CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS.

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, and January 18, 1924.

### Rule 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

## GRADE A FUEL OIL.

### Rule 2. Manner of Storage for Grade A Fuel Oil.

Fuel oil, to be used for commercial, heating and power purposes, shall be at all times contained in metal tanks with all openings or connections through the tops of the tanks.

### Rule 3. General Location of Tanks for Grade A Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

### Rule 4. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

#### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

#### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

#### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

#### Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions.

# FUEL OIL RULES

Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 5. Material and Construction of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free from physical imperfections, such as, laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced entirely by means of rods or bars,

these members should not be spaced greater than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

### Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 5.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{1}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more

# FUEL OIL RULES

than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 60 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full strength of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 15 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket gas or other approved system for use in case of fire, arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

### Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Grade A Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

# FUEL OIL RULES

## Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

## Section 3. Tests for Piping.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

## Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) Fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the

same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oil in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

# FUEL OIL RULES

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 12. Burners for Grade A Fuel Oil

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals.

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently posted near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.

## GRADE B FUEL OIL.

## Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes when stored, shall be at all times contained in closed metal tanks.

## Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tanks shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.

## Rule 22. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

## Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).

## Rule 25. Piping for Grade B Fuel Oil.

### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding material.

# FUEL OIL RULES

rials. Hose shall be no longer than necessary.

## Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

## Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

## Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

## Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.

## Rule 26. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) See Rule 9 (a) for construction of valves.

(c) A remote control for shutting off the supply of oil to the burners shall be provided.

(d) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure.

## Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.

## Rule 28. Pilot Light.

Automatic systems shall be so designed that the flame cannot be extinguished by operation of the automatic control valve. A pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

## Rule 29. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature of which the oil burning device to be installed is capable.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 30. Fire Protection.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster board or other approved incombustible material. Above the

furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal or three-fourths ( $\frac{3}{4}$ ) of an inch of Portland cement plaster on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 31. Instruction Cards.

See Rule 14.

## Rule 32. Installation.

See Rule 16.

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

## Rule 34. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or forcing systems, are prohibited.

## Rule 35. Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies or the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

WILLIAM E. WALSH, Chairman.

## FORMS FOR NOTICES TO PROPERTY OWNERS

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13, properly filled out.

# RULES

## FIRE ESCAPE RULES OF THE BOARD OF STANDARDS AND APPEALS, ADOPTED JULY 2, 1918, CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED MAY 9, 1924, CAL. NO. 414-24-SR.

**Rule 1.** In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ( $\frac{1}{2}$ ) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ( $1\frac{1}{2}$ ) in. mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire windows leading to balconies may be at window sill level if fixed steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto.

(c) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

**Rule 2.** A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

**Rule 3.** When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) **Fire Escapes.**—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) **Interior Stairways.**—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) **Exterior Screened Stairways.**—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for substandard fire escapes in subdivision a.

(d) **Horizontal Bridges.**—Horizontal bridges and party wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

WILLIAM E. WALSH, *Chairman.*

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1 $\frac{1}{2}$ -3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2 $\frac{1}{2}$ -5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## BOARD OF STANDARDS AND APPEALS.

### APPLIANCES SUBMITTED FOR APPROVAL.

- 53-21-S—Angle Hose Valve, approval of.
- 1372-21-S—Ford Fire Line Reducing Valve, approval of.
- 1636-21-SA—Gilbert & Barker Oil Burner and Pump, approval of.
- 337-22-S—Elkhard Brass Company, Siamese Connection, approval of.
- 357-22-S—Quinn Acme Crude Oil Burner, approval of.
- 392-22-S—The Surface-Combustion Company Low Pressure Gas and Oil Burner, approval of.
- 447-22-S—Howard Water Pressure Reducing Devices, approval of.
- 610-22-S—Crocker Gas Valve, approval of.
- 799-22-S—Kennell Gas Cut-Off Valve, approval of.
- 957-22-S—Burnwell Mechanical Burner, approval of.
- 1104-22-S—Dean Fuel Oil Pump, approval of.
- 1105-22-S—Combustion Fuel Oil Burner, approval of.
- 1173-22-S—Anti-Syphon Valve, approval of.
- 1230-22-S—Thermostats for Automatic Fire Alarm Systems, approval of.
- 1249-22-S—Coen Oil Burner, approval of.
- 1274-22-S—Rodriguez Oil Burner, approval of.
- 1391-22-S—Dempsey High & Low Pressure Fuel Oil Burner, approval of.
- 1526-22-S—Delaney Fuel Oil Burner, approval of.
- 57-23-SA—Collin Patent Automatic Gas Cut-Off Valve, approval of.
- 92-23-SA—Surface Combustion Low Pressure Fuel Oil Burner, approval of.
- 124-23-SA—Master Gas Shut-Off Valve, approval of.
- 125-23-SA—Packless Gas Shut-Off Valve, approval of.
- 127-23-SA—S. & K. Gas Shut-Off Valve, approval of.
- 232-23-SA—Manual and Thermal Gas Cut-Off Valve, approval of.
- 275-23-SA—Wm. E. Toelle Manual & Automatic Gas Shut-Off Valve, approval of.
- 279-23-SA—Heil Standard 200 Gal. Truck Tank, approval of.
- 297-23-SA—"Automatic" Deluge Valve, approval of.

# RESERVE CALENDAR

- 345-23-SA—Cornell Falat Oil Burner, approval of.
- 392-23-SA—"Billow" Class G. R. Oil Burner, approval of.
- 393-23-SA—"Billow" Class C. R. F. Oil Burner, approval of.
- 397-23-SA—Cornell No. 1 Type "A" Oil Burner, approval of.
- 443-23-SA—Automatic Gas Shut-Off, approval of.
- 525-23-SA—Tilman-White Gas Cut-Off Valve, approval of.
- 544-23-SA—Domestic Fuel Oil Burner, approval of.
- 888-23-SA—Lewis Oil Burner, approval of.
- 898-23-SA—Enco Type 700 Steam Atomizing Burner, approval of.
- 952-23-SA—Automatic Gas Cut-Off, approval of (Brooklyn Co.).
- 960-23-SA—Crescent Combustion Fuel Oil Burner, approval of.
- 1046-23-SA—Frankfort Type "P" Low Pressure Oil Burner, approval of.
- 1050-23-SA—Marsh Fuel Oil Burner and Pump, approval of.
- 1146-23-SA—Pennsylvania Globe Rotary Oil Burner, approval of.
- 1169-23-SA—Warren Fuel Oil Pumps & Heater Sets, approval of.
- 1176-23-SA—Ziegler Oil Burner, approval of.
- 1246-23-SA—Ludlow Gas Cut-Off Valve, approval of.
- 1339-23-SA—National Light Service Oil Pump, approval of.
- 1346-23-SA—Heatiator Oil Burner, approval of.
- 1358-23-SA—Worthington Oil Burner, approval of.
- 1364-23-SA—Staples & Pfeiffer Oil Burner, approval of.
- 1415-23-SA—Enco Mechanical Atomizing Fuel Oil Burner, approval of.
- 1429-23-SA—Kerrihard Oil Burner, approval of.
- 1444-23-SA—Tate-Jones No. 6 Oil Burner, approval of.
- 1484-23-SA—Universal G. P. O. Burner, approval of.
- 1493-23-SA—Newport Rotary Oil Burner, approval of.
- 1538-23-SA—Lillibridge Oil Vapor Burner, approval of.
- 1550-23-SA—Apex Gas Cut-Off Valve, approval of.
- 254-24-SA—Sherman Oil Burner, approval of.
- 269-24-SA—Universe Oil Burner, approval of.
- 365-24-SA—Koaless Oil Burner, approval of.
- 379-24-SA—Sure Heat Automatic Oil Burner, approval of.
- 492-24-SA—Holtzer-Cabot Type "C" Fire Alarm Box, approval of.
- 501-24-SA—Hagan Swivel Type Burner for Fuel Oil, approval of.
- 503-24-SA—Kinney Rotating Plunger Pump, approval of.
- 536-24-SA—Climax Oil Burner, approval of.
- 654-24-SA—Marvel Oil Burner, approval of.
- 702-24-SA—Simplex Mechanical Oil Burner, approval of.
- 735-24-SA—Petro Mechanical Burner and Air Register, approval of.
- 755-24-SA—Wills Automatic Gas Shut-Off Valve, approval of.
- 803-24-SA—Holmes-Williams Domestic Oil Burner, approval of.
- 826-24-SA—Heymsfield Low Pressure Burner, approval of.
- 860-24-SA—Monarch Domestic Fuel Oil Burner, approval of.
- 907-24-SA—Dempsey Domestic Burner and Fuel Oil Pump, approval of.
- 939-24-SA—Ballard Super Domestic Oil Burner, approval of.
- 1016-24-SA—Milnes Oil Burner, approval of.
- 1108-24-SA—Simplicity Fuel Oil Burner, approval of.
- 1134-24-SA—Peerless Automatic Oil Burner, approval of.
- 1142-24-SA—Decker Oxohydrogen Oil Burner, approval of.
- 1146-24-SA—Salvo Fire Extinguisher, approval of.
- 1162-24-SA—Hart Automatic Fuel Oil Burner, approval of.
- 1192-24-SA—Kemp Oil Burner, approval of.
- 1197-24-SA—Yankee Oil Burner, approval of.
- 1295-24-SA—A.-B.-C. Oil Burner, approval of.
- 1296-24-SA—Chalmers Oil Burner, approval of.
- 1337-24-SA—Sure Heat Gravity Oil Burner, approval of.
- 1359-24-SA—Oliver Oil Gas Burner No. 30-A, approval of.
- 1372-24-SA—Adga High Pressure Burner, approval of.
- 1395-24-SA—Deming Power Rotary Force Pump, approval of.
- 1500-24-SA—Smolensky Check Valve, approval of.
- 19-25-SA—Winslow Industrial Burner and Pump Unit, approval of.
- 26-25-SA—Keenan Brilliant Burner, approval of.
- 228-25-SA—Silent Glow Oil Burner, approval of.
- 259-25-SA—Electrol Automatic Oil Burner, approval of.
- 340-25-SA—McCann-Harrison Low Pressure Oil Burner, approval of.
- 513-25-SA—Rotary Vacuum Pumps, approval of.
- 535-25-SA—Universe Automatic Oil Burner, approval of.
- 558-25-SA—Globe Dry Pipe Valve Accelerator, approval of.
- 603-25-SA—Cook Automatic Electric Fuel Oil Pump, approval of.
- 671-25-SA—Allen 2½ in. Angle Hose Valve, approval of.
- 683-25-SA—Billow Fuel Oil Burner, approval of.
- 729-25-SA—The Hauck Vention Low Pressure Oil Burner, approval of.
- 752-25-SA—Toro Emergency Gas Shut-Off Valve, approval of.
- 813-25-SA—Hardinge Oil Burner, approval of.
- 814-25-SA—Aetna Automatic Syphone Breaker, approval of.
- 815-25-SA—New Way Gas Generator Burner, approval of.
- 846-25-SA—K.F.C. Fuel Oil Burner, approval of.
- 865-25-SA—Kennan High Pressure Brilliant Gas Oil Burner, approval of.
- 887-25-SA—Moussette Oil Burner, approval of.
- 940-25-SA—Doherty Gas Oil Burner, approval of.
- 1032-25-SA—Melco Automatic Oil Burner, Type A, approval of.
- 1060-25-SA—Rotary Pressure Pump, approval of.

Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.

# ANNUAL REPORT

## CITY OF NEW YORK BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, CHAIRMAN

MUNICIPAL BUILDING

HON. JAMES J. WALKER,  
Mayor, New York City.

February 2, 1926.

Sir:—I have the honor to submit for your information the annual report of the Board of Standards and Appeals, for the year ending December 31, 1925, which is set forth as follows:

### CASES FILED AND PENDING, 1925.

#### FOURTH QUARTER.

Appeals from Administrative Orders .....	120
Applications under Building Zone Resolution .....	98
Petitions for Variation of Labor Law .....	111
Petitions for Approval of Appliances and Materials .....	19
Petitions for Adoption of Rules .....	0
Reopened and Restored to Calendar .....	8
Miscellaneous Docket .....	94
Cases filed, restored, etc., 4th Quarter .....	450
Cases filed, restored, etc., 3rd Quarter .....	341
Cases filed, restored, etc., 2nd Quarter .....	441
Cases filed, restored, etc., 1st Quarter .....	453
Cases pending December 31, 1924 .....	598
Total cases filed and pending up to and including December 31, 1925 .....	2283

### SUMMARY.

#### DOCKET.

Cases pending December 31, 1924 .....	598
Cases filed up to and including December 31, 1925 .....	1350
Restored to calendar .....	60

#### MISCELLANEOUS APPLICATIONS.

Requests to reopen .....	148
Requests to amend .....	6
Requests for modification .....	48
Requests to rescind .....	1
Requests for extension of time .....	18
Requests for extension of permit .....	30
Requests for mechanical installations .....	1
Requests for approval of plans .....	13
Administrative requests .....	7
Requests for interpretation .....	3

Total .....	2283
Disposed of .....	1540
Cases pending December 31, 1925 .....	743

#### DISPOSITION OF CASES.

Withdrawn .....	140
Dismissed .....	122
Denied .....	203
Granted .....	10
Granted on condition .....	758
Appliances approved .....	25
Appliances dismissed, disapproved or withdrawn .....	7
Rules approved .....	0
Rules disapproved or rescinded .....	0

#### MISCELLANEOUS ACTIONS.

Requests to reopen granted .....	137
Requests to reopen denied .....	10
Requests to amend granted .....	6
Requests to amend denied .....	0
Requests for modification granted .....	45
Requests for modification denied .....	1
Requests to rescind granted .....	1
Requests to rescind denied .....	0
Requests for extension of time granted .....	18
Requests for extension of time denied .....	0
Requests for extension of permit granted .....	30
Requests for extension of permit denied .....	0
Requests to install granted .....	1
Requests to install denied .....	0
Plans approved .....	13
Plans disapproved .....	0
Administrative requests granted .....	6
Administrative requests denied or withdrawn .....	1
Interpretations .....	3
Requests withdrawn or dismissed .....	3

Total .....	1540

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,  
Room 1001, Municipal Building,  
New York City.

### CONTENTS

is issue of the Bulletin contains, in the order

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, February 2, 1926, at 10 a. m.

Minutes of Regular Meeting, February 2, 1926, at 2 p. m.

Correction.

Rules.

Reserve Calendar.

Annual Report.

Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, February 9, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, February 16, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Holland ..... 1

THE RESOLUTION:

(583-25-A)

WHEREAS, Ferdinand Tannenbaum, for Brooklyn Cooperage Company, owner, filed, June 5, 1925, an appeal with the board of standards and appeals from an order of the fire commissioner, affecting premises 151-65 Kent avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 20, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, three stories in height, 100 ft. by 200 ft. in area. OCCUPIED: Manufacturing wooden boxes; 1st story, 10 persons; 2nd story, 20 persons; 3rd story, 2 persons; and

WHEREAS, the appellant claims the building is equipped with adequate exits; water pails and chemical extinguishers; a 2½ in. standpipe line connected with the city main; also a fire alarm box connected with the fire headquarters; he further contends that the building is under constant supervision during 24 hours of the day; and

WHEREAS, the appellant contends that the building will be demolished and discontinued on or before May 1, 1926.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the present occupancy shall be discontinued and building vacated on or before May 1, 1926.

1058-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Cleveland Duluth Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—South side of East 136th street, from Locust to Walnut avenues, The Bronx.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell and Guilfoyle and Chief

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Holland ..... 1

THE RESOLUTION:

(1058-25-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Cleveland Duluth Company, owner, filed, October 16, 1925, an appeal from an order of the fire commissioner, affecting premises on the south side of East 136th street from Locust avenue to Walnut avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated July 24, 1925 (Order No. 30510-LC), reads:

"2. Discontinue the use of gasoline in the same room or compartment where forge or torch is used.";

and  
WHEREAS, the building is frame, one story (43 ft. 6 in. top of roof truss) in height, 101 ft. by 350 ft. (approximately 35,000 square ft.) in area; OCCUPIED for storage and repair of contractor's equipment—cranes, hoists, tractors, etc., 25 persons; a garage (separated from the rest of the premises by brick walls), being located at the north west corner of the premises; and

WHEREAS, appellant contends that the maximum quantity of gasoline used on the premises is five gallons; that it is stored in an approved safety can, and that the gasoline (about one gallon at a time) is used in the tanks of machinery being tested subsequent to repairs.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than five (5) gallons of gasoline shall be maintained on the premises, restricted for use in mechanical testing of the machinery; that the gasoline shall be stored or maintained in an approved safety can located at the extreme front of the building on the Walnut street end and not more than one (1) gallon shall be distributed and in use throughout the premises at any one time.

1148-25-A.

APPELLANT—William Higginson, for Gowanus Realty Company, owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—98-116 Second avenue, Brooklyn.

APPEARANCES—

For Appellant: Henry Kolb.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

Absent: Commissioner Holland ..... 1

THE RESOLUTION:

(1067-25-BZ)

WHEREAS, John A. Sharp, for J. A. S. Realty Corporation, owner, filed, October 20, 1925, an application, under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises west side of Broadway, 327 ft. north of West 240th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals at its regular meeting February 2, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business and residence district; 240th street is in an unrestricted and a residence district, and that 242nd street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 11, 1925, reads:

"1. Proposed erection of a public garage for more than five motor vehicles contrary to Section 4, Zone Resolution.";

and

WHEREAS, the proposed building is of non-fireproof construction, one story and basement in height, with a frontage of 100 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the zoning resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed a height of one story above grade; that the entire front of the structure for a depth of 32 ft., other than vehicular entrances located at the southerly end of the structure, shall be maintained and operated as stores

# MINUTES

for retail mercantile use; that the store use shall be separated from the garage area by terra cotta partitions of not less than 4 in. in thickness, unpierced; that the gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished in face brick, panel design, with architectural terra cotta or stone trimmings; that there shall be no roof signs erected or maintained on the premises; that there shall be no portable gasoline equipment maintained outside of the structure; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building erected within eighteen months from the date of this action.

Absent: Commissioner Holland .....

THE RESOLUTION:

(1098-25-BZ)

WHEREAS, F. S. McGowan, for O. L. Williams Realty Company, Inc., owner, filed, October 26, 1925, an application, under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises northeast corner of White Plains road and East 242nd street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals at its regular meeting February 2, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that White Plains road is in a business district; that 242nd street is in a residence district, and that 243rd street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 2, 1925, reads:

"1. Erection or extension of a gasoline station in a business district is contrary to the resolutions adopted by the Board of Estimate on June 12th, 1925.";

and

WHEREAS, the proposed building is of steel (metal) construction, one story in height, with a frontage of 16 ft. and a depth of 10 ft.; to be occupied as a gasoline service station; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

970-25-BZ.

APPLICANT—Henry J. Nurick, for Herman Weinberg, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7-e of the building zone resolution, to permit in a business district the addition of a second story to an existing one-story garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—803-811 DeKalb avenue Brooklyn.

APPEARANCES—

For Applicant: Joseph J. Dreyer and Henry Nurick.

For Opposition: B. H. Ratzkin, Mrs. Dorothy Shusterman, et al.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle.....

Negative: Chairman Walsh, Commissioner Connell and Chief Kenlon.....

Absent: Commissioner Holland .....

THE RESOLUTION:

(970-25-BZ)

WHEREAS, Henry J. Nurick, for Herman Weinberg, owner, filed, September 18, 1925, an application, under the building zone resolution, to permit in a business district the addition of a second story to an existing one-story garage for the storage of more than five motor vehicles on premises 803-811 DeKalb avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals at its regular meeting February 2, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that DeKalb avenue is in a business district and Pulaski street is in a residence district and

WHEREAS, the decision of the superintendent of buildings rendered June 30, 1925, reads:

"1. Proposal to add additional story to existing one-story garage in a business district contrary to Zoning Resolution, Art. II, Sec. 4a (15) and Sec. 6.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 95 ft. and a depth of 100 ft.; to be occupied as a garage; and

WHEREAS, applicant, under section 7e of the zoning resolution, applied for an extension of an existing prohibited use and the board concluded that denial of the extension application would entail neither practical difficulty nor unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

## AREAS FIXED.

(1168-25-BZ)

The chairman presented and read a communication from James A. Boyle, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 140-144 Devoe street, Brooklyn.

The following area was approved by the board:

Both sides of Devoe street from a point 100 ft. west of Manhattan avenue to a point 400 ft. east of proposed garage; the east side of Manhattan avenue from Ainslie street to Devoe street; also the north side of Ainslie street from Manhattan avenue to a point 295 ft. east of Manhattan avenue.

(1253-25-BZ)

The chairman presented and read a communication from John J. Dunnigan, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a stable; premises 2131- White Plains avenue, The Bronx.

The following area was approved by the board:

Both sides of Lydig avenue from Bronx Park East to a point 400 ft. east of proposed building; also both sides of White Plains avenue from a point 200 ft. south of Lydig avenue to a point 400 ft. north of premises in question.

Adjourned 4 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

### \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held Tuesday, January 26, 1926, as they appeared in Bulletin No. 5, Vol. XI, are hereby corrected and read as follows:

1112-25-A.

APPELLANT—The United States Printing & Lithograph Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—83-101 North Third street and 209-219 Wythe avenue, Brooklyn.

APPEARANCES—

For Appellant: Lucille Bunzil.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Flanagan and Guilfoyle and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(1112-25-A)

WHEREAS, The United States Printing & Lithograph Co., owner, filed, October 28, 1925, an appeal from an order of fire commissioner, affecting premises 83-101 North 3rd street and 209-219 Wythe avenue, Borough of Brooklyn; and WHEREAS, the order of the fire commissioner, dated October 2, 1925, reads (Order No. 85864-F):

Correction—Number "210" changed to "219" in line 4 of resolution.

"1. Install a standpipe system with risers 4 inches in diameter in Building No. 2, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building, known as Building No. 2, is one of three, separated from each other by fore and aft walls, with fireproof horizontal exits therein on each story. Building No. 2 is non-fireproof, five stories (approximately 80 ft.) in height, 97 ft. 4 in. by 125 ft. (approximately 12,000 sq. ft.) in area; OCCUPIED as a printing and lithographing establishment, a total occupancy of 99 persons in entire building; EQUIPPED with a two-source automatic sprinkler system, supplied by two 30,000 gallon gravity tanks and also with a fire pump connected to a 60,000 gallon reserve tank; and

WHEREAS, appellant contends that the building is amply provided with fire extinguishing appliances and also with exits.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be not increased in height, area or dimension and that the floor areas as now subdivided, with a continuous bearing wall of approved masonry from cellar to roof shall be maintained, any openings therein to be equipped with fireproof self-closing doors; that a two (2) source sprinkler system shall be maintained, and granted only so long as conditions as to occupancy and use shall remain substantially unchanged.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS

Resolved Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.

WHEREAS, the board of appeals, at its regular meeting December 16, 1919, unanimously rescinded an opinion tentatively expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth ( $1/200$ ) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $7/8$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $1/4$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $1/2$ ) inch plaster boards, or three-eighths ( $3/8$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $1/4$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $3/4$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors, shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed with fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Where necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered on both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $3/4$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered on both sides with seven-eighths ( $7/8$ ) inch wood sheathing, one-half ( $1/2$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered on both sides with seven-eighths ( $7/8$ ) inch wood sheathing, two thicknesses of one-quarter ( $1/4$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solid between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partition covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

# FUEL OIL RULES

## CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS.

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, and January 18, 1924.

### Rule 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

### GRADE A FUEL OIL.

## Rule 2. Manner of Storage for Grade A Fuel Oil.

Fuel oil, to be used for commercial, heating and power purposes, shall be at all times contained in metal tanks with all openings or connections through the tops of the tanks.

## Rule 3. General Location of Tanks for Grade A Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

## Rule 4. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth (1¼) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter (1¼) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter (1¼) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

### Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions.

# FUEL OIL RULES

Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 5. Material and Construction of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free from physical imperfections, such as, laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced entirely by means of rods or bars.

these members should not be spaced greater than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

### Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 5.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{1}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more

# FUEL OIL RULES

than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 60 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall be break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full strength of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 6 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

### Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Grade A Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

# FUEL OIL RULES

## Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

## Section 3. Tests for Piping.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

## Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) Fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the

same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

# FUEL OIL RULES

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than (10) feet above the pump or pumps.

## Rule 12. Burners for Grade A Fuel Oil

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals.

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently placed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in system until after a permit has been issued by the Police Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.

## GRADE B FUEL OIL.

## Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes when stored, shall be at all times contained in closed storage tanks.

## Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.

## Rule 22. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

## Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).

## Rule 25. Piping for Grade B Fuel Oil.

### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected.

# FUEL OIL RULES

nected and shall be constructed of fire retarding materials. Hose shall be no longer than necessary.

## Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

## Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

## Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

## Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.

## Rule 26. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) See Rule 9 (a) for construction of valves.

(c) A remote control for shutting off the supply of oil to the burners shall be provided.

(d) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure.

## Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.

## Rule 28. Pilot Light.

Automatic systems shall be so designed that the flame cannot be extinguished by operation of the automatic control valve. A pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

## Rule 29. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature of which the oil burning device to be installed is capable.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 30. Fire Protection.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster board or other approved incombustible material. Above the

furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal, or three-fourths ( $\frac{3}{4}$ ) of an inch of Portland cement plaster on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 31. Instruction Cards.

See Rule 14.

## Rule 32. Installation.

See Rule 16.

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

## Rule 34. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 35. Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

WILLIAM E. WALSH, *Chairman.*

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

# RULES

## FIRE ESCAPE RULES

ADOPTED JULY 2, 1918; CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED MAY 9, 1924; CAL. NO. 414-24-SR.

**Rule 1.** In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ( $\frac{1}{2}$ ) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ( $1\frac{1}{2}$ ) in. mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire windows leading to balconies may be at window sill level if the steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto.

(c) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

**Rule 2.** A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

**Rule 3.** When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) **Fire Escapes.**—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) **Interior Stairways.**—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) **Exterior Screened Stairways.**—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for sub-standard fire escapes in subdivision a.

(d) **Horizontal Bridges.**—Horizontal bridges and party wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

WILLIAM E. WALSH, *Chairman.*

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1 $\frac{1}{2}$ -3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2 $\frac{1}{2}$ -5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

# RESERVE CALENDAR

## BOARD OF STANDARDS AND APPEALS. APPEALS FROM ADMINISTRATIVE ORDERS.

The forty-eight pier cases listed herewith were laid over, pending decision by the Supreme Court on a test case.

### PIER CASES.

- 480-19-A—Piers 4 and 5, North River, Manhattan.
- 481-19-A—Old Pier 3, North River, Manhattan.
- 594-19-A—Pier 8, North River, Manhattan.
- 595-19-A—Pier 44, East River, Manhattan.
- 877-19-A—Pier 14, North River, Manhattan.
- 878-19-A—Pier 15, North River, Manhattan.
- 879-19-A—Pier 15, North River, Manhattan.
- 880-19-A—Pier 28, East River, Manhattan.
- 881-19-A—Pier 1 (Old), North River, Manhattan.
- 882-19-A—Pier 27, North River, Manhattan.
- 883-19-A—Pier 29, North River, Manhattan.
- 884-19-A—Pier 30, North River, Manhattan.
- 885-19-A—Pier 78, North River, Manhattan.
- 886-19-A—Pier 42, North River, Manhattan.
- 890-19-A—Pier 70, East River, Manhattan.
- 937-19-A—Piers 37 and 38, East River, Manhattan.
- 948-19-A—Pier 121, foot of West 131st street, North River, Manhattan. (Order No. 95587-F.)
- 949-19-A—Pier 121, foot of West 131st street, North River, Manhattan. (Order No. 95586-F.)
- 950-19-A—Pier 121, foot of West 131st street, North River, Manhattan. (Order No. 95585-F.)
- 981-19-A—Piers 22-25, East River, Manhattan.
- 1003-19-A—Pier 28, North River, Manhattan.
- 31-20-A—Pier 13, East River, foot of Wall street, Manhattan.
- 265-20-A—Pier 46, East River, foot of Van Brunt street, Brooklyn.
- 266-20-A—Pier 39, East River, foot of Van Dyke street, Brooklyn.
- 267-20-A—Pier 31, East River, s. w. s. Atlantic Basin, Brooklyn.
- 268-20-A—Pier 36, East River, foot of Pioneer street, Brooklyn.
- 269-20-A—Pier 35, East River, n. e. s. Atlantic Basin, Brooklyn.
- 270-20-A—Pier 34, East River, foot of Hamilton street, Brooklyn.
- 271-20-A—Pier 27, East River, foot of Baltic street, Brooklyn.
- 272-20-A—Pier 17, East River, foot of Joralemon street, Brooklyn.
- 273-20-A—Pier 19, East River, foot of Clark street, Brooklyn.
- 318-20-A—Pier between North 4th and 5th streets, East River, Brooklyn.
- 352-20-A—Pier 3, Wallabout basin, foot of Washington and E streets, Brooklyn.
- 353-20-A—Pier 2, Wallabout basin, foot of Washington and F streets, Brooklyn.
- 383-20-A—Pier 20, East River Manhattan.
- 420-20-A—Pier 5, between Poplar and Middagh streets, Brooklyn.
- 421-20-A—Pier 22, foot of Atlantic avenue, Brooklyn.
- 422-20-A—Pier 29, foot of Harrison street Brooklyn.

- 423-20-A—Pier 32, foot of Degraw street, Brooklyn.
- 471-20-A—Pier between North 4th and 5th streets, Brooklyn.
- 907-21-A—East side South street, foot of Dover street, Manhattan.
- 1205-21-A—Pier No. 21, East River, east side South street, foot of Dover street, Manhattan.
- 1302-21-A—Pier 15, East River, Manhattan.
- 1541-21-A—Pier 3, between Main and Dock streets, Brooklyn.
- 1542-21-A—Pier 3, between Main and Dock Streets, Brooklyn.
- 1543-21-A—Pier 2, between Main and Dock streets, Brooklyn.
- 1544-21-A—Pier 2, between Main and Dock streets, Brooklyn.
- 1545-21-A—Pier 2, between Main and Dock streets, Brooklyn.

Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.

# ANNUAL REPORT

## CITY OF NEW YORK BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, CHAIRMAN  
MUNICIPAL BUILDING

February 2, 1926.

HON. JAMES J. WALKER,  
Mayor, New York City.

Sir:—I have the honor to submit for your information the annual report of the Board of Standards and Appeals, for the year ending December 31, 1925, which is set forth as follows:

### CASES FILED AND PENDING, 1925.

#### FOURTH QUARTER.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First,* That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second,* That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third,* That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth,* That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth,* That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,  
Room 1001, Municipal Building,  
New York City.

 BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

---

 PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

---

 HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

---

 CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, February 16, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, February 23, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

---

 NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

motor vehicles; premises 975-977 Second avenue, Astoria, Borough of Queens.

CAL. NO. 1038-25-BZ—Application, October 9, 1925, under sections 21 and 7e of the building zone resolution, of Gardiner Conroy, applicant, on behalf of Fangusta Realty Corp., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 878-892 East New York avenue, Brooklyn.

CAL. NO. 1079-25-BZ—Application, October 22, 1925, under section 21 of the building zone resolution, of Philip Freshman, architect, on behalf of John De Angelo, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles and also a gasoline service station; premises 6418-6424 Fort Hamilton parkway, northwest corner of 65th street, Brooklyn.

CAL. NO. 1291-25-BZ—Application, December 14, 1925, under section 21 of the building zone resolution, of Schwartz and Gross, architects on behalf of 22 East 76th Street, Inc., owner, to permit in a 1½ times district the erection and maintenance of a building to a height exceeding the limit required by the building zone resolution; premises 20-28 East 76th street, Manhattan.

CAL. NO. 1292-25-BZ—Application, December 14, 1925, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Martin W. Teichman, owner, to permit in a 1½ times district the erection and maintenance of a building to a height exceeding the limit required by the building zone resolution; premises 307-17 West 38th street, Manhattan.

CAL. NO. 923-25-BZ—Application, September 10, 1925, under section 21 of the building zone resolution, of McCooey & Conroy, applicants, on behalf of Peter Rinelli, owner, to permit in a residence district the erection of a two-story building to be used for stores on 1st story and for offices on the 2nd story; premises southeast corner of Bay parkway and 85th street, Brooklyn.

CAL. NO. 776-25-BZ—Application, July 27, 1925, under sections 7b and 21 of the building zone resolution, of Burke and Olsen, architects, on behalf of Edward B. Sweeney, owner, to permit in a residence district the erection and maintenance of a building for business occupancy; premises 401 Schenectady avenue, Brooklyn.

CAL. NO. 942-25-BZ—Application, September 14, 1925, under section 21 of the building zone resolution, of Julius Hochman, applicant, on behalf of Adelaide Kopf and Henry Dreyer, owners, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 1630-1636 Bergen street, Brooklyn.

CAL. NO. 1013-25-BZ—Application, October 2, 1925, under sections 7g and 21 of the building zone resolution, of George F. Rohe, applicant and owner, Ryan Sales and Service, lessee, to permit the erection and extension from a business into a residence district of a proposed basement story of a garage (permission to erect same as a one-story was granted by the board under Cal. No. 166-20-BZ); premises south side of Northern boulevard, 225 ft. east of Gardiner street, Bayside, Borough of Queens.

CAL. NO. 1039-25-BZ—Application, October 9, 1925, under section 21 of the building zone resolution, of Gardiner Conroy, applicant, on behalf of Mosholu Building Corp., owner, to permit in a residence district the erection and maintenance of a building to be used for stores; premises 188-196 Audubon avenue, southwest corner of West 175th street, Manhattan.

Negative .....	0
Absent: Chief Kenlon.....	1

723-25-A.

APPELLANT—California Exterminating Co., Inc.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—302 West 127th street, Manhattan.

## APPEARANCES—

For Appellant: None.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(723-25-A)

WHEREAS, Max Lewy, president California Exterminating Co., Inc., for Est. of John J. Hallahan, owner, filed, July 8, 1925, an appeal from the order of the fire commissioner, affecting premises No. 302 West 127th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 13, 1925, reads (Order No. 29953-LC):

“Referring to your application dated March 21, 1925, for a permit to manufacture a combustible mixture at the foregoing address, I regret to inform you that your application for such permit is disapproved, inasmuch as the occupancy of this building is such that the manufacture of a combustible mixture is prohibited by the Code of Ordinances.

“You are therefore hereby ordered to

“1. Discontinue the manufacture of a combustible mixture on these premises.”;

and

WHEREAS, the building is non-fireproof, one story in height, 26 ft. 6 in. by 49 ft. 11 in. in area; OCCUPIED as a garage for the storage of three motor vehicles and also two stores, appellant occupying the store located in the northwest portion of the premises for the storage and sale of insecticides; and

WHEREAS, appellant contends that there is no gasoline storage (in re: the garage use) excepting that in the tanks of the cars; that the store in question is separated from the garage portion of the building by unpierced brick walls, 8 in. thick, metal lined on the store side; that the ceiling of the store is metal lined, and proposes to reduce the storage of combustible mixtures on the premises to 25 gals. of kerosene, 1 bbl. kerosene substitute, 18 lbs. sulphuric acid, and other essential oils to an amount of 25 lbs.; and

WHEREAS, at the public hearing the appellant or his representative did not appear; and

WHEREAS, the fire department representative stated that appellant had told him that he intended to withdraw his appeal.

*Resolved*, that the appeal be and it hereby is *dismissed* for lack of prosecution.

475-25-A.

APPELLANT—Nathan A. Krischer, for Mollie R. Krischer, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—4077-4085 Park avenue, The Bronx.

## APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(475-25-A)

WHEREAS, Nathan A. Krischer, for Mollie R. Krischer, owner, filed, May 6, 1925, an appeal from an order of the fire commissioner, affecting premises 4077-4085 Park avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated April 7, 1925, reads (Order No. 75313-LF):

“2. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at north and west sides of building, or other approved protection, as per Sec. 375 Article 18, Chapter 5 of the Code of Ordinances.”;

and

WHEREAS, the building is non-fireproof, five stories and basement in height, 100 ft. by 80 ft. in area. OCCUPIED: Basement, iron shop, 18 persons; 1st, 2nd and 5th stories, vacant; 3rd story, locksmith, 3 persons; 4th story, radio parts, 6 persons; and

WHEREAS, the appellant claims that there are 27 windows on the west side and 32 windows on the north side affected by Order No. 75313-LF, Item 2; that the board of review granted a modification to a similar order on condition that the windows in the two-story building adjoining at west be bricked up, which work was done; and

WHEREAS, at the public hearing, the fire department representative refuted the statement as to a board of review action.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the windows in westerly wall other than the three (3) windows from the north end and the windows on the course of fire escape and on the stairhall, *on condition* and only so long as the easterly wall of the adjoining exposure to the west is unpierced; the order shall be complied with in all other respects.

949-25-A.

APPELLANT—John Cox, Jr., for Clark Equipment Co., Inc., lessee.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—109-115 West End avenue, Manhattan.

## APPEARANCES—

For Appellant: John Cox, Jr.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

# MINUTES

## THE RESOLUTION:

(949-25-A)

WHEREAS, Clark Equipment Co., Inc., lessee, filed, September 15, 1925, an appeal from the decision of the fire commissioner, affecting premises No. 109-115 West End avenue, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated September 11, 1925, reads:

"2. Furnace room should be separated from the remainder of the building by 8 in. of solid masonry, unpierced by any openings, must have direct entrance from exterior only.

"4. Tanks must be buried and encased in 12 in. of stone concrete.";

and

WHEREAS, the building is fireproof, two stories in height, 100 ft. 5 in. by 100 ft. in area, a furnace room 25 ft. by 35 ft., located at the northwest corner of 1st story. OCCUPIED: 1st story, manufacture of steel springs and the application of such springs to automobiles, garage and repair shop, 30 persons; 2nd story, occupancy undetermined; and

WHEREAS, the appellant proposes to install two hollow shell steel tanks in the furnace room, constructed of 3-16 in. steel, riveted, each tank to contain 100 gallons of crude oil for the purpose of tempering steel; and

WHEREAS, the appellant contends that the steel springs are heated in the furnaces to a temperature of 1500 to 1750 degrees Fahrenheit, then placed in the crude oil tank; that the hollow shell permits of a water jacket 4 in. in thickness, which is kept in circulation under and around the entire tank; that the furnace room is separated from the rest of 1st story by an 8 in. brick wall, with the exception of one door opening 7 ft. by 7 ft., which is provided with a self-closing fireproof door.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1104-25-A.

APPELLANT—Dodge & Morrison, for Pasquale Margarella, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—477-479 Broome street, Manhattan.

APPEARANCES—

For Appellant: Stephen W. Dodge.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(1104-25-A)

WHEREAS, Dodge and Morrison, for Pasquale Margarella, owner, filed, October 27, 1925, an appeal from an order of the fire commissioner, affecting premises 477-479 Broome street, Manhattan; and

WHEREAS, the order of the fire commissioner, No. 83068-F, dated August 19, 1925, reads:

"1. Install a standpipe system with risers 4 in. in diameter to withstand a pressure of 300 lbs. per sq. in., extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs)

placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ in. standard hose attached thereto.

"Such standpipe shall be kept constantly filled with water by means of an approved tank or pump supply and be ready for use at all times.";

and

WHEREAS, the building is non-fireproof, six stories (87 ft.) in height, 75 ft. by 85 ft. (6,400 sq. ft.) in area; OCCUPIED as a tenant factory, 70 persons above the 1st story; and

WHEREAS, the appellant contends that the building is protected by a sprinkler system supplied from a 10,000 gallon gravity tank and 7,500 gallon pressure tank; that the building is only 2 ft. over the legal height requirement for omission of a standpipe system.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that an approved two-source sprinkler system shall be maintained with central office connection; that the building shall not be increased in height, area or dimension; and *granted* so long as the premises shall be operated in single tenancy.

692-25-A.

APPELLANT—Henry C. Brucker, for Isidor Gootzeit, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—2152 Metropolitan avenue, Middle Village, Borough of Queens.

APPEARANCES—

For Appellant: Henry C. Brucker.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(692-25-A)

WHEREAS, Henry C. Brucker, for Isidor Gootzeit, owner, filed, July 1, 1925, an appeal from the decision of the fire commissioner, affecting premises 2152 Metropolitan avenue, Middle Village, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated June 12, 1925, reads (Alt. Application No. 505-25):

"3. A gravity tank of at least 3,500 gallons capacity with all appurtenances located 20 ft. above the roof must be provided.";

and

WHEREAS, the building is non-fireproof, two stories (21 ft.) in height, 150 ft. by 90 ft., about 13,500 sq. ft. in area. OCCUPIED: 1st story, 8 stores and a motion picture theatre, with seating capacity for 1,073 persons; 2nd story, one living apartment; and

WHEREAS, the appellant contends that the theatre portion of the building is fireproof; that there is no stage, scenery nor balcony in the theatre.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the installation of gravity tank, *on condition* that the standpipe equipment shall comply with the rules in all other respects; that the existing structure shall not be increased in height, area or dimension; and that premises shall be conducted exclusively for the exhibition and display of moving pictures, with no scenery, dressing rooms or stage.

APPEARANCES—

For Applicant: Charles D. Cords.

For Opposition: S. L. Marcus, Louis Soll, Michael J. Casey, Wm. J. Wright, Geo. J. Higgins, Mrs. Geo. Booth and David Rosenberg.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle and Chief Kenlon ..... 2

Negative: Chairman Walsh, Commissioners Connell and Holland ..... 3

Absent ..... 0

THE RESOLUTION:

(826-25-BZ)

WHEREAS, Charles D. Cords, for Thrift Service Stations, Inc., lessee, filed, August 13, 1925, an application, under the building zone resolution, to permit partly in a residence district and partly in a business district the erection and maintenance of a gasoline selling station; premises 3002-3012 Avenue N, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Nostrand avenue is in a business district, and that East 31st street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 27, 1925, reads:

"Proposed gasoline station located partly in a business district and partly in a residence district is contrary to Art. II, Sec. 3 and 4 (a) of the Zone Resolution.";

and

WHEREAS, the premises consist of a plot of ground, 40 ft. by 105 ft. in area, the easterly portion of the lot extends a distance of 5 ft. into the residence district, the remainder of the lot being located in a business district; it is proposed to locate on the premises three 550 gallon gasoline tanks, piping and pumps to make a complete installation, and also to erect a small office, 10 ft. by 12 ft. in area; and

WHEREAS, the board concluded that applicant was not entitled to relief under section 21 of the building zone

resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

1134-25-BZ.

APPLICANT—Edward P. Doyle, for Morris Levine, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7e of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—290-292 Ellery street and 861-863 Park avenue, Brooklyn.

APPEARANCES—

For Applicant: Edward P. Doyle and Morris Levine.

For Opposition: Leonard Buxbaum.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(1134-25-BZ)

WHEREAS, Edward P. Doyle, for Morris Levine, owner, filed, November 5, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 861-863 Park avenue and 290-292 Ellery street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue and Ellery street are both in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered November 4, 1925, reads:

"The proposition is therefore contrary to the Zone Resolution, Art. II, Sec. 4a 15. The erection of a garage for more than five motor vehicles in a business district;"

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 55 ft. on Park avenue and 45 ft. on Ellery street and a depth of 200 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under the provisions of section 7-e of the building zone resolution as to the premises on the Ellery street frontage only.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the garage structure shall not exceed two stories in height above the sidewalk level, restricted to the Ellery street frontage, and for a depth not exceeding one hundred (100) ft.; that the building shall be constructed fireproof; that any gasoline storage equipment installed shall be located at the street front; that the rear and gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished in face brick, with architectural terra cotta or stone trimmings; that there shall be no

advertising displayed or maintained on the front of the building, other than one projecting electric sign; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1157-25-BZ.

APPLICANT—William F. Doyle, for Milef Realty Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a 1½ times height district the erection of the street walls of a building to a height exceeding the limit set by the building zone resolution.

PREMISES AFFECTED—306-308 West 38th street, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application denied.

THE RESOLUTION:

(1157-25-BZ)

WHEREAS, William F. Doyle, for Milef Realty Corporation, owner, filed, November 10, 1925, an application, under the building zone resolution, to permit in a 1½ times height district the erection of the street walls of a proposed building to a height exceeding the limit set by the building zone resolution; premises 306-308 West 38th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 38th street is in a 1½ times height district; that west side Eighth avenue, between 37th street and 38th street, is in a 1½ times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 5, 1925, reads:

"1. Building is a one and one-half times district and may not exceed 90 ft. in height without lawful setbacks (Section 8-C of the Zoning Resolution).";

and

WHEREAS, the proposed building is of fireproof construction, 14 stories (167 ft.) in height, with a frontage of 50 ft. and a depth of 98 ft. 9 in.; to be occupied as lofts, offices and showrooms;

WHEREAS, the board concluded that applicant was not entitled to relief under section 21 of the building zone resolution, on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

1022-25-BZ.

APPLICANT—Daniel Luftman, owner.

SUBJECT—Application (re: order of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the use of a restaurant on the basement floor of a building.

## THE RESOLUTION:

(1022-25-BZ)

WHEREAS, Daniel Luftman, owner, filed, October 5, 1925, an application, under the building zone resolution, to permit in a residence district the use, as a restaurant, of the basement of an existing building; premises 72 East 108th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 108th street is in a residence district; that Park avenue is in a business district, and that Madison avenue is a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 5, 1925, reads:

"You are hereby notified that the building situate on the front of the lot on the south side of E. 108th St., commencing about 133 ft. 4 in. from the south-

west corner of E. 108th St. and Park Ave., being a cel/base/3 story brick building, about 16 ft. 8 in. front, 16 ft. 8 in. rear, 50 ft. deep and 38 ft. in height, and occupied as a restaurant in basement and dwelling above and known as Number 72 E. 108th St. and located in a residential district in the Borough of Manhattan, in The City of New York, does not conform to section 3 of the Building Zone Resolution of the Board of Estimate and Apportionment adopted July 25, 1916, in the respects noted below:

"In that of occupying the basement floor as a restaurant in a residential district.";

and

WHEREAS, the existing building is of non-fireproof construction, three stories and basement in height, with a frontage of 16 ft. 8 in. and a depth of 50 ft. 6 in.; to be occupied as restaurant and dwelling; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution, on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the order of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

## THE RESOLUTION:

(726-25-A)

WHEREAS, Philip Steigman, for Harry Rosenfield, owner, filed, July 9, 1925, an appeal from an order of the fire commissioner, affecting premises 159 Varet street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 11, 1924, reads (Order No. 54590-F):

"1. Provide iron or kalameined shutters at all openings in the exterior wall above 1st story which are dis-

tant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at the east and west sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances."

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 100 ft. in area; OCCUPIED as a tenant factory, about 30 persons on each story; and

WHEREAS, the appellant claims there are 44 windows on the west side and 7 windows on the east side of the building affected by Fire Department Order No. 54590-F; that a similar order was complied with June 19, 1919, in accordance with modifications granted by the board of review; he further proposes to fireproof all windows on the 2nd and 3rd stories at west side which are affected by the order; and

WHEREAS, the fire department representative reported that the alleged action of the board of review of fire department did not provide reasonable protection in view of the adjoining exposure, namely, moving picture theatre, which is a non-fireproof and non-sprinklered old structure.

Resolved, that the order of the fire commissioner be and it hereby is dismissed for lack of prosecution.

799-25-A.

APPELLANT—Arnold Levien, for Neivel Realty Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—Southwest corner of Ely avenue and 13th street, Long Island City, Borough of Queens.

## APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

## THE RESOLUTION:

(799-25-A)

WHEREAS, Arnold Levien, for Neivel Realty Corp., owner, filed, August 4, 1925, an appeal from the order of the fire commissioner, affecting premises southwest corner Ely avenue and 13th street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated May 18, 1925, reads (Order No. 75858-F):

"1. Provide iron shutters at all openings on the exterior wall above first story, which are distant in a direct line less than thirty feet from any opening in any other building and not in the same plane with said openings and which are not more than fifty feet above a neighboring roof at south and west sides of building, or other approved protection, as per Section 375, Article 18, Chapter 5 of the Code of Ordinances."

and

WHEREAS, the building is fireproof, three stories in height, 98.8 ft. by 98.8 ft. in area. OCCUPIED: Electric car service station, about 8 persons on each story; and

WHEREAS, the appellant filed plans showing 12 windows on the south side and 16 windows on the west side of the building affected by Fire Department Order No. 75858-F; and

WHEREAS, the appellant contends that the exposure at south side is a one-car garage and a chicken coop, which lean against his wall; that the exposure at west is a one-story brick and steel building having fireproof windows and located 15 ft. away.

# MINUTES

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, so long as conditions as to occupancy and use remain unchanged, *on condition* that the building shall be equipped with an approved sprinkler system; that all openings shall be equipped with metal frames and sash; and that no light of glass shall exceed in area 14 in. by 20 in.

1138-25-A.

APPELLANT—James Kearney, for The Permutit Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—5401-5405 First avenue, Brooklyn.

APPEARANCES—

For Appellant: James Kearney.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(1138-25-A)

WHEREAS, James Kearney, for The Permutit Co., owner, filed, November 6, 1925, an appeal from the order of the fire commissioner, affecting premises No. 5401-5405 First avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 20, 1925, reads (Order No. 85410-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, \* \* \* placed within main stairway enclosure. \* \* \*";

and

WHEREAS, the building is fireproof, two stories (35 ft. 9 in.) in height, 73 ft. 6 in. by 185 ft. (approximately 12,500 sq. ft.) in area, subdivided into seven sections on the 1st story and into four sections on the 2nd story by 6 in. hollow tile walls, with sliding doors at openings therein; the storage room for crushed glass and sand being one clerestory in height; OCCUPIED for the manufacture and storage of water filters; and

WHEREAS, appellant contends that the occupancy is non-hazardous, the materials used being glass, sand, clay, etc., and contends, further, that the building is low in height and faces on two street fronts.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height or area; that the floor area as now subdivided by 6 in. terra cotta partitions shall remain unchanged; that any openings in partition walls shall be equipped with a self-closing fireproof door; and *granted* so long as conditions as to operation and use shall remain substantially unchanged.

715-25-A.

APPELLANT—George Dieringer, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—237 Central avenue, Far Rockaway, Borough of Queens.

APPEARANCES—

For Appellant: George Dieringer.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(715-25-A)

WHEREAS, George Dieringer, owner, filed, July 6, 1925, an appeal from order of the fire commissioner, affecting premises No. 237 Central avenue, Far Rockaway, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated May 18, 1925, reads (Order No. 96551-LC):

"1. Discontinue the maintenance of a garage on these premises.

"NOTE: Portion of building is used as a dwelling. the location of which is not immediately above the garage inasmuch as the 2nd story of premises is vacant and 3rd story is used for dwelling purposes. Sec. 154, Chapter 10, Code of Ordinances.

"2. Separate boiler from remainder of building by unpierced wall of solid masonry at least 8 inches in thickness. Entrance to boiler room to be from exterior of building only. Sec. 159-1, Chapter 10, C. of O.";

and

WHEREAS, the building is non-fireproof, three stories in height, 28 ft. by 100 ft. in area. OCCUPIED: 1st story, undertaker's store and office, garage at rear; 2nd story, chapel, morgue and stock room; 3rd story, dwelling of owner; and

WHEREAS, appellant contends that the entire building, including the 2nd story, is occupied and has been used in a similar manner since 1920; that the only entrance to the boiler room is through the store; that the 8 in. partition separating the garage and store is wood stud and fire retarded by 2 in. of cement plaster on metal lath and that the ceiling of the garage is also fire retarded in a similar manner.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Items 1 and 2, *on condition* that the occupancy of the garage shall be limited to automobiles, the property of the owner and occupant of the premises used in the conduct and operation of business conducted from these premises; that a fire escape shall be erected in the side court at the front of the building, with connecting iron stairs between the 2nd and 3rd stories, with counterbalanced drop ladder in guides from lowest balcony; that the interior stairhall enclosure shall be protected with approved fire retarding material on the 1st story, any openings therein to be provided with self-closing fireproof doors; that a cross partition of 4 in. terra cotta blocks shall be erected in the center of the cellar, approximately, separating the boiler room from the rear portion of the cellar story, with not more than one opening therein, equipped with self-closing fireproof door; that a fixed stairs shall be provided from the rear of cellar, with egress to the yard, with exit therefrom through open driveway direct to street.

941-25-A.

APPELLANT—Theodore J. Groh, for Theodore E. Hergert, Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—422-430 East 53rd street, Manhattan.

APPEARANCES—

For Appellant: James T. Hallinan and Theodore E. Hergert.

For Administration: Inspector Maher of fire department.

## THE RESOLUTION:

(941-25-A)

WHEREAS, Theodore J. Groh, for Theodore E. Hergert, Inc., owner, filed, September 12, 1925, an appeal from an order of the fire commissioner, affecting premises 422-30 East 53rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 22, 1925 (Order No. 77694-F) reads:

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals \* \* \*"; and

WHEREAS, the building is fireproof, eight stories and pent house in height, 125 ft. by 129 ft. (approximately 16,000 sq. ft.) in area. OCCUPIED: 1st story, manufacture of platform scales; 2nd story, laundry and offices, 52 persons; 3rd story, furniture manufacture, 25 persons; 4th story, vacant at present; 5th story, printing, 23 persons; 6th story, manufacture of switchboards and electrical specialties, 103 persons; 7th story, manufacture of inlaid wood, 38 persons; 8th story, upholstering and finishing furniture, 16 persons; pent house or 9th story (28 ft. by 125 ft. in area), fur dyeing, 2 persons; and

WHEREAS, appellant contends that the building is amply provided with exits and also that it is equipped with a standpipe system—a 4 in. riser in each stairhall with outlets and hose on each story—supplied by two tanks, each having a capacity of 5,000 gallons.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the 3rd story shall be equipped with one-source sprinkler system, fed from the city main with 4 in. connection, with siamese on street front, properly marked to indicate 3rd story service only; that the occupancy shall remain substantially unchanged and no further increase in furniture or upholstering manufacturing shall be permitted in building.

1136-25-A.

APPELLANT—Herbert K. Twitchell, owner.

SUBJECT—Appeal from order of fire commissioner.

Absent ..... 0

## THE RESOLUTION:

(1136-25-A)

WHEREAS, Herbert K. Twitchell, owner, filed, November 5, 1925, an appeal from an order of the fire commissioner, affecting premises 350 Waverly avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 16, 1925 (Order No. 98775-LC) reads:

"You are hereby notified that an inspection of the above premises used as a non-storage garage shows that the following must be done before the permit requested by you can be issued:

## FORTHWITH

"1. Provide a covering of approved fire retarding material on ceiling of 1st story occupied as a garage. Sec. 9, Chapter 10, C. of O.";

and

WHEREAS, the building is non-fireproof, two stories in height, 40 ft. by 38 ft. in area; a one-story brick boiler room, 6 ft. by 12 ft. in area, located outside the building at the northerly rear portion. OCCUPIED: 1st story, private garage; 2nd story, dwelling; and

WHEREAS, appellant contends that no oil or gasoline (other than that in the tanks of the cars) is stored in the building and that the partitions enclosing the stairway leading to the 2nd story and also the stair soffits are metal covered.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

182-25-A.

APPELLANT—The Surface Combustion Company, for Fidelity Metal Company, owner.

SUBJECT—Application for extension of permit—appeal from decision of fire commissioner.

PREMISES AFFECTED—East side of Ranton street, Newtown Creek, Brooklyn.

APPEARANCES—

For Appellant: Raymond S. Wile.

ACTION OF BOARD—Extension of permit granted.

THE VOTE TO GRANT EXTENSION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(182-25-A)

WHEREAS, the Surface Combustion Company, for Fidelity Metal Company, owner, filed, February 13, 1925, an appeal with the board of appeals, from a decision of the fire commissioner, affecting premises east side of Ranton street, Newtown Creek, Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered March 3, 1925, in acting on Alteration Application No. 2782-24, reads:

"1. Burners must be of a type approved by the Board of Standards and Appeals.";

and

WHEREAS, the premises consist of a plot of ground upon which is located the plant of the Fidelity Metal Company consisting of a one-story fireproof building, 97 ft. by 28 ft. in area; OCCUPIED for smelting metal; and

WHEREAS, a fuel oil burning system has been installed consisting of two 10,000-gallon fuel oil storage tanks, located on concrete piers at a distance of 50 ft. from the nearest building, surface combustion burners and the necessary valves, pumps and piping to make a complete installation; and

WHEREAS, appellant requests a temporary permit pending an inspection of the burner; and

WHEREAS, this appeal was granted by the board at its meetings April 21, 1925, July 28, 1925, and November 24, 1925, for a temporary period, and appellant requested an extension of the time limit set.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a period of 90 days, at owner's risk, pending determination by the board of standards and appeals on petition now before it.

APPLICANT—William F. Doyle, for Fordham Triangle Realty Co., owner.  
SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.  
PREMISES AFFECTED—East side of Jerome avenue, 50 feet north of 200th street, The Bronx.  
APPEARANCES—  
For Applicant: William F. Doyle.  
For Opposition: Samuel M. Katz, Paul Jones, Miss Montagany and Herman Hermele.  
ACTION OF BOARD—Application granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Chief Kenlon.. 4  
Negative: Commissioner Guilfoyle..... 1  
Absent ..... 0

## THE RESOLUTION:

(991-25-BZ)

WHEREAS, William F. Doyle, for Fordham Realty Company, owner, filed, September 28, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises east side of Jerome avenue, 50 ft. north of 200th street (Bedford Park boulevard), Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; that 200th street (Bedford Park boulevard) is in a business district, and that Villa avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 15, 1925, reads:

"1. Occupancy of proposed building in business district as garage for storage of more than five motor vehicles is contrary to the provisions of the Building Zone Resolution."

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 100 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be restricted to a two (2) story structure above grade, with no cellar other than a boiler room, the use and occupancy of which will be restricted exclusively to heating apparatus for the use of this structure; that the 1st tier of this building shall be built of fireproof construction, steel beams, reinforced concrete arches; that the roof shall be of flat design and construction, the underside of which shall be fire retarded in accordance with the rules of the board of standards and appeals; that the rear and gable walls shall be unpierced throughout the entire height and length; no roof signs shall be erected; that there shall be no signs or advertising on the street front of the building other than one projecting electric sign indicating the title of the business conducted on the premises; that the street wall shall be finished with face brick and architectural terra cotta or stone trimmings; any gasoline storage equipment installed shall be located on the extreme northerly end at the street front; that the rear wall shall be painted a light color and that there shall be no skylight in the roof within 30 ft. of the rear wall; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

## 1041-25-BZ.

APPLICANT—William F. Doyle, for Dr. Morris J. Levine, owner.  
SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district

the change of occupancy of warehouse to a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—178-184 Scholes street, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle and Dr. Morris J. Levine.

For Opposition: Frank Kleinholz and Alfred J. J. Wentz.

ACTION OF BOARD—Application denied.

THE VOTE TO DISMISS—

Affirmative: Commissioner Guilfoyle..... 1

Negative: Chairman Walsh, Commissioners Connell and Holland ..... 3

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(1041-25-BZ)

WHEREAS, William F. Doyle, for Dr. Morris Levine, owner, filed, October 13, 1925, an application, under the building zone resolution, to permit in a business district the change of occupancy of a warehouse to a garage for the storage of more than five motor vehicles; premises 174-184 Scholes street, southwest corner Humboldt street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Scholes street and Humboldt street are both in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered October 6, 1925, reads:

“Amendment to change occupancy of warehouse to a public garage in a business district is contrary to Section 4 of Art. 2 of the Building Zone Resolution.”; and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 100 ft. on Scholes street and 124 ft. on Humboldt street; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

755-25-BZ.

APPLICANT—Aniello Nappi, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7g of the building zone resolution, to permit in a business district the change of occupancy of a building used for the storage of barrels to a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—870-872 Metropolitan avenue, Brooklyn.

APPEARANCES—

For Applicant: J. W. Sullivan and Max Cohn.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(755-25-BZ)

WHEREAS, Max Cohn, for Aniello Nappi, owner, filed, July 20, 1925, an application, under the building zone resolution, to permit in a business district the change of occupancy of a building used for the storage of barrels to a garage for the storage of more than five motor vehicles; premises 870-872 Metropolitan avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Metropolitan avenue and Devoe street are both in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 29, 1925, reads:

“1. Amendment to change occupancy of proposed bldg. to a public garage for more than five cars in a business district is contrary to Art. II, Sec. 4 of Zoning Resolution and is hereby denied.”;

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 27 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the premises has been used as a cooperage (non-conforming use) and barrel storage plant; that there are stables existing in the street and the applicant is supported by 65 per cent affirmed consents; and whereas, the board deemed that the applicant is entitled to relief under section 7e of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not be increased in height, area or dimension; that it shall be restricted to one story in height; that the rear and gable walls shall be unpierced throughout their entire height and length; that the existing skylights shall be glazed with plain glass, protected with wire guards above and below; that there shall be no additional skylights installed; any gasoline storage equipment installed shall be located on the extreme westerly end at the street front; that there shall be no signs erected or maintained or no advertising displayed on the front of the building other than one fixed projecting electric sign; any permits necessary shall be obtained within six (6) months and any work involved thereby completed within nine (9) months from the date of this action.

1514-23-BZ.

APPLICANT—Joseph W. Keller, for Morris Saskowitz, owner.

SUBJECT—Application for extension of permit (re: decision of superintendent of buildings) to permit in a business district the extension and change of occupancy of the 2nd, 3rd and 4th stories of a building from storage to a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—75 First avenue, Manhattan.

APPEARANCES—

For Applicant: Joseph W. Keller.

For Opposition: None.

ACTION OF BOARD—Extension of time granted.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....

Negative ..... 0

Absent: Chief Kenlon..... 1

# MINUTES

## THE RESOLUTION:

(1514-23-BZ)

WHEREAS, Morris Saskowitz, owner, filed, December 23, 1923, an application, under the building zone resolution, to permit in a business district the extension and change of occupancy of the 2nd, 3rd and 4th stories of a building from storage to a garage for the storage of more than five motor vehicles; premises 75 First avenue, Manhattan; and

WHEREAS, a public hearing was held on this application before the board of appeals, at its special meeting, October 3, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that First avenue, East 4th street and East 5th street are business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered December 19, 1923, reads:

"Your application for certificate of occupancy filed December 6, 1923, for garage in entire building is hereby denied for the following reasons:

"Garage in basement and 1st floor was granted by the Board of Appeals, Cal. 7-21-BZ, and extension of the garage occupancy is prohibited by the Building Zone Resolution; the building being in a business district."; and

WHEREAS, the building is of non-fireproof construction, four stories in height, with a frontage of 24 ft.  $\frac{1}{2}$  in. and depth of 100 ft.; occupied as a garage in the basement and 1st story and furniture storage above; it is proposed to occupy the entire structure as a garage; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 83 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted by the board at its meeting, October 3, 1924, on certain conditions, and present owner, through his architect, John De Hart, requests modification of these conditions; and

WHEREAS, the following brief summary of the action of the board on these premises was submitted to the board:

Under Cal. No. 7-21-BZ, it was brought out that the premises were then occupied as a stable on the first and basement stories, the second to fourth stories, inclusive, being occupied for storage, and the Board granted a permit to convert the first story and basement from a stable to a garage for more than five motor vehicles.

There exists a public school within 200 ft. in the rear extending from 4th to 5th Streets.

Under Cal. 368-21-BZ (June 7, 1921) a new application was presented to the Board for permission to convert from warehouse to garage from the second to the fourth stories, and this new application the Board unanimously denied.

Under date of May 31, 1922, this application was again renewed to permit the extension of the public garage existing in the basement and 1st story throughout the entire building, and the Board again unanimously denied that extension of use.

Under Cal. 1514-23-BZ, a new application was filed under section 7-g, supported by 83 per cent of consents within the area fixed by the Board, to permit the change of occupancy from storage to garage for the entire premises, and that was granted on condition that the entire premises be made fireproof.

That the fireproof requirement was known to and consented to by the attorney of record for the applicant is proved by the quotations from the stenographer's minutes of the hearing:

"The fireproof conditions adopted by the Board was, in its judgment, important and even imperative for the safeguarding of the adjoining tenement houses in this highly congested district, and those adjoining tenement houses are old law tenements, and there is a motion picture theatre within 24 feet on the same street front."

The Board had the most intimate knowledge of the situation at the time that resolution was adopted, because it had already considered several appeals affecting this same premises.

and

WHEREAS, the board deemed, at its meeting December 3, 1925, that no modification of the original resolution should be granted; and

WHEREAS, applicant now requests an extension of time in which to carry out the terms of the resolution.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure be erected fireproof throughout; that the building zone requirements as to rear yard and area restrictions shall be complied with in all respects; that the gable walls shall be unpierced throughout their entire height and length; that any gasoline storage equipment plant shall be installed at the extreme front of the building and confined to the 1st story; that the front elevation should be finished in light colored face brick; that there shall be not more than one projecting electric sign not over 10 ft. in height on the premises; that the structure shall not exceed four stories in height above grade; that there shall be no ramps installed, maintained or used in this building; and that all permits necessary for the prosecution of this work shall be obtained and the building completed within 30 days from the date of this action.

Adjourned 5.30 p. m.

WILLIAM J. O'GORMAN, Secretary.

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 9, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1 $\frac{1}{2}$ -3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2 $\frac{1}{2}$ -5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

*Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

# RULES

## ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,  
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE  
AUGUST 26, 1918.

**Rule 1. Application of Elevator Rules.** Every elevator, escalator, freight incline or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

**Rule 2. Definitions Relating to Elevators.**

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight incline" shall apply to a moving continuous inclined runway for elevating or lowering freight.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

**Rule 3. Permits.** The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

**Rule 4. Alterations.** In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely renewed, at the discretion of the superintendent of buildings.

Where hand power elevators are changed to power-driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In

such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

**Rule 5. Change of Classification.** In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, car enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

**Rule 6. Tests of New Elevators.** In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the upper and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speeds exceeding one hundred (100) feet per minute, and of hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and car safety device and the slack rope device when required, and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift load.

The cars of power-driven elevators having speeds of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At this speed the governor shall be manually operated to test the action of the safety equipment.

**Rule 7. Carrying Capacity.** In existing installations the owner, lessee or other person having charge or control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having suitable letters and figures on same, which shall designate the number of pounds weight which said elevator can safely carry.

Future installations shall be designed to sustain in all their parts a load per square foot of platform area inside the car of not less than the following:

- (a) 75 pounds for power-driven passenger elevators;
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet;
- (c) 50 pounds for hand-power passenger elevators.

**Rule 8. Rules to be Posted.** In the car of every passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the operation of elevators as he may deem necessary to insure public safety, including the number of passengers that such car may carry at one time.

**Rule 9. Full Automatic Push Button Elevators.** In future installations full automatic push button elevators must be so designed and equipped that the car, at its

# RULES

rated speed and load, will automatically stop when the car floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

**Rule 10. Belt or Chain Drives.** In future installations no hoisting machine driven by a chain or belt device from a motor or countershaft shall be used in connection with any passenger elevator.

**Rule 11. Shaft Openings.** In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the car operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first or main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the car gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls. No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

**Rule 12. Hoistway Enclosure.** In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six (6) feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure may be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half ( $1\frac{1}{2}$ ) inches; when grille work is used there shall be not more than one and one-half ( $1\frac{1}{2}$ ) inches space between any two members, except that where plain straight bars, not filled in with scroll, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths ( $\frac{3}{8}$ ) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by law or regulation as a shaft enclosure is altered, such alteration shall be of substantial material and construction, properly braced and carried the full height of openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between mem-

bers. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

**Rule 13. Shaft Doors.** In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors;
- (b) by combination slide and swing doors;

(c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;

(d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height (except for hand-power elevators having the pull rope located in front of the shaft entrance, in which case gates may be two (2) feet six (6) inches, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and shall close automatically upon the car leaving the landing in either direction).

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 14. Car Gates.** In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 15. Counterweights.** In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be pro-

# RULES

vided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof four tell-tale metal chains not less than five feet long shall be suspended from the bottom of the counterweight.

**Rule 16. Speed Governors.** All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators of less than thirty-five feet rise and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

**Rule 17. Limit Devices.** In future installations all power-driven elevators shall have approved upper and lower limit devices in the shaft or on the car, and in drum type elevators they shall also be provided on the machine.

**Rule 18. Elevator Brake.** In future installations every electric elevator shall be equipped with an electric or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

**Rule 19. Operating Device.** In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switches shall be self-centering and self-locking in the inoperative position.

**Rule 20. Reverse Phase Relays.** In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

**Rule 21. Slack Rope Device.** In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, hoisting rope or chains become slack.

**Rule 22. Car Locking Device.** No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator, unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

**Rule 23. Hand-Power Elevator Safety Devices.** In future installations every hand-power elevator (except

sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

**Rule 24. Escalators.** In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

**Rule 25. Car Construction.** In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible materials. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

**Rule 26. Passenger Car Enclosures.** In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for the car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between any two members; except that where straight bars not filled in with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall be of solid construction or screened with not more than one-half ( $\frac{1}{2}$ ) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six (6) inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations, it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the car enclosure.

**Rule 27. Emergency Exit.** In future installations every power-driven passenger elevator car shall have a trap door in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car.

In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head or car top construction renders it impracticable to provide such trap door, this requirement may be waived by the superintendent of buildings, if egress, in case of emergency, is possible through shaft openings, or to an adjacent car.

**Rule 28. Freight Car Enclosure.** In existing and future installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head when this is less than five (5) feet six (6) inches above the car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

**Rule 29. Freight Elevator Cover.** In existing and future installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U

# RULES

S. gauge wire or its equivalent in strength, and of a mesh that will reject a one and one-half ( $1\frac{1}{2}$ ) inch diameter ball. Sections of the cover or grating may be arranged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where car gates are provided) that part of the cover facing the entrances to the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

**Rule 30. Space Between Saddles and Car.** In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch space between the floor of the car and the floor saddles, and where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

**Rule 31. Lights.** In existing and future installations the cars of all elevators shall be properly lighted at all times when in service.

**Rule 32. Guide Rails.** In future installations, guide rails for both car and counterweights of all elevators (except dumbwaiters, and hand-power elevators with a rise of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with wrought or cast iron brackets of such strength and design and so spaced that the guide rails and their fastenings shall be able to safely withstand the application of the safety when stopping a fully loaded car under test. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and joints shall be tongued and grooved or dowelled, and rails shall extend to the level of or above the overhead beams and shall be bottomed on a suitable support.

The weights of steel or iron guide rails shall be not less than given in the following table:

WEIGHT OF GUIDE RAILS PER LINEAL FOOT.

Total Weight of Car and Live Load, or Weight of Counterweight	Weight of Car Guide Rails		Weight of Counterweight Guide Rails	
	With Guide Rail Safeties.	Without Guide Rail Safeties.	With Guide Rail Safeties.	Without Guide Rail Safeties.
0-4000 lbs.....	$7\frac{1}{2}$	$7\frac{1}{2}$	$7\frac{1}{2}$	$6\frac{1}{2}$
4001-15000 ".....	14	14	14	$7\frac{1}{2}$
15001-40000 ".....	30	30	30	$7\frac{1}{2}$

**Rule 33. Ropes.** In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth ( $1/40$ ) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

**Rule 34. Auxiliary Freight Compartments.** In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator cannot be operated until the gate is closed.

**Rule 35. Overhead Gratings.** In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by gratings or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the grating.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

**Rule 36. Elevator Pit.** In every elevator shaft hereafter constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than five feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the car floor when the car is at the lowest possible position. In the case of power-driven sidewalk type elevators, the clear space between the bottom of the shaft and underside of the car floor shall be not less than six inches. The pits herein required at the bottom of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent of the area of the pit.

**Rule 37. Overhead Clearance for Cars.** For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

**Rule 38. Overhead Clearance for Counterweights.** In future installations the clearance space between the top of the counterweight and the overhead beams when the car has completely compressed the pit buffers shall be not less than six (6) inches for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

**Rule 39. Machinery Room.** All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter erected free and safe access must be provided to all parts of

the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installations in existing buildings, such clearance shall be provided as deemed necessary by the superintendent of buildings, but need not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

**Rule 40. Speed.** The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

**Rule 41. Buffers.** In future installations for all power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

**Rule 42. Supporting Beams.** Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

**Rule 43. Determination of Questions.** When an existing installation for either passenger or freight service is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variations are granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

## PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building Manhattan.

## HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

## CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, February 23, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, March 2, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

## NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners Holland, Guilfoyle and Chief Kenlon ..... 4

Absent: Commissioner Connell ..... 1

THE RESOLUTION:

(909-25-A)

WHEREAS, Peerless Roofing & Construction Co., Inc., for Richmond Weed, owner, filed, September 9, 1925, an appeal from the order of the fire commissioner, affecting premises No. 56 West 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 23, 1925, reads (Order No. 82993-F):

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at south side of building, \* \* \*";

and

WHEREAS, the building is non-fireproof, five stories in height, 20 ft. 6 in. by 100 ft. 6 in. in area at 1st story and 20 ft. 6 in. by 60 ft. 6 in. in area above; OCCUPIED as a tenant factory, 24 persons above the 1st story; and

WHEREAS, there are three openings (a fireproof door and two unprotected windows) in the southerly wall of the premises, on the 3rd, 4th and 5th stories, within 50 ft. of a tin-roofed two-story extension of a dwelling to the west; the two windows on the 2nd, 3rd, 4th and 5th stories in the southerly wall of the building in question being also within 30 ft. of openings in the westerly wall of a building to the east; and

WHEREAS, appellant contends that the openings directly adjacent to the tin-roofed extension forming the exposure are provided with fireproof doors, and contends, in re: to the exposures from the openings in the westerly wall of the building to the east, that the openings therein are fireproof.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

THE RESOLUTION:

(855-25-BZ)

WHEREAS, Ernest Henke and Max Geidel, for Ernest Henke and Henrietta Geidel, owners, filed, August 26, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles, and also a gasoline selling station; premises southeast corner Hylan boulevard, formerly Drumgoole avenue, and Page street (formerly avenue), Tottenville, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hylan boulevard and Page street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered August 10, 1925, reads:

"I hereby notify you that your application number N. B. 1445-1925, filed August 10, 1925, for the erection of a Public Garage and Filling Station located on the southeast corner of Drumgoole and Page avenues, Tottenville, is disapproved; being contrary to Zone Law. This locality being in a business zone."

and

WHEREAS, the premises consist of a plot of ground 150 ft. by 125 ft. in area, upon which it is proposed to erect a gasoline selling station, consisting of a 16 ft. by 32 ft. one-story hollow tile auto accessory building, tanks and pumps and also a one-story 50 ft. by 100 ft. non-fireproof garage for the storage of more than five motor vehicles; and

WHEREAS, the board concluded that applicant should be granted relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the establishing of a gasoline selling station at the southeast corner, formed by the intersection of Hylan boulevard and Page street, confined to plot 100 ft. square, *on condition* that return drawings shall be made to this board for approval as to design, material and layout of incidental structures or equipment, before submitting same to the fire and building departments; and that all permits required shall be obtained within nine months and all work entailed thereby shall be completed within eighteen months.

Adjourned 3.30 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

## THE RESOLUTION:

(748-25-S)

WHEREAS, W. C. W. Child, for Century Stearic Acid and Candle Works, filed, July 17, 1925, a petition for variation from the requirements of the labor law, as cited in the

order of the fire commissioner, affecting premises No. 380 South street and 341-3-5 Front street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 25, 1925, reads (Order No. 74507-LD):

"1. Remove the substandard fire escape on the front of the building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals adopted May 9, 1924. Among the defects noted are the following:

"(1) Windows on course not fireproof, self-closing.

"(2) No 60 degree connecting stairway.

"(3) No proper egress from termination.

"2. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. Note: Among the defects noted are the following:

"(1) Connecting stairs are not 60 degree.

"(2) Windows on course are not fireproof, self-closing.

"(3) No fireproof passageway from termination to street.";

and

WHEREAS, the building is non-fireproof, extending through the block from street to street, four stories in height in the South street section, and a clerestory (equivalent to two stories) in height in the Front street section, 70 ft. 6 in. by 140 ft. in area at 1st and 2nd stories and 70 ft. 6 in. by 94 ft. in area above; OCCUPIED for the manufacture of glycerine, acids, etc., 34 persons above the 1st story; EQUIPPED with a sprinkler system. EXITS (South street section of building): An interior wooden stairway, extending from the 1st story to top story; enclosed in wooden partitions with wooden doors at openings; one flight of wooden stairs, at rear, extending from 3rd story to 4th story; two sub-standard fire escapes, one on the front and one on the rear, having non-fireproof openings along the course thereof, extending from top story to the ground; the rear fire escapes terminate in an enclosed court, with egress through the building to Front street; ROOFS of adjoining buildings 25 ft. lower at north and south; and

WHEREAS, the petitioner proposes to comply with Item 1 of Order No. 74507-LD, by removing the sub-standard fire escapes on South street front; re: Item 2, the petitioner proposes to construct a fire escape balcony at rear of top story, with a 60 degree stairs to an iron passageway extending over the roof of the Front street section of the building to a 60 degree stairs leading to a platform, provided with a counterbalanced drop ladder to sidewalk on Front street; the windows opening on the new balcony at rear of top story will be made fireproof.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item No. 2 of Order 74507, only so far as it affects the fireproof passageway required, on condition that all openings on the interior court shall be fireproofed throughout and that a fire escape balcony with not less than 60 degree stairs shall be provided from the 2nd story to the roof of the one-story building on Front street; that the fire escape from the rear of the top story on the South street building shall be provided with iron fire escape bridge, crossing over to the Front street elevation with stairs to an intermediate balcony and equipped with counterbalanced stairs at the termination to the street; and that the under side of the roof of the one-story non-fireproof structure on the Front street side shall be fire retarded in accordance with the rules of the board of standards and appeals; and that the plant shall be not increased in height, area or dimension; and denied as to Item No. 1.

THE RESOLUTION:

(898-25-S)

WHEREAS, Spad Manufacturing Company, Inc., for The 215 West 40th Street Corporation, owner, filed, September 3, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 215-17 West 40th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 6, 1925, reads (Order No. 81905-LD):

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, 14 stories in height, 48 ft. by 82 ft. in area; OCCUPIED, tenant factory, 207 persons above the 1st story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner, occupying the 9th story for the purpose of assembling parts of a timing device for gas engines with 30 persons employed, claims that the wooden partitions are 7 ft. in height, and a total length of 170 ft.; that a length of 52 ft. of such partitions are extended to the ceiling by glass sashes; that no machinery of any kind is used, and no fire hazard exists.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

971-25-S.

PETITIONER—H. H. Murdock, for 142 West 24th Street Corp., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—142-146 West 24th street, Manhattan.

APPEARANCES—

For Petitioner: H. H. Murdock.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

Negative .....	0
Absent: Commissioner Connell.....	1

THE RESOLUTION:

(971-25-S)

WHEREAS, H. H. Murdock, for 142 West 24th Street Corp., owner, filed, September 18, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises Nos. 142-146 West 24th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 22, 1925, reads (Order No. 83248-LD):

"1. Provide safe and unobstructed egress from the lower termination of the exterior screened stairway a rear of building independent of other exit from the building, by constructing a fireproof passageway with an unobstructed width of at least three feet through out leading to the street, adequately lighted at all time during working hours or by means of providing access to an open area having communication with the street as per Section 268 of the Labor Law.";

and

WHEREAS, the building is fireproof, 12 stories in height, 55 ft. 9 in. by 96 ft. 3 in. in area at 1st story and 55 ft. 9 in. by 90 ft. in area above; OCCUPIED as a tenant factory, approximately 250 persons above the 1st story EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with fire doors at openings; an exterior screened stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the mezzanine story fire escape balcony; with EGRESS from the termination of the exterior screened stairway by means of a 3 ft. 6 in. wide passageway on the mezzanine story leading to the main stairway and thence to street; and

WHEREAS, petitioner contends that the existing means of egress from the termination of the fire escape are adequate and that the building has been occupied as a factory since prior to 1913.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects egress from the termination of the exterior screened stairway through a continuous and independent passageway, on condition that a passageway shall be provided from the termination of the exterior screened stairway on the mezzanine floor connecting to the main interior stairway with direct egress therefrom to the street, and that the occupancy shall not exceed the capacity of the interior stairway with allowance for an existing automatic sprinkler system.

THE RESOLUTION:

(1221-25-S)

WHEREAS, George F. Pelham, for Kermacoe Realty Co., owner, filed, November 24, 1925, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises No. 257-267 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated November 20, 1925, reads (re: Application No. 131):

"16. Store front and second story front windows should be constructed as per Section 264 of Labor Law, and Rule 503 of Industrial Code.";

and WHEREAS, the building is fireproof, 16 stories in height, 126 ft. by 100 ft. in area; OCCUPIED for stores, lofts, offices and show rooms; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways extending from roof to 1st story, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, there are openings on the 1st and 2nd stories, in the street walls of the building, glazed with  $\frac{1}{4}$  in. plate glass. The maximum area of the glass on the 1st story being 6 ft. by 10 ft. in area and the maximum area on the 2nd story being 7 ft. by 11 ft. 6 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the use of the lowest two stories and would, also, affect the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the window openings of the lower two stories on street front, on condition that these openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; and that the labor law requirements shall be complied with in all other respects.

70-26-S.

PETITIONER—Walter H. Volckening, for Henri Bendel, Inc., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—15 West 56th street and 14 West 57th street, Manhattan.

APPEARANCES—

For Petitioner: Walter H. Volckening.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon .....	4
Negative .....	0
Absent: Commissioner Connell.....	1

THE RESOLUTION:

(70-26-S)

WHEREAS, Walter H. Volckening, for Henri Bendel, Inc., owner, filed, January 26, 1926, a petition, with the board of standards and appeals from a decision of the superintendent of buildings, affecting premises 15 West 56th street and 14 West 57th street, Manhattan.

WHEREAS, the decision of the superintendent of buildings, Alt. 482-1925, dated January 21, 1926, reads:

"20. Method of fire retarding stair enclosure does not comply with Rule 504 of Industrial Code.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 89 ft. in area in 1st story and 25 ft. by 59 ft. 5 in. in area above. OCCUPIED: Cellar, storage, 2 persons; 1st story, store, 5 persons; 2nd story, lunch room, 5 persons; 3rd, 4th and 5th stories, work rooms, a total of 86 persons above the 1st story; the means of EGRESS consisting of an interior stairway extending from the 1st story to the roof, enclosed in the lower stories in brick partitions with fire doors at the openings, and in lath and plaster partitions above; a fire escape in the 3rd, 4th and 5th stories connecting with the building to the rear, a horizontal exit in the cellar connecting with the building in the rear on 57th street; and

WHEREAS, petitioner proposes to leave the present lath and plaster on the room side of the stair hall partition enclosure on all stories, to remove the lath and plaster on the hall side, and to fill in between the 4 in. by 6 in. spruce studs, which are set 16 in. on the center, with gypsum block, and to cover this hall side enclosure with metal lath and  $\frac{3}{4}$  in. Portland cement mortar; all door openings to be protected with self-closing fireproof doors and to install a fire alarm signal system.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the existing stairhall enclosure partition shall be filled in throughout with 4 in. gypsum block, the full width of the stud, fire-stopped from floor to floor throughout; and that the hall side shall be finished with Portland cement mortar on metal lath, all openings in the stairhall enclosure to be equipped with self-closing fireproof doors and that an approved fire alarm signal system shall be installed; only so long as conditions as to occupancy and use remain substantially unchanged.

## THE RESOLUTION:

(735-24-SA)

WHEREAS, the Petroleum Heat and Power Company filed, May 27, 1924, a petition with the board of standards and appeals for approval of its device, known as the Petro Mechanical Oil Burner and Air Register; and

WHEREAS, a committee of the board inspected this device in operation in the Municipal Building, New York, and recommended the approval of the device for use with Grade A fuel oil.

Resolved, that the board of standards and appeals does hereby approve the device known as the Petro Mechanical Oil Burner and Air Register for use with Grade A fuel oil in commercial and industrial installations when used in conjunction with fuel oil burning equipment, installed as required by the rules of the board of standards and appeals and operated in compliance with such rules and under the supervision of a licensed engineer.

Adjourned 5.15 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

# RULES

## COVERING THE DESIGN OF REINFORCED CONCRETE FLAT SLABS.

Adopted by the Board of Standards and Appeals, July 8, 1920, under Cal. 395-20-S.

**Rule 1. Application.** The rules governing the design of reinforced concrete flat slabs shall apply to such floors and roofs, consisting of three or more rows of slabs, without beams or girders, supported on columns, the construction being continuous over the columns and forming with them a monolithic structure.

**Rule 2. Compliance with Building Code.** In the design of reinforced concrete flat slabs, the provisions of article 16 of the building code shall govern with respect to such matters as are specified therein.

**Rule 3. Assumptions.** In calculations for the strength of reinforced concrete flat slabs, the following assumptions shall be made:

(a) A plane section before bending remains plane after bending;

(b) The modulus of elasticity of concrete in compression within the allowable working stresses is constant;

(c) The adhesion between concrete and reinforcement is perfect;

(d) The tensile strength of concrete is nil;

(e) Initial stress in the reinforcement due to contraction or expansion in the concrete is negligible.

**Rule 4. Stresses.** (a) The allowable unit shear in reinforced concrete flat slabs on the bd section around the perimeter of the column capital shall not exceed one hundred twenty (120) pounds per square inch; and the allowable unit shearing stress on the bjd section around the perimeter of the drop shall not exceed sixty (60) pounds per square inch, provided that the reinforcement is so arranged or anchored that the stress may be fully developed for both positive and negative moments.

(b) The extreme fibre stress to be used in concrete in compression at the column head section shall not exceed seven hundred fifty (750) pounds per square inch.

**Rule 5. Columns.** For columns supporting reinforced concrete flat slabs, the least dimension of any column shall be not less than one-fifteenth ( $1/15$ ) of the average span of any slabs supported by the columns; but in no case shall such least dimension of any interior column supporting a floor or roof be less than sixteen (16) inches when round nor fourteen (14) inches when square; nor shall the least dimension of any exterior column be less than fourteen (14) inches.

**Rule 6. Column Capital.** Every reinforced concrete column supporting a flat slab shall be provided with a capital whose diameter is not less than 0.225 of the average span of any slabs supported by it. Such diameter shall be measured where the vertical thickness of the capital is at least one and one-half ( $1\frac{1}{2}$ ) inches, and shall be the diameter of the inscribed circle in that horizontal plane. The slope of the capital considered effective below the point where its diameter is measured shall nowhere make an angle with the vertical of more than forty-five (45) degrees. In case a cap of less dimensions than hereinafter described as a drop, is placed above the column capital, the part of this cap enclosed within the lines of the column capital extended upward to the bottom of the slab or drop at the slope of forty-five (45) degrees may be considered as part of the column capital in determining the diameter for design purposes.

**Rule 7. Drop.** When a reinforced concrete flat slab is thicker in that portion adjacent to or surrounding the column, the thickened portion shall be known as a drop. The width of such drop when used, shall be determined by the shearing stress in the slab around the perimeter of the drop, but in no case shall the width be less than 0.33 of the average span of any slabs of which it forms a part. In computing the thickness of drop required by the negative moment on the column head section, the width of the drop only shall be considered as effective in resisting the compressive stress, but in no case shall the thickness of such drops be less than 0.33 of the thickness

# RULES

of the slab. Where drops are used over interior columns, corresponding drops shall be employed over exterior columns and shall extend to the one-sixth ( $1/6$ ) point of the panel from the center of the column.

**Rule 8. Slab Thickness.** The thickness of a reinforced concrete flat slab shall be not less than that derived by the formulae  $t = 0.024 L \sqrt{w} + 1\frac{1}{2}$  for slabs without drops, and  $t = 0.02 L \sqrt{w} + 1$  for slabs with drops, in which  $t$  is the thickness of the slab in inches,  $L$  is the average span of the slab in feet, and  $w$  is the total live and dead load in pounds per square foot; but in no case shall this thickness be less than one-thirty-second ( $1/32$ ) of the average span of the slab for floors, nor less than one-fortieth ( $1/40$ ) of the average span of the slab for roofs, nor less than six (6) inches for floors nor less than five (5) inches for roofs.

**Rule 9. Reinforcement.** (a) In the calculation of moments at any section, all the reinforcing bars which cross that section may be used, provided that such bars extend far enough on each side of such section to develop the full amount of the stress at that section. The effective area of the reinforcement at any moment section shall be the sectional area of the bars crossing such section multiplied by the sine of the angle of such bars with the plane of the section. The distribution of the reinforcement of the several bands shall be arranged to fully provide for the intermediate moments at any section.

(b) Splices in bars may be made wherever convenient but are preferably at points of minimum stress. The length of any splice shall be not less than eighty (80) bar diameters and in no case less than two (2) feet. The splicing of adjacent bars shall be avoided as far as possible. Slab bars which are lapped over the column, the sectional area of both being included in the calculation for negative moment, shall extend to the lines of inflection beyond the column center.

(c) When the reinforcement is arranged in bands, at least fifty (50) per cent of the bars in any band shall be of a length not less than the distance center to center of columns measured rectangularly and diagonally; on bars used as positive reinforcement shall be of a length less than half ( $1/2$ ) the panel length plus forty (40) bar diameters for cross bands, or less than seven-tenths ( $7/10$ ) of the panel length plus forty (40) bar diameters for diagonal bands and no bars used as negative reinforcement shall be of a length less than half ( $1/2$ ) the panel length. All reinforcement framing perpendicular to the wall in exterior panels shall extend to the outer edge of the panel and shall be hooked or otherwise anchored.

(d) Adequate means shall be provided for properly maintaining all slab reinforcement in the position assumed by the computations.

**Rule 10. Line of Inflection.** In the design of reinforced concrete flat slab construction, for the purpose of making calculations of the bending moments at sections other than defined in these rules, the line of inflection shall be considered as being located one-quarter ( $1/4$ ) the distance, center to center, of columns, rectangularly and diagonally, from center of columns for panels without drops, and three-tenths ( $3/10$ ) of such distance for panels with drops.

**Rule 11. Moment Sections.** For the purpose of design of reinforced concrete flat slabs, that portion of the section across a panel, along a line midway between columns, which lies within the middle two quarters of the width of the panel shall be known as the inner section, and those portions of the section in the two outer quarters of the width of the panel shall be known as the outer sections. Of the section which follows a panel edge from column to column and which includes the quarter perimeters of the edges of the column capitals, that portion within the middle two quarters of the panel width shall

be known as the mid section and the two remaining portions, each having a projected width equal to one-quarter of the panel width, shall be known as the column head sections.

**Rule 12. Bending Moments.** In the design of reinforced concrete flat slabs the following provisions with respect to bending moments shall be observed. In the moment expressions used:

$W$  is the total dead and live load on the panel under consideration, including the weight of drop whether a square, rectangle or parallelogram;

$W_1$  is the total live load on the panel under consideration;

$L$  is the length of side of a square panel center to center of columns; or the average span of a rectangular panel which is the mean length of the two sides;

$n$  is the ratio of the greater to the less dimension of the panel;

$h$  is the unsupported length of a column in inches, measured from top of slab to base of capital;

$I$  is the moment of inertia of the reinforced concrete column section.

**A. Interior Square Panels.** The numerical sum of the positive and negative moments shall be not less than  $1/17 W L$ . A variation of plus or minus five (5) per cent shall be permitted in the expression for the moment on any section, but in no case shall the sum of the negative moments be less than sixty-six (66) per cent of the total moment, nor the sum of the positive moments be less than thirty-four (34) per cent of the total moment for slabs with drops; nor shall the sum of the negative moments be less than sixty (60) per cent of the total moment, nor the sum of the positive moments be less than forty (40) per cent of the total moment for slabs without drops.

1. In *two-way systems*, for slabs with drops, the negative moment resisted on two column head sections shall be  $-1/32 W L$ ; the negative moment on the mid section shall be  $-1/133 W L$ ; the positive moment on the two outer sections shall be  $+1/80 W L$  and the positive moment on the inner section shall be  $+1/133 W L$ ; and for slabs without drops, the negative moment resisted on two column head sections shall be  $-1/36 W L$ , the negative moment on the mid section shall be  $-1/133 W L$ , the positive moment on the two outer sections shall be  $+1/63 W L$  and the positive moment on the inner section shall be  $+1/133 W L$ .

2. In *four-way systems*, the negative moments shall be as specified for Two-Way Systems; the positive moment on the two outer sections shall be  $+1/100 W L$  and the positive moment on the inner section shall be  $+1/100 W L$  for slabs with drops; and the positive moment on the two outer sections shall be  $+1/174 W L$ , and the positive moment on the inner section shall be  $+1/100 W L$ , for slabs without drops.

3. In *three-way systems*, the negative moment on the column head and mid sections and the positive moment on the two outer sections, shall be as specified for Four-Way Systems. In the expression for the bending moments on the various sections, the length  $L$  shall be assumed as the distance center to center of columns and the load  $W$  as the load on the parallelogram panel.

**B. Interior Rectangular Panels.**

1. When the ratio  $n$  does not exceed 1.1, all computations shall be based on a square panel of a length equal to the average span, and the reinforcement shall be equally distributed in the short and long directions according to the bending moment coefficients specified for interior square panels.

2. When the ratio  $n$  lies between 1.1 and 1.33, the bending moment coefficients specified for interior square panels shall be applied in the following manner:

(a) In *two-way systems*, the negative moments on the two column head sections and the mid section and the positive moment on the two outer sections and the

# RULES

inner section at right angles to the long direction shall be determined as for a square panel of a length equal to the greater dimension of the rectangular panel; and the corresponding moments on the sections at right angles to the short direction shall be determined as for a square panel of a length equal to the lesser dimension of the rectangular panel. In no case shall the amount of reinforcement in the short direction be less than two-thirds ( $2/3$ ) of that in the long direction. The load  $W$  shall be taken as the load on the rectangular panel under consideration.

(b) In *four-way systems*, for the rectangular bands, the negative moment on the column head sections and the positive moment on the outer sections shall be determined in the same manner as indicated for *two-way systems*.

For the diagonal bands the negative moments on the column head and mid sections and the positive moment on the inner section shall be determined as for a square panel of a length equal to the average span of the rectangle. The load  $W$  shall be taken as the load on the rectangular panel under consideration.

(c) In *three-way systems*, the negative and positive moments on the bands running parallel to the long direction shall be determined as for a square whose side is equal to the greater dimension; and the moments on the bands running parallel to the short direction shall be determined as for a square whose side is equal to the lesser dimension. The load  $W$  shall be taken as the load on the parallelogram panel under consideration.

**C. Exterior Panels.** The negative moments at the first interior row of columns and the positive moments at the center of the exterior panels on moment sections parallel to the wall, shall be increased twenty (20) per cent over those specified above for interior panels. The negative moment on moment sections at the wall and parallel thereto shall be determined by the conditions of restraint, but the negative moment on the mid section shall never be considered less than fifty (50) per cent and the negative moment on the column head sec-

tion never less than eighty (80) per cent of the corresponding moments at the first interior row of columns.

**D. Interior Columns** shall be designed for the bending moments developed by unequally loaded panels, eccentric loading or uneven spacing of columns. The bending moment resulting from unequally loaded panels shall be considered as  $1/40 W_1 L$ , and shall be resisted by the columns immediately above and below the floor line under consideration in direct proportion to the values of their ratios of  $I/h$ .

**E. Wall Columns** shall be designed to resist bending in the same manner as interior columns, except that  $W$  shall be substituted for  $W_1$  in the formula for the moment. The moment so computed may be reduced by the counter moment of the weight of the structure which projects beyond the center line of the wall columns.

**F. Roof Columns** shall be designed to resist the total moment resulting from unequally loaded panels, as expressed by the formulae in paragraphs (D) and (E) of this rule.

**Rule 13. Walls and Openings.** In the design and construction of reinforced concrete flat slabs, additional slab thickness, girders or beams shall be provided to carry any walls or concentrated loads in addition to the specified uniform live and dead loads. Such girders or beams shall be assumed to carry twenty (20) per cent of the total live and dead panel load in addition to the wall load. Beams shall also be provided in case openings in the floor reduce the working strength of the slab below the prescribed carrying capacity.

**Rule 14. Special Panels.** For structures having a width of less than three (3) rows of slabs, or in which exterior drops, capitals or columns are omitted, or in which irregular or special panels are used, and for which the rules relating to the design of reinforced flat slabs do not directly apply, the computations in the analysis of the design of such panels, shall, when so required, be filed with the superintendent of buildings.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals,  
March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## BUILDING CODE ON SALE.

Copies of the Building Code are now on sale at the Distributing Division of the City Record Office, 125 Worth street. Price, \$1.25; by mail, \$1.35.

## ELECTRICAL CODE ON SALE.

Copies of the Electrical Code are now on sale at the Distributing Division of the City Record Office, 125 Worth street. Price, 30c; by mail, 35c.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1923; amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards and Appeals July 29, 1924.

**Rule 1.**—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty-five persons employed above the second story, all interior stairways, serving as required means of exit, and the landings, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest point of the stairway in accordance with the following schedule:

Number of stories	Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible and sprinkler
Three	Stairways Enclosed			
Four	Stairways Enclosed	Stairways Enclosed		
Five	Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

The term "contents" as used above means articles, goods, wares and merchandise, packed, stored, manufactured or in the process of manufacture.

The term "combustible" as used above means articles, goods, wares or merchandise which will burn or support combustion.

The term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

The term "story" as used above means that part of a building between any floor and the floor or roof next above;—the first story is that part of a building which is more than 50 per cent above the floor below and the floor next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding that portion of the under side of the roof beams within the stair enclosure shall be covered with fire resisting material, except in buildings with roofs of non-combustible material, in which case the partitions may stop at the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvres or ventilators, or exterior windows with ventilating sections at the top floor.

All openings in such partitions shall be provided with approved self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, will be accepted as a compliance with this rule when both sides of the fire wall or walls are occupied on any factory floor by the same occupant

**Rule 2.**—Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills, properly secured. When sill is more than 8 inches above the floor level, and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

**Rule 4.**—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

# RULES

## ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,  
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE  
AUGUST 26, 1918; REVISED MAY 13, 1919.

**Rule 1. Application of Elevator Rules.** Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

### Rule 2. Definitions Relating to Elevators.

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device used for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the services of an operator thereon.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

(j) The term "power driven elevator" shall apply to any form of elevator except those operated by hand power, gravity in both directions, or through friction grip on the pull rope.

**Rule 3. Permits.** The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

**Rule 4. Alterations.** In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely re-

newed, at the discretion of the superintendent of buildings. Where hand power elevators are changed to power driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

**Rule 5. Change of Classification.** In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

**Rule 6. Tests of New Elevators.** In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lift capacity of the machinery and the operation of the up and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speed exceeding one hundred (100) feet per minute, and hand-power elevators with a rise of more than fifty (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and safety device and the slack rope device when required and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift.

The cars of power-driven elevators having speed of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At normal speed the governor shall be manually operated to test the action of the safety equipment.

**Rule 7. Carrying Capacity.** In existing installations the owner, lessee or other person having charge and control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having legible letters and figures on same, which shall designate the number of pounds weight which said elevator is safely carry.

Future installations shall be designed to sustain all their parts a load per square foot of platform area inside the car of not less than the following:

- (a) 75 pounds for power-driven passenger elevators
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet
- (c) 50 pounds for hand-power passenger elevators

**Rule 8. Rules to be Posted.** In the car of a passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the

# RULES

ion of elevators as he may deem necessary to insure public safety, including the number of passengers that each car may carry at one time.

**Rule 9. Full Automatic Push Button Elevators.** In future installations full automatic push button elevators must be so designed and equipped that the car, at its rated speed and load, will automatically stop when the floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

**Rule 10. Belt or Chain Drives.** In future installations no hoisting machine driven by a chain or belt drive from a motor or countershaft shall be used in connection with any passenger elevator.

**Rule 11. Shaft Openings.** In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls. No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

**Rule 12. Hoistway Enclosure.** In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure shall be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half ( $1\frac{1}{2}$ ) inches; when grille work is used there shall be not more than one and one-half ( $1\frac{1}{2}$ ) inches space between any two members, except that where plain straight bars, not filled in with glass, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths ( $\frac{3}{8}$ ) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by any regulation as a shaft enclosure is altered, such

alteration shall be of substantial material and construction, properly braced and carried the full height of openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

**Rule 13. Shaft Doors.** In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors;
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;

(d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give the required head room, and shall close automatically upon the car leaving the landing in either direction; except further that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 14. Car Gates.** In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 15. Counterweights.** In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the

# RULES

uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof tell-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

**Rule 16. Speed Governors.** All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

**Rule 17. Limit Devices.** In future installations all power-driven elevators shall have approved limit devices as follows:

- (a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine and in the shaft or on the car;
- (b) for Traction Type Electric Elevators, limit switches in the shaft or on the car;
- (c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;
- (d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;
- (e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;
- (f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

**Rule 18. Elevator Brake.** In future installations every electric elevator shall be equipped with an electric or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

**Rule 19. Operating Device.** In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the

operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switches shall be self-centering and self-locking in the inoperative position.

**Rule 20. Reverse Phase Relays.** In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

**Rule 21. Slack Rope Device.** In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or chain attached to the drum becomes slack.

**Rule 22. Car Locking Device.** No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator, unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

**Rule 23. Hand-Power Elevator Safety Devices.** In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

**Rule 24. Escalators.** In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

**Rule 25. Car Construction.** In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible materials. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

**Rule 26. Passenger Car Enclosures.** In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for the car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between any two members; except that where straight bars not filled in with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall be of solid construction or screened with not more than one-half ( $\frac{1}{2}$ ) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six (6) inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations, it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the car enclosure.

**Rule 27. Emergency Exit.** In future installations every power-driven passenger elevator car shall have a trap

# RULES

in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car. In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head or car top construction renders it impracticable to provide a trap door, this requirement may be waived by the superintendent of buildings, in case of emergency, accessible through shaft openings, or to an adjacent car.

**Rule 28. Freight Car Enclosure.** In existing and new installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head, if this is less than five (5) feet six (6) inches above the car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

**Rule 29. Freight Elevator Cover.** In existing and new installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U. S. gauge wire or its equivalent in strength, and of a height that will reject a one and one-half (1½) inch diameter ball. Sections of the cover or grating may be hinged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where cars are provided) that part of the cover facing the entrances to the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

**Rule 30. Space Between Saddles and Car.** In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch, between the floor of the car and the floor saddles, where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

**Rule 31. Lights.** In existing and future installations cars of all elevators shall be properly lighted at all times when in service.

**Rule 32. Guide Rails.** In future installations, guide rails for both car and counterweights of all elevators except dumbwaiters, and hand-power elevators with a rise of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with cast or wrought iron brackets of such strength and so spaced that the guide rails and their fittings shall be able to safely withstand the application of the safety when stopping a fully loaded car in test. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and shall be tongued and grooved or doweled, and shall extend to the level of or above the overhead beams and shall be bottomed on a suitable support. The weights of steel or iron guide rails shall be not less than given in the following table:

GROSS WEIGHT OF GUIDE RAILS PER LINEAL FOOT.	Weight of Car Guide Rails		Weight of Counterweight Guide Rails	
	With Guide Rail Safeties.	Without Guide Rail Safeties.	With Guide Rail Safeties.	Without Guide Rail Safeties.
4000 lbs. ....	7½	7½	7½	6½
15000 " ....	14	14	14	7½
40000 " ....	30	30	30	7½

**Rule 33. Ropes.** In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth (1/40) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with hand rope control. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

**Rule 34. Auxiliary Freight Compartments.** In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator cannot be operated until the gate is closed.

**Rule 35. Overhead Gratings.** In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by gratings or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the grating.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

**Rule 36. Elevator Pit.** In every elevator shaft hereafter constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than five feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the car floor framing when the car is at the lowest possible position. In the case of power-driven sidewalk type elevators, the clear space between the bottom of the pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom

of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent of the area of the pit.

**Rule 37. Overhead Clearance for Cars.** For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

**Rule 38. Overhead Clearance for Counterweights.** In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of the counterweight of not less than two (2) feet for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

**Rule 39. Machinery Room.** All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter erected free and safe access must be provided to all parts of the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installa-

tions in existing buildings, such clearance shall be provided as deemed necessary by the superintendent of buildings, but need not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

**Rule 40. Speed.** The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

**Rule 41. Buffers.** In future installations for all power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

**Rule 42. Supporting Beams.** Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

**Rule 43. Determination of Questions.** When any existing installation for either passenger or freight service is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variations are granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—Worth 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

## CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, February 23, 1926, at 10 a. m.

Minutes of Regular Meeting, February 23, 1926, at 2 p. m.

Corrections.

Reserve Calendar.

Rules.

Progress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, March 2, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, March 9, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## CALL OF CLERK'S CALENDAR.

**TUESDAY, MARCH 2, 1926, AT 2 P. M.**

### *Building Zone Cases.*

1066-25-BZ.	APPLICANT—Daniel Campbell, Jr., for Roland Lieven- dag, owner. PREMISES—Northwest corner of Queens avenue and 24th street, Flushing, Queens. APPLICATION, under section 7g of the building zone resolution, TO PERMIT in a business district the erection and main- tenance of a garage for the storage of more than five (5) motor vehicles.
1168-25-BZ.	APPLICANT—James A. Boyle, for Elizabeth J. Schaedle Margaret M. Schaedle, Mary L. Schaedle and Amelia M. Schaedle, owners. PREMISES—140-144 Devoe street, Brooklyn. APPLICATION, under section 7e of the building zone resolution, TO PERMIT in a business district the erection and main- tenance of a garage for the storage of more than five (5) motor vehicles.
1059-25-BZ.	APPLICANT—Eugene De Rosa, for Hamford Real Corp., owner. PREMISES—West side of Jerome avenue, 100 ft. south of 190th street, The Bronx. APPLICATION, under sections 7b and 21 of the building zone resolution, TO PERMIT the extension from a business district into a residence district of a proposed building to be used as a theatre.
1225-25-BZ.	APPLICANT—William F. Doyle, for Elbarth Real Corp., owner. PREMISES—2636-2656 Ocean avenue, Brooklyn. APPLICATION, under sections 7c and 21 of the building zone resolution, TO PERMIT in a residence district the erection of apartment house with stores on the 1st story.
1200-25-BZ.	APPLICANT—Edward P. Doyle, for Hargreen Real Corp., owner. PREMISES—588 Knickerbocker avenue, Brooklyn. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a business district the erection and main- tenance of a gasoline selling station.
1226-25-BZ.	APPLICANT—William F. Doyle, for Irville Realty Co. owner. PREMISES AFFECTED—377-383 Dahill road, Brooklyn. APPLICATION, under sections 7c and 21 of the building zone resolution, TO PERMIT the extension, from a business district into a residence district, of a proposed business building (warehouse).
1305-25-BZ.	APPLICANT—Harry Landy, for Love Lane Garage Co. owner. PREMISES—46-50 Love lane, Brooklyn. APPLICATION, under sections 7e and 21 of the building zone resolution,

# CALENDAR

PERMIT in a business district the alteration and extension of an existing garage for the storage of more than five (5) motor vehicles.

89-25-BZ.

## THE RESOLUTION—

(1545-23-A)

WHEREAS, Wm. F. Doyle, for Garland Automobile Co., lessee, filed, December 28, 1923, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 41-3 West 63rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 21233-C, dated November 30, 1923, reads:

"1—Discontinue the maintenance of a motor vehicle repair shop on third story of above premises."

and

WHEREAS, the building is fireproof, three stories in height, 50 ft. by 100 ft. in area. OCCUPIED: 1st story, auto sales and show room, garage for more than five motor vehicles; 2nd story, storage of old and new automobiles, garage for more than five motor vehicles; 3rd story, auto repairs (minor adjustments); the building is located in a business district; and

WHEREAS, the fire department contends the occupancy of the premises is contrary to the certificate of occupancy issued by the superintendent of buildings; and

WHEREAS, appellant contends there is no power driven machinery used on the premises, with the exception of a small electric hand drill and that auto parts that are broken or worn out are replaced and the repairing done are only minor manual repairs incidental to the operation of a garage business, and appellant further contends that there is no gasoline storage system on the premises; and

WHEREAS, this appeal was granted by the board at its meeting February 19, 1924, on certain conditions, and appellant requested a modification of these conditions as to occupancy.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that there shall be no power driven machinery other than a portable electric drill maintained on premises; and *granted* so long as the operation of the business is conducted in conjunction with and incidental to the automobile business of the lessee or occupant of the premises, and that the entire premises comply with the requirements of the labor law, and that the occupancy shall not exceed the legal capacity allowed for the interior stairs.

350-25-A.

APPELLANT—Edward P. Doyle, for Robert Walton Goelet, owner.

Absent ..... 0

## THE RESOLUTION—

(350-25-A)

WHEREAS, Edward P. Doyle, for Robert Walton Goelet, owner, filed, April 1, 1925, an appeal from an order of the fire commissioner, affecting premises No. 637 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 2, 1924, reads (Order No. 61902-F):

"1. Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the Rules of the Board of Standards and Appeals, adopted January 11th, 1924. \* \* \*. Section 20-a, Chapter 12, Code of Ordinances."

and

WHEREAS, the building is non-fireproof, five stories height, 25 ft. by 100 ft. in area. OCCUPIED: 1st story, stores; upper stories, tenant factories, 28 persons above the 1st story; and

WHEREAS, appellant contends that the gas is used for heating and lighting and that the installation would not add to the safety of the occupants in case of fire.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

## THE RESOLUTION—

(388-25-A)

WHEREAS, Edward P. Doyle, for Robert Walton Goelet, owner, filed, April 11, 1925, an appeal from an order of the fire commissioner, affecting premises No. 641 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 2, 1925, reads (Order No. 71484-F):

"1. Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the Rules of the Board of Standards and Appeals, adopted January 11th, 1924. \* \* \*. Section 20-a, Chapter 12, Code of Ordinances."

and

WHEREAS, the building is non-fireproof, two stories height, 25 ft. by 50 ft. in area. OCCUPIED: 1st story, drug store, 5 persons; 2nd story, vacant; and

WHEREAS, the appellant contends that the installation of a gas shut-off valve would not add to the safety of any person in the case of fire; that it is not his duty to protect himself against gas until the gas becomes his property; and the regulation of the use of gas should be made by the Public Service Commission, which alone has jurisdiction.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

## THE RESOLUTION—

(1132-25-A)

WHEREAS, Edward P. Doyle, for Mrs. Mary T. Yourell, owner, filed, November 5, 1925, an appeal from an order of the fire commissioner, affecting premises No. 1687 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 11, 1925, reads (Order No. 75453-LD):

"1. Arrange the sign obstructing the windows of 2nd and 3rd story, at front of building, so that free ingress to and egress from said building may be had thereby, or remove said sign pursuant to Chapter 23, Article 16, Sections 214 and 217 of the Code of Ordinances of the City of New York."

and

WHEREAS, the building is non-fireproof, three stories (30 ft.) in height, 20 ft. 9 in. by 31 ft. 5 in. in area. OCCUPIED: 1st story, store; 2nd story, photograph gallery, 1 person; 3rd story, workroom for photograph gallery, 1 person; and

WHEREAS, there is on the Broadway front of the building, covering the windows on the 2nd and 3rd stories, an advertising sign made of metal with wood border, 20 ft. by 20 ft. in area; and

WHEREAS, appellant contends that the existing means of egress are adequate for the small number of employees in the building.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

## THE RESOLUTION—

(733-25-A)

WHEREAS, Edward P. Doyle, for Frank Dobson, owner, filed, July 13, 1925, an appeal from the order of the fire commissioner, affecting premises No. 319-21 East 53rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 17, 1925, reads (Order No. 79160-F):

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.

"Etc., etc.";

and

WHEREAS, the building is non-fireproof, five stories (52 ft.) in height, 40 ft. 3½ in. by 96 ft. in area. OCCUPIED: Cellar, storage of screens; 1st story, office and storage of lumber; 2nd story, upholstering, 11 persons; 3rd and 4th stories, cabinet work, 15 persons on the two floors; 5th story, painting and repair shop, 10 persons; and

WHEREAS, the appellant contends the building is small, occupied entirely by one firm; the appellant further proposes to install a non-automatic sprinkler system with siamese connections at front, and a thermostatic fire alarm connected direct to headquarters.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that an approved wet sprinkler system shall be installed with a 4 in. street connection to city main, fed two ways; and granted only so long as conditions as to occupancy and use shall remain substantially unchanged.

## THE RESOLUTION—

(334-25-A)

WHEREAS, Acorn Insulated Wire Co., for New York Dock Company, owner, filed, March 27, 1925, an appeal from the order of the fire commissioner, affecting premises No. 178-192 Sullivan street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 16, 1924, reads (Order No. 68873-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, \* \* \*"; and

WHEREAS, the building is non-fireproof, three stories (35 ft.) in height, 199 ft. 10 in. by 161 ft. 10 in. (approximately 31,000 sq. ft.) in area, divided into two sections by a 12 in. brick wall (the maximum section being 16,500 sq. ft. in area) with openings therein protected by fireproof self-closing doors on both sides of the openings; OCCUPIED for the manufacture and storage of wire, 125 persons in entire building; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system; that the building faces on three streets and that there are 15 city fire hydrants within 300 ft. of the premises in question.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, so long as the building shall not be increased in height, area or dimension; that the floor area as now subdivided shall remain unchanged; that an approved sprinkler system shall be maintained; and granted so long as use and occupancy of building shall remain unchanged.

983-25-A.

APPELLANT—H. C. Bainbridge, Jr., for I. C. Bainbridge, et al., owners.

SUBJECT—Appeal from orders of fire commissioner.

## THE RESOLUTION—

(983-25-A)

WHEREAS, H. C. Bainbridge, Jr., for I. C. Bainbridge and Estate of R. W. Bainbridge, owners, filed, September 24, 1925, an appeal from the orders of the fire commissioner, affecting premises No. 2 to 24 Cumberland street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated July 14, 1925, read (Order No. 82609-F):

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at north and west sides of building, or other approved protection, as per Sec. 375, Article 18 Ch. 5, Code of Ordinances."

(Order No. 82610-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof. \* \* \*"

(Order No. 82612-LF):

"2. Provide a fireproof vault with a self-closing fireproof door to same, for the storage of baled waste paper. Sec. 20, Ch. 12, Code of Ordinances."

and

WHEREAS, the premises consist of a plot of ground, irregular in area, upon which is located three non-fireproof buildings, No. 1 and No. 2 being four stories and No. 3 being five stories (57 ft.) in height, interconnected on each story by horizontal openings protected with fireproof sliding doors; the total area of the three buildings being approximately 12,000 sq. ft. on the 1st story and 10,500 sq. ft. in area above; OCCUPIED for the manufacture of paper goods, 113 persons in entire premises; and

WHEREAS, there are on each story above the 1st story 3 windows in the west wall of building No. 3 and 7 windows in the west wall of building No. 2, within 20 ft. of a neighboring building to the west and 8 windows on each story above the 1st story in the north wall of building No. 2, and also 11 windows on each story above the 1st story in the west wall of building No. 1, within 50 ft. of the roof of a one-story frame shed to the west; and

WHEREAS, appellant contends that the buildings are protected by a sprinkler system; that the buildings are subdivided into three sections by walls with openings therein protected by fireproof sliding doors, each section being less than 5,000 sq. ft. (excepting the 1st story of building No. 2), and that the total area of the buildings, which face on two street fronts, is less than 15,000 sq. ft.; that the sprinkler heads are located within 4 ft. of the windows and would act as a water curtain in case of fire, and that all waste paper is removed daily from the factory.

Resolved, that the orders of the fire commissioner be and they hereby are modified, and the appeal, as to Order No. 82609, be and it hereby is granted on condition that the windows in the westerly wall of building No. 3, in the westerly wall and northerly wall of building No. 2 and in the westerly wall of building No. 1 shall be protected; as to Order No. 82610, be and it hereby is granted on con-

dition that an approved sprinkler system shall be maintained; and as to Order No. 82612, be and it hereby is granted on condition that a cross partition of 6 in. terra cotta blocks shall be erected at front of building No. 2, in cellar, any openings therein to be protected with a self-closing fireproof door; that said partition shall run continuously from cellar floor to the underside of the floor of the 1st story; that the ceiling of this enclosure shall be fire retarded in accordance with the rules of the board of standards and appeals; and the appeal is further granted so long as the buildings shall not be increased in height, area and dimension, and that the use and occupancy shall remain substantially unchanged.

1086-25-A.

APPELLANT—P. Cousten, for Bernard Burge, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—102 West 101st street, Manhattan.

## APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Absent .....	0

## THE RESOLUTION—

(1086-25-A)

WHEREAS, P. Cousten, one of the lessees, for Bernard Burge, owner, filed, October 24, 1925, an appeal from the order of the fire commissioner, affecting premises No. 102 West 101st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 23, 1925, reads (Order No. 31365-LC):

"With reference to your application dated October 21, 1925, for a permit to store nitro-cellulose products at the above location, I regret to inform you that I am without power to grant such a permit for the following reasons: Section 232, Subdivision 2, Chapter 10, Code of Ordinances, prohibits the storage of nitro-cellulose products in any building

"2. Which is not equipped with an approved two source system of auto. sprinklers;

"3. Where paints and varnishes are manufactured, stored or kept for sale;

"4. Where matches are stored or kept for sale.

"You are therefore ordered to:

"Remove all nitro-cellulose products from these premises forthwith."

and

WHEREAS, the building is non-fireproof, six stories (80 ft.) in height, 100 ft. by 100 ft. 11 in., nearly 10,000 sq. ft. in area; OCCUPIED for the manufacture of furniture, underwear, fountain pens, perfumes and celluloid articles; about 35 persons on each story; and

WHEREAS, the appellant, who occupies the 6th story for the manufacture of celluloid articles, claims that the building is of fireproof construction; that it is provided with an automatic sprinkler system connected with the national district office by telegraphic alarm, and supplied by a 12,000 gallon gravity tank; that 10,000 pounds of celluloid is stored in a fireproof vault on the roof; that only 100 pounds of celluloid is used in the course of work; that the only paint, varnish and matches kept on the premises is that which is sold retail by the Woolworth store on the first story, and for which a permit has been issued by the fire department.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

THE RESOLUTION—  
(1089-25-A)

WHEREAS, Kenneth B. Norton, for Leah L. P. Norton, owner, filed, October 26, 1925, an appeal from the order of the fire commissioner, affecting premises No. 16 West 45th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 28, 1925, reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at west side of building, or other approved protection, as per Section 375, Article 18, Chapter 5, Code of Ordinances."

and  
WHEREAS, the building is non-fireproof, seven stories in height, 21 ft. by 100 ft. 5 in. in area. OCCUPIED: 1st story, store; 2nd story, jeweler's tools and supplies, 8 persons; 3rd story, uniforms, 2 persons; 4th story, advertising, 6 persons; 5th story, vacant; 6th story, washing dresses, 10 persons; 7th story, manufacturing embroidery, 10 persons; and

WHEREAS, the appellant claims there are 18 windows on the west side of the building affected by fire department Order No. 81872-F; that a similar order was waived July 1, 1919, by the board of review and dismissed September 20, 1920.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, ratifying the action of the board of review of the fire department, dated July 1, 1919, *on condition* that the stipulations in said action shall be complied with and that the conditions remain substantially unchanged.

1105-25-A.  
APPELLANT—Estate of Ogden Goelet, owner.  
SUBJECT—Appeal from orders of fire commissioner.  
PREMISES AFFECTED—894-900 Broadway, Manhattan.

For Appellant: T. S. Holmes.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—  
Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Absent ..... 0

THE RESOLUTION—  
(1105-25-A)

WHEREAS, Estate of Ogden Goelet, owner, filed, Janu-

ary 12, 1926, an appeal from the orders of the fire commissioner, affecting premises No. 894-900 Broadway, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated October 5, 1925, and September 23, 1925, respectively, read: (Order No. 85718-F):

"1. Provide a tank on roof of at least 3,500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will be not less than 20 feet above the roof level."

(Order No. 85715-LF):

"2. Lower standpipe outlets on all stories to not more than 6 ft. above floor. Sec. 20, Ch. 12, Code of Ordinances and rules of the Board of Standards and Appeals."

and  
WHEREAS, the building is fireproof, 10 stories (130 ft.) in height, 95 ft. by 112 ft. (10,600 sq. ft.) in area; OCCUPIED as a tenant factory, approximately 36 persons per story; and

WHEREAS, appellant contends that the building is protected by a sprinkler system having a 9,000 gallon pressure tank and a 12,000 gallon gravity tank supply and with central office connection; that there is installed a 4 in. standpipe system; the storage supply for the standpipe being 2,500 gallons in the house tank, the bottom of said tank being located approximately 6 ft. above the roof level; that there are sprinkler and also standpipe siameses on both street fronts. And in re: the order relating to height of the outlets from the floor, contends that the outlets, as installed, vary from 6 ft. 3 in. to 6 ft. 9 in. above the floor and are readily accessible to the average man.

Resolved, that the orders of the fire commissioner be and they hereby are *affirmed*, and the appeal be and it hereby is *denied*.

1158-25-A.  
APPELLANT—Buchman & Kahn, for S. Karpen & Bros., Inc., owner.

Negative: Chairman Walsh, Commissioners Connell and Holland and Chief Kenlon .. 4  
Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION—  
(1158-25-A)

WHEREAS, Buchman & Kahn, for S. Karpen & Bros., Inc., owner, filed, November 10, 1925, an appeal from the decision of the fire commissioner, affecting premises on the south side of Jackson avenue between Hulst street and Harold avenue, L. I. City, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated October 21, 1925, reads (Alt. Applic. No. 1017-25):

"DISAPPROVED October 21st, 1925, with the following objections:

"4. The standpipe system must be entirely separated from the sprinkler system supplied from a tank of at least 3,500 gallons."

and  
WHEREAS, the building is fireproof, five stories (83 ft. 3 in.) in height, 467 ft. 10¼ in. by 72 ft. 9¼ in. and 135 ft. irregular in depth, about 45,000 sq. ft. floor area; OCCUPIED for the manufacture of furniture, about 115 persons on each story; and

# MINUTES

WHEREAS, the appellant proposes to erect an extension to the existing building, to extend the present standpipe equipment to cover the additional area, and has filed plans and application with the bureau of fire prevention for such changes; and

WHEREAS, the appellant claims the building is provided with a standpipe system and also an automatic sprinkler system, supplied by a 40,000 gallon gravity tank; the upper 10,000 gallons of the tank is connected with the standpipes, the lower 30,000 gallons connected with the sprinkler system; that there is a pump in the cellar with a capacity of 750 gallons per minute, which is connected to the city water main by an 8 in. pipe.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1202-25-A.

APPELLANT—D. C. Raymond, for DeForest Phonofilm Corp., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—315-319 East 47th street, Manhattan.

APPEARANCES—

For Appellant: B. F. Waddell.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell and Holland and Chief Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Guilfoyle..... 1

THE RESOLUTION—

(1202-25-A)

WHEREAS, D. C. Raymond, for De Forest Phonofilm Corporation, owner, filed, November 20, 1925, an appeal from a decision of the fire commissioner, affecting premises 315-319 East 47th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered November 14, 1925, reads (N. B. Applic. No. 2454-25):

"3. An approved two (2) source pressure and gravity sprinkler system is required.

"4. Storage of inflammable motion picture film cannot be permitted in building within 50 ft. of a church.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 72 ft. 3 in. on East 48th street, 72 ft. 3 in. on East 47th street and a depth of 200 ft. 5 in., upon which is located the plant of the De Forest Phonofilm Corporation, consisting of a two-story brick studio building, a two-story and basement brick building used for storage, carpenter shop and studio; a one-story brick machine shop and a one-story brick building, 40 ft. by 9 ft. in area, used for a film vault (a maximum quantity of 30,000 ft. of film stored) and a film printing and examining room, 30 persons in entire premises, 4 persons being engaged in the manufacture of phonofilms; and

WHEREAS, it appears that the areaway, which is a means of egress from the premises, is used also as a means of egress from the church basement; and

WHEREAS, appellant proposes to install (only in the building occupied as film vault, printing and examining room) a sprinkler system with the source of supply direct from the city water mains on both the 47th street and 48th street sides of the property; that the hydrostatic pressure in these mains is 49 pounds per square inch and both mains are fed two ways (this statement being substantiated by a

filed letter from the department of water supply, gas and electricity), and in regard to the proximity of the church, appellant contends that the film vault building, wherein the film is stored, is more than 50 ft. from the church in question, and that the building is separated from all other structures by 12 in. fire walls and an open areaway.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, as to Item 3, on condition that a sprinkler system, with 4 in. street connection to city main, shall be provided; as to Item 4, on condition that the films maintained on the premises shall be stored in a fireproof vault, located as indicated on plans filed in this appeal, and limited in size and area to the dimensions as indicated on said plans.

## BUILDING ZONE CASES.

## THE RESOLUTION—

(1164-25-BZ)

WHEREAS, Logan Billingsley, for Jerome Avenue Exhibition Company, owner, filed, November 12, 1925, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a theatre building; premises west side of Jerome avenue, 144 ft. north of 176th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district; that East 167th street is in a residence district, and that Davidson avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 21, 1925, reads:

"1—Erection of proposed theatre in business district and extending into residence district is contrary to provisions of Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 135 ft. and a depth of 90 ft., with a one-story extension; to be occupied as a theatre; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7-c of the building zone resolution and also that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the use and occupancy of the proposed structure shall be restricted exclusively to the conduct and operation of a motion picture theatre, with no dressing rooms, stage or scenery; that the layout, as indicated in amended plans filed in this case February 16, 1926, shall be substantially carried out; that a rear court of not less than 24 ft. in depth, for the entire width of the property, and two 11 ft. side courts, with a court-way of not less than 25 ft. in width, clear and unobstructed, as means of exit from the southerly side court to the highway of 176th street, shall be maintained; that the remainder of the property in this same ownership shall be restricted to conforming use, occupancy and development; that a return of the finished drawings and layout, in accordance with the conditions of this resolution, shall be submitted to this board for approval, before submitting same to the superintendent of buildings; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1291-25-BZ.

APPLICANT—Schwartz & Gross, for 22 East 76th street, Inc., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a 1½ times height district the erection and maintenance of a building to a height exceeding the limit required by the building zone resolution.

PREMISES AFFECTED—20-28 East 76th street, Manhattan.

## APPEARANCES—

For Applicant: Albert A. Tearle and Arthur Gross.

For Opposition: Martin Taylor, William D. Gaillard, Joseph Vardus, J. R. Margelies and William B. Fugurt.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Negative .....	0
Absent .....	0

## THE RESOLUTION—

(1291-25-BZ)

WHEREAS, Schwartz & Gross, for 22 East 76th Street Inc., owner, filed, December 14, 1925, an application, under the building zone resolution, to permit in a 1½ times height district the erection and maintenance of a building to a height exceeding the limit required by the zone resolution; premises 20-28 East 76th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 75th street and East 76th street are in both residence and 1½ times height districts, and that Madison avenue is in a business and 1½ times height district; and

WHEREAS, the decision of the superintendent of buildings rendered December 8, 1925, reads:

"2. The front walls must not exceed the limits of height prescribed by Section 8 of the Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 15 stories in height, with a frontage of 98 ft. 1½ in. and a depth of 102 ft. 2 in.; to be occupied on 1st floor as restaurant and doctors' offices and the remainder of the building as apartments; it is proposed to erect a street wall for the entire frontage to a height of 120 ft. a portion of the street wall 18 ft. 1½ in. long being limited to 90 ft. in height; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects a triangular gore at the upper frontage of the street elevation, *on condition* that the building shall not exceed a height on the street front of 120 ft., and that the requirements of the building zone resolution otherwise shall be complied with in all respects; that the occupancy of the structure throughout shall be restricted specifically

Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION—

(1013-25-BZ)

WHEREAS, George F. Rohe, owner, filed, October 2, 1925, an application, under the building zone resolution, to permit the erection and extension, from a business into a residence district, of a proposed basement story of a garage; premises south side of Northern boulevard, 225 ft. east of Gardiner street, Bayside, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Northern boulevard is in a business district, and that 45th road (Mauric avenue) is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 11, 1925, reads:

"The proposed alteration is contrary to the decision of the Board of Appeals (166-20-BZ) rendered on March 30th, 1920.";

and

WHEREAS, the existing one-story garage (granted under Cal. 166-20-BZ) is 50 ft. by 100 ft. in area; it is proposed to construct a basement story under the existing garage and, as the grade of Mauric avenue is lower than Northern boulevard, have the exit and entrance to the proposed basement portion of the garage lead to Mauric avenue; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

1039-25-BZ.

APPLICANT—Gardiner Conroy, for Mosholu Building Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used for stores.

PREMISES AFFECTED—188-96 Audubon avenue, Manhattan.

Holland and Connell ..... 3

Absent: Chief Kenlon ..... 1

THE RESOLUTION—

(1039-25-BZ)

WHEREAS, Gardiner Conroy, for Mosholu Building Corporation, owner, filed, October 9, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used for stores; premises 188-196 Audubon avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, February 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Audubon avenue is in a residence district, and that West 175th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 1, 1925, reads:

"1. The proposed building of store is prohibited in a residential district. Zoning Resolution, Article 2, paragraph 3.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 145 ft. 8 in. and a depth of 25 ft.; to be occupied as stores; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

Adjourned 4 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

### THE RESOLUTION—

(691-25-S)

WHEREAS, Emery Roth, for Ferro Realty Corp., owner, filed, July 1, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 119-21 West 23rd street, Borough of Manhattan; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated April 7, 1925, reads (No. 75319-LD):

"1. Remove the substandard fire escape on the north and south side of building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, May 9, 1924. Among the defects noted on these fire escapes are the following: "Windows on course not fireproof nor self-closing. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same.";

and  
WHEREAS, the building extends through the block from 23rd street to 24th street, is fireproof, ten stories in height, 50 ft. by 197 ft. 6 in. in area. OCCUPIED: Manufacturing furs, dresses and embroidery; 329 persons above the 1st story; EQUIPPED with a sprinkler system and a stand-pipe system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; two substandard fire escapes, one on each street front of the building, having non-fireproof openings along the course thereof, extending from top story to 2nd story, and drop ladder to sidewalk; and

WHEREAS, the petitioner contends that the two substandard fire escapes are structurally strong and located on the front of the building in each case; that the expense would be very large to provide fireproof windows; that there is no hazardous occupancy.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that there shall be not less than two (2) interior primary means of exit maintained, and that the fire escapes shall be maintained structurally safe in accordance with the substandard fire escape rules; that the building shall be equipped throughout with a standard two source sprinkler system, and that the sprinkler heads shall in no instance be more than 3 ft. from the openings; *granted* so long as conditions as to occupancy and use remain unchanged.

833-25-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Estate of Kate C. Clark, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—226 East 144th street, The Bronx.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(833-25-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Estate of Kate C. Clark, owner, filed, August 13, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 226 East 144th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated February 20, 1925 (Order No. 72411-LD), reads:

"1. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of

the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. See Note.

"NOTE: Among the defects noted on this fire escape are the following: Windows on course on 1st story not fireproof nor self-closing. No safe passageway to street from the termination. No stairway from lowest balcony to ground.

"2. Remove the substandard fire escape on the front of building or reconstruct same as per Section 274 of the Labor Law and Rule 3A as amended by the Board of Standards and Appeals May 9th, 1924. Among the defects noted on this fire escape are the following:

"Windows on course not fireproof nor self-closing. No 60 degree stairways connecting balconies. No stairway at least 22 in. in width from lowest balcony to ground or drop ladder in guides.

"3. Enclose the interior stairway at east side of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the cellar to the underside of the roof boarding, that portion of the underside of the roof beams within the stair enclosure shall be covered with fire resisting material constructed as per Section 271 of the Labor Law and Rule 1 of the Board of Standards and Appeals revised and adopted July 29th, 1924, or carry out a proper alternative method of complying with Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories in height, 50 ft. by 93 ft. in area. OCCUPIED: Manufacturing metal cabinets, 25 persons on each story; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in match board partitions with wooden doors at openings; a double rung ladder from top story loft, at front, to roof scuttle; a substandard fire escape on the front of the building; also a fire escape on the rear of the building having fireproof openings along the course thereof, extending from main roof to the roof of basement extension; with EGRESS from the termination of the fire escape over roof of basement extension to door in adjoining building at south, thence direct to Canal place; ROOFS of adjoining buildings 2 stories lower at east, 5 stories lower at south; and

WHEREAS, the petitioner contends, re: Item 1, that the egress from termination of rear fire escapes to street is on the same level with street and is adequate; that the said fire escapes otherwise will conform with the labor law; re: Item 2, the petitioner proposes to reconstruct front fire escapes in full conformity with the labor law; he contends that the building will then be provided with two adequate fire escapes, and requests to be relieved of complying with Item 3.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item No. 1, only so far as it affects the egress from the termination, *on condition* that the ceiling of the extension at grade level, on which the fire escape terminates, shall be fire retarded throughout; that an iron platform runway shall be installed from the termination of the fire escape direct to the Canal place front, same to be not less than 3 ft. in width; and *granted*, as to Item 3, *on condition* stairway enclosed in fire retarding material in accordance with rules of board; *denied*, as to Item No. 2.

THE RESOLUTION:

(992-25-S)

WHEREAS, William F. Doyle, for Frank Borm, owner, filed, September 28, 1925, a petition for variation from the requirements of the labor law, as cited in the orders of the fire commissioner, affecting premises No. 14-20 Centre street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated May 8, 1925, read (Order No. 76812-LD):

"1. Provide an additional means of exit from each story remote from interior stairway as per Rules 3 and 4, Board of Standards and Appeals, adopted July 29th, 1924."

(Order No. 77553-LD):

"Inspection shows the following to be necessary to make the above premises comply with the requirements of the Labor Law:

"1. Arrange iron bars on windows on 1st and 2nd stories, so as to be readily removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress as per Section 272 of the Labor Law."

and

WHEREAS, the building, separated into two sections by a fore and aft 12 in. brick wall, with openings on each story, protected by fire doors; the warehouse portion of the easterly section being fireproof, and the remainder of the building is non-fireproof, two stories in height, 75 ft. by 100 ft. in area at 1st story and 75 ft. by 75 ft. in area above; OCCUPIED for the storage and bottling of bay rum products, 1st story, 13 persons; 2nd story, 5 persons. EXITS: One interior fireproof stairway extending from the 1st to 2nd story, enclosed in fireproof partitions with kalameined doors at openings; and

WHEREAS, all windows on the 1st and 2nd stories of the building are covered with fixed iron bars; and

WHEREAS, petitioner contends, in view of the light occupancy, that the existing means of egress are adequate, and contends, further, that the building, on account of the nature of the products, is under Government supervision, and that the bars are a necessary protection.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item No. 1, Order No. 76812-LD, on condition that a horizontal opening, equipped with self-closing fireproof doors, shall be provided in the dividing wall at the rear or southerly end of 1st story; that a portable iron ladder be maintained on roof of 1st story extension with hooks sufficient to spread the parapet wall, and of sufficient length to reach the alleyway at the west; granted, as to Item No. 1, Order No. 77553, on condition that horizontal exit shall be provided at the 1st story, and granted only so long as conditions as to occupancy and use and size of the building shall remain unchanged.

1095-25-S.

Negative .....	0
Absent .....	0

THE RESOLUTION:

(1095-25-S)

WHEREAS, Edward P. Doyle, for Central Union Trust Company, owner, filed, October 26, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 142 West 23rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 21, 1925 (Order No. 78105-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at the rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an area having communication with the street, as per Section 273 of the Labor Law."

and

WHEREAS, the building is non-fireproof, four stories and basement in height, 25 ft. by 50 ft. in area. OCCUPIED: Basement, stores; 1st story, vacant; 2nd story, dressmaking, 6 persons; 3rd story, furrier, 8 persons; 4th story, furrier, 4 persons. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in non-fireproof partitions with wooden doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the 1st story balcony, with stationary 45 degree stair leading to yard level; with EGRESS from the termination of the fire escape by means of gate in fence to a joining yard at west; and

WHEREAS, the petitioner contends that the occupancy is small; that the means of egress by gate in fence to a joining premises at west is adequate; that the two premises are under the same ownership; and he refers to Calendar No. 165-23-S, affecting premises adjoining at west, in which the board accepted the same gate in fence as satisfactory egress from these premises to the yard of premises under this petition.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects egress from termination of fire escapes on the rear, on condition that egress shall be provided from the termination of fire escapes on rear through an opening in fence to yard of 144 West 23rd street, granted, so long as the requirements of the labor law shall be complied with in all other respects; and so long as building properties shall remain in single ownership, and the occupancy shall not exceed 25 persons above 1st story.

## THE RESOLUTION:

(1103-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for 14-16 E. 38th St. Holding Corp., owner, filed, October 27, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises 14-16 East 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 19, 1925, reads (Order No. 85470-LD):

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law."

and

WHEREAS, the building is fireproof, 14 stories in height, 50 ft. by 98 ft. in area at 1st story and 50 ft. by 88 ft. in area above; OCCUPIED as a tenant factory, 392 persons above the 1st story, petitioner occupying the 3rd story for the manufacture of artificial flowers, 25 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways extending from the 1st story to roof; enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, petitioner, who is tenant of the 3rd story, has erected partitions of "sheet rock" on wood studs, some 6 ft. 6 in. high and others topped with glass to ceiling; and

WHEREAS, petitioner contends that the partitions do not interfere with the operation of the sprinkler system and that the greater portion of the loft is open and unobstructed.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

## THE RESOLUTION:

(1108-25-S)

WHEREAS, F. P. Keniston, for Max E. Lobley, owner, filed, October 28, 1925, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 160-162 Berry street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 17, 1925 (Order No. 75713-LD), reads:

"1. Provide an additional means of exit from the 2nd story remote from the present interior stairway, as per Rule 3 of the Rules of the Board of Standards and Appeals."

and

WHEREAS, the building is non-fireproof, 2 stories in height, 49 feet 6 inches by 64 feet in area at 1st story and 49 feet 6 inches by 32 feet in area above; OCCUPIED as a machine shop, 20 persons on 1st story and 10 persons on the 2nd story; EXITS: an open interior wooden stairway, extending from the 1st story to 2nd story; ROOFS of adjoining buildings, to north 15 ft. higher; to south, 15 ft. lower; and

WHEREAS, the petitioner proposes to provide a door in the southerly portion of the west wall of the 2nd story, affording egress to the roof of the 1st story extension and at the rear of the extension roof proposes to provide an iron stairs leading to yard; egress from yard by means of gate in south fence of property to adjoining yard, thence, by public hall of tenement to south, to street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that an iron bridge of not less than 3 ft. in width shall be provided across the rear extension, with 45-degree iron stairs from extension roof to yard, with egress therefrom to yard of adjoining premises to the south and rear; that the occupancy of the 2nd story shall be restricted to ten (10) males; and that the premises shall not be increased in height, area or dimension.

1122-25-S.

For Petitioner: William J. Minogue.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon .....	1

## THE RESOLUTION:

(1122-25-S)

WHEREAS, Sugarman & Berger, for 570 Seventh Avenue Corporation, owner, filed, October 29, 1925, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings affecting premises 570-576 Seventh avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered October 27, 1925, reads:

"14. All windows must conform to Section 264 of the Labor Law and Rule 503 of the Industrial Code."

and

WHEREAS, the building is fireproof, 20 stories in height, 72 feet 8 inches by 99 feet 11 inches in area; OCCUPIED: 1st story and mezzanine, stores, 100 persons; 2nd to 20th story, show rooms and offices, 25 per cent manufacturing, 95 persons per story; EQUIPPED with a standpipe and also a sprinkler system; EXITS: two fireproof stairways ex-

# MINUTES

tending from 1st story to roof, enclosed in fireproof partitions with kalameined doors at openings; and

WHEREAS, there are openings in the street walls on the 7th avenue front and also on the 41st street front of the building on the 1st and 2nd stories, glazed with plate glass; the maximum area of the glass on the 1st story being 10,000 square inches, the maximum distance between supports being 11 feet 5 inches by 6 feet 0 inches; the maximum area of the glass on the 2nd story being 6,300 square inches, the maximum distance between supports being 6 feet 0 inches by 7 feet 3 inches; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lowest two stories, and would also affect the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects windows on street front, 1st and 2nd stories, on condition that all openings shall be equipped with approved metal frames and sash, glazed with ¼-inch polished plate glass, and that the labor law requirements shall be complied with in all other respects.

973-25-S.

PETITIONER—William Zinsser & Company, owner.  
SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—513-519 West 58th street, Manhattan.

For Petitioner: Joseph A. Keenan.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(973-25-S)

WHEREAS, William Zinsser & Company, owner, filed, September 19, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 513-515, 517-519 West 58th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 16, 1925, reads:

"1. Arrange the horizontal openings in the division wall between 513 and 515, 517 and 519 near center of building on all stories to be at least 44 inches in width said openings to be protected by fire doors as per Section 267 of the Labor Law, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

"3. Provide an interior stairway at the east side of building at southerly end to serve as a required means of exit extending from first story to the roof, with a safe passageway to the street, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

and

WHEREAS, the premises consist of a plot of ground 100 ft. by 200 ft. in area, upon which is located the plant of William Zinsser & Co., manufacturers of shellacs, consisting of three four-story buildings (the building located at southeast corner of lot being fireproof, the remainder being non-fireproof) and also a 2-story concrete building on the 59th street front. The buildings on the 58th street front being separated by a fore and aft brick wall with openings therein protected with self-closing fireproof doors; on the basement story are two openings, respectively 50 in. and 35½ in. in width; 1st story, 2 openings, respectively 42 in.

and 39½ in. wide; 2nd story, 2 openings, respectively 42 in. and 34½ in. wide; 3rd story, 1 opening, 37½ in. wide, also, on the 4th story, one opening, 37 in. wide, also, connecting iron bridges between No. 513-515 (rear) and the building fronting on 59th street. OCCUPANCY: An approximate total of 38 persons in the buildings Nos. 513-519 West 58th street. EXITS: In Nos. 517-519, an interior non-fireproof open stairway extending from 1st story to roof and in Nos. 513-515 (rear) a non-fireproof open stairway extending from the 1st story to roof. A fire escape on the rear of Nos. 517-519 extending from the roof to yard opening on 59th street; also various horizontal openings and connecting iron bridges inter-connecting the various buildings and

WHEREAS, petitioner contends that there are only 7 persons in No. 513-515 building (wherein the interior stairway has been ordered) and in view of the small occupancy contends that the existing means of exit are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as follows: Item 1, on condition that no opening shall be less than 36 in. in width, protected with self-closing, fireproof door; as Item 3, granted on condition that a fixed open iron bridge shall be provided at the northeast corner at 2nd, 3rd and 4th stories from the rear of No. 513 and No. 515, connecting with premises to the rear; and granted so long as conditions as to occupancy and use shall remain substantially unchanged.

198-25-S.

PETITIONER—Thomas B. Leahy, for the 566-568 Seventh Avenue, Inc., owner.

SUBJECT—Variation of labor law as cited in letter of superintendent of buildings.

PREMISES AFFECTED—566-568 Seventh avenue, Manhattan.

APPEARANCES—

For Petitioner: Thomas B. Leahy.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative: Commissioners Holland and Guilfoyle .....

Negative: Chairman Walsh and Commissioner Connell .....

Absent: Chief Kenlon .....

THE RESOLUTION:

(198-25-S)

WHEREAS, Thomas B. Leahy, for 566-568 Seventh Avenue, Inc., owner, filed, February 18, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law as cited in a letter of the superintendent of buildings, affecting premises 566-568 Seventh avenue, Borough of Manhattan; and

WHEREAS, the letter of the superintendent of buildings dated January 13, 1925, reads:

"Before a Certificate of Occupancy may be issued on the above premises for use as a factory, the following objections must be removed:

"2. A second means of exit in accordance with Section 270, subdivision 3, of the Labor Law; present enclosed exterior stairway does not meet the requirements of the Labor Law.

"3. Interior stairway and elevator shafts must be enclosed in 6-in. terra cotta or 8-in. brick walls, present 2½-in. partitions not in accordance with the requirements of the Labor Law.

"5. All windows in exterior walls must be fireproof self-closing and area of glass must not exceed 70 square inches per light.

"6. Passageway from termination of stairs to building line must be enclosed in fireproof material.

"7. Glass in fireproof doors in stair enclosure not permitted.

"8. Wood partitions must be removed from all floors. Labor Law required that all partitions in the interior

# MINUTES

of a fireproof building shall be built of incombustible material.”;

and

WHEREAS, the building is fireproof, 8 stories and pent house (98 ft. 10 in.) in height, 50 ft. by 100 ft. in area; OCCUPIED as offices, show rooms and tenant factory; the factory occupancy to be limited to 25 per cent of the floor area; the means of egress consisting of an interior stairway extending from the first story to the eighth story, with egress through pent house to roof, enclosed in 2½-in. angle iron, reinforced cinder concrete partitions, covered both sides with gypsum plaster, making a 4-in. partition; with self-closing fireproof doors at openings, glazed with wire glass panels over 720 square inches in area; an exterior iron stairway on the rear of the building, extending from the eighth story to a balcony at the second story level with egress by stairway to an enclosed passageway in building connecting with the first story hallway to street, this hallway being enclosed in 2½-in. angle iron reinforced concrete, gypsum covered, 4-in. partitions, with the exception of a plate glass show window at the extreme front with egress from the first story hall through restaurant and passageway to 40th street, the windows along course of the exterior iron stairs will be made fireproof, self-closing; all front exterior windows in the building are of wood frames glazed with plate glass; the building to be equipped with a wet sprinkler system; and

WHEREAS, the petitioner requests acceptance of the existing stairway and passageway enclosures as being fireproof construction, although not conforming with the requirements of the labor law; the acceptance of the exterior windows other than those opening on the exterior iron stairs, which will be made fireproof, self-closing; the acceptance of the glass panels in doors to the stairway enclosure, and the acceptance of the present means of egress from the termination of the exterior iron stairway to which he proposes to add a connection by bridge to the fire escape on the adjoining premises to the rear (207 West 40th street) and proposes to comply with the requirements of the board as set forth in recent actions of the board on the interior combustible partitions and to provide clear wire glass instead of plate glass in show windows in hallway; and

WHEREAS, petitioner contends that the building is of the soft type of construction, steel column, beams and girders, with reinforced concrete floor arches and with bed rock foundations; the strength of each floor is limited by the steel floor beams and each floor will carry a safe superimposed load of 100 lbs. per square foot; and petitioner proposes to post this loading and to restrict the 25 per cent factory occupancy to the needlework industry.

Resolved, that the decision as cited in letter of the superintendent of buildings be and it hereby is *affirmed* and the petition be and it hereby is *denied*.

THE RESOLUTION:

(103-26-S)

WHEREAS, Horace Trumbauer, for New York Evening Post, owner, filed, February 3, 1926, a petition for variation

from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises No. 71-75 West Street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 31, 1925, reads (N. B. Applic. No. 244-25):

“This amendment is disapproved with the following objection:

“12. All flooring in the building should be of incombustible material—Section 264 of Labor Law.”;

and

WHEREAS, the building is fireproof, 16 stories in height, 133 feet by 180 feet in area. OCCUPIED: For the publication of a newspaper and also for offices, approximately 100 persons per story. EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Three interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, it is proposed to use maple flooring for the 2nd floor and a wood block floor for the press room in the basement of the premises; and

WHEREAS, petitioner contends that the wood flooring does not impair the strength of the floors and requests the use of the wood covering, on the concrete slabs forming the floors, due to the fact that the men employed in the portion of the premises under appeal are obliged to be on their feet all day and they object to working on a cement floor.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the composing room on the 2nd story, and press room in basement, *on condition* that the floor surface shall be finished with 1½-in. heart-faced maple flooring, laid in mastic cement, tight to a Portland cement finished floor, of reinforced concrete arch construction, with no air space or interstices; and that the floor of the press room shall be finished with two-inch edge-grained interlocking blocks, set on edge, laid in mastic cement, set on finished cement concrete floor; and that the labor law requirements shall be complied with in all other respects.

THE RESOLUTION:

(109-26-S)

WHEREAS, Schreiber, Collins, Myers & Buchter, for Rose-Sil Realty Corp., owner, filed, February 5, 1926, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises No. 13 West 36th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated February 1, 1926, reads:

“1. Provide a second means of exit as provided by Section 270 Labor Law.

“2. Windows on street wall are not fireproof and glass panes exceed 720 square inches in area.

“3. All steel should be protected by 2 inches of fireproofing.”;

and

# MINUTES

WHEREAS, the building is fireproof, eight stories in height, 24 ft. by 98 ft. 9 in. in area at 1st story and 24 ft. by 88 ft. 9 in. in area above. OCCUPIED: 1st story and mezzanine, office and store; tenant factory above, 25 per cent manufacturing, 15 persons on each story. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; ROOFS of adjoining buildings same level at east, about 75 ft. higher at west; and

WHEREAS, the petitioner proposes, re: to Item 1, to erect a fire escape on the rear of the building from roof to 2nd story, in accordance with the labor law, with the exception of egress from the termination of the same, which egress is provided by means of extending the 2nd story balcony to the 2nd story balcony on rear of adjoining building at east, the latter balcony is connected by means of a stairway to the outside fireproof stairs on the rear of building adjoining at north, thence down a stairway to 1st story and through a fireproof passageway to 37th street; re: to Item 2, the petitioner claims the front windows on all stories are glazed with  $\frac{1}{4}$  in. plate glass in fireproof frames; the maximum size of glass on 1st story is 9 ft. 4 in. by 8 ft.; on the 2nd story, 4 ft. 6 in. by 9 ft. 4 in., and on all stories above, 5 ft. 8 in. by 4 ft. 4 in.; that the 1st story is not used for factory purposes; re: to Item 3, the petitioner contends that he does not know of any part of the steel construction which is not protected with 2 in. of concrete.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that a standard labor law fire escape shall be erected on rear of building, with egress from the termination at 2nd story to the platform of the 1st story fire escape of building to the north, with egress therefrom through fireproof passageway to 37th street; as to Item 2, on condition that all windows on the front shall be equipped with approved fireproof frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass, and that no light of glass above 3rd story shall exceed 720 sq. in.; granted, as to Item 3, on condition that all steel shall be protected in accordance with Chapter 5 of the code of ordinances; and granted only so long as the factory occupancy shall be limited to light manufacturing, the entire factory occupancy not to exceed 25 per cent of the floor area of the premises.

THE RESOLUTION:

(967-25-S)

WHEREAS, Edward P. Doyle, for Karman Realty Corp., owner, filed, September 18, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 35 Wilbur avenue, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 3, 1925, reads (Order No. 79008-LD):

"1. Provide an additional interior or exterior enclosed fireproof stairway at the north side of the building ex-

tending from the 1st story to 3 ft. above the roof as per Section 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, four stories and basement in height, 24 ft. 10 in. by 100 ft. in area at 1st story and 24 ft. 10 in. by 90 ft. in area above. OCCUPIED: Basement, assembling dies, 5 persons; 1st story, store, 3 persons; 2nd story, manufacturer of dresses, 10 persons; 3rd story, manufacturer of shoes, 15 persons; 4th story, manufacturer of musical instruments, 10 persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with kalameined doors at openings; ROOFS of adjoining buildings to east 40 ft. lower, to west 40 ft. lower; and

WHEREAS, petitioner contends that it would be impracticable to construct an interior stairway on account of the small floor area and the fact that the building has been erected to the rear lot line on the 1st story, and propose to provide a 45 degree standard labor law fire escape on the front of the building.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION:

(433-25-S)

WHEREAS, United States Printing and Lithograph Company, owner, filed, April 21, 1925, a petition, with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 83-101 North 3rd street and 209-219 Wythe avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 1, 1925, reads:

"1. Extend the interior stairway to roof and enclose said stairway with partitions of fire resisting material \* \* \*.

"2. Remove the sub-standard fire escapes on the north and south sides of building No. 2 or reconstruct same as per Section 274 of the Labor Law \* \* \*.

"3. Enclose the interior stairway at the east side of building No. 3 in partitions of fire resisting material \* \* \*.

"4. Remove the party wall balcony between buildings No. 2 and No. 3 or maintain same structurally safe, properly painted and unobstructed \* \* \*";

and

WHEREAS, the premises consist of three buildings of non-fireproof construction; building No. 1 being six stories in height and buildings No. 2 and No. 3, five stories in height with a total area of 126 ft. by 236 ft.; OCCUPIED as printing and lithographing establishment with a total of 143 persons in buildings No. 2 and No. 3 and 140 persons in building No. 1; the means of EGRESS consisting of an interior enclosed fireproof stairway in building No. 1 extending from 1st story to the roof, a non-fireproof stairway at the rear also extending from 1st story to the roof;

# MINUTES

escape on the rear of the building and one on the  
the avenue front; horizontal exits on each story lead-  
to building No. 2; the means of EGRESS in building  
No. 2 consisting of an interior stairway extending from  
1st story to top story with scuttle and ladder to roof, an  
interior iron stairway at rear centre and a party wall fire  
escape at rear and front connecting with building No. 3,  
horizontal exits in each story connecting with buildings No.  
2 and No. 3; the means of EGRESS in building No. 3  
consisting of an interior stairway extending from 1st story  
to roof, a party wall fire escape on the rear and front  
connecting with building No. 2; horizontal exits in each  
story connecting with building No. 2; the building being  
equipped with a two-source sprinkler system and a fire  
alarm signal system; and

WHEREAS, petitioner contends that the means of egress  
are adequate and that building No. 1 was acted upon by  
the board of standards and appeals, Cal. No. 1406-21-S,  
and that there has been an action of the board of review  
by the fire department on these premises; and

WHEREAS, this petition was granted by the board at its  
meeting November 10, 1925, on certain conditions and pe-  
titioner requested a reopening of the case and a modification  
of these conditions.

*Resolved*, that the board of standards and appeals does  
hereby make a variation from the requirements of the labor  
code, and that the petition be and it hereby is granted, as to  
Item 1, on condition that a fixed double-rung ladder shall  
be provided to scuttle in roof; as to Item 2, on condition  
that fire escape shall be maintained structurally safe, and  
that the present frames and sashes of windows on fire  
escapes shall be covered with metal framing; that the ex-  
isting 60 degree connecting stairs shall remain and that a  
counterbalanced drop ladder shall be provided from lowest  
coney to ground; as to Item 3, on condition that the exist-  
ing stairway shall be enclosed with fire retarding material,  
using line of stringers in accordance with the rules of the  
board of standards and appeals, with fireproof self-closing  
doors at the top and bottom of each run; that horizontal exit  
shall be provided and maintained between buildings No. 3 and  
No. 2, equipped with self-closing fireproof door; and that a  
party wall fire escape on front of building shall be main-  
tained standard; denied as to Item 4; and that the appeal  
be granted on condition that entire occupancy of building  
No. 3 shall not exceed 15 persons above 2nd story; and that  
use and occupancy shall remain substantially unchanged—  
single occupancy and ownership.

## APPLIANCES SUBMITTED FOR APPROVAL.

836-25-SA.  
PETITIONER—Walter Pfaendler.  
SUBJECT—Approval of Sword Automatic Oil Burner.  
APPEARANCES—None.  
ACTION OF BOARD—Petition placed on reserve cal-  
endar, subject to inspection by committee of  
the board.

836-25-SA.

PETITIONER—York Rotary Burner, Inc., Abraham  
Greenebaum, president.

SUBJECT—National Rotary Oil Burner, approval of  
APPEARANCES—None.

ACTION OF BOARD—Petition placed on reserve cal-  
endar, subject to inspection by committee of  
the board.

1240-25-SA.

PETITIONER—Crane Company.

SUBJECT—Approval of Crane 2½-inch brass angle  
hose valve.

APPEARANCES—None.

ACTION OF BOARD—Petition placed on reserve cal-  
endar, subject to report and test by fire com-  
missioner.

1133-25-SA.

PETITIONER—The Goulds Manufacturing Company.

SUBJECT—Approval of Goulds Hand Rotary Pump.

APPEARANCES—None.

ACTION OF BOARD—Petition approved.

THE VOTE TO APPROVE—

Affirmative: Chairman Walsh, Commission-  
ers Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(1133-25-SA)

WHEREAS, the Goulds Manufacturing Company filed, No-  
vember 5, 1925, a petition with the board of standards and  
appeals for approval of their device known as the Goulds  
Hand Rotary Pump; and

WHEREAS, the pump is of standard mechanical construc-  
tion, operated by hand power.

*Resolved*, that the board of standards and appeals does  
hereby approve the Goulds Hand Rotary Pump for use with  
Grade "B" fuel oil in fuel oil installations, on condition  
that all moving parts in contact with the oil are of brass  
or bronze.

## RULES

77-25-SR.

PETITIONER—National Automatic Sprinkler Asso-  
ciation.

SUBJECT—Amendment to the Sprinkler Rules.

APPEARANCES—None.

ACTION OF BOARD—Laid over to Friday, March 26,  
1926, at 10 a. m.

Adjourned 7.10 p. m.

WILLIAM J. O'GORMAN, Secretary.

of fire commissioner" in next to last line of resolution.*

missioner, affecting premises 159 Varet street, Borough of  
Brooklyn; and

WHEREAS, the order of the fire commissioner, dated Febru-  
ary 11, 1924, reads (Order No. 54590-F):

"1. Provide iron or kalameined shutters at all open-  
ings in the exterior wall above 1st story which are dis-  
tant in a direct line less than 30 ft. from any opening  
in any other building and not in the same plane with  
said openings and which are not more than 50 ft. above  
a neighboring roof at the east and west sides of build-  
ing, or other approved protection, as per Sec. 375, Arti-  
cle 18, Chapter 5 of the Code of Ordinances."

and

# MINUTES

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 100 ft. in area; OCCUPIED as a tenant factory, about 30 persons on each story; and

WHEREAS, the appellant claims there are 44 windows on the west side and 7 windows on the east side of the building affected by Fire Department Order No. 54590-F; that a similar order was complied with June 19, 1919, in accordance with modifications granted by the board of review; he further proposes to fireproof all windows on the 2nd and 3rd

stories at west side which are affected by the order; and

WHEREAS, the fire department representative reported that the alleged action of the board of review of fire department did not provide reasonable protection in view of the adjoining exposure, namely, moving picture theatre, which is a non-fireproof and non-sprinklered old structure.

*Resolved*, that the appeal be and it hereby is *dismissed* for lack of prosecution.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held December 22, 1925, as they appeared in Bulletin No. 50, Vol. X, are hereby corrected to read as follows:

### THE RESOLUTION:

(743-25-S)

WHEREAS, Deiches, Goldwater & Flynn, for Duplex Motion Picture Industries, Inc., owner, filed, July 14, 1925, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 74-78 Sherman place, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated October 7, 1924, reads (Order No. 65901-LD):

"1. Provide an exterior enclosed fireproof stairway at the east side of building, not less than 44 inches in width extending from 1st story to roof, to serve as a required means of exit, constructed as per Section 266 or carry out a proper alternative method of complying with the Section 271 of the Labor Law."

and

WHEREAS, the building is fireproof, five stories, mezzanine and basement (81 feet) in height, 75 feet 1 1/8 inches by 100 feet in area at 1st story, and 75 feet 1 1/8 inches by 90 feet in area above. OCCUPIED: Basement, de-

*\*Correction—Occupancy in lines 21-22-23 changed to read "with 25 persons per story when fully occupied," word "screened" added in line 47.*

veloping; 1st story, printing; mezzanine, photographing; 2nd story, offices; 3rd story and 4th story, rug cleaning; 5th story, manufacturing machines, with 25 persons per story when fully occupied; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partition with fire doors at openings, and exterior stairs on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 2nd story; with EGRESS from the termination of the fire escape by means of long platform to a stairway and drop ladder to yard of adjoining premises at south; ROOFS of adjoining buildings, 4 stories lower at west; open yard at east; and

WHEREAS, the petitioner claims that the building is fireproof with adequate means of exit facilities; that the exterior stairs on rear of building has its termination in the yard of adjoining premises at south which is under the same control as the owners of the premises in question; in consideration of the small occupancy, he requests the board to accept the existing exits without change.

*Resolved*, that the board of standards and appeals do hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension, and shall be equipped with a two-source sprinkler system; that an approved exterior screened stairway shall be provided on the rear of the building with egress at the termination of the property to the rear in the same ownership, egress therefrom to be maintained open and unobstructed direct to the street to the south.

Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.

# RULES

## FIRE DRILL RULES, ADOPTED OCTOBER 5, 1923.

The following rules, governing Fire Drills, were adopted by the Board of Standards and Appeals at the special meeting held on Friday, October 5, 1923:

### DEFINITION OF "FIRE DRILL."

The method and practice of the systematic and orderly vacating of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest safe means of exit—and the use of fire appliances which shall be provided for the extinguishing or retarding of fire and the safeguarding of human life.

#### Rule 1.

In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to Section 279 and in any other building in which the Fire Commissioner may be directed pursuant to the power conferred in section 775-B of the Greater New York Charter, it shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Fire Commissioner may direct.

For the purpose of conducting such fire drills the owner or tenant shall appoint from among their employees such responsible and dependable persons, male or female, who shall efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter in the blank spaces provided for that purpose in said chart the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

#### Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, enforce and have full charge of the "Fire Drill" in every factory on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc. are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal not being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captains) Foreman's orders are final as to the carrying out of the fire drill on his particular floor.

#### Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. The WATCHMEN shall be the only persons permitted to remain on the floor during the progress of a fire drill and do so at their own risk. For ordinary purposes only one watchman and a substitute shall be designated. In special cases, however, extra watchmen may be assigned with consent in writing from Fire Commissioner.

#### Rule 4. Duties of Searchers.

The MALE and FEMALE SEARCHERS shall search all toilets, dressing rooms and emergency rooms used and frequented by their sex and all other portions of the floor and order all persons, except those authorized to remain, to leave the premises. They are to take care of and assist all persons who may faint or be disabled.

SEARCHERS shall leave the floor immediately after the last squad leaves.

#### Rule 5. Duties of Street Alarm Box Runner.

The STREET ALARM BOX RUNNER shall be familiar with the location of the nearest city fire alarm box and know how it is operated.

In ordinary practice fire drills the STREET-ALARM-BOX-RUNNER shall report to the Foreman for orders and if his services are not required he shall promptly leave out of the premises with the other occupants.

Only when a fire actually occurs on his floor, or when ordered to do so by the Foreman, shall the STREET-ALARM-BOX-RUNNER proceed to the street alarm box and send in the fire alarm.

---

# RULES

---

## Rule 6. Duties of Fire Brigade.

The fire brigade shall have full charge of the operation of all auxiliary fire fighting apparatus and shall endeavor to extinguish, or at least hold in check until the arrival of the fire department, any fire that may occur. When it is necessary for the fire brigade to respond to different floors in the building they shall not use the stairways or fire escapes while the occupants are escaping from the premises.

## Rule 7. Duties of Exit Guards.

The EXIT GUARDS shall station themselves at all exit doors leading to fire escapes, stairways and other means of escape immediately upon the sounding of the alarm. There shall be two guards for each exit, if practicable; one to stand in the hallway holding back the door and the other directly inside on the floor. They are to keep the exit doors open and direct the movements of the persons using these exits and prevent congestion.

EXIT GUARDS shall remain at their stations until all of the occupants of the building have passed their station. Then close their doors and pass out of the building. Upon signal for the occupants to return, EXIT GUARDS shall take their designated stations and remain there until all persons have returned to their respective floors.

## Rule 8. Duties of Squad Monitors.

The SQUAD MONITORS, as soon as the alarm is sounded, shall see that the employees under their charge quickly form into line, two abreast, and numbering not more than thirty to each squad. They shall see that all aisles and passageways are cleared of obstructions.

Note: Chairs, stools, baskets, etc., should be pushed under or placed on top of work benches.

MONITORS shall proceed at the head of their respective squads to the exit assigned, and then march up or down the stairs or to other exits as directed by the EXIT GUARDS.

On reaching the sidewalk MONITORS shall keep their squads in order and lead them a reasonable distance from the building, so as not to cause congestion and interference with fire apparatus. When the proper signal is given they shall return to their respective floors at head of their squads.

MONITORS will at all times see that those under their charge conduct themselves in a respectable and orderly manner.

## Rule 9. Holding of Drills.

FIRE DRILLS shall be held at least once each month at varied hours of the day, and all of the occupants shall participate therein simultaneously. Such drills shall conduct all occupants to a place of safety.

Where dual operation interior fire alarm systems are installed as permitted under Rule 11 of the interior fire alarm

rules of the Board of Standards and Appeals, the fire drill conducted each month shall include all of the persons on the premises engaged at work for a factory, and drills shall be conducted at least twice each year in which all of the persons on the premises shall participate simultaneously.

## Rule 10. Duties of Owner.

It shall be the duty of the OWNER, LESSEE OR TENANT OF THE BUILDING or his authorized agent or their representatives to personally observe that the "Fire Drill" is held simultaneously on every floor of the building and the participation therein of every occupant of such building. Any FIRE DRILL in which all of the occupants do not participate shall not be considered as complying with the LAW, except as otherwise provided in these rules.

The person or persons representing the OWNER, LESSEE OR TENANT who supervises the FIRE DRILL at the building shall submit to an examination by the Bureau of Fire Prevention as to their experience and general fitness for such duties, and shall be so certified in writing by the FIRE COMMISSIONER.

## Rule 11. Duties of Engineer.

It shall be the duty of the ENGINEER, SUPERINTENDENT or other PERSON IN CHARGE of a building having an interior fire alarm system to test such system daily immediately after the beginning of business, and to see that all apparatus operated by springs requiring winding are rewound after each alarm and kept in normal condition for operation.

Whenever it is necessary to test the fire alarm system at any other time of the day, owing to repairs, etc., being made, the PERSON IN CHARGE OF BUILDING will first notify all Foremen of the several floors of the intended test and likewise notify them when the repairs, etc., are completed. This precaution is taken to prevent confusion and excitement, also misunderstanding of the alarm signals.

It shall also be the duty of the PERSON IN CHARGE OF BUILDING to sound the interior alarm system at irregular intervals, but not less than once each calendar month, for the purpose of holding practice fire drills. He shall keep on the premises a record of such drills showing the date when held and the required time for all occupants to reach the street or a point of safety outside the building.

The PERSON IN CHARGE OF BUILDING must immediately acquaint new tenants of the existence of the "Fire Drill" Organization and its purport.

## Rule 12. Registration.

The name and address of every person, corporation or co-partnership, that will, under professional service, carry on the trade, business or calling of establishing, maintaining or supervising the "Fire Drill" shall be registered in the Fire Department, which Department shall, upon evidence of fitness, grant a certificate to that effect.

# RULES

## ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,  
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE  
AUGUST 26, 1918; REVISED MAY 13, 1919.

**Rule 1. Application of Elevator Rules.** Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

**Rule 2. Definitions Relating to Elevators.**

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device used for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the services of an operator thereon.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

(j) The term "power driven elevator" shall apply to any form of elevator except those operated by hand power, gravity in both directions, or through friction grip on the pull rope.

**Rule 3. Permits.** The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

**Rule 4. Alterations.** In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely re-

newed, at the discretion of the superintendent of buildings. Where hand power elevators are changed to power-driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

**Rule 5. Change of Classification.** In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, car enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

**Rule 6. Tests of New Elevators.** In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the upper and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speed exceeding one hundred (100) feet per minute, and hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and safety device and the slack rope device when required and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift loads.

The cars of power-driven elevators having speeds of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At the speed the governor shall be manually operated to test the action of the safety equipment.

**Rule 7. Carrying Capacity.** In existing installations the owner, lessee or other person having charge and control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having suitable letters and figures on same, which shall designate the number of pounds weight which said elevator can safely carry.

Future installations shall be designed to sustain all their parts a load per square foot of platform area inside the car of not less than the following:

- (a) 75 pounds for power-driven passenger elevators
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet
- (c) 50 pounds for hand-power passenger elevators

**Rule 8. Rules to be Posted.** In the car of every passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the op-

# RULES

ation of elevators as he may deem necessary to insure public safety, including the number of passengers that such car may carry at one time.

**Rule 9. Full Automatic Push Button Elevators.** In future installations full automatic push button elevators must be so designed and equipped that the car, at its rated speed and load, will automatically stop when the car floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

**Rule 10. Belt or Chain Drives.** In future installations no hoisting machine driven by a chain or belt device from a motor or countershaft shall be used in connection with any passenger elevator.

**Rule 11. Shaft Openings.** In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the car operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first or main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the car gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls.

No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

**Rule 12. Hoistway Enclosure.** In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six (6) feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure may be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half ( $1\frac{1}{2}$ ) inches; when grille work is used there shall be not more than one and one-half ( $1\frac{1}{2}$ ) inches space between any two members, except that where plain straight bars, not filled in with scroll, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths ( $\frac{3}{8}$ ) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by law or regulation as a shaft enclosure is altered, such

alteration shall be of substantial material and construction, properly braced and carried the full height of openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

**Rule 13. Shaft Doors.** In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors;
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;
- (d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give the required head room, and shall close automatically upon the car leaving the landing in either direction; except further that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 14. Car Gates.** In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 15. Counterweights.** In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the

# RULES

uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof tell-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

**Rule 16. Speed Governors.** All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

**Rule 17. Limit Devices.** In future installations all power-driven elevators shall have approved limit devices as follows:

(a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine and in the shaft or on the car;

(b) for Traction Type Electric Elevators, limit switches in the shaft or on the car;

(c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;

(d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;

(e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;

(f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

**Rule 18. Elevator Brake.** In future installations every electric elevator shall be equipped with an electric or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

**Rule 19. Operating Device.** In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the

operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switches shall be self-centering and self-locking in the inoperative position.

**Rule 20. Reverse Phase Relays.** In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

**Rule 21. Slack Rope Device.** In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or chain attached to the drum becomes slack.

**Rule 22. Car Locking Device.** No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator, unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

**Rule 23. Hand-Power Elevator Safety Devices.** In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

**Rule 24. Escalators.** In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

**Rule 25. Car Construction.** In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible materials. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

**Rule 26. Passenger Car Enclosures.** In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for the car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between any two members; except that where straight bars not filled in with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall be of solid construction or screened with not more than one-half ( $\frac{1}{2}$ ) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six (6) inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the car enclosure.

**Rule 27. Emergency Exit.** In future installations every power-driven passenger elevator car shall have a trap

# RULES

door in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car. In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head or car top construction renders it impracticable to provide such trap door, this requirement may be waived by the superintendent of buildings, if egress, in case of emergency, is possible through shaft openings, or to an adjacent car.

**Rule 28. Freight Car Enclosure.** In existing and future installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head, when this is less than five (5) feet six (6) inches above the car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

**Rule 29. Freight Elevator Cover.** In existing and future installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U. S. gauge wire or its equivalent in strength, and of a mesh that will reject a one and one-half (1½) inch diameter ball. Sections of the cover or grating may be arranged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where car gates are provided) that part of the cover facing the entrances to the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

**Rule 30. Space Between Saddles and Car.** In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch space between the floor of the car and the floor saddles, and where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

**Rule 31. Lights.** In existing and future installations the cars of all elevators shall be properly lighted at all times when in service.

**Rule 32. Guide Rails.** In future installations, guide rails for both car and counterweights of all elevators (except dumbwaiters, and hand-power elevators with a rise of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with wrought or cast iron brackets of such strength and design and so spaced that the guide rails and their fastenings shall be able to safely withstand the application of the safety when stopping a fully loaded car under test. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and joints shall be tongued and grooved or doweled, and rails shall extend to the level of or above the overhead beams and shall be bottomed on a suitable support.

The weights of steel or iron guide rails shall be not less than given in the following table:

WEIGHT OF GUIDE RAILS PER LINEAL FOOT.				
Total Weight of Car and Live Load, or Weight of Counterweight	Weight of Car Guide Rails		Weight of Counterweight Guide Rails	
	With Guide Rail Safeties.	Without Guide Rail Safeties.	With Guide Rail Safeties.	Without Guide Rail Safeties.
0-4000 lbs.....	7½	7½	7½	6½
4001-15000 ".....	14	14	14	7½
15001-40000 ".....	30	30	30	7½

**Rule 33. Ropes.** In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth (1/40) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with hand rope control. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

**Rule 34. Auxiliary Freight Compartments.** In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator cannot be operated until the gate is closed.

**Rule 35. Overhead Gratings.** In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by gratings or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the grating.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

**Rule 36. Elevator Pit.** In every elevator shaft hereafter constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than five feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the car floor framing when the car is at the lowest possible position. In the case of power-driven sidewalk type elevators, the clear space between the bottom of the pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom

(Continued from page 255)

of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent of the area of the pit.

**Rule 37. Overhead Clearance for Cars.** For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

**Rule 38. Overhead Clearance for Counterweights.** In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of the counterweight of not less than two (2) feet for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

**Rule 39. Machinery Room.** All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter erected free and safe access must be provided to all parts of the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installa-

tions in existing buildings, such clearance shall be provided as deemed necessary by the superintendent of buildings, but need not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

**Rule 40. Speed.** The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

**Rule 41. Buffers.** In future installations for all power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights provided that for the cars and counterweights of all elevator having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

**Rule 42. Supporting Beams.** Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

**Rule 43. Determination of Questions.** When an existing installation for either passenger or freight service is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variations are granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

issued under authority of Sec. 718 of the Greater New York Charter as amended by Chap. 503, Laws of 1916, and the  
 Municipal Assembly, Local Law No. 13, of 1925.

PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building,  
Manhattan.

## HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

# CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, *Tuesday, March 9, 1926*, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, March 16, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

## NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, *Chairman.*

257

Minutes of Regular Meeting, March 2, 1926, at  
2 p. m.

## MINUTES

### BOARD OF STANDARDS AND APPEALS

#### REGULAR MEETING.

TUESDAY MORNING, MARCH 2, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon.  
The minutes of the regular meeting of the board, held on Tuesday morning, February 23, 1926, and the minutes of the regular meeting of the board, held on Tuesday afternoon, February 23, 1926, were approved and printed in the Bulletin, No. 9, Vol. XI.

3-25-A.  
APPELLANT—The Frank A. Munsey, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—280 Broadway, Manhattan.  
APPEARANCES—  
For Appellant: None.  
For Administration: Inspector Maher of fire department.  
ACTION OF BOARD—Laid over to March 9, 1926, at 2 p. m.

25-A.  
APPELLANT—Joseph L. Burke, for Standard Oil Company, lessee.  
SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—Southwest corner of Avenue U and East 56th street, Brooklyn.  
APPEARANCES—  
For Appellant: John J. Gilmartin.  
For Administration: Inspector Carroll of fire department.  
ACTION OF BOARD—Laid over to March 23, 1926, at 10 a. m., pending inspection by committee of the board.

25-A.  
APPELLANT—Edward P. Doyle, for Louis Schrag, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—134 West 23rd street, Manhattan.  
APPEARANCES—  
For Appellant: None.  
For Administration: Inspector Maher of fire department.  
ACTION OF BOARD—Laid over to March 9, 1926, at 2 p. m., on written request of appellant.

25-A.  
APPELLANT—Edward P. Doyle, for Emily McGuckin, owner.  
SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—146 West 23rd street, Manhattan.  
APPEARANCES—  
For Appellant: None.  
For Administration: Inspector Maher of fire department.  
ACTION OF BOARD—Laid over to March 9, 1926, at 2 p. m., on written request of appellant.

526-25-A.  
APPELLANT—Edward P. Doyle, for Louis Schrag, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—153 West 21st street, Manhattan.  
APPEARANCES—  
For Appellant: None.  
For Administration: Inspector Maher of fire department.  
ACTION OF BOARD—Laid over to March 9, 1926, at 2 p. m., on written request of appellant.

1222-25-A.  
APPELLANT—Burke & Olsen, for Salvatore Palumbo, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—490 Henry street, Brooklyn.  
APPEARANCES—None.  
ACTION OF BOARD—Appeal withdrawn on written request.  
THE VOTE TO WITHDRAW—  
Affirmative: Chairman Walsh, Commissioners Connell and Guilfoyle and Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Holland..... 1

1224-25-A.  
APPELLANT—Edward P. Doyle, for Abramo Bros., lessees.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—43-47 West 16th street, Manhattan.  
APPEARANCES—None.  
ACTION OF BOARD—Appeal withdrawn on written request.  
THE VOTE TO WITHDRAW—  
Affirmative: Chairman Walsh, Commissioners Connell and Guilfoyle and Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Holland..... 1

# MINUTES

1450-21-A.

APPELLANT—Preferred Utilities Company, for Utility Oil Corporation, owner.

SUBJECT—Application for reopening—appeal from decision of fire commissioner.

PREMISES AFFECTED—Southeast corner of Third and Creek streets, Long Island City, Borough of Queens.

ACTION OF BOARD—Request to reopen and modify denied.

THE VOTE TO REOPEN AND MODIFY—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon..... 1

1159-25-A.

APPELLANT—John J. Gilmartin, for M. Slonea, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—43-47 West 16th street, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(1159-25-A)

WHEREAS, John J. Gilmartin, for M. Slonea, owner, filed, November 10, 1925, an appeal from the order of the fire commissioner, affecting premises No. 43-47 West 16th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 19, 1925, reads (Order No. 31352-LC):

"You are hereby notified that your permit, No. 115540, expiring March 27, 1926, to store and use 99 pounds nitro-cellulose products, becomes null and void on December 15, 1925, for the reason that Section 232-2-1 of Article 19, Chapter 10, Code of Ordinances, of the City of New York, prohibits the storage of nitro-cellulose products in that portion of the building occupied by you.

"You are therefore ordered to remove all nitro-cellulose products by December 15, 1925.";

and

WHEREAS, the building is fireproof, 12 stories in height, 60 ft. by 92 ft. in area at 1st story and 60 ft. by 80 ft. in area above; OCCUPIED as a tenant factory; the appellant occupying the northeast corner of the 3rd story;

and

WHEREAS, the appellant contends that the only work done on celluloid toilet articles is the setting of rhinestones in them and affixing monograms; that the maximum amount of celluloid articles stored on his premises at any one time is 50 pounds; that all appliances, cabinets and tote boxes as called for by the regulations as well as fire buckets and fire extinguishers are provided; that the building is equipped with standpipe, sprinkler and fire alarm systems; that the present occupancy existed since 1923.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1219-25-A.

APPELLANT—Herbert N. Wind, for Byram L. Winters, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—207 East 51st street, Manhattan.

APPEARANCES—

For Appellant: David K. Shappiro and Herbert N. Wind.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(1219-25-A)

WHEREAS, Herbert N. Wind, for Byram L. Winters, owner, filed, November 24, 1925, an appeal from the order of the fire commissioner, affecting premises No. 207 East 51st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 27, 1925, reads (Order No. 28359-C):

"You are hereby notified that your Fire Department Permit No. 105661, issued on June 30, 1924, and expiring on July 5, 1925, is revoked.

"You are, therefore, ordered to discontinue the maintenance of a motor vehicle repair shop at premises 207 East 51st Street and to remove all motor vehicles, the fuel tanks of which are not empty, from premises.

"Reason for this order is, the use and maintenance of the occupancy mentioned above is in violation of Resolution adopted by the Board of Appeals on June 6, 1922, Cal. No. 274-22-A.";

and

WHEREAS, the building is brick and metal on steel frame construction, one story in height, 20 ft. by 100 ft. 6 in area; OCCUPIED as an automobile body repair shop for 10 persons; and

WHEREAS, a prior appeal (Cal. No. 274-22-A) from the order of the fire commissioner to discontinue the maintenance of a motor vehicle repair shop was modified by the board and the appeal was granted by the board on condition that the business be confined to auto body building and repairing and that no gasoline be stored or used on the premises; and

WHEREAS, appellant contends that the work done on the premises is confined to the repairing and building of auto bodies, and contends that no gasoline is used or stored on the premises.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the alleged repair business conducted on the premises shall be confined to auto body building and repairing incidental to the conduct of such business and embracing minor adjustments of the motor; that there shall be no blacksmith work conducted on the premises; that there shall be no motor-driven machinery other than the one-half horsepower portable electric drill; and there shall be no gasoline stored or maintained on the premises.

507-25-A.

APPELLANT—Francis Harold Dike, for Francis Bailey, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—60 Grand street, Manhattan.

APPEARANCES—

For Appellant: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4  
Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(507-25-A)

WHEREAS, Francis Harold Dike, for Francis D. Bailey, owner, filed, May 13, 1925, an appeal from an order of the fire commissioner, affecting premises 60 Grand street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 26, 1925, reads (Order No. 72212-F):

"1. Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the Rules of the Board of Standards and Appeals, adopted January 11th, 1924. \* \* \*";

and

WHEREAS, the building is non-fireproof, seven stories in height, 25 ft. by 90 ft. in area; OCCUPIED as a tenant factory, 24 persons above the 1st story; EQUIPPED with an automatic sprinkler system and a fire alarm signal system; and

WHEREAS, there are distributed on the various stories gas meters of 10 and 20 light capacity, the gas being used for illuminating, heating, solder, heating a pleating machine and some for heating lunches, etc.; and

WHEREAS, appellant contends that the use of gas in the premises is limited; that all the meters are located in similar positions on the various stories and that the valve on the 2 in. gas main (located just inside the street wall of the building) is easily accessible.

*Resolved*, that the order of the fire commissioner be and it hereby is *denied*.

1165-25-A.

APPELLANT—Pearl Art Novelty Co., for Tuscany Realty Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—35 Sixth avenue, Manhattan.

APPEARANCES—

For Appellant: Israel Rothman.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1165-25-A)

WHEREAS, Pearl Art Novelty Co., for Tuscany Realty Corp., owner, filed, November 12, 1925, an appeal from the order of the fire commissioner, affecting premises No. 35 Sixth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 21, 1926, reads (Order No. 31361-LC):

"Remove all nitro-cellulose products from premises by December 15th, 1925, for the reason that Section 232-2-1 of Chapter 10, Article 19, Code of Ordinances of the City of New York, prohibits the storage of nitro-cellulose products in that portion of the building occupied by you.";

and

WHEREAS, the building is fireproof, 12 stories in height, triangular in plan, having frontage of 105 ft. 10½ in. on Sixth avenue and 115 ft. 6½ in. on Cornelia street, about 4,000 sq. ft. floor area; OCCUPIED as a tenant factory, about 200 persons above the 1st story; the appellant occupying the southwest corner of 8th story; and

WHEREAS, the appellant contends that the maximum quantity of celluloid products stored on the premises does not exceed 25 pounds, the quantity in working state does

not exceed 2 pounds; that the work consists of setting rhinestones in celluloid articles; that the present occupancy has existed since 1921.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the stipulations as set forth in resolution under Cal. No. 1405-23-A, granted by this board, shall be complied with and conditions maintained.

508-25-A.

APPELLANT—Francis Harold Dike, for Francis D. Bailey, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—64 Grand street, Manhattan.

APPEARANCES—

For Appellant: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4  
Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(508-25-A)

WHEREAS, Francis Harold Dike, for Francis D. Bailey, owner, filed, May 13, 1925, an appeal from an order of the fire commissioner, affecting premises No. 64 Grand street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 19, 1925, reads (Order No. 72358-F):

"1. Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the Rules of the Board of Standards and Appeals, adopted January 11th, 1924. Such valve to be attached to the gas supply pipes on the inside of the building at a point where said pipes enter the building and before they reach the gas meters, which valve shall shut off the gas automatically when subjected to direct contact with fire, and shall also be connected with a conspicuous and conveniently accessible control box at a place on the exterior of the building, so arranged as to allow the gas supply to be shut off by the officers of the Fire Department immediately, whenever the necessity arises. Section 20a, Chapter 12, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, seven stories in height, 25 ft. by 90 ft. in area; OCCUPIED as a tenant factory, 30 persons above the 1st story; EQUIPPED with an automatic sprinkler system and also a fire alarm signal system; and

WHEREAS, there are distributed on the various stories 10 and 20 light capacity gas meters, the gas being used for illumination, heating glue and also lunches, etc.; and

WHEREAS, appellant contends that the use of gas in the premises is limited; that all the meters are located in a similar position on the various stories and that the valve (located just inside the street wall of the building) on the 2 in. gas main is easily accessible.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

624-25-A.

APPELLANT—Stulman Box & Lumber Co., for 18-20 Wooster Street Realty Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—18-20 Wooster street, Manhattan.

APPEARANCES—

For Appellant: F. C. Kochler.

For Administration: Inspector Maher of fire department.

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

THE RESOLUTION:

(624-25-A)

WHEREAS, Stulman Box & Lumber Co., lessee, filed, June 17, 1925, an appeal from the order of the fire commissioner, affecting premises No. 18-20 Wooster street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 14, 1925, reads (Order No. 76987-F):

"1. Provide a separate and distinct system of automatic sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

and

WHEREAS, the building is non-fireproof, five stories in height, 45 ft. 6 in. by 94 ft. 7 in. in area; separated into two sections by a fore and aft brick wall with openings therein on the 1st and 2nd stories; openings protected by fireproof doors on each side of the wall; OCCUPIED for the storage of wooden boxes; 37 persons in the entire premises; and

WHEREAS, appellant contends that the occupancy of the premises is not of a hazardous nature.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

424-25-A.

APPELLANT—Gustave Erda, for Gleason-Tiebout Glass Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—Northwest corner of Garrison street and Flushing avenue, Maspeth, Borough of Queens.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition in part and denied in part.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(424-25-A)

WHEREAS, Gustave Erda, for Gleason-Tiebout Glass Company, owner, filed, April 20, 1925, an appeal from an order of the fire commissioner, affecting premises northwest corner of Garrison street and Flushing avenue, Maspeth, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 30, 1925 (Order No. 954071-LC), reads:

"1. Discontinue the storage of fuel oil in containers other than metal tanks with all openings or connections through the top. \* \* \*.

"4. Provide a reinforced concrete or masonry cover for fuel oil tank enclosure. \* \* \*.

"5. Provide a manhole in tank enclosure and a fireproof cover properly weighted, immediately above manhole in fuel oil storage tank. \* \* \*.

"7. Fill space between fuel oil storage tanks and the enclosure with dry upland sand or earth well tamped. \* \* \*.

"8. Provide a separate enclosure for each fuel oil storage tank. \* \* \*.

"9. Provide a bracing for flat heads of cylindrical fuel oil storage tank or tanks. \* \* \*.

"10. Discontinue the use of cylindrical fuel oil storage tank which is not constructed of 5/16 in. shell and 3/8 in. heads.

"11. Discontinue the use of rectangular fuel oil tank, the steel plates of which are less than 5/16 in. \* \* \*.

"12. Remove rust proofing material from seams of tank so that proper test can be made. \* \* \*.

"13. Make manhole cover of fuel oil storage tank of cast iron, steel or of same material used in construction of tank. \* \* \*.

"14. Make manhole cover of fuel oil storage tank or tanks gas-tight. \* \* \*.

"15. Provide a manhole on fuel oil storage tank or tanks of not less than 11 in. by 16 in. \* \* \*.

"16. Provide an approved fire extinguishing system for each fuel oil storage tank in excess of 5,000 gallons for inside tanks and in excess of 10,200 gallons for outside tanks. \* \* \*.

"17. Provide an easily accessible control for fuel oil fire extinguishment system. \* \* \*.

"18. Place fuel oil storage tank or tanks in permanent position and make hydrostatic test in the presence of an inspector from the Fire Department. \* \* \*.

"19. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 25 pounds per square inch for all riveted tanks. \* \* \*.

"21. Install fuel oil carrying pipes in such a manner as to drain to the fuel oil storage tank. \* \* \*.

"26. Provide full weight standard piping for all work carrying fuel oil at a pressure of not less than 100 lbs. \* \* \*.

"27. Provide a hydrostatic test of not less than 150 lbs. per square inch for all fuel oil carrying piping of a normal working pressure of less than 100 lbs. \* \* \*.

"28. Provide a non-corrosive automatic pressure relief valve of not less than 1/2 in. by 1/2 in. on each fuel oil heater. \* \* \*.

"29. Remove all hand valves from safety valve lines. \* \* \*.

"30. Connect the discharge from each automatic pressure relief valve or valves into the fuel oil storage tanks or into the suction line free from valves. \* \* \*.

"31. Provide an automatic by-pass valve between each fuel oil pump and first discharge shut-off valve. \* \* \*.

"32. Connect the discharge from each automatic by-pass valve or valves into the suction lines near the pump or into the fuel oil storage tank. \* \* \*.

"41. Discontinue the practice of heating fuel oil storage tanks by means other than by hot water. \* \* \*.

"42. Provide a thermostat to control the heating of the fuel oil in the storage tanks to not more than 140 degrees F. \* \* \*.

"43. Provide a shut-off valve at each fuel oil burner so designed as to close against the supply of oil as to prevent the withdrawal of stems by continued operation of the hand wheel. \* \* \*.

"44. Provide a shut-off valve in the suction line near the supply tank as practicable. \* \* \*.

"45. Provide a vaporproof gauging device for indicating the level of the oil in the fuel oil storage tank. \* \* \*.

"46. Make test well gas-tight and keep same lock when located outside of building. \* \* \*.

"47. Provide fuel oil pump or pumps of a type approved by the Board of Standards and Appeals. \* \* \*.

# MINUTES

"48. Locate the fuel oil pumps not more than 10 ft. below the elevation of the top of tank or tanks. \* \* \*.

"52. Remove all fuel oil from the premises until a permit has been issued by the Fire Commissioner. \* \* \*.

"53. File plans showing the complete installation of fuel oil burning equipment. \* \* \*.

"54. Submit a certificate from the Superintendent of Buildings approving the proposed construction of the tank enclosure and location of the tanks. \* \* \*."

WHEREAS, the premises consists of a large plot of ground containing eight structures designated on plans by numerals, one story in height. No. 1, oil storage; No. 2, cistern; No. 3, producer house; No. 4, furnace house; No. 5, manufacturing house; No. 6, boiler house; No. 7, pot storage house; No. 8, sand storage house; OCCUPIED collectively as a glass smelting works; a fuel oil system has been installed on the premises since 1903 for use in smelting the glass; one rectangular and two cylindrical oil storage tanks of 8,000, 10,000 and 3,700 gallons capacity, respectively, constructed of metal, 1/4 in. thick, except the cylindrical heads, which are 1/2 in. thick, and two oil pumps are installed in the fireproof structure No. 1, 71 ft. by 25 ft. in area; the burner is 6 ft. above the tank, installed in structure No. 4, with necessary connecting pipes between the buildings; and WHEREAS, the appellant contends that the piping installed known to the trade as "standard"; the working pressure of the fuel oil equipment is 40 pounds; that the fuel oil is not heated in the tanks; that one Worthington and one Smith & Vail pump are installed, which are mechanically perfect; that the fuel oil equipment as installed has been successfully operated since its installation in the year 1903.

Resolved, that the order of the fire commissioner be and hereby is *modified*, and the appeal as to Items 1, 4, 5, 7, 9, 10, 11, 12, 15, 18, 19, 21, 26, 27, 45, 47, 52, 53 and 54, and it hereby is *granted on condition* that the existing pumps or other approved pumps shall be maintained; that the items denied by this board shall be rectified and that a plan shall be filed with the fire department as to the existing use and layout; that no further extension of the permit shall be made unless same complies with the fuel oil rules of the board of standards and appeals; and *granted* so long as the use and conduct of this existing fuel oil burning installation shall be restricted to the industrial operation and use of existing glass manufacturing plant, with burners of approved type; and the appeal as to Items 13, 14, 17, 28, 29, 30, 31, 32, 41, 42, 43, 44 and 46, be and it hereby is *denied*.

## BUILDING ZONE CASES.

1101-25-BZ.

APPLICANT—Jenks & Rogers, for Henner Realty Co., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—342-352 Coney Island avenue, Brooklyn.

APPEARANCES—

For Applicant: John H. McCooey, Jr.

For Opposition: Philip Scharf.

ACTION OF BOARD—Laid over to March 9, 1926, at 2 p. m., for inspection and report by a committee of board.

1102-25-BZ.

APPLICANT—McCooey & Conroy, for James Fennimore, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7e of the building

zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—767-793 East New York avenue, Brooklyn.

APPEARANCES—

For Applicant: John H. McCooey, Jr.

For Opposition: Saul Jurkowitz, Andrew S. Derby and others.

ACTION OF BOARD—Laid over to March 23, 1926, at 10 a. m., on consent of both sides.

1101-25-BZ.

APPLICANT—Bernard Stattman, for Bernard and Jacob Stattman, owners.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the proposed alteration and maintenance of a building to be used as a wet wash laundry.

PREMISES AFFECTED—54 Avenue U, Brooklyn.

APPEARANCES—

For Applicant: Bernard Stattman.

For Opposition: N. C. Helman.

Absent ..... 0

THE RESOLUTION:

(903-25-BZ)

WHEREAS, McCooley & Conroy, for N. & H. Building Company, Inc., owner, filed, September 4, 1925, an application, under the building zone resolution, to permit in a business district the change of occupancy of the 2nd story from auto accessories to a garage for the storage of more than five (5) motor vehicles; premises 823-829 Classon avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 2, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Classon avenue is in a business district; that Lincoln place is in a residence district, and that St. Johns place is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 10, 1925, reads:

"Proposition contrary to zone resolution changing occupancy of 2nd floor from auto accessories to public garage for more than five (5) cars.";

and

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 65 ft. and a depth of 100 ft. Occupied: 1st story, garage for the storage of more than five (5) motor vehicles; the building having been erected under variation of the building zone resolution granted by the board under Cal. No. 399-23-BZ, for a one-story structure; and

WHEREAS, the board deemed that the applicant was not entitled to relief under section 7-b of the building zone resolution nor under section 21 of the resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

1213-25-BZ.

APPLICANT—Morris L. Kaufman, for Isidore Resnikoff, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7b and c of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a theatre and store building.

PREMISES AFFECTED—4001-4011 14th avenue, Brooklyn.

APPEARANCES—

For Applicant: Herman E. Horwood.  
For Opposition: None.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative .....  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....  
Absent .....  
THE RESOLUTION:

(1213-25-BZ)

WHEREAS, Morris Kaufman, for Isidore Resnikoff, owner, filed, November 23, 1925, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a theatre and store building; premises 4001-4011 Fourteenth avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 2, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fourteenth avenue is in a business and unrestricted district, and that 40th street and 41st street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings rendered February 24, 1926, reads:

"Proposed theatre as per revised plans, to be located partly in a business district and partly in a residence district is contrary to Art. II, Sect. 3 of Zone Resolution.";

and

WHEREAS, the proposed building is of fireproof construction, two stories in height, with a frontage of 90 ft. and a depth of 120 ft.; to be occupied as a theatre and store building; a portion of the building projecting 20 ft. into the residence district; and

WHEREAS, the board deemed that applicant was not entitled to relief under sections 7-b and 7-c of the building zone resolution, and also that there would not be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the law within the meaning of section 21 of the building zone resolution.

*Resolved*, that the decision of the superintendent of buildings be and the same hereby is *affirmed*, and that the application be and it hereby is *denied*.

1137-25-BZ.

APPLICANT—Deutsch & Schneider, for Alice J. owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the alteration and also the change of occupancy, from a residence to a business use, the basement and 1st story of an existing building occupied as a dwelling.

# MINUTES

PREMISES AFFECTED—53 East 60th street, Manhattan.

## APPEARANCES—

For Applicant: Maurice Deutsch and Alice Jones.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(1137-25-BZ)

WHEREAS, Deutsch & Schneider, architects and engineers, Alice Jones, owner, filed, October 22, 1923, an application, under the building zone resolution, to permit in a residence district the alteration and also the change of occupancy from residence to a business use of the basement and 1st story of an existing building occupied as a dwelling; premises 53 East 60th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 2, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 61st street is in a residence district, and that East 60th street and East 59th street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered October 22, 1925, reads:

"5. Proposed business use is unlawful in a residence district. Art. II of Building Zone Resolution."

WHEREAS, the existing building is of non-fireproof construction, four stories and basement (five stories) in height, with a frontage of 20 ft. and a depth of 100 ft. 5 in.; and occupied as stores and dwellings; and

WHEREAS, there was no objection to granting the application and relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, in view of the existing non-conforming use on premises adjoining and abutting to premises on either side of the appeal.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the front elevation of the existing street wall shall remain unchanged; that it shall not be extended forward to the lot line; that the business use shall be restricted to the lower two stories, and shall be limited to the conduct and operation of retail mercantile stores or shops, such as book store, confectionery or other light industry of inoffensive and inconspicuous character, and the remainder of the building restricted to dwelling use and occupancy; that there shall be no advertising signs displayed on the front of the building, other than flat metal wall signs; that there shall be no manufacturing use conducted on the premises; that all permits necessary for the prosecution of the work shall be obtained within nine months and the alterations completed within twelve months from the date of this action; and that the provisions of the building zone resolution shall be complied with in all other respects.

23-BZ.

APPLICANT—Nicholas Di Gregorio, owner.

SUBJECT—Application for extension of permit (re: decision of superintendent of buildings) to permit in a residence district the maintenance of a garage for the storage of four (4) motor vehicles; three (3) spaces rented to persons not residing on premises.

PREMISES AFFECTED—733-735 East 235th street, The Bronx.

## APPEARANCES—

For Applicant: Nicholas Di Gregorio and Conrad Di Cristina.

For Opposition: None.

ACTION OF BOARD—Extension of permit denied.

## THE VOTE TO EXTEND PERMIT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(729-23-BZ)

WHEREAS, John De Hart, for Nicholas Di Gregorio, owner, filed, June 11, 1923, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of four (4) motor vehicles, three spaces rented to persons not residing on the premises; premises 733-35 East 235th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, December 18, 1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 235th, East 236th streets and Byron avenue are residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 1, 1923, reads:

"Your request of May 29th for a certificate of occupancy for a garage of four motor vehicles, three of which are to be rented out to persons not residing on the premises 733-35 East 235th Street, Bronx, is hereby denied for the reason that the premises are located within a residence district as established by the Building Zone Resolution and the garage will not be used solely as an accessory to the dwelling upon the premises."

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 35 ft. and a depth of 20 ft.; occupied as a garage for the storage of four motor vehicles, three spaces rented to persons not residing on premises; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 82.3 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted by the board at its meeting December 18, 1923, for a temporary period of two years, and Nicholas Di Gregorio requested an extension of time for a further period of two years; and

WHEREAS, it appears that Nicholas Di Gregorio is no longer the owner of the property, Conrad Di Cristina being the owner, having purchased the premises June 9, 1925, subject to the conditions set forth in the resolution of the board.

Resolved, that the application for an extension of the permit be and it hereby is denied.

## AREA FIXED.

(1304-25-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents for the conversion of an existing warehouse and garage to a garage for more than five motor vehicles; premises 2447-2449 Coney Island avenue, Brooklyn.

The following area was approved by the board:

Both sides of Coney Island avenue from Avenue U to Avenue V; also the premises at rear and for a distance of 50 ft. on either side of the side lot lines of the premises in question.

Adjourned 1.30 p. m.

WILLIAM J. O'GORMAN, Secretary.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition dismissed.

#### THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative ..... 0

Absent ..... 0

#### THE RESOLUTION:

(1026-25-S)

WHEREAS, A. L. Reed Co., owner, filed, October 5, 1925, a petition for variation from the requirements of the law, as cited in the order of the fire commissioner, affecting premises No. 120-08-120-10 Jamaica avenue, Richmond Hill, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated November 11, 1925, reads (Order No. 79979-JD):

"1. Arrange iron bars on windows on 1st story, 120th St. side, also in court yard, so as to be removable or removable from both sides in such a manner as to afford the free and unobstructed use of windows for purposes of egress, as per Sec. 272 Labor Law."

and

WHEREAS, the building is non-fireproof, four stories high, 50 ft. by 100 ft. in area; OCCUPIED for the manufacture of leather goods, 30 persons on each story; EQUIPPED with a fire alarm signal system. EXITS: An interior non-fireproof stairway, extending from the 1st story to the roof; iron ladder to roof scuttle, enclosed in brick stone walls with fireproof doors at openings; a fire escape from 1st to 2nd story at front; a fire escape on the side of the building, having a gooseneck ladder extending from top story to the ground level; with exit from the termination of the fire escape by means of a fire escape on Jamaica avenue; and

WHEREAS, the petitioner claims that there are four windows on the west side, four windows on the south side, five windows on the east side at 1st story which are in order to protect against theft; that large and heavy stocks are stored on the premises; that the exits are obstructed; the petitioner refers the board to a similar order which was granted under Cal. No. 805-17-S;

WHEREAS, a similar order was modified under Cal. No. 805-17-S.

Resolved, that the petition be and it hereby is dismissed without prejudice.

984-25-S.

PETITIONER—H. C. Bainbridge, Jr.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

# MINUTES

PREMISES AFFECTED—2-24 Cumberland street, Brooklyn.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

## THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5

Absent ..... 0

## THE RESOLUTION:

(984-25-S)

WHEREAS, H. C. Bainbridge, Jr., for I. C. Bainbridge and Estate of R. W. Bainbridge, owners, filed, September 24, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 2-24 Cumberland street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 14, 1925 (Order No. 82611-LD), reads:

"1. Arrange the doors leading to the stairways on all stories upon which five or more persons are employed, so as to open outwardly without obstructing the stairways, as per Section 271 of the Labor Law."

WHEREAS, the premises consist of three non-fireproof buildings; No. 1 and No. 2 being four stories and No. 3 being five stories in height; buildings being connected on each story by a corridor with stair tower and elevator shafts; Building No. 1 being 92 ft. by 41 ft. in area; Building No. 2 being 70 ft. by 91 ft. in area at 1st story and 53 ft. by 72 ft. in area above; Building No. 3 being 45 ft. by 94 ft. in area; OCCUPIED for the manufacture and storage of paper goods. Building No. 1, 1st story, 6 persons; 2nd story, 3 persons; 3rd story, 4 persons; 4th story, 2 persons. Building No. 2, 1st story, 9 persons; 2nd story, 17 persons; 3rd story, 7 persons; 4th story, 1 person. Building No. 3, 1st story, 2 persons; 2nd story, 5 persons; 3rd story, 37 persons; 4th story, 6 persons; 5th story, 12 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS for the three buildings consist of two interior fireproof stairways, extending from the 1st story to top stories (with iron ladders to bulkheads in roof), enclosed in fireproof partitions with sliding fireproof doors at openings; a fire escape on the southerly side of the building, having fireproof openings along the course thereof, extending from roof to the street; and

WHEREAS, petitioner contends that the openings leading to the stairways and corridors are adequately protected, and that the doors do not obstruct the stairways.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

1024-25-S.

PETITIONER—Samuel Cohen, for Catalino Realty Co., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—336-338 West 25th street, Manhattan.

## APPEARANCES—

For Petitioner: Max Siegel.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell and Holland and Chief  
Kenlon ..... 4

Negative: Commissioner Guilfoyle ..... 1

Absent ..... 0

## THE RESOLUTION:

(1024-25-S)

WHEREAS, Samuel Cohen, for Catalino Realty Co., owner, filed, October 5, 1925, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises No. 336-38 West 25th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated September 22, 1925, reads (Alt. Applic. No. 1124-1925):

"11. A fireproof passageway should be provided from fire escape to street. Section 273 of Labor Law."

WHEREAS, the premises consists of two non-fireproof five-story tenement houses on the front of the lot, and a rear non-fireproof building under consideration in this petition, having a separate entrance from the street through the 1st story of front tenement No. 338 West 25th street, three stories in height, 75 ft. by 22 ft. in area. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in fire-retarded partitions with fireproof doors at openings; an iron ladder to roof scuttle; ROOFS of adjoining buildings 8 ft. below at east; and

WHEREAS, the petitioner has filed plans and applications with the bureau of buildings, proposing to convert the occupancy from a stable to a factory building, located within a business use district, and proposes to construct a fire escape on the front of the building in accordance with the labor law, except as to the proposed egress from the termination of the same, which is through the non-fireproof hallway on 1st story of the front tenement No. 336 West 25th street, leading to the street; and

WHEREAS, the petitioner contends that the proposed egress from termination of proposed front fire escapes is adequate; also that the front and rear buildings are under one ownership.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects passageway from fire escape proposed on building at rear of plot, on condition that the fire escape and exit facilities otherwise required shall comply with the labor law in all other respects and egress from termination of the fire escape in yard shall be maintained through open and approved passage of tenement house on the front of the lot direct to street and through horizontal opening from yard to adjoining structure to the west.

1126-25-S.

PETITIONER—J. C. Penney Building & Realty Corp., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—330 West 34th street, Manhattan.

## APPEARANCES—

For Petitioner: J. F. Miller.

For Administration: None.

ACTION OF BOARD—Petition denied.

## THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5

Absent ..... 0

## THE RESOLUTION:

(1126-25-S)

WHEREAS, J. C. Penney Bldg. & Realty Corp., owner, filed, October 30, 1925, a petition for variation from the requirements of the labor law, as cited in the decisions of the superintendent of buildings, affecting premises 330 West 34th street, Borough of Manhattan; and

WHEREAS, the decisions of the superintendent of buildings, dated November 11, 1925, and September 22, 1925, respectively, read:

# MINUTES

"It is requested that permission be given to use the basement, 1st and 2nd floors of the extension at the west of the building for factory purposes.

"This amendment is disapproved with the following objection:

"44. This building does not comply with Sections 264-270 of the Labor Law."

"It is requested that permission be given to use the central portion and westerly portion of the unassigned space in the basement as a Printing Establishment for the owner's use.

"This amendment is disapproved with the following objection:

"44 This building does not comply with Sections 264 and 270 of the Labor Law.";

and

WHEREAS, the main building is fireproof, 18 stories (with a two-story and basement extension, 61 ft. 5 in. by 197 ft. 6 in. in area at the northwest), 235 ft. by 197 ft. 6 in. in area. OCCUPIED: Basement, storage and also proposed use as printing plant and box repair, 50 persons; 1st story, stores; 2nd to 14th stories, warehouse; 15th to 18th stories, offices, 1,065 persons above the 1st story; it is proposed to use the basement, 1st and 2nd story of the two-story extension as a factory; EQUIPPED with a sprinkler system and a fire alarm signal system. EGRESS: Three interior fireproof stairways extending from the basement to the roof, enclosed in 4 in. hollow tile partitions with tin-clad doors at openings; the means of EGRESS in the two-story section being a fireproof stairway extending from the basement to 1st story, a fireproof stairway extending from the 1st to 2nd story and also, on the 2nd story, a horizontal exit, in the east wall, leading to the stairways in the main building; and

WHEREAS, petitioner contends that the building complies in all other respects with the labor law excepting as to there being 1½ in. instead of 2 in. of fireproof material encasing structural steel; that instead of all windows being fireproof, only the windows on the east side of the building are fireproof, and that the partition around the stairways and fire towers are constructed of 4 in. hollow tile instead of being 6 in. of hollow tile as required by the labor law.

Resolved, that the decision of the superintendent of buildings be and they hereby are affirmed, and the petition be and it hereby is denied.

892-25-S.

PETITIONER—Peerless Roofing & Construction Co., Inc., for Richmond Weed, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—56 West 46th street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(892-25-S)

WHEREAS, Peerless Roofing & Construction Co., for Richmond Weed, owner, filed, September 1, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 56 West 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 18, 1925, reads (Order No. 82991-LD):

"1. Arrange the fire escape at the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted on this fire escape are the following: No stairway at least 22 in. in width placed at an angle of not more than 45 degrees leading from lowest balcony to ground. No safe passageway to street from the termination.";

and

WHEREAS, the building is non-fireproof, five stories in height, 20 ft. 6 in. by 100 ft. 6 in. in area at 1st story and 20 ft. 6 in. by 60 ft. 6 in. in area above. OCCUPIED: 1st story, store; 2nd story, furrier, 4 persons; 3rd story, manufacturing embroidery, 12 persons; 4th story, corsetmaker, 3 persons; 5th story, offices, 5 persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fire-resisting partitions with fireproof doors at openings; an exterior iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the roof of 1st story extension; with no legal means of egress from the termination of the same; ROOFS of adjoining buildings at the same level; and

WHEREAS, the petitioner proposes to provide a 60 degree iron stairway, 22 in. in width, leading from roof of 1st story extension to roof of one-story extension adjoining at south; the petitioner also contends that the State Labor Department accepted the present outside fireproof stairs as a required means of egress in 1916, the same having been erected as a result of an order to provide an additional means of egress and

WHEREAS, this question was approved by the State Department of Labor on February 18, 1916.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects egress from the termination of the fire escape on the rear of the building, on condition that fixed 45 degree stairs shall be provided from the roof of the existing extension to roof of a one-story fireproof extension on the rear of the building, with egress therefrom into 1st story extension through plain glass openings and adjoining roofs to the west; granted only so long as conditions as to use remain unchanged and the occupancy do not exceed capacity of interior stairway.

THE RESOLUTION:

(1142-25-S)

WHEREAS, James W. Byrnes, for Wichert, Inc., owner, filed, November 6, 1925, a petition for variation from requirements of the labor law, as cited in the order of

# MINUTES

the commissioner, affecting premises No. 1708-16 Atlantic Avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 1924, reads (Order No. 60647-LD):

"1. Arrange the fire escape on the south side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. \* \* \*.

"NOTE: Among the defects noted on this fire escape are the following: No stairway from top balcony to roof. Windows on course not fireproof nor self-closing.";

WHEREAS, the building is non-fireproof, three stories in height, 67 ft. by 90 ft. in area. OCCUPIED: Tenant factory, textile work, 75 persons above the 1st story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof; enclosed in fireproof partitions with doors at openings; a fire escape on the rear of the building, having unprotected openings along the course thereof, extending from the top story (with gooseneck ladder to roof) to the 2nd story balcony with counterbalanced stairs to yard; with EGRESS from the termination of the fire escape by means of open yard to street; and

WHEREAS, petitioner proposes to provide fireproof windows along the course of the fire escape, and contends that the existing means of egress will then be adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects stairway from the top story balcony to the escape, on condition that a fixed gooseneck ladder shall be provided from the top story balcony fire escape to roof, and that the fire escape shall comply in all other respects with the requirements of the labor law; and granted only so long as the conditions as to occupancy and use shall remain substantially unchanged.

THE RESOLUTION:

(1035-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Regina Schild, owner, filed, October 9, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 122 West 29th street, Borough of Manhattan;

WHEREAS, the order of the fire commissioner, dated May 1925, reads (Order No. 78104-LD):

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least three feet throughout leading to the street, \* \* \*."

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 98 ft. 6 in. in area at 1st story and 25 ft. by 88 ft. 6 in. in area above. OCCUPIED: 1st story, store; 2nd, 3rd and 4th stories, furriers; 21 persons above the 1st story; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the roof of 1st story extension, with no legal means of egress to the street; ROOFS of adjoining buildings at same level; and

WHEREAS, the petitioner contends that the present means of egress from foot of rear fire escapes is adequate, consisting of an iron stairway leading from roof of 1st story extension down to yard of premises adjoining at south, thence through said adjoining building to street; egress may also be had to roof of the one-story extension adjoining at east on the same level.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects egress from the termination of the fire escape, on condition that a fixed 45 degree iron stairs shall be provided from the roof of the one-story extension to adjoining yard to the west, with egress through openings in brick wall to yards of four adjoining premises to the west; that the fire escape shall comply with the labor law requirements in all respects; and that the occupancy shall be limited to the legal capacity of the interior stairs.

THE RESOLUTION:

(1036-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for George R. Smith, owner, filed, October 9, 1925, a petition for variation from the requirements of the labor law as cited in the order of the fire commissioner, affecting premises No. 131 Liberty street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 18, 1925, reads (Order No. 83004-LD):

"3. Arrange the bridges connecting buildings at west side on all stories so as to conform with the requirements of Section 267 of the Labor Law.

"NOTE: Among the defects noted on these bridges are as follows: Gradient more than 1 foot fall in six. Windows within 30 feet of bridge in connected buildings not encased in metal frames and sash and not provided with wired glass.";

WHEREAS, the building is non-fireproof, seven stories in height, 23 ft. 2 in. by 96 ft. 10 in. in area. OCCUPIED: 1st story, store; 2nd story, stock room, 10 persons; 3rd story, vacant; 4th story, printers, 17 persons; 5th story, manufacture of jewelry, 27 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in fire-re-

THE RESOLUTION:

(1072-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Warman & Cook, Inc., owner, filed, October 20, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 209 East 39th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 24, 1925, reads (Order No. 85741-LD):

"1. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. \* \* \*. Among the defects noted on this fire escape are the following:

"2. Extend the interior stairway at the west side of building to the roof, as per Section 271 of the Labor Law. (See Note).";

and

WHEREAS, the building is non-fireproof, four stories in height, 16 ft. 6 in. by 44 ft. in area. OCCUPIED: 1st story, store, 7 persons; 2nd story, showrooms and factory, 3 persons; 3rd story, manufacture of drapery, 7 persons; 4th story, manufacturer of drapery and finishing fixtures, 7 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story with double rung iron ladder (in closet) leading to scuttle in roof, enclosed in wood lath and plaster partitions with wooden doors at openings; a fire escape on the rear of the building, having fireproof self-closing windows along the course thereof, extending from the roof to the yard; with EGRESS from the termination of the fire escape by means of door in fence opening to yard of premises adjoining to the west; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner contends, in view of the light occupancy of the premises, that the existing means of egress are adequate.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item No. 1, only so far as it affects egress from the termination of the fire escape, on condition that an open, unobstructed doorway shall be maintained from the yard of premises to adjoining yard to the west, with egress through open passageway to street; denied as to Item No. 2.

THE RESOLUTION:

(1179-25-S)

WHEREAS, Samuel Rosenblum, for Morris Simon, owner, filed, November 13, 1925, a petition for variation from the requirements of the labor law, as cited in order of fire commissioner, affecting premises 1459 Third avenue, Manhattan; and

WHEREAS, the order of the fire commissioner, No. 85741-LD, dated September 29, 1925, reads:

"1. Extend the interior stairway at the south side of building to the roof, as per Section 271 of the Labor Law, said extension and the landings and passageway connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 3 ft. above the roof, as per Sec. 271 and 272 of the Labor Law and Rule 2 of Industrial Code (see note)."

"2. Provide safe and unobstructed egress from the lower termination of the fire escape on rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 ft. throughout, leading to the street, adequately lighted at all times during business hours, or by means of providing access to a rear area having communication with the street, as per Section 273 of Labor Law.";

and

WHEREAS, the building is non-fireproof, five stories in height, 20 ft. by 80 ft. in area. OCCUPIED: 1st story, store; 2nd story, manufacture of costumers, 3 persons; 3rd story, manufacture of clothing, 15 persons; 4th story, manufacture of cigars, 15 persons; 5th story, manufacture of balls, 20 persons; EQUIPPED with a fire alarm system. EXITS: An interior fireproof stairway extending from the 1st story to the top story; double rung iron ladder to roof scuttle, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the yard level, with EGRESS from the termination of the fire escape by means of door in fence, 2 ft. 6 in. by 4 ft., leading to yard of No. 209 East 39th street; ROOFS of adjoining buildings 1 story higher at north, 1 ft. 6 in. higher at south; and

WHEREAS, the petitioner claims that the board of standards and appeals has granted the petition for variation of the interior stairs without extension to roof under Item 2557-17-S; that re: to Item 2, the petitioner contends

THE RESOLUTION:

(1196-25-S)

WHEREAS, William F. Doyle, for Rafel Estates, Inc., owner, filed, November 18, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 778-80 Sixth avenue and 69-77 West 44th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered November 5, 1925 (N. B. Applic. No. 283-1925), reads:

"13. Type of fireproof windows should comply with Section 262 of the Labor Law or with windows approved by the Board of Standards and Appeals.";

and  
WHEREAS, the building is fireproof, 20 stories in height, 75 ft. by 125 ft. in area; OCCUPIED as lofts, offices and showrooms; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; ROOFS of adjoining buildings to north 150 ft. lower, to east 200 ft. lower; and

WHEREAS, petitioner proposes to eliminate self-closing devices on all windows excepting on those windows within 50 ft. of adjoining roofs and within 30 ft. of any openings in adjoining buildings.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows, within 30 ft. vertically or 50 ft. horizontally of the adjoining buildings, and on the street front, below the 12th story, inclusive, *on condition* that the requirements of the labor law shall be complied with in all other respects.

1235-25-S.

PETITIONER—Charles A. Platt, for Vincent Astor, owner.

THE RESOLUTION:

(1235-25-S)

WHEREAS, Charles A. Platt, for Vincent Astor, owner, filed, December 2, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 697 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered November 30, 1925 (N. B. Applic. No. 538-1925), reads:

"1. Exits should comply with Sec. 270, Subd. 3 of Labor Law for all floors.";

and  
WHEREAS, an application was filed in the bureau of buildings (N. B. 538-1925) for the construction of a five-story fireproof building, 25 ft. by 100 ft. in area at 1st story and 25 ft. by 88 ft. in area above; and under date of November 24, 1925, an amendment was filed to change the occupancy of the building as follows: Cellar, storage, 5 persons; 1st story, store, 25 persons; 2nd story to 5th story, showrooms, 25 per cent manufacturing, 30 persons per story; the means of EGRESS to consist of an interior fireproof stairway, extending from 1st story to roof, enclosed in 6 in. terra cotta partitions with fireproof self-closing doors at openings; the proposed second means of EXIT to consist of a 24 in. wide exterior screened stairway on the rear of the building from the mezzanine floor to the roof, connected to fireproof building at the rear by bridge at the 3rd story level, building at the rear being under same ownership; it was proposed to have the store entrance door on the 1st story and the door from store to exit hall 3 ft. wide and swinging in; the cellar exits consist, in addition to the fireproof stairway to the 1st story, of an engineer's ladder to the sidewalk; there will be no heating plant in the cellar, heat being obtained from the adjoining premises; and

WHEREAS, petitioner contends that the proposed means of egress would be adequate for the small factory occupancy which is incidental to showroom occupancy, and that it is not proposed to rent the building for manufacturing purposes.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION:

(1272-25-S)

WHEREAS, James P. Whiskeman, for 66 West 47th Street Corporation, owner, filed, December 10, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 66 West 47th street, Borough of Manhattan; and

# MINUTES

WHEREAS, the decision of the superintendent of buildings, rendered November 4, 1925 (N. B. Applic. No. 268-1925), reads:

"13. Proposed stairway between basement and first story should be enclosed in fireproof partitions to comply with Sections 264-70, Par. 7 of Labor Law.";

and

WHEREAS, an application (N. B. Applic. No. 268-1925) was filed in the bureau of buildings for the construction of a fireproof building, 16 stories in height, 118 ft. by 100 ft. 5 in. at 1st story, and 118 ft. by 90 ft. in area above. To be OCCUPIED: Cellar, boiler room and storage; 1st story to 4th story, stores; 5th story to 16th story, showrooms with 25 per cent manufacturing; building to be EQUIPPED with a sprinkler system; means of EGRESS to consist of an interior fireproof stairway extending from 1st story to roof, and a fire tower; and

WHEREAS, an amendment was filed in the bureau of buildings to permit an open stairway from the basement to the 1st story; the building from the basement to the 4th story being used as a salesroom for furniture by one tenant; and

WHEREAS, the petitioner contends that if the building were not used in part for manufacturing on the upper stories, the building code would permit this open stairway, and that all the other stairways comply with the labor law in all respects.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION—

(1181-25-S)

WHEREAS, Samuel Rosenblum, for George W. Welsh, owner, filed, November 13, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 186-88 Franklin street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 8, 1925, reads (Order No. 86020-LD):

"1. Arrange the fire escape at the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. \* \* \*. (See Note.)

"Among the defects noted on this fire escape are the following: No stairway from lowest balcony to ground. No fireproof passageway leading to the street from termination. \* \* \*.

"2. Remove the sub-standard fire escape on the front of the building or reconstruct same to conform with Sec. 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, amended May 9th, 1924:

"Among the defects noted on this fire escape are the following: Windows on course not fireproof nor self-

closing. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same.";

and

WHEREAS, the building is non-fireproof, six stories height, 49 ft. 9 in. by 87 ft. 9 in. in area at 1st story and 49 ft. 9 in. by 73 ft. in area above; OCCUPIED by one tenant for the manufacture of mirrors; 36 persons above the 1st story; EQUIPPED with a fire alarm signal system; EXITS: An interior wooden stairway, extending from the 1st story to roof; enclosed in fire-resisting partitions with fireproof doors at openings; a sub-standard fire escape on the front of the building, having unprotected openings along the course thereof, extending from the top story to the 2nd story balcony, with drop ladder to street; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of a connecting balcony to the fire escape on the building to the rear—No. 64-66 North Moore street; ROOFS of adjoining buildings to west 2 stories higher, to east 1 story lower; and

WHEREAS, petitioner contends that the existing means of egress have been in existence since 1914.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, to Item No. 1, only so far as it affects the egress from the termination of the fire escape, on condition that the lower balcony shall be connected by an iron bridge to the balcony of adjoining fire escape of premises directly to the rear; granted, as to Item No. 2, on condition that the fire escape shall be maintained structurally safe, with not less than 1 degree connecting stairs and counterbalanced drop ladder guides; and granted on further condition that the interior stairs shall be enclosed and maintained in accordance with the requirements of the labor law, and that the number of persons occupying the structure shall not exceed the legal capacity of the stairs.

THE RESOLUTION—

(1185-25-S)

WHEREAS, Samuel Rosenblum, for Adolfrieda Realty Corporation, owner, filed, November 13, 1925, a petition, with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 103 Reade street and 121 Chambers street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 1, 1925, reads:

“Order No. 73901-LD:

“1. Provide an unobstructed passageway around hoistway leading from the foot of the stairway to the street, said passageway to be not less than 3 ft. in width, as per Section 272 of the Labor Law.”;

WHEREAS, the building is non-fireproof, five stories in height, extending through the block from Reade street to Chambers street, 25 ft. 9 in. by 150 ft. 10 in. in area. OCCUPIED: 1st story, restaurant; 2nd, 3rd, 4th and 5th stories, office and manufacture of suit cases; 26 persons above the 1st story. EXITS: Two interior wooden stairways, the southerly one extending from the 1st story to roof, the northerly stairway extending to top story with an ladder to roof scuttle, the southerly stairway is enclosed in fire-retarding partitions with fireproof doors at openings; the northerly stairway is enclosed only at 1st story and 2nd story in wooden partitions, with wooden doors at the openings; a 60 degree fire escape on the Reade street front of the building, having fireproof openings along the course thereof, extending from top story to the sidewalk level; ROOFS of adjoining buildings one story higher at east, same level at east; and

WHEREAS, the petitioner proposes to provide tell-tale chains in a manner as has been prescribed by the board for other cases of a similar nature.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the hoistway opening shall be provided on each story with fixed rails and that the hoistway on the 1st story shall be equipped with tell-tale chains in accordance with the recommendations of the board of appeals, Cal. No. 1680-18-A.

1186-25-S.

PETITIONER—Samuel Rosenblum, for L. S. Briggs, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—41-45 Washington avenue, Brooklyn.

APPEARANCES—

For Petitioner: Samuel Rosenblum and L. S. Briggs.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION—

(1186-25-S)

WHEREAS, Samuel Rosenblum, for L. S. Briggs, owner, filed, November 14, 1925, a petition for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 41-5 Washington avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 14, 1925, reads:

“Order No. 76801-LD:

“1. Provide a second means of exit remote from interior stairway at 1st and 2nd stories, as per Rule 3 of the Board of Standards and Appeals, adopted July 29th, 1924.”;

and

WHEREAS, the building is non-fireproof, two stories in height, 100 ft. by 51 ft. ¾ in. in area. OCCUPIED: 1st story, bank and stores; 2nd story, manufacturing of slippers, 45 persons. EXITS: An interior wooden stairway, extending from the 1st story to 2nd story, enclosed in wood lath and plaster partitions, with wooden doors at openings; ROOFS of adjoining buildings one story lower at east and south; and

WHEREAS, the petitioner proposes to construct an iron balcony from 2nd story window at centre of court, extending over the roof of 1st story extension and leading to roof of one-story building adjoining at east.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a balcony fire escape shall be provided on the Flushing avenue front, embracing the five (5) centre openings, and that a counterbalanced drop ladder in guides shall be provided at both ends of the balcony.

1156-25-S.

PETITIONER—Helena M. Schillinger, Adm. for Estate of J. J. Schillinger, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—401-405 East 91st street, Manhattan.

## THE RESOLUTION—

(862-25-S)

WHEREAS, G. A. & H. Boehm, for No. 124 West 47th Street Company, Inc., owner, filed, August 25, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting prem-

ises 197 and 199-201 Greene street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner read:

Order No. 79453-LD—

"Inspection shows the following to be necessary to make the above premises comply with the requirements of the Labor Law.

"1. Arrange the horizontal balconies at rear of building on the 2nd, 3rd, 4th and 6th stories, so as to conform with the provisions of Section 267 of the Labor Law. Among the defects noted on these balconies are as follows: Kalamein doors with plain glass panels opening on same. Window openings within 30 ft. of open balconies in the connected buildings not encased in metal frames and sashes and provided with wire glass, or provide a second means of exit on the 2nd, 3rd, 4th and 6th stories by constructing horizontal exits having openings not less than 44 in. wide in the division wall between buildings, said openings to be protected by fire doors as per Section 267 of the Labor Law or carry out a proper alternative method of complying with the requirements of the Labor Law, Section 271.

"2. Provide an additional means of exit from the cellar and sub-cellar, said exit to be located at the south side of building remote from existing exit, in accordance with the provisions of Section 271 of the Labor Law.

Order No. 79456-LD—

"Inspection shows the following to be necessary to make the above premises comply with the requirements of the Labor Law.

"1. Provide an additional means of exit from the cellar and sub-cellar, said exit to be located at the north side of building remote from existing exit, in accordance with the provisions of Section 271 of the Labor Law.

"2. Arrange the open horizontal balconies at rear of the building on the 2nd, 3rd, 4th and 6th stories so as to conform to Section 267 of the Labor Law. Among the defects noted on these balconies are as follows:

"Kalamein doors with plain glass panels opening on same. Window openings within 30 ft. of open balconies in the connected buildings not encased in metal frames and sashes and provided with wire glass.

"Provide a second means of exit on the 2nd, 3rd, 4th and 6th stories by constructing horizontal exits having openings not less than 44 in. wide in the division wall between buildings, said openings to be protected by fire doors as per Section 267 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

and

WHEREAS, the premises consist of two non-fireproof buildings, six stories in height, 73 ft. 11 in. by 95 ft. in total area at the 1st story and 73 ft. 11 in. by 87 ft. 6 in. in area above. OCCUPIED: 1st story, stores; 2nd to 6th story, exclusive, manufacturing, 30 persons on each story of each building; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway in each building extending from the 1st story to the roof, enclosed in fireproof partitions with fireproof doors at the openings and an open exterior stairway from cellar to 1st story in each building; a horizontal exit through party wall at 1st story with fireproof sliding door on either side; an open outside party wall balcony at rear of each story above the 1st story;

WHEREAS, this case was acted upon by the board at a meeting held on January 5, 1926, and the board made a variation from the requirements of the labor law and the petition was granted as to Item No. 2 (Order No. 79453) and as to Item No. 1 (Order No. 79456) on condition that a fire-

# MINUTES

al exit would be provided in the subdividing fore and aft at the rear of the cellar and sub-cellar, opening to be pped with self-closing fireproof doors; that the stair- s in the cellars and sub-cellars shall be enclosed in fire- stng material, with self-closing fireproof doors; this pe- n was granted only so long as conditions as to occupancy use otherwise remained unchanged; the petition was de- as to Item No. 1 (Order No. 79453) and Item No. 2 der No. 79456); and reopened by the vote of the board he meeting held on February 16, 1926, and petitioner requests a modification of the conditions in view of the that the exit conditions were accepted by the bureau ildings as complying with the labor law.

esolved, that the board of standards and appeals does by *make a variation* from the requirements of the labor and that the petition be and it hereby is *granted*, as to er No. 79453, Item No. 1, *on condition* that the work as oved by the bureau of buildings under Alteration No. -1916, shall be complied with and so maintained; *granted*, o Item No. 2, *on condition* that a horizontal exit shall provided at the rear in the fore and aft wall of the r and sub-cellar, protected with self-closing fireproof ; *granted*, as to Order No. 79456, Item No. 1, *on condi-* that a horizontal exit shall be provided in the fore and wall of the cellar and sub-cellar, protected with self- ng fireproof door; *granted*, as to Item No. 2, *on con-* that the work as approved by the bureau of buildings r Alteration No. 2805-1916, shall be complied with and tained; and that the occupancy and use shall be re- ted to that permitted and approved by the superintend- of buildings under the said Alt. No. 2805-1916.

IE RESOLUTION—

(1435-24-S)

HEREAS, Joseph E. Marx, for William F. Insloe, owner, December 4, 1924, a petition for variation from the rements of the labor law, as cited in an order of the ommissioner, affecting premises 213 West 33rd street, gh of Manhattan; and

HEREAS, the order of the fire commissioner, dated No- ver 1, 1924, reads:

"1. Extend the interior stairway at the east side of uilding to the roof as per Section 271 of the Labor aw.";

HEREAS, the building is non-fireproof, four stories in e, 20 ft. by 100 ft. in area at the 1st story, 20 ft. by in area at the 2nd story and 20 ft. by 49 ft. in area

OCCUPIED: 1st story, restaurant; 2nd story, rooms and repair of furs, 6 persons; 3rd story, of- 5 persons; 4th story, show rooms and mfg. of em- ry, 6 persons. EXITS: An interior wooden stairway ling from 1st story to top story with iron ladder to e in roof; enclosed in wire lath and cement partitions

with wooden doors at openings; a fire escape on the front of the building extending from the top story to the 2nd story, with counterbalanced stair to street; ROOFS of ad- joining buildings are approximately at the same level; and

WHEREAS, this case was acted upon by the board at the meeting held on March 10, 1925, and the board made a vari- ation from the requirements of the labor law, and the pe- tition was granted on condition that a fixed iron ladder shall be provided from the top story hall to scuttle in roof, and that the fire escape shall be extended to the roof, and that the occupancy shall not exceed six persons on the 2nd story, three persons on the 5th story and eleven persons on the 4th story; and was granted only so long as conditions as to occupancy and use otherwise remained substantially un- changed; and reopened by the vote of the board at the meet- ing held on February 16, 1926; petitioner now requests a modification of the conditions so as to permit an increase in the occupancy, the exit capacity of the building permitting 25 persons above the 1st story.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the la- bor law, and that the petition be and it hereby is *granted on condition* that the occupancy shall not exceed twenty-five (25) persons above the 1st story, and *granted* only so long as conditions as to occupancy and use remain otherwise un- changed.

THE RESOLUTION:

(902-25-S)

WHEREAS, Frank H. Bulley, for May H. Bulley and Lillie H. Cray, owners, filed, September 4, 1925, a peti- tion for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises 355 Adams street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated Au- gust 17, 1925, reads (Order No. 83830-LD):

"1. Enclose the interior stairway at north side of building serving as a required means of exit on all sides with partitions of fire resisting material extending con- tinuously from the floor of the 1st story to the under- side of the floor above, including any exposed stair sof- fits, landings and passageways, openings shall be pro- vided with approved self-closing fire doors, constructed as per Section 271 of the Labor Law and Rule 2 of the Board of Standards and Appeals, revised and adopted July 29th, 1924, or carry out a proper alterna- tive method of complying with Section 271 of the La- bor Law.

"NOTE:—Plans for all structural changes should be filed in the Bureau of Buildings, as required by Chap- ter 503, Laws of 1916.";

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 50 ft. in area. OCCUPIED: 1st story,

# MINUTES

restaurant, 4 persons; 2nd story, art school, 10 persons; 3rd story, vacant; 4th story, pattern shop, 7 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story; enclosed in match board partitions with wooden doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from 2nd story to the top story, a gooseneck ladder to roof and a counterbalanced drop ladder to sidewalk; ROOFS of adjoining buildings 15 ft. lower at north and south; and

WHEREAS, the petitioner contends the exits are adequate; that the school on 2nd story is occupied only between the hours 7.30 and 10 p. m.; and that it is contemplated to demolish the building within 18 months; and

WHEREAS, this petition was granted by the board at its meeting January 19, 1926, on certain conditions, and petitioner requested an amendment to these conditions to permit plaster board and metal for covering of partitions.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the existing enclosure shall be covered on both sides and soffit of stair from 1st to 2nd story with "V" ribbed metal wire lath and cement mortar or 1/2 in. plaster board covered with 26 gauge sheet metal; and granted so long as conditions as to use and occupancy remain unchanged and that the occupancy shall not exceed 25 persons above the 1st story.

RULES

FIRE DRILL RULES, ADOPTED OCTOBER 5, 1923.

The following rules, governing Fire Drills, were adopted by the Board of Standards and Appeals at the special meeting held on Friday, October 5, 1923:

DEFINITION OF "FIRE DRILL."

The method and practice of the systematic and orderly vacating of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest safe means of exit—and the use of fire appliances which shall be provided for the extinguishing or retarding of fire and the safeguarding of human life.

Rule 1.

In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to Section 279 and in any other building in which the Fire Commissioner may be directed pursuant to the power conferred in section 775-B of the Greater New York Charter, it shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Fire Commissioner may direct.

For the purpose of conducting such fire drills the owner or tenant shall appoint from among their employees such responsible and dependable persons, male or female, who shall efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter in the blank spaces provided for that purpose in said chart the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

FIRE DRILL ORGANIZATION.

Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, enforce and have full charge of the "Fire Drill" in every factory on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc. are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal not being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captains) Foreman's orders are final as to the carrying out of the fire drill on his particular floor.

Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. The WATCHMEN shall be the only persons permitted to remain on the floor during the progress of a fire drill and do so at their own risk. For ordinary purposes only one watchman and a substitute shall be designated. In special cases, however, extra watchmen may be assigned by consent in writing from Fire Commissioner.

Rule 4. Duties of Searchers.

The MALE and FEMALE SEARCHERS shall search all toilets, dressing rooms and emergency rooms used and frequented by their sex and all other portions of the floor and order all persons, except those authorized to remain, to leave the premises. They are to take care of and assist all persons who may faint or be disabled.

SEARCHERS shall leave the floor immediately after the last squad leaves.

Rule 5. Duties of Street Alarm Box Runner.

The STREET ALARM BOX RUNNER shall be familiar with the location of the nearest city fire alarm box and know how it is operated.

In ordinary practice fire drills the STREET-ALARM BOX-RUNNER shall report to the Foreman for orders, and if his services are not required he shall promptly file out of the premises with the other occupants.

Only when a fire actually occurs on his floor, or when ordered to do so by the Foreman, shall the STREET ALARM-BOX-RUNNER proceed to the street alarm box and send in the fire alarm.

# RULES

## Rule 6. Duties of Fire Brigade.

The fire brigade shall have full charge of the operation of all auxiliary fire fighting apparatus and shall endeavor to extinguish, or at least hold in check until the arrival of the fire department, any fire that may occur. When it is necessary for the fire brigade to respond to different floors in the building they shall not use the stairways or fire escapes while the occupants are escaping from the premises.

## Rule 7. Duties of Exit Guards.

The EXIT GUARDS shall station themselves at all exit doors leading to fire escapes, stairways and other means of escape immediately upon the sounding of the alarm. There shall be two guards for each exit, if practicable; one to stand in the hallway holding back the door and the other directly inside on the floor. They are to keep the exit doors open and direct the movements of the persons using these exits and prevent congestion.

EXIT GUARDS shall remain at their stations until all the occupants of the building have passed their stations. Then close their doors and pass out of the building. Upon signal for the occupants to return, EXIT GUARDS shall take their designated stations and remain there until all persons have returned to their respective floors.

## Rule 8. Duties of Squad Monitors.

The SQUAD MONITORS, as soon as the alarm is sounded, shall see that the employees under their charge quickly form into line, two abreast, and numbering not more than thirty to each squad. They shall see that all aisles and passageways are cleared of obstructions.

**Note:** Chairs, stools, baskets, etc., should be pushed under or placed on top of work benches.

MONITORS shall proceed at the head of their respective squads to the exit assigned, and then march up or down the stairs or to other exits as directed by the EXIT GUARDS.

On reaching the sidewalk MONITORS shall keep their squads in order and lead them a reasonable distance from the building, so as not to cause congestion and interference with fire apparatus. When the proper signal is given they shall return to their respective floors at head of their squads.

MONITORS will at all times see that those under their charge conduct themselves in a respectable and orderly manner.

## Rule 9. Holding of Drills.

FIRE DRILLS shall be held at least once each month at varied hours of the day, and all of the occupants shall participate therein simultaneously. Such drills shall conduct occupants to a place of safety.

Where dual operation interior fire alarm systems are installed as permitted under Rule 11 of the interior fire alarm

rules of the Board of Standards and Appeals, the fire drill conducted each month shall include all of the persons on the premises engaged at work for a factory, and drills shall be conducted at least twice each year in which all of the persons on the premises shall participate simultaneously.

## Rule 10. Duties of Owner.

It shall be the duty of the OWNER, LESSEE OR TENANT OF THE BUILDING or his authorized agent or their representatives to personally observe that the "Fire Drill" is held simultaneously on every floor of the building and the participation therein of every occupant of such building. Any FIRE DRILL in which all of the occupants do not participate shall not be considered as complying with the LAW, except as otherwise provided in these rules.

The person or persons representing the OWNER, LESSEE OR TENANT who supervises the FIRE DRILL at the building shall submit to an examination by the Bureau of Fire Prevention as to their experience and general fitness for such duties, and shall be so certified in writing by the FIRE COMMISSIONER.

## Rule 11. Duties of Engineer.

It shall be the duty of the ENGINEER, SUPERINTENDENT or other PERSON IN CHARGE of a building having an interior fire alarm system to test such system daily immediately after the beginning of business, and to see that all apparatus operated by springs requiring winding are rewound after each alarm and kept in normal condition for operation.

Whenever it is necessary to test the fire alarm system at any other time of the day, owing to repairs, etc., being made, the PERSON IN CHARGE OF BUILDING will first notify all Foremen of the several floors of the intended test and likewise notify them when the repairs, etc., are completed. This precaution is taken to prevent confusion and excitement, also misunderstanding of the alarm signals.

It shall also be the duty of the PERSON IN CHARGE OF BUILDING to sound the interior alarm system at irregular intervals, but not less than once each calendar month, for the purpose of holding practice fire drills. He shall keep on the premises a record of such drills showing the date when held and the required time for all occupants to reach the street or a point of safety outside the building.

The PERSON IN CHARGE OF BUILDING must immediately acquaint new tenants of the existence of the "Fire Drill" Organization and its purport.

## Rule 12. Registration.

The name and address of every person, corporation or co-partnership, that will, under professional service, carry on the trade, business or calling of establishing, maintaining or supervising the "Fire Drill" shall be registered in the Fire Department, which Department shall, upon evidence of fitness, grant a certificate to that effect.

# NOTICE

## BUILDING CODE ON SALE.

Copies of the Building Code are now on sale at the Distributing Division of the City Record Office, 125 North street. Price, \$1.25; by mail, \$1.35.

## ELECTRICAL CODE ON SALE.

Copies of the Electrical Code are now on sale at the Distributing Division of the City Record Office, 125 North street. Price, 30c; by mail, 35c.

# RULES

## ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,  
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE  
AUGUST 26, 1918; REVISED MAY 13, 1919.

**Rule 1. Application of Elevator Rules.** Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

**Rule 2. Definitions Relating to Elevators.**

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device used for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the services of an operator thereon.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

(j) The term "power driven elevator" shall apply to any form of elevator except those operated by hand power, gravity in both directions, or through friction grip on the pull rope.

**Rule 3. Permits.** The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

**Rule 4. Alterations.** In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely re-

newed, at the discretion of the superintendent of buildings.

Where hand power elevators are changed to power-driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

**Rule 5. Change of Classification.** In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, car enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

**Rule 6. Tests of New Elevators.** In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the upper and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speeds exceeding one hundred (100) feet per minute, and of hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and car safety device and the slack rope device when required, and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift load.

The cars of power-driven elevators having speeds of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At this speed the governor shall be manually operated to test the action of the safety equipment.

**Rule 7. Carrying Capacity.** In existing installations the owner, lessee or other person having charge or control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having suitable letters and figures on same, which shall designate the number of pounds weight which said elevator can safely carry.

Future installations shall be designed to sustain in all their parts a load per square foot of platform area inside the car of not less than the following:

- (a) 75 pounds for power-driven passenger elevators
- (b) 50 pounds for power-driven freight elevator having platform areas not exceeding 100 square feet
- (c) 50 pounds for hand-power passenger elevators.

**Rule 8. Rules to be Posted.** In the car of every passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the operation

# RULES

tion of elevators as he may deem necessary to insure public safety, including the number of passengers that each car may carry at one time.

**Rule 9. Full Automatic Push Button Elevators.** In future installations full automatic push button elevators must be so designed and equipped that the car, at its rated speed and load, will automatically stop when the car floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

**Rule 10. Belt or Chain Drives.** In future installations no hoisting machine driven by a chain or belt drive from a motor or countershaft shall be used in connection with any passenger elevator.

**Rule 11. Shaft Openings.** In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the car operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the car gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls. No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

**Rule 12. Hoistway Enclosure.** In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure shall be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half ( $1\frac{1}{2}$ ) inches; when grille work is used there shall be not more than one and one-half ( $1\frac{1}{2}$ ) inches space between any two members, except that where plain straight bars, not filled in with slats, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths ( $\frac{3}{8}$ ) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by code or regulation as a shaft enclosure is altered, such

alteration shall be of substantial material and construction, properly braced and carried the full height of openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

**Rule 13. Shaft Doors.** In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors;
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;
- (d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give the required head room, and shall close automatically upon the car leaving the landing in either direction; except further that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 14. Car Gates.** In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 15. Counterweights.** In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the

# RULES

uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof tell-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

**Rule 16. Speed Governors.** All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

**Rule 17. Limit Devices.** In future installations all power-driven elevators shall have approved limit devices as follows:

(a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine and in the shaft or on the car;

(b) for Traction Type Electric Elevators, limit switches in the shaft or on the car;

(c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;

(d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;

(e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;

(f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

**Rule 18. Elevator Brake.** In future installations every electric elevator shall be equipped with an electric or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

**Rule 19. Operating Device.** In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the

operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switch shall be self-centering and self-locking in the inoperative position.

**Rule 20. Reverse Phase Relays.** In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

**Rule 21. Slack Rope Device.** In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or chain attached to the drum becomes slack.

**Rule 22. Car Locking Device.** No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

**Rule 23. Hand-Power Elevator Safety Devices.** In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

**Rule 24. Escalators.** In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

**Rule 25. Car Construction.** In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible material. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

**Rule 26. Passenger Car Enclosures.** In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between two members; except that where straight bars not filled with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall be of solid construction or screened with not more than one-half (1/2) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations, it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the enclosure.

**Rule 27. Emergency Exit.** In future installations every power-driven passenger elevator car shall have a top

# RULES

or in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car. In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head car top construction renders it impracticable to provide such trap door, this requirement may be waived by the superintendent of buildings, if egress, in case of emergency, is possible through shaft openings, or to an adjacent car.

**Rule 28. Freight Car Enclosure.** In existing and future installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head, if this is less than five (5) feet six (6) inches above car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

**Rule 29. Freight Elevator Cover.** In existing and future installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U. S. gauge wire or its equivalent in strength, and of a thickness that will reject a one and one-half (1½) inch diameter ball. Sections of the cover or grating may be hinged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where car safeties are provided) that part of the cover facing the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

**Rule 30. Space Between Saddles and Car.** In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch, between the floor of the car and the floor saddles, where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

**Rule 31. Lights.** In existing and future installations cars of all elevators shall be properly lighted at all times when in service.

**Rule 32. Guide Rails.** In future installations, guide rails for both car and counterweights of all elevators except dumbwaiters, and hand-power elevators with a height of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with cast iron brackets of such strength and so spaced that the guide rails and their attachments shall be able to safely withstand the application of the safety when stopping a fully loaded car. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and shall be tongued and grooved or doweled, and shall extend to the level of or above the overhead support. Counterweights of steel or iron guide rails shall be not less than given in the following table:

## WEIGHT OF GUIDE RAILS PER LINEAL FOOT.

Weight of and Live or Weight interweight	Weight of Car Guide Rails		Weight of Counter- weight Guide Rails	
	With Guide Rail Safeties.	Without Guide Rail Safeties.	With Guide Rail Safeties.	Without Guide Rail Safeties.
1000 lbs. ....	7½	7½	7½	6½
1000 " .....	14	14	14	7½
1000 " .....	30	30	30	7½

**Rule 33. Ropes.** In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth (1/40) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with hand rope control. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

**Rule 34. Auxiliary Freight Compartments.** In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator cannot be operated until the gate is closed.

**Rule 35. Overhead Gratings.** In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by gratings or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the grating.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

**Rule 36. Elevator Pit.** In every elevator shaft hereafter constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than five feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the car floor framing when the car is at the lowest possible position. In the case of power-driven sidewalk type elevators, the clear space between the bottom of the pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom

of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent of the area of the pit.

**Rule 37. Overhead Clearance for Cars.** For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

**Rule 38. Overhead Clearance for Counterweights.** In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of the counterweight of not less than two (2) feet for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

**Rule 39. Machinery Room.** All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter erected free and safe access must be provided to all parts of the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installa-

tions in existing buildings, such clearance shall be provided deemed necessary by the superintendent of buildings, but not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

**Rule 40. Speed.** The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

**Rule 41. Buffers.** In future installations for power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights. Provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

**Rule 42. Supporting Beams.** Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

**Rule 43. Determination of Questions.** When an existing installation for either passenger or freight elevator is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to modify their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variation is granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Telephone—Worth 0184.

Office Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, March 9, 1926, at 10 a. m.

Minutes of Regular Meeting, March 9, 1926, at 2 p. m.

Rules.

Notice of Public Hearing.

Progress Report.

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, March 16, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, March 23, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION:  
(858-25-A)  
WHEREAS, George M. Wood, for Jessica D. Harrison, owner, filed, August 24, 1925, an appeal from an order of the

# MINUTES

fire commissioner, affecting premises 147 Wooster street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 29, 1925, No. 78507-F, reads:

"1. Install an automatic dry pipe sprinkler system in cellar and 1st story used for the storage and manufacture of paper boxes, having at least one source of water supply \* \* \*";

and

WHEREAS, the building is non-fireproof, four stories (45 ft.) in height, 25 ft. by 100 ft. in area. OCCUPIED: Basement, 1st, 2nd and 3rd stories, vacant; 4th story, manufacture of suit cases, 5 persons; and

WHEREAS, the appellant claims that the paper box manufacture has been removed from the premises and will not be used for such purpose in the future; also that the occupancy is small.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1027-25-A.

APPELLANT—Guy W. Culgin, for Estate of Henry S. Hoyt, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—40-44 Pine street, Manhattan.

APPEARANCES—

For Appellant: Guy W. Culgin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(1027-25-A)

WHEREAS, Guy W. Culgin, for Estate of Henry S. Hoyt, owner, filed, October 6, 1925, an appeal from the order of the fire commissioner, affecting premises No. 40-44 Pine street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 27, 1925, reads:

"1. Provide approved fireproof windows, with metal or kalameined frames, glazed with wire glass, for all openings in the exterior wall above the first story, which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at north and west sides of building, or other approved protection, as per Section 375, Article 18, Chapter 5 of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, ten stories in height, 79 ft. 1 in. by 61 ft. 1 in. (irregular) in area; OCCUPIED as an office building, 25 persons per story; and

WHEREAS, there are eight windows in the north wall of the premises on each story above the 1st story within 30 ft. of openings in an adjoining building to the north and five windows in the west wall of the premises on each story above the sixth (6th) story within 30 ft. of openings of a neighboring building to the west (Nos. 32-36 Pine street) and also within 50 ft. of the roof of an adjoining building to the west (No. 38 Pine street); and

WHEREAS, appellant contends that the surrounding buildings, constituting the exposures, are office buildings and that there is no manufacturing done therein; and contends further that the windows forming the exposure in the building to the north are fireproof.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1070-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Eugene Higgins, owner

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—611-625 West 43rd street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(1070-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Eugene Higgins, owner, filed, October 20, 1925, an appeal from the order of the fire commissioner, affecting premises No. 611-25 West 43rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 13, 1925, reads:

"1. Install a standpipe system with risers 4 in. diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof \* \* \* placed within main stairway enclosure, \* \* \*";

and

WHEREAS, the building is non-fireproof, three stories (45 ft.) in height, 181 ft. 5 in. by 56 ft. 9 in. (inside dimensions approximately 10,300 sq. ft.) in area; OCCUPIED for magazine printing, 206 persons in entire building; and

WHEREAS, appellant contends that the building is equipped with a two-source sprinkler system; that there is a night and day watchman service maintained and also a National District fire alarm system installed on each story, and contends, further, that the area of the building is only 300 sq. ft. over the legal limit requiring a standpipe system.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be increased in height, area or dimension; that the premises be equipped with an approved sprinkler system; and granted so long as conditions as to occupancy and use remain substantially unchanged.

1116-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Charles W. Strohbeck, Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—309-329 Johnson street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell and Holland and Chief Kenlon .....

Negative: Commissioner Guilfoyle.....

Absent .....

THE RESOLUTION:

(1116-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Charles W. Strohbeck, Inc., owner, filed, October

# MINUTES

29, 1925, an appeal from an order of the fire commissioner, affecting premises 309-29 Johnson street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 3, 1925, reads:

"Order No. 83889-F:

"Provide iron shutters at all windows in the interior wall above 1st story, which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at west side of four-story building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5, of the Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, four stories in height, "L"-shaped in area, having a frontage of 100 ft. on Leo place and a frontage of 100 ft. on Johnson street. OCCUPIED: 1st story, silversmith and also a brush manufacturer, 18 persons; upper stories, shoe manufacturer, 25 persons per story; and

WHEREAS, there are eight (8) windows in the west wall of the building on each story above the 1st story, within 50 ft. of the roof of a neighboring building to the west, and also four (4) of these same windows (the northerly four on each story) are within 30 ft. of openings in an adjoining building to the north; and

WHEREAS, appellant contends that the building in question is equipped with a sprinkler system, supplied by a 10,000 gallon tank, and having siamese connections on both street fronts; that there is a line of sprinkler heads within 51 inches of the windows in question; that the openings forming the exposure in the building adjoining to the north are protected with iron shutters, and that the one-story building forming the exposure to the west is under the same occupancy and ownership as the building in question.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that the appeal be and it hereby is granted so long as conditions as to use and occupancy shall remain unchanged and that the exposure of the abutting structure as now protected shall remain substantially unchanged.

1182-25-A.

APPELLANT—J. Schneider, Sr., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—147 12th avenue, L. I. City, Borough of Queens.

APPEARANCES—

For Appellant: John Schneider.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(1182-25-A)

WHEREAS, J. Schneider, Sr., owner, filed, November 13, 1925, an appeal from a decision of the fire commissioner, affecting premises 147 Twelfth avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the superintendent of buildings, rendered November 5, 1925 (Alt. Applic. No. 2437-1925), reads:

"1. Burner must be of a type approved by Board of Standards and Appeals. Examination continued when additional information is received.";

and

WHEREAS, the building is of frame and glass sash construction, one story in height, 100 ft. by 100 ft. in area;

OCCUPIED as a greenhouse; the appellant having installed an oil burning system, consisting of a 2,000 gallon storage tank, all necessary piping and valves in accordance with the fuel oil rules, except as to the burners; and

WHEREAS, the appellant has submitted plans to the fire department, which were disapproved; and

WHEREAS, the appellant claims that he is using four burners, known as the "Strong, Carlisle & Hammond Burner," which is now before the board for its consideration under Calendar No. 1046-23-S; the appellant requests a temporary permit to operate the fuel oil system, pending the approval of the burner.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, for a temporary period of ninety days, subject to further examination and consideration of plans filed in the fire department.

1197-25-A.

APPELLANT—Samuel Rosenblum, for Acme Backing Corp., lessee of basement only.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—104-14 South Fourth street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum and R. M. Freydberg.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(1197-25-A)

WHEREAS, Samuel Rosenblum, for Acme Backing Corp., lessee (basement only), filed, November 18, 1925, an appeal from an order of the fire commissioner, affecting premises 104-14 South 4th street, Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 13, 1925, reads:

"Order No. 98566-C:

"1. Surrender to bear permit No. 146271, issued to you on July 7, 1925, to expire April 4, 1926, authorizing on the above premises the storage of 250 gallons rubber cement in 5-gallon cans, as it is revoked for the reason that amount stored by you is in excess of quantity allowed by permit No. 146271.

"2. You are therefore ordered to reduce the quantity of volatile inflammable liquid (rubber cement) to a quantity not exceeding 5 gallons, as storage and use of more than 5 gallons on the 1st story of a factory building creates a dangerous condition. Sec. 10, Chap. 10, C. of O.

"3. Provide a ventilated hood, over each spreading machine, having an effective ventilating sectional area of the width of the cloth employed, said hoods to be connected to an exhaust to the outer air and ventilated by mechanical means. Sec. 10, Chap. 10, Code of Ordinances.";

and

WHEREAS, the building is fireproof, seven stories in height, 120 ft. by 81 ft. 6 in. in area; OCCUPIED as a tenant factory, 426 persons above the 1st story; appellant occupying the 1st story (basement level) for backing up cloth with rubber cement, 18 persons; and

WHEREAS, appellant contends that, having occupied the premises for this purpose since 1922, and that permits have been issued by the fire department for the storage of 250 gallons of rubber cement; that the main stock of material is stored in a metal closet in a brick building in rear yard;

# MINUTES

that the stock is all in sealed 10-gallon cans; that only 30 gallons of the cement are used in the work at one time, and that there is no open flame used in the premises; and

WHEREAS, there has been a permit in force issued by fire department substantially under the same existing conditions.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than 250 gallons of rubber cement shall be maintained on the premises, stored in a one-story building, located on rear of plot separate from main building, and confined to a metal closet; that the cement stored in this building shall be maintained in sealed metal cans, the capacity of each container not to exceed 10 gallons; that the one-story storage building shall be provided with an approved fire extinguisher and five pails of sand; that not more than 30 gallons of cement shall be used in work in the manufacturing process within the main building at any one time.

40-25-A.

APPELLANT—John Kenlon, Chief of Fire Department.

SUBJECT—Request for revocation of permit granted by the board of standards and appeals—appeal from order of fire commissioner.

PREMISES AFFECTED—Spuyten Duyvil parkway and 227th street, The Bronx.

APPEARANCES—

For Appellant: Edward Morris.

For Administration: Inspectors Henry J. Hille and Lynch of fire department.

ACTION OF BOARD—Request to revoke permit denied.

THE VOTE TO REVOKE PERMIT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(40-25-A)

WHEREAS, The Acton Gas Stations, Inc., lessee, filed, January 9, 1926, an appeal with the board of appeals from an order of the fire commissioner, affecting premises Spuyten Duyvil parkway and West 227th street, The Bronx; and

WHEREAS, the order of the fire commissioner reads:

"Referring to your application for a permit to maintain an oil storage plant for the storage of gasoline, at the above address, your attention is respectfully invited to Section 111-5, Chapter 10, Code of Ordinances, which reads in part as follows:

"All storage tanks comprising or forming part of an oil storage plant shall be buried so that the tops thereof shall be at least 2 ft. below the grade level.

"Inspection of the above premises shows the following conditions exist:

"1. Tanks are not buried. Section 111-5, Chapter 10, Code of Ordinances.

"3. One tank exceeds the maximum capacity permitted in Section 111-5, Chapter 10, viz., 100,000 gals.

"4. The total capacity of the group of tanks for which permit is requested exceeds the maximum quantity permitted, viz., 250,000 gals. Chap. 10, Section 111-5, Code of Ordinances."

and

WHEREAS, the premises consist of a plot of ground along the Harlem Ship Canal, upon which is located, 30 ft. from each other, two steel gasoline storage tanks (cross connected with a 6 in. pipe) of respectively 200,000 and 75,000 gallons capacity; and

WHEREAS, applicant contends that there are no buildings within 5,000 ft. of the location and proposes to increase the height of the ½ in. steel wall forming the pit around

the tanks to a point so that the pit will be of such a capacity as to take care of the contents of the tank; and

WHEREAS, a committee of the board inspected the premises and reported:

April 28th, 1925.

Cal. No. 40-25-A.

Premises—Spuyten Duyvil Parkway,  
& West 227th St., The Bronx.

REPORT OF COMMITTEE:

A Committee of the Board, consisting of Chairman Walsh, Fire Chief Kenlon, Messrs. Holland and Connell, on April 23rd, 1925, visited the above premises under appeal, on an objection of the Fire Department as to location of the proposed gasoline oil storage.

There are two (2) existing tanks, used for a number of years, from record, for the storage of oil. They are located on the neck of land projecting into the Spuyten Duyvil Creek of the Harlem Ship Canal, formerly a part of the now discontinued Johnston Iron Works, which land has been taken over by the State.

All buildings and structures from the Creek to the next nearest public roadway, a distance of at least 500 feet or more, have been entirely demolished or removed. There is no structure of any nature that would be involved and as a result, the tanks are isolated from any improvement, structure or condition that would be impaired or adversely affected by any fire menace or hazard, and as the use is temporarily subject to notice of removal, the Committee recommends the *granting* of a temporary permit for one (1) year, *on condition* that reasonably sufficient excess capacity be provided in the nature of surrounding enclosure reservoir, equal in capacity to not less than one-half of the capacity of the tank in each case, to retain and control any leakage or discharge.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
JAMES P. HOLLAND,  
HENRY L. CONNELL.

and

WHEREAS, the board granted this appeal under date of April 28, 1925, the resolution reading:

"*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary period of one (1) year from the date of this action, *on condition* that a dike wall shall be constructed outside of each tank, providing thereby a reservoir, equal in capacity to not less than 50 per cent of the tank itself. \* \* \*"

and

WHEREAS, a letter was filed alleging a violation of the resolution and requesting a revocation of the action of the board of April 28, 1925; and

WHEREAS, a hearing was held on this request at a meeting of the board February 23, 1926, and a representative of the fire prevention bureau reported that the premises and the conditions thereon complied with the resolution adopted by the board April 28, 1925, and that he recommended the issuance of a permit.

*Resolved*, that the board *reaffirm* its action of April 28, 1925, and that the request to revoke the permit is *denied*.

## BUILDING ZONE CASES.

977-25-BZ.

APPLICANT—Emil Guterman, for Michael De Stefano, owner.

SUBJECT—Application (re: decision of fire commissioner), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Northwest corner of Roosevelt avenue and 63rd street (Trimble place), Woodside, Borough of Queens.

THE RESOLUTION:

(979-25-BZ)

WHEREAS, McCooley & Conroy, for A. E. DeBaun, owner, filed, September 22, 1925, an application, under the building zone resolution, to permit partly in a residence district and partly in a business district the erection and maintenance

of a garage for the storage of more than five motor vehicles; premises 144-18 Hillside avenue, Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hillside avenue is in a business district, and that Willett avenue and Colonial avenue are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered February 11, 1925, reads:

"Erection of a garage for more than 5 cars as proposed is prohibited by Zone Law in residence and business district not examined further.";

and

WHEREAS, the proposed building is to be of non-fire-proof construction, one story in height, with a frontage of 122 ft. 6 in. and a depth of 163 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, applicant failed to establish his basis of appeal under section 7-g of the building zone resolution, and the board concluded that there were not practical difficulties and unnecessary hardships in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

651-25-BZ.

APPLICANT—John M. Baker, for William Hirsh, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—North side of Rockaway boulevard, 78 feet west of 90th street, Woodhaven, Borough of Queens.

THE RESOLUTION:

(924-25-BZ)

WHEREAS, Goodhue Livingston, for Empire City Savings Bank, owner, filed, September 11, 1925, an application, under the building zone resolution, to permit the omission of a lawful rear yard as provided for in section 17 of the building zone resolution; premises 219-231 West 125th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 125th street is in a business and also a "B" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 13, 1925, reads:

"1. A lawful rear yard should be provided as per Section 17 of the Zone Resolution.";

and

WHEREAS, the existing one-story fireproof building, occupied as a bank, is 50 ft. by 89 ft. 11 in. in area; the main portion of the building being 50 ft. by 70 ft. 2 in. in area and one clerestory (41 ft.) in height; at the rear there is a one-story and mezzanine portion about 23 ft. high; it is proposed to construct an additional story upon this rear portion, thereby forming, at the northwest corner of the proposed addition, a portion of the structure 10 ft. by 17 ft. in area and 14 ft. 6 in. high, within the limits of the legally required rear yard; and

WHEREAS, the board concluded that there were practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the building zone resolution, and that applicant should be granted relief under section 21.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the extension shall not exceed a height of 14 ft. 6 in. above the existing rear extension, and shall be restricted in area and dimensions to a depth of 10 ft. and a width of 17 ft. 5 in.; that the rear and westerly gable walls shall be unpierced throughout their entire height and length; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1147-25-BZ.

APPLICANT—Charles P. Cannella, for Julia Wyckoff, Ella Wyckoff and Adelaide E. Wyckoff, owners.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—436-446 New York avenue Brooklyn.

APPEARANCES—

For Applicant: Charles P. Cannella and Frederick J. Flynn.

For Opposition: Max L. Kane, R. P. McNulty Arthur Freshman and Arthur Benter.

THE RESOLUTION:

(1109-25-A)

WHEREAS, Keiner-Williams Stamping Co., owner, filed, October 28, 1925, an appeal from the orders of the fire commissioner, affecting premises No. 8746 123rd street, Richmond Hill, Borough of Queens; and

WHEREAS, the orders of the fire commissioner, dated September 18, 1925, read (Order No. 84944-F):

"1. Remove all hose outlet connections from sprinkler system and cap openings throughout building. Sec. 20 Ch. 12, Code of Ordinances.

(Order No. 84945-F)

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ in. standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, three stories (4½ ft.) in height, 100 ft. by 155 ft., irregular (approximately 11,500 sq. ft.) in area. OCCUPIED: 1st floor, press room and annealing and welding metal, 54 persons; 2nd floor soldering and assembling metal, 33 persons; 3rd floor, tire shop and assembling metal, 20 persons; and

WHEREAS, appellant contends that the building is protected by a sprinkler system; that the building is accessible, from many points, to the fire department, and that the product manufactured is steel and non-hazardous.

Resolved, that the order of the fire commissioner, No. 84944-F, be and it hereby is affirmed, and the appeal be and it hereby is denied; and the order of the fire commissioner No. 84945-F, be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be increased in height, area or dimension; that an approved sprinkler system shall be maintained; that the building shall be maintained in single tenancy; and granted only so long as existing conditions as to use and operation shall remain substantially unchanged.

WHEREAS, Pyrograph Advertising Sign Corporation of U. S., for Pyrocolor Corporation, lessee, filed, November 1925, an appeal from an order of the fire commissioner, affecting premises 4401 Bronx boulevard, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated May 1925, reads (Order No. 29544-LC):

"1. Expose buried tank to view so that a proper hydrostatic test may be made by a representative of the Fire Commissioner as per Rule 7, Section 4b of the Fuel Oil Rules.

"4. Provide a hydrostatic test of not less than 150 pounds per square inch for all fuel oil carrying piping of a normal working pressure of less than 100 pounds, as per Rule 8, Section 3 of the Fuel Oil Rules.

"12. Provide fuel oil pump or pumps of a type approved by the Board of Standards and Appeals, as per Rule 11, Section a of the Fuel Oil Rules."

WHEREAS, the building is of fireproof construction, three stories and basement in height, 200 ft. by 50 ft. in area. OCCUPIED: Basement, firing kiln, shipping room, 5 persons; 1st story, office, printing shop, 30 persons; 2nd story, printing, 15 persons; 3rd story, bottling medicine, 35 persons; and

WHEREAS, the appellant has installed an oil burning equipment, consisting of a 5,000 gallon outside storage tank, buried 3 ft. below grade, all necessary piping and valves, one Anthony burner and a Kinney pump; and has also submitted plans and applications to the fire department, which were disapproved; and

WHEREAS, the appellant contends that the tank has had a shop test; that the piping installed is known as extra heavy standard; that the Kinney pump, manufactured by the Kinney Manufacturing Company, was the best pump found after experiment with others; the appellant further contends that the building is fireproof, and requests a permit to continue the operation of the oil burning system.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, for a temporary period of ninety days, pending the determination by the board of the Kinney pump petition, on condition that certificate of factory test as to tank shall be filed with the fire department; that standard wrought iron pipe shall be used throughout installation, which shall comply with the fuel oil rules in all other respects.

1180-25-A.

APPELLANT—Samuel Rosenblum, for Fred. J. Schussel, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—450-458 19th street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum and Louis S. Southwick.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(1180-25-A)

WHEREAS, Samuel Rosenblum, for Fred J. Schussel, owner, filed, November 13, 1925, an appeal from an order of the fire commissioner, affecting premises 450-8 19th street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, No. 84929-F, dated September 18, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is of brick and frame construction, two stories (34 ft. 6 in.) in height, 125 ft. 8½ in. by 87 ft. 10 in., also a one-story extension 12 ft. 4 in. by 74 ft.; total floor area about 11,500 sq. ft. OCCUPIED: 1st story, manufacture of name plates, 75 persons; 2nd story, drafting and photo room, 10 persons; and

WHEREAS, the appellant contends that the building is equipped with an automatic sprinkler system, having direct connection with the city main; that night watchman services and a special fire alarm signal system are provided; also that the floor area is not much over 10,000 sq. ft.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, only so long as conditions as to manufacturing

# MINUTES

process, operation and use shall remain substantially unchanged; that the building shall not be increased in height or area; that the premises shall be equipped throughout with an approved wet sprinkler system; and that any horizontal openings shall be protected with approved fireproof equipment.

1431-24-A.

APPELLANT—Augustus Misch, for W. J. Durr, owner.

SUBJECT—Request for extension of permit—appeal from decision of fire commissioner.

PREMISES AFFECTED—3294 Hull avenue, The Bronx.

APPEARANCES—

For Appellant: Anthony J. Sbarco.

ACTION OF BOARD—90-day permit granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE TO GRANT 90-DAY PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(1431-24-A)

WHEREAS, August Misch, for William J. Durr, owner, filed, December 4, 1924, an appeal with the board of appeals from a decision of the fire commissioner, affecting premises 3294 Hull avenue, The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered December 2, 1924, reads:

"Replying to your letter of the 8th inst. in which you requested a temporary permit to cover a fuel oil heating plant at the mentioned address, we regret to advise that we must deny your request in view of the fact that the plans covering the installation indicate that the burner which you intend using is not a type approved by the Board of Standards and Appeals.";

and

WHEREAS, the building is non-fireproof, three stories in height, 25 ft. by 50 ft. in area. OCCUPIED: 1st story, stores; upper stories, dwellings; and

WHEREAS, a fuel oil burning system has been installed consisting of a 200 gallon fuel oil storage tank, a 55 gallon auxiliary tank and a "Universe" oil burner with necessary valves and piping; and

WHEREAS, appellant contends that the installation conforms with the fuel oil rules excepting in that the burner is not an approved burner, and requests a temporary permit pending approval of the burner by the board; and

WHEREAS, this appeal was granted by the board at its meeting February 10, 1925, and October 20, 1925, for a temporary period, and appellant requests an extension of time.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary period of ninety (90) days, on condition that the installation otherwise shall comply with the fuel oil rules of the board of standards and appeals, pending action on petition for approval of burner by the board of standards and appeals.

## BUILDING ZONE CASES.

728-24-BZ.

APPLICANT—Philip J. Sinnott, for Helen B. Peckett, owner.

SUBJECT—Application for reopening (re: decision of superintendent of buildings) to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—2074-2088 Fulton street, Brooklyn.

APPEARANCES—None.

ACTION OF BOARD—Application reopened and set for calendar call March 23, 1926, at 2 p. m.

THE VOTE TO RESTORE TO CALENDAR—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

1292-25-BZ.

APPLICANT—William F. Doyle, for Martin W. Teichman, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a 1½ times height district the erection and maintenance of a building to a height exceeding the limit required by the building zone resolution.

PREMISES AFFECTED—307-317 West 38th street, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Jacob Richman, Benjamin C. Ribman, J. A. Haughwout and Thomas H. Lawrence.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(1292-25-BZ)

WHEREAS, William F. Doyle, for Martin W. Teichman, owner, filed, December 14, 1925, an application, under the building zone resolution, to permit in a 1½ times height district the erection and maintenance of a building to a height exceeding the limit required by the zone resolution; premises 307-317 West 38th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that West 38th street and West 39th street are in 1½ times height districts and the west side of Eighth avenue from 38th street to 39th street is in a 2 times height district, and that the three streets are in an unrestricted use district; and

WHEREAS, the decision of the superintendent of buildings rendered December 9, 1925, reads:

"1. Building appears to exceed the height of limitations imposed by Section 8 of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, 18 stories in height, with a frontage of 15 ft. and a depth of 98 ft. 9 in.; to be occupied as stores, lofts, offices and showroom; it is proposed to erect the easterly 50 ft. of street wall to a height of 192 ft. 6 in. and the remaining 100 ft. to a height of 120 ft.; and

WHEREAS, the board deemed that the applicant was entitled to relief under sections 9 and 21 of the building zone resolution, the plot in question abutting a two times height district.

*Resolved*, that the board of standards and appeals do hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the street wall to a point 150 ft. from the

# MINUTES

corner, westerly from Eighth avenue to the height of the adjoining building to the east, not exceeding a height of 100 ft., and that the remainder of the street front for a distance of 100 ft. shall not exceed a height of 120 ft.; and that the requirements of the zoning resolution as to height and area shall be complied with in all respects; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

923-25-BZ.

APPLICANT—McCooley & Conroy, on behalf of Peter Rinelli, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district the erection of a two-story building to be used for stores on the 1st story and for offices on the 2nd story.

PREMISES AFFECTED—Southeast corner of Bay Parkway and 85th street, Brooklyn.

APPEARANCES—

For Applicant: John H. McCooley, Jr.

For Opposition: Henry Perlman, Leo Previn, Rev. Father King, Mrs. Thall and others.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland, Guilfoyle and Chief Kenlon	4
Negative: Commissioner Connell	1
Absent	0

THE RESOLUTION:

(923-25-BZ)

WHEREAS, McCooley & Conroy, for Peter Rinelli, owner, filed, September 10, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a two-story building, to be used for stores on the 1st story and for offices on the 2nd story; premises southeast corner Bay parkway and 85th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, March 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 85th street and Bay parkway are in residence districts, and that 86th street is in business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 29, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3. The erection of stores and offices in a residence district."

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 100 ft. and a depth of 100 ft.; to be occupied as stores on the 1st story and offices above; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution for a limited portion of 1st story only, the street front involved being subdivided by two use districts.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as affects the 1st story on Twenty-second avenue, for a frontage of 53 ft., on condition that the remainder of these premises shall be restricted and maintained for conform-

ing residential uses; that the front elevations on the 85th street front and Twenty-second avenue other than store show windows shall be finished with face brick and architectural terra cotta or stone trimmings; that it shall be of attractive architectural design; that there shall be no openings of any nature or description from the store area to the 85th street side; that the street wall of the 85th street frontage shall be returned on the Twenty-second avenue front for a distance of not less than 16 in.; that the business use on the 1st story shall be restricted to retail mercantile store use and occupancy, no part of store use to be occupied for meat market, fish store or delicatessen; that there shall be no advertising signs or display erected or maintained of any nature or description on any portion of the building on the 85th street front, nor on the Twenty-second avenue frontage other than lettering on the plate glass show windows of the stores; that the store use shall be separated from the apartment use at the rear by unpierced walls of approved masonry; that return drawings shall be submitted to this board, showing the layout of the store floor and facades, before submitting same to the superintendent of buildings for consideration; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

776-25-BZ.

APPLICANT—Burke & Olsen, for Edward B. Sweeney, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7b and 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building for business occupancy.

PREMISES AFFECTED—401 Schenectady avenue, Brooklyn.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Resolved Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO RULES GOVERNING FIRE EXTINGUISHING APPLIANCES— SPRINKLER SYSTEMS.

[77-25-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals on Friday, March 26, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Rules for Fire Extinguishing Appliances, Sprinkler Rules.

*General Requirements.* The rules contained herein cover the general details of a sprinkler equipment only. Before an equipment is installed or before a present equipment is remodeled, complete working plans should be submitted for approval to Fire Department.

These plans shall be drawn to an indicated scale; give correct address and points of compass; show sectional elevations of the building; and the essential features of the construction, viz., size, location and direction of joists, timbers or other structural members. They shall also indicate the location and size of water supplies, connecting pipes, feed mains and risers, gate, check, alarm and dry-pipe valves, as well as the location, spacing, number and type of sprinklers.

Upon approval of preliminary plans such number of sets of clean, corrected plans on cloth as the Fire Commissioner may require, not exceeding three (3), shall be filed for final approval of the Fire Commissioner. A certified copy of the approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If a standpipe (fire line) equipment is provided throughout the building, the plans shall include a note to that effect.

When entirely completed in accordance with the approved plans and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the sprinkler equipment is approved the applicant will be so advised in writing by the Bureau of Fire Prevention.

All sprinkler equipments shall be installed in a thoroughly workmanlike manner.

**Rule 1. Definition of Automatic Extinguisher Systems.** Automatic extinguisher systems shall consist of a system of piping connected to one or more acceptable sources of water supply, or other extinguishing medium, provided with distributing devices so arranged and located as to discharge and diffuse automatically under the action of heat an effective stream or spray over every part of the interior of the building area in which a fire may start or to which it may be communicated.

**Rule 2. Classification of Sprinkler Systems.** For the purpose of these rules, sprinkler systems shall be classified as:

(a) Automatic Wet Pipe Systems, in which all pipes and sprinkler heads are at all times filled with water;

(b) Automatic Dry Pipe Systems, in which the pipes and sprinkler heads are filled with air, either compressed or at atmospheric pressure, and the water supply is operated by a Dry Pipe Valve as defined in Rule 27 of these Rules.

(c) Non-Automatic Systems, in which all pipes and sprinkler heads are maintained dry with a fire department connection for water supply.

Thermostatic fire alarm with direct connection to Central Office or Fire Department Headquarters shall be provided in connection with all non-automatic sprinkler systems.

**Rules 3. Approved Devices.** Automatic Sprinklers and accessory appliances shall include all devices approved as such by the Bureau of Standards, Washington, D. C.; by the Underwriters' Laboratories, Inc., of Chicago; by the Associated Factory Mutual Laboratories of Boston; and all devices which meet the tests prescribed by the Board of Standards and Appeals.

**Rule 4. Water Supply.** Approved sources of water supply shall be classified as Automatic and Auxiliary.

(a) Automatic Sources shall include the Gravity Tank, the Pressure Tank, [and] the Public Water System, and the Automatic Electric Fire Pump, installed as required under the provisions of Rule 8, hereinafter provided for.

(b) Auxiliary Sources shall include the non-automatic Fire Pump and the Fire Department Connection.

**Rule 5. Gravity Tank.** Gravity tanks shall contain available quantity of water sufficient to supply twenty-five per cent (25%) of the number of sprinkler heads in the average protected fire area for twenty (20) minutes, but not less than 5,000 gallons; and the bottom of the tank shall have an elevation of not less than twenty (20) feet above the highest line of sprinklers below the main roof. Where the area of a pent house exceeds 2,500 sq. ft. the bottom of the tank shall be required to be not less than 20 feet above the highest line of sprinklers below the pent house roof, but where a pent house contains only pressure tanks this rule will not apply.

Where a tank capacity in excess of [25,000] 30,000 gallons is required by this rule, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Standards and Appeals, except where tanks of unlimited capacities are supported on structures together independent of buildings.

The tank shall be filled through a fixed pipe, independent of the sprinkler piping, not less than two (2) inches in size, discharging into the top of the tank, through a by-pass not less than two (2) inches in size around the check valve in the discharge pipe, provided the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute.

The filling pipe shall be carried up inside a frost-proof casing and may extend through tank bottom to discharge at top of tank above full water level. The portion of the inside tank must be of brass or copper or other non-corrosive material.

Tanks shall not be fed through sprinkler lines.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, provided that there are separate feed mains from the basement or lowest story and a control valve in each feed line in a pump or engine room.

The overflow pipe shall be not less than two (2) inches in diameter for tanks up to 30,000 gallons capacity and less than three (3) inches in diameter for larger tanks. The top of the overflow pipe shall be three (3) inches above the top of the staves in wooden tanks and one (1) inch from the top in steel tanks. The pipe may extend through the bottom of tank provided the portion inside tank is of brass or copper or other non-corrosive metal without joints or it may extend through side of tank. Tanks over roofs overflow pipes shall terminate not more than twenty-four (24) inches above roof and shall be fitted with a 90 degree elbow.

The discharge, heating or filling pipes where exposed to the weather shall be protected from freezing by a frost-proof covering which may be of three layers of one-half (1/2") hair felt interspersed with building paper well wrapped and secured and covered with canvas well painted or frost-proof boxing as specified by the National Board of Fire Underwriters.

Easy access to top of each tank shall be provided by means of a steel gooseneck ladder substantially constructed and rigidly braced, the top of which shall not tip out from the vertical at any point.

Tanks above roofs shall be constructed according to the requirements of the Building Code and supporting structure.

# PUBLIC HEARING

res shall be approved by the Superintendent of Buildings. Tanks not enclosed and exposed to the weather shall be covered with a double roof of acceptable construction consisting of a tight flat cover of matched boards and above this a conical roof which shall be covered with an approved roofing.

Where a gravity tank may supply both sprinklers and fire hydrants it shall not be of less than 30,000 gallons capacity and located on a structure altogether independent of buildings and the bottom shall not be less than 75 feet above the ground level, and not less than 20 feet above the highest line of sprinklers below the main roof of the highest building in a group of buildings.

Rule 6. Pressure Tank. Pressure tanks shall contain sufficient water to supply twelve and one-half per cent (12½%) of the number of sprinklers in the average protected fire area for twenty (20) minutes, but not less than [5,000] 3,000 gallons of water for a wet pipe system where supplemented by an auxiliary water supply, and not less than 5,000 gallons of water for a dry-pipe system. No single tank shall have a capacity greater than 9,000 gallons. The tank shall be kept two-thirds (2/3) full of water under a pressure of seventy-five (75) pounds per square inch, and shall be so proportioned and located that a pressure of not less than fifteen (15) pounds per square inch will be available on the highest line of sprinklers below the main roof when all the water has been discharged from the tank.

[The tank shall be placed either on the roof or in the highest sprinklered story.]

A pressure tank or tanks shall not be located below the highest line of sprinklers supplied by tank or tanks.

Where [a tank] the total capacity of the pressure tank supply is in excess of [25,000] 30,000 gallons as required by this rule, the amount of water to be provided in excess of [5,000] 30,000 gallons shall be specified by the Board of Standards and Appeals.

The water shall be supplied through a fixed pipe, independent of the sprinkler piping, not less than [two] one and one-half (1½) inches in size [with a one and one-quarter (1¼) inch connection to the tank], or through a bypass not less than [two (2)] one and one-half (1½) inches in size around the check valve in the discharge pipe provided the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute without reducing the pressure in the tank. The tank shall have a fixed metallic horizontal line at the end opposite the glass gauge, or other acceptable device, to indicate the level of the water when the tank is two-thirds full.

The air compressor shall be of sufficient capacity to increase the air pressure at the average rate of one pound in two minutes in each pressure tank.

Rule 7. Public Water System. Direct connection to the city water supply shall be capable of furnishing water at not less than fifteen (15) pounds per square inch static pressure at the highest line of sprinklers under the main roof.

Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each connection shall be as large as that of the main riser and not less than four (4) inches, and shall have a conveniently accessible control valve fixed to it at, or near, the curb, or, when possible, still further away from the building. The control valve shall be fitted with a frost and waterproof box, not less than four (4) feet nor more than six (6) feet below the curb, with a fixed stem extending to a compartment at the level of the sidewalk. The cover shall be bolted to the casing and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be marked with an indicating pattern, operated by a special socket wrench approved by the department of water supply, gas and electricity.

Where it is impractical to install a control valve box at the curb because of a vault under the sidewalk and within 18" thereof, the control valve may be located in the water supply connection at a point not more than two (2) feet from the point of entry into a vault.

Where a water meter is required in the water supply connection to an automatic sprinkler equipment, it shall be of a type which allows free flow of water and approved by the Department of Water Supply, Gas and Electricity, or a type of fire line meter which has been specifically approved by the Fire Commissioner for use in connection with fire extinguishing equipment.

Evidence establishing the fact that water supply conditions and pressures are as may be required shall be submitted to the Fire Department.

Rule 8. Fire Pump. An automatic electric fire pump as an automatic source of water supply is one approved for such use and controlled by an approved automatic controlling device, which shall be adjusted to maintain not less than 15 pounds water pressure at the highest sprinkler below main roof and in pent houses over 2,500 sq. ft., as provided in Rule 5. And shall receive water supply only from a direct connection to the city water main.

As auxiliary sources of water supply steam or electric standard fire pumps shall receive water supply from a suction tank, a direct connection to the city water main or other approved sources capable of supplying the pump at its rated capacity for sixty (60) minutes. The rated capacity of the pump shall be not less than five hundred (500) gallons per minute, and shall be sufficient to supply twenty-five per cent (25%) of the number of sprinklers in the average protected fire area.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

A reliable source of energy for driving the pump shall be provided. For steam pumps, provision shall be made for sufficient steam power to operate the pumps at full rated capacity, and a steam pressure of not less than fifty (50) pounds shall be maintained at the pump at all times. Where there is more than one boiler, the pipes and valves shall be so arranged to permit the cutting out of any one boiler without interrupting the steam supply to the pump from the other boilers. The boiler room shall be cut off from the remainder of the building by fireproof floor and wall construction with approved fire doors at all openings.

Electrical energy from a public service plant shall be acceptable as a source of energy for driving electric fire pumps. When local power plants supply the energy for operating electric pumps, two motor generator units shall be provided, or one generator unit supplemented by a public service break-down switch. Local electric power plants shall be located in rooms of fireproof construction with approved fire doors at openings.

Rule 9. Sprinkler Discharge. For the purpose of computing the capacity of water supplies, standard one-half (½) inch sprinkler heads shall be assumed to have an average discharge of twenty (20) gallons per minute, and the discharge of larger heads shall be computed proportionately in the ratio of the areas of their respective orifices.

Rule 10. Fire Area. A fire area is any floor space enclosed on all sides by exterior walls or fire walls or a combination of both. The number of sprinklers in the average protected fire area shall be determined by the number of sprinklered stories in such section. In

# PUBLIC HEARING

determining the required capacity of water supplies, the number of sprinklers in the average protected fire area need not include those located in low positions, such as under benches, low shelves, closets and platforms and between cars in car barns.

Rule 11. Fire Department Connection. All automatic sprinkler systems shall be provided with at least one two-way Siamese connection on each street front of the building for connection to the fire department hose. Buildings fronting on only one street shall be provided with at least two Siamese connections when the street frontage of building exceeds [one hundred and fifty (150)] *two hundred (200)* feet [in width].

*Where buildings have frontages on more than one street there shall be a fire department connection on each street front where frontage is not continuous but in all cases where more than one fire department connection is required they shall be located as the Fire Commissioner may direct and shall not be grouped.*

All Siamese hose connections hereafter installed, except those on piers or warehouses intended for fire boat use, shall be three (3) inches in size. Fire boat connections shall be three and one-half ( $3\frac{1}{2}$ ) inches in size. All hose connections shall be female, with standard fire department threads.

The inlets shall be placed at least eighteen (18) inches and not more than two (2) feet above the sidewalk, in a horizontal position accessible to the fire department, and shall be provided with a four (4) inch discharge connecting with a four (4) inch pipe to the sprinkler system for three (3) inch fire department connection and with a six (6) inch discharge outlet and six (6) inch pipe for three and one-half ( $3\frac{1}{2}$ ) inch fire boat connection. Each inlet shall be provided with a clapper valve machined to a true face.

Each Siamese connection shall be designated by raised letters at least one (1) inch in size, cast in the fitting in a clear and prominent manner and reading for the service designated, viz.: "Base. Spkr.," etc., as the case may be. If the entire building is sprinklered, the fitting shall be marked "Auto. Spkr."

*Siamese hose connections may project through a street wall not more than twelve (12) inches beyond the building line except that where there is an angle formed by the street wall and a check piece or the base of a column, pilaster or ornamental projection, they may be so located that no part extends more than fifteen (15) inches from either side of such angle in accordance with the provisions of the Building Code.*

*In each fire department connection there shall be an approved straightway check valve installed in a horizontal position, unless suitably designed for vertical position, and the piping shall be arranged to drain between the check valve and the outside siamese coupling by either a ball drip having a one-half ( $\frac{1}{2}$ ) inch pipe connection and one-half ( $\frac{1}{2}$ ) inch orifice and a bronze ball of proper size, or by a three-quarter ( $\frac{3}{4}$ ) inch drip connection, with plugged valve attached, and when necessary arranged to drain to a sewer. A drain connection may be tapped into the body of check valve only when located in a horizontal position.*

Rule 12. Automatic Sprinkler Systems. Automatic sprinkler systems shall be classified as:

(a) One Source Systems, supplied with water from any one of the automatic sources; and

(b) Two Source Systems, supplied with water from a combination of any two of the automatic sources; two pressure tanks with a total water capacity twice that required for a one source supply; direct connection to the city water supply on two different streets, so located that the closing of the controlling valve on one main will not eliminate the main on the other street; or a direct connection to the city water supply and one of the auxiliary sources provided the water supply main is at least six (6) inches in size, the main is fed both

ways and a two (2) inch test pipe at the top of the sprinkler riser shows a flowing pressure of fifteen (15) pounds per square inch between the hours of six a. m. to six p. m.

*A gravity tank and pressure tank, or a gravity tank and pressure tank and one of the automatic sources or two pressure tanks having a total water capacity for a one source supply may be considered as a two-source supply, where the occupancy of the building does not conflict with Rules 38, 39 and 40 hereinafter provided for.*

Rule 13. Sprinkler Spacing. Sprinkler heads and lines shall be spaced as herein provided:

Mill Construction. Under mill ceiling (smooth solid plank and timber construction, 5 to 12 foot bays) on line of sprinklers shall be placed in the center of each bay and the distance between the heads on each line shall not exceed the following:

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads—
  - 8 feet in 12 foot bays;
  - 9 feet in 11 foot bays;
  - 10 feet in 10 foot bays;
  - 11 feet in 9 foot bays;
  - 12 feet in 5 to 8 foot bays;
- (b) For Conran\* one (1) inch heads—
  - 20 feet in 5 to 12 foot bays.
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads—
  - 25 feet in 5 to 12 foot bays.
- (d) Vaults used for the storage of nitro-cellulose products and vaults used for the storage of inflammable motion picture films shall have or standard one-half ( $\frac{1}{2}$ ) inch head for each 62 cubic feet of available storage space, or one (1) inch Conran\* head for each 250 cubic feet of available storage space.

Measurements shall be taken from center to center of timbers.

Ceilings of modified mill construction having bays less than three (3) feet wide shall be treated as open joist construction and sprinkler heads and lines spaced accordingly.

Bay timbers spaced three (3) feet or more on centers, but less than five (5) feet on centers, will require special ruling by the administrative official having jurisdiction.

Joisted Construction. Under open finish joisted construction ceilings, floor, decks and roofs, the sprinkler lines shall be run at right angles to the joists and the heads "Staggered spaced" so that heads on one line will be opposite a point half way between heads on adjacent lines.

(a) For Standard one-half ( $\frac{1}{2}$ ) inch heads the distance between lines of sprinklers shall not exceed ten (10) feet and the distance between heads on each line shall not exceed eight (8) feet, the end heads on alternate lines being spaced not more than two (2) feet from wall or partition. Permission may be given by the administrative official having jurisdiction to install but one line of sprinklers, in each bay where girders project below the under side of joists and divide the ceiling into bays ten (10) to eleven and one-half ( $11\frac{1}{2}$ ) feet wide from center to center of girders, and the heads shall then be spaced on each line so that the area covered by a single head does not exceed eighty (80) square feet. In all cases where such bays are over eleven and one-half ( $11\frac{1}{2}$ ) feet wide, two or more lines of sprinklers shall be installed in each bay as required by the rules for spacing.

\*Wherever the term "Conran head" is used in the Rules, it is to be taken as meaning either a Conran head of the type tested and approved by the Fire Department, or one that has passed similar tests by the Fire Department.

# PUBLIC HEARING

Where girders and joists are flush at the bottom, heads shall be spaced according to the general rule.

(b) For Conran\* one (1) inch heads the distance between adjacent lines shall not exceed twenty (20) feet and the distance between the heads on each line shall not exceed sixteen (16) feet, the end heads on alternate lines being spaced not more than four (4) feet from wall or partition. Where sprinklers project below the under side of joists and divide the ceiling into bays not exceeding twenty (20) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty (20) feet in width at least two (2) lines shall be installed in each bay and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads the distance between adjacent lines shall not exceed twenty-five (25) feet and the distance between the head on each line shall not exceed twenty (20) feet, the end head on alternate lines being spaced not more than five (5) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty-five (25) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty-five (25) feet in width at least two lines shall be installed in each bay, and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Smooth Finish, Sheathed or Plastered Ceilings.** Under smooth finish, sheathed or plastered ceilings, in bays six (6) feet wide and over (measurements to be taken from center of timber, girder or other projection or support forming the bay), sprinkler heads and lines shall be spaced as follows:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twelve (12) feet in width, and the distance between the heads on each line shall not exceed the following:

- 8 feet in 12 foot bays;
- 9 feet in 11 foot bays;
- 10 feet in 6 to 10 foot bays.

Bays in excess of twelve (12) feet in width and less than twenty-three (23) feet in width, shall contain at least two (2) lines of sprinklers; bays twenty-three (23) feet in width or over shall have the lines therein not over ten (10) feet apart. In bays in excess of twelve (12) feet in width, not more than one hundred (100) square feet of ceiling area shall be allotted to any single head.

(b) For Conran\* one (1) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty (20) feet in width, and the distance between the heads on each line shall not exceed twenty (20) feet. Bays in excess of twenty (20) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty-five (25) feet in width, and the distance between the heads on each line shall not exceed twenty-five (25) feet. Bays in excess of twenty-five (25) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Fireproof Construction.** The rules of slow-burning construction shall apply as far as practicable. The spacing of heads to protect the contents rather than the ceilings; but in no case shall the distance between a head on one line and a head on an adjacent line exceed the following:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads, 12 feet.

(b) For Conran one (1) inch heads, 20 feet.

(c) For Conran one and one-quarter ( $1\frac{1}{4}$ ) inch heads, 25 feet.

**Distance From Walls.** The distance from wall or partition to the first head on a sprinkler line shall not exceed one-half the allowable distance between the heads on such line. Additional heads may be required in the narrow pockets formed by bay timbers or beams and wall. Where beams, girders, columns, walls, partitions or other obstructions prevent the effective discharge of water, additional heads shall be installed to effectively sprinkle the area.

**Vertical Shafts.** In vertical shafts having inflammable sides, heads shall be provided within the shaft in addition to the head or heads at the tops of shafts, as follows:

(a) One standard one-half ( $\frac{1}{2}$ ) inch head for each 200 square feet of inflammable surface.

(b) One Conran\* one (1) inch head for each 400 square feet of inflammable surface.

(c) One Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch head for each 500 square feet of inflammable surface.

Such head or heads shall be installed at each floor when practicable, and always when shaft is trapped. Where practicable, heads shall be "staggered" at the alternate floor levels, particularly when only one head is installed at each floor level.

**Pitched Roofs.** Under a pitched roof sloping more steeply than one (1) foot in three (3) feet, heads shall be located in peak of roof, and those on either side of the peak shall be spaced according to the foregoing requirements. The distance between heads shall be measured on a line parallel with the roof. Where the roof meets the side wall or the floor line, the heads shall be placed not more than the following distance from such intersection:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $3\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 7 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $8\frac{1}{2}$  feet.

Heads spaced not to exceed the following distance each way from the peak of roof, measured on a line parallel with the roof, may be used in lieu of heads located in peak of roof:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

In sawtooth roof construction, the end heads on the branch line shall be spaced not to exceed the following distance from the peak of the sawtooth:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

**Special Locations and Variations.** In special locations, such as over electric generating, power and transforming apparatus, over their controlling devices and switchboards, where water from the fire extinguishing equipment would be detrimental, the sprinkler lines and heads may be omitted at the discretion of the administrative official having jurisdiction, and when in his judgment a slight variation of this rule of spacing is desirable to effect a more efficient distribution of water for fire extinguishing purposes, the sprinkler lines and heads shall be spaced as he may direct.

**Rule 14. Sprinkler Position.** All sprinkler heads shall be located, wherever possible, in an upright position on top of the pipes, except that sprinkler heads on automatic wet pipe systems may be pendant on concealed piping and when construction or occupancy of a room or enclosure makes it preferable.

(a) Where standard one-half ( $\frac{1}{2}$ ) inch heads are installed sprinkler deflectors shall be parallel to ceilings, roofs or the

# PUBLIC HEARING

incline of stairs, but when installed in the peak of a pitched roof they shall be horizontal. Distance of deflectors from ceilings of mill or other smooth construction, or bottom of joists of open joist construction, shall be not less than three (3) inches nor more than ten (10) inches.

In fireproof buildings, the distance between deflectors and panel ceilings shall not exceed fifteen (15) inches.

Not less than eighteen (18) inches effective clear space shall be left below the sprinkler heads, so that they may discharge an unbroken spray blanket from sprinkler to sprinkler and sides of room when in operation. Any stock piles, racks or other obstructions interfering with such action shall not be permitted. *Sprinkler system piping shall not be used for the support of stock, clothing, etc.*

(b) Where Conran\* heads are installed, the top of head shall be located the same distance below joists or ceiling as specified for deflectors in paragraph (a) of this rule; except that when heads are located under pitched roofs of piers or similar structures, they shall in general be installed in the upright position (not normal to slope of roof) and three (3) feet vertically below the underside of roof. When the administrative official having jurisdiction deems a variation of this rule advisable to obtain a more efficient distribution of water, the heads shall be located with respect to joists or ceiling, as he may direct.

Rule 15. Pipe Sizes. The number of heads on a given size pipe in one fire area in any story shall not exceed the following:

(a) For standard one-half (1/2) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
3/4 inch	1 head
1 " "	2 heads
1 1/4 " "	3 " "
1 1/2 " "	5 " "
2 " "	10 " "
2 1/2 " "	20 " "
3 " "	36 " "
3 1/2 " "	55 " "
4 " "	80 " "
5 " "	140 " "
6 " "	200 " "
7 " "	300 " "
8 " "	420 " "

(b) For Conran\* one (1) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 inch	1 head
1 1/4 " "	2 heads
1 1/2 " "	3 " "
2 " "	4 " "
2 1/2 " "	6 " "
3 " "	9 " "
4 " "	18 " "
5 " "	34 " "
6 " "	51 " "
7 " "	75 " "
8 " "	105 " "

(c) For Conran\* one and one-quarter (1 1/4) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 1/4 inch	1 head
1 1/2 " "	2 heads
2 " "	3 " "
2 1/2 " "	4 " "
3 " "	6 " "
4 " "	12 " "
5 " "	21 " "
6 " "	40 " "
7 " "	60 " "
8 " "	84 " "

When it is desired to use pipe of larger size than eight (8) inches in diameter, special ruling will be required by the administrative official having jurisdiction as to the permissibility of its use and the number of heads that may be fed thereby.

Where practicable, it is desirable to arrange the piping so that the number of heads on a branch line will not exceed eight.

When the piping is arranged on the "gridiron" plan, the permissible number of heads may be doubled, provided the feed main is of the size indicated in the schedule for the total number of heads.

Where feed mains supply branch lines of only two heads each, the conditions approach those of long single line. Such feed mains shall usually be centrally supplied when there are over eight (8) or ten (10) branch lines. Branch lines up to fourteen (14) in number may be fed from end provided a two and one-half (2 1/2) inch pipe does not supply more than sixteen (16) standard one-half (1/2) inch heads in lieu of twenty (20).

Buildings having slatted floors, or large unprotected floor openings without approved stops, shall be treated as one room with reference to the pipe sizes, and the feed main shall be of sufficient size to accommodate the number of heads called for. Larger pipe sizes than are allowed in the schedule for a given number of heads may be required wherever the construction or conditions introduce unusually long runs of feed mains or many angles. Buildings with blind attics with unprotected openings to floor below, may be piped from a system on the ceiling of floor below, provided pipe size schedule is not overloaded on sizes three (3) inches or under.

Rule 16. Feed Mains. The size of feed mains shall be less than the size of riser and shall be arranged to run direct as possible from source of water supply to riser.

Feed mains for stair or other towers without approved stops between floors, when piped on independent riser, shall be of sufficient size to accommodate the total number of sprinklers in such tower.

Rule 17. Risers. There shall be one or more separate risers in each building and in each section of the building divided by fire walls. Risers shall be arranged to provide "Center Central" or "Side Central" supply to feed mains. Each riser shall be of sufficient size to supply all the heads on said riser in one story, according to the schedule of pipe sizes in Rule 15.

*In buildings of fireproof construction, and for the purposes of this rule, a blank wall, or one in which the openings are protected by standard fire doors, may be considered as a fire wall, if of equivalent construction.*

If the conditions warrant, special permission will be granted allowing the heads in a fire section of small area to be fed from the risers in another section, provided the total number of heads in such area does not exceed the following number per floor:

(a) For standard one-half (1/2) inch heads, 48.

(b) For Conran\* one (1) inch heads, 12.

(c) For Conran\* one and one-quarter (1 1/4) inch heads, 12.

Risers shall not be located close to windows, properly protected from mechanical injury and freezing and shall be properly supported on foundations and by floor plates, clevis couplings or hangers.

No connections, such as for sill cocks, house service hose outlets, shall be made with a sprinkler system or any part thereof.

Where gravity and pressure tanks feed through a common discharge pipe or "dead riser" to the foot of a riser an air lock is likely to develop the discharge pipe of the gravity tank shall connect with the discharge pipe, or "dead riser" forty (40) feet below the bottom of the pressure tank.

# PUBLIC HEARING

Rule 18. Pipes and Fittings. All pipe shall be full-weight standard wrought iron or steel threaded pipe, well reamed and screwed up tight into fittings without reducing the waterway. Fittings shall be standard cast iron fittings, and shall be long turn pattern on feed mains and risers.

Such fittings shall be designed and guaranteed for a working pressure of 150 pounds per square inch and must be capable of withstanding a hydrostatic test pressure of 750 pounds per square inch without failure.

All pipe shall be secured to the ceiling, walls and other parts of the building with standard steel, wrought or malleable iron hangers.

Extra heavy fittings shall be employed where the normal pressure in the pipe system exceeds one hundred and fifty (50) pounds per square inch, and shall be designed for a working pressure of 250 pounds per square inch and be capable of withstanding a hydrostatic test pressure of 1,250 pounds per square inch without failure.

All underground pipe shall comply with the specifications for cast iron pipe of the American Water Works Association.

Rule 19. Protection of Pipes and Sprinklers. When exposed to moisture, sprinkler pipes and hangers shall be protected against corrosion whenever found necessary by thoroughly cleaning the pipe of all scale and grease and painting with a coat of red lead and linseed oil paint or other acceptable moisture resistive paint. When exposed to chemical fumes, the pipe and fittings shall be coated with graphite or other approved chemical resistive paint. Care shall be taken not to paint the sprinkler heads.

Supply pipes of risers in low basements or low spaces under ground floors exposed to frost, shall be properly protected by a masonry or wood enclosure, properly heated, or lined with mineral wool, sawdust or tar mixed with granulated cork, extending below bottom of pipe and through the flooring of ground floor, or the pipe shall be protected with three alternate layers of one-inch hair felt and building paper or by other approved method. When of wood, the enclosure shall be constructed double with a layer of paper between the two thicknesses of wood.

Where risers, drains, heating pipes, etc., pass through concrete floors or partitions, they shall be protected with a metal sleeve or be grouted with cement mortar.

Wherever sprinklers are exposed to corrosion, the heads shall be protected with an approved hermetically sealed cover, with an approved wax coating.

Rule 20. Drainage. All sprinkler pipe and fittings shall be installed so that they can be thoroughly drained, and where practicable, all piping shall be arranged to drain at main drips.

Drains or drip pipes shall be so arranged as not to expose any part of the sprinkler system to frost, and shall be connected, either by check valves or other means, so that they will not [overthrow] overflow domestic service or other connections to the same sewer or house drain, or if carried through the wall and exposed to the weather, they shall be fitted with hoods or down-turned elbows.

Drains, pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet, shall be installed:

- at the base of the main riser;
- at each alarm valve;
- at each dry-pipe valve;
- at each gravity tank;
- at each pressure tank.

at each fire department connection;

on each floor, if independent floor control valves are used;

at each supply main, when the water in the same can be removed through any of the above drains. Such drains shall be installed with controlling valves so that flow-tests may be made to determine if the water supplies connections from yard mains to the inside of the build-

ing are in order without causing water damage or overflowing service connections to the same house drain. Any such drain shall be not less than two (2) inches in size except that drains at independent floor valves [may be one and one-quarter ( $\frac{1}{4}$ ) inches in size] shall be not less than 1 inch in size where floor valves are not over 2½ inches in size and 1¼ inches where floor valves are larger, and connected to a main drain riser of not less than 1½ inches in size. The drain at the main riser shall discharge into a cone or sight drain, or if carried through the wall and exposed to the weather, it shall be fitted with a hood or down-turned elbow.

*At an alarm valve at the top of a riser in a down-fed system a drain shall not be required.*

*At each gravity or pressure tank erected above roof of a building there shall be a 4-inch valved drain connection so arranged as to discharge on roof of building. And where a tank is on a separate structure altogether independent of buildings drain connection to be arranged to discharge at ground level.*

On automatic wet pipe systems, the horizontal branch pipes shall be pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet to drain towards the sources of supply with drip valves at the low points.

On automatic dry-pipe systems, branch pipes shall be pitched at least one-half ( $\frac{1}{2}$ ) inch in ten (10) feet.

Rule 21. Test Pipe. [On] In all wet-pipe automatic sprinkler systems a test pipe of not less than  $\frac{3}{4}$  inch in diameter shall be connected directly with each [riser] system but shall be connected to a pipe of not less than 1¼ inches in diameter in upper story and arranged to discharge, through a ½-inch brass outlet, preferably to a point where it can readily be seen. With long runs or many angles, size of test pipe [shall] should be increased to one (1) inch or larger. Controlling valve should be located at a sufficient distance from where the test pipe passes through the wall of the building so as to reduce to a minimum the chance of freezing of water in test pipe.

*In all dry-pipe automatic sprinkler systems a ¾-inch inspector's test pipe shall be installed at the end of the most distant branch line and fitted with a ¾-inch shut-off valve stopped with a brass plug.*

Rule 22. Pressure Gauges. A four and one-half (4½) inch double-spring Bourdon pressure gauge shall be provided in all automatic sprinkler systems as follows:

- Above dry-pipe valves;
- Below dry-pipe valves;
- At the pressure tank;
- At the air compressor;
- Above the alarm valve;
- Below the alarm valve; and

In the connections from city water supply.

Provision may be made for taking the pressure both above and below the alarm valve and the dry-pipe valve with only one gauge at each valve.

*A gauge shall not be required at an alarm valve located at the top of a riser in a down-fed system.*

Gauge connections shall be taken from the supply main or riser and not from the two-inch drain or test pipe.

Gauges shall be installed in a suitable place protected from freezing and be controlled by a valve with arrangements for draining. A plugged outlet, not less than one-quarter ( $\frac{1}{4}$ ) inch in size, shall be located between each valve and gauge for purpose of installing the inspector's gauge.

Rule 23. Valves. All valves two (2) inches in diameter and under shall be of brass or bronze, or other approved [non-corrodible] non-corrosive material. Valves over two (2) inches in diameter shall be of brass, or bronze or iron body, brass mounted, or of other approved [non-corrodible] non-corrosive material.

All sidewalk Siamese inlet valves, caps and chains shall be of galvanized cast iron or other approved [non-corrodible] non-corrosive material.

# PUBLIC HEARING

All gate valves shall be solid or double wedge disc, sufficing box pattern with hand wheel, outside screw and yoke, or other approved indicator pattern.

All check valves shall be approved straight way regrinding pattern, so built that the clappers may be readily removed for repairs.

Rule 24. Water Supply Gate Valves. The piping connecting each source of water supply with the sprinkler system shall be provided with a gate valve of the outside screw and yoke type, sealed open and tagged to designate its purpose, so located as to control each source of water supply except that from fire department hose connections. All such gate valves shall be located within the building where easily visible and readily accessible and as close as possible to the supply inlet.

Rule 25. Water Supply Check Valves. The piping connecting each source of water supply with the sprinkler system, including fire department connections, shall be provided with a check valve.

On two-source systems, check valves shall have a gate valve on each side to permit repair of check without shutting off both supplies, except that where the two sources of supply consist of tanks located above the highest line of sprinklers, a gate valve need only be provided on the downstream side of each check valve.

Rule 26. Control Valves. All automatic sprinkler systems shall be provided with a main control or shutoff valve arranged to be readily accessible and sealed in the open position; except that when the sprinkler system is fed from water supplies on the roof of the building, independent and readily accessible floor control valves, sealed in the open position, may be installed.

When not more than ten (10) standard one-half ( $\frac{1}{2}$ ) inch sprinkler heads or three (3) Conran\* heads in any automatic wet pipe system are exposed to cold and subject to freezing, shutoff valves may be provided to discontinue the water supply to such heads between November 1 and April 1. A greater number of heads than specified above, located in places which cannot be properly heated, shall be controlled by an automatic dry-pipe valve.

Rule 27. Dry-Pipe Valves. A dry-pipe valve shall be taken to mean a valve automatically controlling the water supply of the sprinkler system in such a manner that under normal conditions its piping system beyond the valve is maintained dry, but in the event of fire, the valve automatically releases the water into the sprinkler system, for fire extinguishing purposes.

Dry-pipe valves shall, for the purpose of these rules, be classified as follows:

Type A, in which the valve is actuated by the release of compressed air in the sprinkler piping system, due to the opening of a sprinkler head; and

Type B, in which the valve is actuated by an approved trip under electric control of an approved automatic thermostatic fire alarm system.

Dry-pipe valves shall be located as near as practicable to the sprinkler system in an enclosed and accessible place protected from mechanical injury and freezing.

*When anti-columning pipes are used, they shall be either lead lined or of brass.*

Automatic wet-pipe sprinkler systems in which only twenty-five (25) per cent of the heads are required to be maintained dry for protection from freezing, shall have only such heads under dry-pipe valve control.

(a) When "Type A" valve is installed, the air pressure in sprinkler systems under such dry-pipe valve control shall not exceed forty (40) pounds per square inch, nor be permitted to fall below twenty-five (25) pounds per square inch, nor shall it be less than one-sixth ( $\frac{1}{6}$ ) of the water pressure in any case.

The air compressor shall have a capacity of not less than eleven (11) cubic feet per minute and the air supply for the pump shall be taken, if possible, from a room containing dry air, or it shall be passed through a drying chamber containing calcium chloride, in order to avoid the introduction of moisture into the system.

The air pressure on such dry-pipe systems shall be maintained throughout the year.

Not more than the following number of heads shall be controlled by one "Type A" dry-pipe valve:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

*Where equipped with an approved quick-opening device, the following number of heads may be controlled by one "Type A" dry-pipe valve:*

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

(b) When "Type B" valve is installed the actuating alarm system shall be designed to operate at a temperature lower than that required to open the sprinkler heads, and all connections between the alarm system and the dry-pipe valve shall be adequately protected against injury of any kind.

When required by the administrative official having jurisdiction, the dead end of every feed main in such dry-pipe system shall be provided with an air relief valve or vent so constructed as to be normally open in order to permit the free escape of air from the system, but to close automatically against the escape of water.

Not more than the following number of heads shall be controlled by one "Type B" dry-pipe valve:

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

Rule 28. Alarm Valve. All automatic wet pipe sprinkler systems shall be equipped with an alarm valve so constructed that a flow of water through a one-half ( $\frac{1}{2}$ ) inch or larger will operate an electric or mechanical gong.

Dry pipe valves shall be equipped with a reliable device to give either an electrical or mechanical alarm.

Rule 29. High and Low Water and Pressure Alarm. Gravity tanks shall be equipped with a device to indicate when the water falls below or rises above the normal level of the tank, with an indicator or alarm located in the engine room near the pump.

All pressure tanks shall be equipped with a device to indicate when the pressure in the tank falls below seventy (70) or rises above eighty (80) pounds per square inch, with an indicator or alarm located in the engineer's room [near the compressor].

Rule 30. Heating of Tanks. The water in all sprinkler tanks subject to freezing shall be protected by inter-heating the water or enclosing the tank in a frost-proof house properly heated and lighted.

Rule 31. Concealed Pipe Systems. All pipe in concealed pipe systems shall be of standard full-weight wrought iron or steel, painted with two coats of protective paint, before and one after installation. Such pipe shall be installed in ducts or be encased in cement mortar and shall be inspected prior to concealment. When installed in concealed space between floor arches and ceiling, such pipe shall be supported by hangers and all pipe, fittings and hangers be protected with two coats of paint.

Rule 32. Preparation of Building. Floor or wall openings and other structural defects which prevent the buildup of heated air and retard the automatic action of sprinkler heads shall be provided with the necessary ceiling boards and draft stops to permit specific control of the air by the local sprinklers.

Curtain boards shall project at least three (3) inches above the lowest sprinkler.

# PUBLIC HEARING

Rule 33. *Approval of Sprinkler System [Tests]. Before acceptance* all automatic sprinkler systems, excluding the water supply tanks, shall be subjected after installation to a hydrostatic pressure of a test of at least fifty (50) pounds per square inch in excess of that which will be normally carried and observed in the sprinkler system, **such test pressure, however, never to be less than one hundred and fifty (150) pounds per square inch in any part of the system.**

All pressure tanks shall be tested after erection to a test pressure of one and one-half ( $1\frac{1}{2}$ ) times the working pressure. To prevent the possibility of serious water damage in case of a break, the pressure shall be maintained by a ball pump, the main controlling gate being meanwhile shut. Brine or other corrosive chemicals shall not be used for testing systems.

In automatic dry-pipe systems with "Type A" valve control, an air pressure of forty (40) pounds per square inch shall be pumped up, be held for twenty-four (24) hours, all leaks stopped which allow a loss of pressure of over (2) pounds per square inch for the twenty-four (24) hours.

In the case of automatic dry-pipe systems with differential "Type A" valve, the valve shall be held off its seat during the test to prevent injuring the valve.

Non-automatic systems shall be tested after installation not less than fifty (50) pounds per square inch in excess of the pressure necessary to reach the highest line of sprinklers.

All tests of installed systems shall be made by the contractor in the presence of the Fire Commissioner, or his authorized representative.

No piping, devices nor any portion of a newly constructed sprinkler system shall be covered up or permanently concealed until tested by the Bureau of Fire Prevention and approved of in writing, except piping passing through floors, walls, partitions or beams for distances equal to the thickness of such floors, walls, partitions or beams.

Rule 34. *Non-fireproof Business Buildings.* Automatic sprinklers required in non-fireproof business buildings under provisions of Chapter 5, Article 4, Section 72, Code of Ordinances, unless otherwise specifically provided in these rules, shall consist of at least a One Source System.

Rule 35. *Dangerous or Hazardous Buildings.* Automatic sprinklers required in buildings having occupancies considered to be dangerous or hazardous by the Fire Commissioner shall consist of at least a one-source system unless otherwise specifically provided for in these rules.

Rule 36. *Factories and other Buildings.* Automatic sprinklers required in buildings under the provisions of the Code of Ordinances and the Labor Law shall consist of at least a one-source system.

Rule [35] 37. *Theatre Buildings.* Automatic sprinklers required in theatre buildings under the provisions of Chapter 10, Article 25, Section 524, Code of Ordinances, shall consist of at least a One Source System.

Rule [36] 38. *Firework Storage.* Automatic sprinklers required in buildings in which fireworks are stored or sold under the provisions of Chapter 10, Article 6, Section 92, Code of Ordinances, shall consist of a Two Source System.

Rule [37] 39. *Nitro-Cellulose Products.* Automatic sprinklers as required in buildings in which nitro-cellulose products are stored under the provisions of Chapter 10, Article 19, Section 232, Code of Ordinances, shall consist of a system supplied from both approved gravity tank supply and an approved pressure tank supply, except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems, in conformity with the provisions of this rule as in force up to December 1, 1921.

*In buildings wherein are stored or handled only limited quantities of nitro-cellulose products, not exceeding 500 pounds, the automatic sprinklers may consist of a two source system as provided for in Rule 12.*

Rule [38] 40. *Inflammable Motion-Picture Films.* Automatic sprinklers, required in buildings in which inflammable motion-picture films are stored under the provisions of Chapter 10, Article 20, Section 241, Code of Ordinances, shall consist of a system supplied from both an approved gravity tank supply and an approved pressure tank supply except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems in conformity with the provisions of this rule as in force up to December 1st, 1921.

Rule [39] 41. *Existing Installations and Approvals.* Automatic extinguisher systems and devices heretofore approved and accepted by the authorities having jurisdiction shall not be required to conform to the provisions of these rules; and all such systems heretofore installed shall not be required to be altered to conform to these rules so long as the fire hazard due to construction and occupancy of the building is not increased or where substantial additions or extensions in height or area is made to the building when these rules shall apply if deemed advisable or necessary by the Fire Commissioner and the system after inspection is found to be in good working order.

Rule 42. *Communicating Openings.* When a building fully equipped with sprinklers communicates with another not so equipped the openings must be protected by approved fire doors on both sides of the wall, one of which must be automatic.

Rule 43. *Maintenance Inspections.* Automatic sprinkler systems shall be inspected at least once a month by the person in charge of the building, or by other competent person employed by the owner, to see that all parts of the system are in perfect working order, and the fire department connection or connections, if any, ready for immediate use by the Fire Department. A detailed record of each inspection shall be kept for examination by a representative of the Fire Department.

There shall be kept available at all times in the premises a supply of extra sprinklers, never less than six (6), to replace promptly any fused or damaged sprinklers. And there shall be one or more employees instructed in the maintenance of sprinkler system.

Rule 44. *Open Sprinklers.* When open sprinklers are required for exposure protection by the Fire Department as specified in the Building Code they shall be installed in accordance with the rules of the National Board of Fire Underwriters. Plans for such installation to be filed with the Fire Department for approval.

## FORMS FOR NOTICES TO PROPERTY OWNERS

applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such copies are not to be supplied by this office. The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,

### DIRECTORY

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Telephone—Worth 0184.

Office Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, March 16, 1926, at 10 a. m.

Minutes of Regular Meeting, March 16, 1926, at 2 p. m.

Correction.

Rules.

Notice of Public Hearing.

Progress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan. MAR 31 1926

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, March 23, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, March 30, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## CALL OF CLERK'S CALENDAR.

TUESDAY, MARCH 23, 1926, AT 2 P. M.

### Building Zone Cases.

897-25-BZ.

APPLICANT—John W. Dolan, owner.

PREMISES—Southwest corner of Jackson avenue at 51st street, Corona, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline service station.

910-25-BZ.

APPLICANT—Croker National Fire Prevention Engineering Co., for Peter Bressi, owner.

PREMISES—1421-25 65th street, Brooklyn.

APPLICATION, under section 7e of the building zone resolution,

TO PERMIT in a business district the change of occupancy of a building used for the storage of grain and feed to a garage for the storage of more than five (5) motor vehicles.

1334-25-BZ.

APPLICANT—Edward P. Doyle, for Robert R. Meyer, owner.

PREMISES—136-8 West 4th street, Manhattan.

APPLICATION, under sections 7c, 7e and 21 of the building zone resolution,

TO PERMIT partly in a business district and partly in an unrestricted district the alteration and change of occupancy of a building formerly occupied as a stable to a garage for the storage of more than five (5) motor vehicles.

1154-25-BZ.

APPLICANT—Gardiner Conroy, for Fogel-Hirsh Building Co., owner.

PREMISES—8502-8512 Bay parkway, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a building for a business occupancy on the 1st story.

1169-25-BZ.

APPLICANT—Ferdinand Savignano, for James Schacht, owner.

PREMISES—Northeast corner of Hillside avenue and Springfield boulevard, Springfield Heights, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

THE RESOLUTION:

(1171-25-A)

WHEREAS, John J. Gilmartin, for the Alpha Novelty & Button Works, Inc., lessee of the 9th floor, filed, November 12, 1925, an appeal from an order of the fire commissioner, affecting premises 35 Sixth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 31363-LC, dated October 21, 1925, reads:

"You are hereby notified that your permit, No. 117401, expiring February 14, 1926, to store and use 5,000 lbs. nitro-cellulose products, becomes null and void on December 15, 1925, for the reason that Section 232-2-1 of Article 19, Chapter 10, Code of Ordinances of the City of New York prohibits the storage of nitro-cellulose products in that portion of the building occupied by you.

"You are therefore ordered to remove all nitro-cellulose products by December 15, 1925."

and

WHEREAS, the building is fireproof, 12 stories in height, triangular in plan, having frontage of 105 ft. 10½ in. on Sixth avenue, 115 ft. 6½ in. frontage on Cornelia street and 9 ft. 4 in. frontage on West 4th street; OCCUPIED as a tenant factory, principally for the manufacture of celluloid articles, about 25 persons on each story; EQUIPPED with a standpipe system, a sprinkler system and a fire alarm signal system; one outside fireproof stairway and one inside fireproof stairway, extending from ground to roof; and

WHEREAS, the appellant, who occupies the 9th story, contends that he has conducted his business on the premises since 1917, under permits issued by the fire department; that he carries 5,000 pounds of cellulose in an approved vault on the roof; that only 50 lbs. of cellulose is in the working state at any one time; that all requirements of law are complied with.

Resolved, that the order of the fire commissioner, No. 31363-LC, be and it hereby is modified, and that the appeal be and it hereby is granted, only so far as it affects the 9th floor, on condition that the amount of celluloid stored on said 9th floor shall not exceed one hundred pounds, and that the celluloid work, occupancy and use shall be in accordance with the rules and regulations of the fire department and code of ordinances in all other respects.

THE RESOLUTION:

(1209-25-A)

WHEREAS, National Bridge Works, owner, filed, November 21, 1925, an appeal from an order of the fire commissioner, affecting premises north side of Young street, 274 ft. east of Review avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated November 4, 1925, reads (Order No. 86105-F):

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient length of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, one story (33 ft.) in height, 136 ft. by 83 ft. (approximately 10,700 sq. ft.) in area; OCCUPIED for structural steel fabrication, 7 persons; and

WHEREAS, applicant contends that the building is provided with many large exits; that it is available to the fire department from all sides; that the nature of the work is not hazardous and that there are two city fire hydrants in the immediate vicinity.

# MINUTES

*Resolved*, that the order of the fire commissioner, No. 86105-F, be and it hereby is *modified*, and that the appeal be and it hereby is *granted on condition* that the present use and occupancy and operation of business conducted on the premises remain substantially unchanged.

THE RESOLUTION:

(1210-25-A)

WHEREAS, National Bridge Works, owner, filed, November 21, 1925, an appeal from an order of the fire commissioner, affecting premises No. 100 Review avenue, Borough of Queens; and

WHEREAS, the order of the fire commissioner, filed November 4, 1925, reads (Order No. 86104-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

WHEREAS, the building is non-fireproof, two stories (38 ft.) in height, 153 ft. by 229 ft. (approximately 22,000 sq. ft.) in area. OCCUPIED: 1st story, structural steel fabrication, 50 persons; 2nd story, template shop and drafting room, 12 persons; and

WHEREAS, appellant contends that there is no hazard in the nature of the work done; that owing to the operation of the shop, many large exits have been provided; that the building is accessible to the fire department on all sides and that there are three city fire hydrants in the immediate vicinity.

*Resolved*, that the order of the fire commissioner, No. 86104-F, be and it hereby is *modified*, and that the appeal be and it hereby is *granted*, only so long as the use and occupancy of the premises be restricted to the present business conduct and use, and the building be not increased in height, area, and *on condition* that the drafting room be equipped with not less than two 2½-gallon approved fire extinguishers.

THE RESOLUTION:

(148-26-A)

WHEREAS, Charles H. May, for Jacob May Realty Company, owner, filed, February 19, 1926, an appeal from an order of the fire commissioner, affecting premises 323 Kosciusko street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated October 3, 1924, read:

Order No. 64633-F:

"1. Install an automatic dry pipe sprinkler system on 1st story used for the storage and manufacture of paper boxes, having at least one source of water supply, arranged and equipped as provided in the Rules for Fire Extinguishing Appliances adopted by the Board of Standards and Appeals, May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.

Order No. 64634-F:

"1. Provide iron or kalameined shutters at all openings in the exterior wall above the 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east and west sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances."

and

WHEREAS, the building is non-fireproof, three stories (30 ft.) in height, 25 ft. by 100 ft. in area. OCCUPIED: 1st story, box manufacture, 12 persons; 2nd story, electroplater, 5 persons; 3rd story, glass beveler, shoe manufacturer, 7 persons; and

WHEREAS, the fire commissioner has requested an early hearing of this appeal; and

WHEREAS, the appellant contends, with regard to Order No. 64633-F, that the box manufacturer is a temporary tenant; he further proposes to provide fire hose, fire pails and fire extinguishers; the appellant contends, with regard to Order No. 64634-F, that he is also the owner of the one-story adjoining building, and therefore the building does not require shutters as called for.

*Resolved*, that the orders of the fire commissioner be and they hereby are *modified*, and that the appeal be and it hereby is *granted*, as to Order No. 64633-F, *on condition* that the paper box manufacturing be restricted to the 1st story of the three-story section, and that said paper box manufacture occupancy shall be discontinued and that portion of the premises vacated on or before May 1, 1926, and that not less than two approved fire extinguishers shall be provided and maintained on the premises in the meantime; and that the appeal be and it hereby is *granted*, as to Order No. 64634-F, *on condition* that the windows on the course of the fire escape be equipped in accordance with the requirements of the labor law.

## THE VOTE TO AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(1545-23-A)

WHEREAS, Wm. F. Doyle, for Garland Automobile Co., lessee, filed, December 28, 1923, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 41-3 West 63rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 21233-C, dated November 30, 1923, reads:

"1—Discontinue the maintenance of a motor vehicle repair shop on third story of above premises.";

and

WHEREAS, the building is fireproof, three stories in height, 50 ft. by 100 ft. in area. OCCUPIED: 1st story, auto sales and show room, garage for more than five motor vehicles; 2nd story, storage of old and new automobiles, garage for more than five motor vehicles; 3rd story, auto repairs (minor adjustments); the building is located in a business district; and

WHEREAS, the fire department contends the occupancy of the premises is contrary to the certificate of occupancy issued by the superintendent of buildings; and

WHEREAS, appellant contends there is no power driven machinery used on the premises, with the exception of a small electric hand drill, and that auto parts that are broken or worn out are replaced and the repairing done are only minor manual repairs incidental to the operation of a garage business, and appellant further contends that there is no gasoline storage system on the premises; and

WHEREAS, this appeal was granted by the board at its meeting February 19, 1924, and the resolution modified at the meeting February 23, 1926, on certain conditions, and appellant requested a further modification of these conditions as to occupancy.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the operation of any machinery shall be limited to a 5 horsepower motor for the operation and power of not more than four 1/2-in. drills and four 1/2-in. lathes and such other light tools incidental to and used in the operation, adjustment and setting of taxi meter machines, restricted to the 3rd story only, and that the business conducted in conjunction with and the entire premises shall comply with the requirements of the labor law, and that the occupancy shall not exceed the legal capacity permitted by certificate of occupancy issued by the bureau of buildings.

## THE RESOLUTION:

(1297-25-BZ)

WHEREAS, John J. Friend, for Schlatter Embroidery Company, owner, filed, December 15, 1925, an application, under building zone resolution, to permit in a residence district the erection and maintenance of an additional building on a lot occupied for manufacturing purposes since 1913; premises 911 Longfellow avenue, Borough of The Bronx;

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, March 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Longfellow avenue is in a residence district; that Bryant avenue is in a residence district; that Seneca avenue is in a business district, and that Madison avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 27, 1925, reads:

"1. Proposed extension of factory building in residence district is contrary to provisions of Building Zone Resolution."

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 48 ft. and a depth of 100 ft.; to be occupied as an embroidery factory; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7-a of the building zone resolution, due to the fact that the property and business concerned thereon has been under one ownership since 1913.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed structure shall be limited in height to a one-story building; that the rear and gable walls shall be unadorned throughout their entire height and length; that the exterior of the front elevation shall be finished, as to texture, material and design as the existing building in the same ownership; that the use and occupancy shall be restricted to an extension of the present use and business of the premises under appeal; all permits necessary for the execution of the work shall be obtained within ninety (90) days and the building completed within six (6) months from the date of this action.

1297-25-BZ.

APPLICANT—Henry Vollmer, Jr., for Jamaica Water Supply Co., owner.

SUBJECT—Application (re: decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used as a water supply pumping station.

PREMISES AFFECTED—Northeast corner of 214th street and 89th avenue, Queens Village, Borough of Queens.

## APPEARANCES—

For Applicant: Cohn Koehendorfer and Cornelius J. Keily.

Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1149-25-BZ)

WHEREAS, Henry Vollmer, for Jamaica Water Supply Company, owner, filed, November 9, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used as a water supply pumping station; premises northeast corner 214th street and 89th avenue, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that both 214th street and 89th avenue are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered October 23, 1925, reads:

"1. The erection of the proposed structure is contrary to Art. 2, Section 3 of the Building Zone Resolution."

and

WHEREAS, the building is to be of non-fireproof construction, one story in height, with a frontage of 20 ft. and a depth of 26 ft.; to be occupied as a water supply pumping station; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution, and that this pumping station is adjacent to the local community water supply system, a public necessity and need.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure shall be limited to a one-story building in height, to be set back not less than 24 ft. from the building line on 214th street and 89th avenue, and that the exterior of the building on four (4) sides shall be of face brick with not more than one window opening on each side and with not more than one door to the premises; the window openings to be of brick architrave and circular head; that the plant shall be electrically operated, no furnace or smoke developing apparatus to be permitted on the premises; that the westerly and easterly plot line shall be enclosed in heavy gauge metal wire fence; that the street front shall be finished with box wood hedge and that the entire plot shall be laid out in grass lawn and no other structure to be permitted on the premises; all permits necessary for the prosecution of the work to be obtained within sixty (60) days and the work involved completed within ninety (90) days.

the building shall not exceed a depth at the easterly line of the plot from 167th street of 150 ft.; that the exterior face of the easterly and southerly walls shall be finished with light-colored face brick; that the front elevations on 167th street and Sheridan avenue shall be finished with face brick, with architectural terra cotta or stone trimmings; that there shall be no signs, billboards or advertising display erected or maintained within the residence area of the plot nor on any portion of Sheridan avenue; the main entrance of the theatre shall be restricted to the 167th street front of the building; the building to be constructed in accordance with section 25, article 5, of the code of ordinances; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

226-25-BZ.

APPLICANT—William F. Doyle, for Harold J. Levine, owner.

SUBJECT—Application (re: decision of superintendent of buildings) under sections 7c and 21 of the building one resolution, to permit the extension, from a business district into a residence district, of a proposed business building (warehouse).

PREMISES AFFECTED—377-383 Dahill road, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Murray Spett.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(1226-25-BZ)

WHEREAS, William F. Doyle, for Harold J. Levine, owner, filed, November 24, 1925, an application, under the building one resolution, to permit the extension from a business district into a residence district of a proposed business building (warehouse); premises 377-383 Dahill road, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 16, 1926, after due notice by publication in the bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Dahill road is in a residence district; that Cortelyou road is in a business district, and at Gravesend avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 17, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Sec. 3.

"The erection of a storage warehouse extending into a residential district.";

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 60 ft. on Dahill road, 80 ft. on Gravesend avenue, and a depth of 200 ft.; to be occupied as a warehouse; a portion 60 ft. x 100 ft. is in the residence district; and

WHEREAS, the board deemed the applicant was entitled to relief under sections 7c and 21 of the building zone resolution and as a means of access to the corner plot.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that

the application be and it hereby is *granted on condition* that the building shall be restricted to a one-story structure in height (not exceeding 16 ft.) above grade; that the use and occupancy shall be restricted to the use, conduct and operation of a storage warehouse; that any openings on the Dahill road frontage shall be restricted to windows, the sills of which shall be not less than 5 ft. above the sidewalk grade; that there shall be one door opening on Dahill road, 3 ft. 8 in. in size, to be located in the center of the building; that there shall be no storage of automobiles of any nature or description nor under any condition permitted on the premises; that there shall be no gasoline storage equipment installed and no gasoline or volatile oils stored or maintained on the premises; that the front elevation on Dahill road, Gravesend avenue and the railroad right-of-way shall be finished in light-colored face brick with architectural terra cotta or stone trimmings; that the northerly gable wall on Dahill road and the twenty (20' 0) foot easterly jog thereof shall be unpierced throughout its entire height and length; that there shall be no signs of any nature or description erected on the Dahill road front of the property; and that all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

## CASES DISMISSED

### *Appeals from Administrative Orders.*

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(244-25-A)

Filed March 2, 1925—Premises 305-313 West 58th street and 6 Columbus Circle, Manhattan. Order of the superintendent of buildings. Appellant, Michael Bernstein. Dismissed for lack of prosecution.

(849-25-A)

Filed August 20, 1925—Premises 43 West 143rd street, Manhattan. Order of the fire commissioner. Appellant, Estate of James McLaughlin. Dismissed for lack of prosecution.

(895-25-A)

Filed September 2, 1925—Premises 326 Boulevard, Long Island City, Borough of Queens. Order of the fire commissioner. Appellant, Pressed & Welded Steel Products Co. Dismissed for lack of prosecution.

(978-25-A)

Filed September 22, 1925—Premises 2-30 Lorraine street, Brooklyn. Order of the fire commissioner. Appellant, The P. H. Gill & Sons Forge & Machine Works. Dismissed for lack of prosecution.

THE VOTE TO DISMISS FOR LACK OF PROSECUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

WHEREAS, the foregoing appellants have filed appeals with the board of standards and appeals from orders affecting the premises in question; and

WHEREAS, the appellants have failed to complete the papers, though duly notified to do so.

Resolved, that the foregoing appeals be and they hereby are *dismissed* for lack of prosecution.

## CASES DISMISSED

### *Under the Building Zone Resolution.*

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(149-25-BZ)

Filed February 4, 1925—Premises 437-451 Prospect avenue, Brooklyn. Decision of the superintendent of buildings. Applicant, Richard H. Smythe. Dismissed for lack of prosecution.

(676-25-BZ)

Filed June 30, 1925—Premises 41-43 East 149th street, The Bronx. Decision of the superintendent of buildings. Applicant, Croker National Fire Prevention Engineering Co. Dismissed for lack of prosecution.

(851-25-BZ)

Filed August 21, 1925—Premises northwest corner of Cortelyou road and East 16th street, Brooklyn. Decision of the superintendent of buildings. Applicants, Magnuson & Kleinert. Dismissed for lack of prosecution.

(861-25-BZ)

Filed August 25, 1925—Premises 168-170 Decatur street, Brooklyn. Decision of the superintendent of buildings. Applicant, Denis M. Hurley. Dismissed for lack of prosecution.

(866-25-BZ)

Filed August 26, 1925—Premises southwest corner of East 179th street and Boston road, The Bronx. Decision of the superintendent of buildings. Applicant, William Kampel. Dismissed for lack of prosecution.

### THE VOTE TO DISMISS FOR LACK OF PROSECUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

### THE RESOLUTION:

WHEREAS, the foregoing applicants have filed applications with the board of standards and appeals from orders affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

*Resolved*, that the foregoing applications be and they hereby are *dismissed* for lack of prosecution.

## AREAS FIXED (996-25-BZ)

The chairman presented and read a communication from Croker National Fire Prevention Engineering Co. requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 24-6 Stagg street, Brooklyn.

The following area was approved by the board:

Both sides of Stagg street from Lorimer street to Union avenue, and also the premises at the rear and for a distance of 50 ft. on either side of the side lot lines of premises in question.

(1134-25-BZ)

The chairman presented and read a communication from Edward P. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 290-292 Ellery street, 861-863 Park avenue, Brooklyn.

The following area was approved by the board:

Both sides of Ellery street, also both sides of Park avenue from Broadway to a point 200 ft. west of Sumner avenue; also the easterly side of Sumner avenue from Park avenue to Ellery street.

(20-26-BZ)

The chairman presented and read a communication from Walter B. Wills requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 1219-1223 Putnam avenue, Brooklyn.

The following area was approved by the board:

Both sides of Putnam avenue from Central avenue to a point 100 ft. west of Evergreen avenue, also the property at the rear and for a distance of 50 ft. each side of the side lot lines of the property in question.

(137-26-BZ)

The chairman presented and read a communication from William F. Regan requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 8224-8226 18th avenue, Brooklyn.

The following area was approved by the board:

Both sides of 18th avenue from New Utrecht avenue to a point 400 ft. east of premises in question; both sides of 83rd street and also 82nd street from 18th avenue to a point 200 ft. south of 84th avenue; the east side of 84th street from 18th avenue to New Utrecht avenue; also all properties fronting on right of way.

THE RESOLUTION:

(1117-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Charles W. Strohbeck, Inc., owner, filed, October 29,

1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 309-29 Johnson street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 20, 1925, reads (Order No. 83891-LD):

"1. Remove the substandard fire escapes, 2 on the north side and 2 on the west side of the 4-story building, or reconstruct same as per Sec. 274 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted May 9, 1924. Among the defects noted are the following:

"1—Windows on course not fireproof, self-closing.

"2—No drop ladder in guides from lowest balcony to ground.

"3—No stairway—top balcony to roof.

"4—No 60 degree connecting stairway on 2 fire escapes at southeast corner of court."

and

WHEREAS, the building is non-fireproof, four stories in height, "L"-shape in area, having a frontage of 100 ft. on Leo place and a frontage of 100 ft. on Johnson street. OCCUPIED: On the 1st story by a silversmith and also a brush manufacturer, 18 persons; upper stories being occupied for the manufacture of shoes, approximately 25 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior wooden stairways extending from 1st to top story, enclosed in brick and also in metal-lined wooden partitions with wooden (and also some iron) doors at openings; two fire escapes with non-fireproof windows along the course thereof, on the northerly wall, one with small balconies and vertical ladders and the other a 60 degree fire escape, extending from the roof to the 2nd story balcony, with drop ladder to open yard; two fire escapes with non-fireproof windows along the course, on the westerly wall, one with small balcony and vertical ladders and the other a 60 degree fire escape extending from the main roof to the roof of a one-story building (under the same occupancy and ownership) with egress from roof of one-story building by means of iron ladder to open yard; EGRESS from yard to street being by means of a driveway in an adjoining building to street; ROOF of adjoining buildings to north 12 ft. higher, to west 2 stories lower; and

WHEREAS, petitioner proposes to remove the two vertical ladder fire escapes, and requests permission to retain the 60 degree fire escapes with non-fireproof windows along the course thereof.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the two smaller fire escapes shall be removed and the two larger fire escapes shall be equipped with 60 degree connecting stairs from lowest balcony to the roof that a sprinkler head be provided in front of each window the maximum distance from any opening to any head not exceed 54 in.; and granted on further condition that a counterbalanced drop ladder in guides shall be provided from lowest balcony of fire escapes to the ground, with egress direct from the yard to the street through open driveway and that the building shall not be increased in height, area or dimension, so long as conditions otherwise as to use and occupancy shall remain unchanged.

1227-25-S.

PETITIONER—Royal Baking Powder Co., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—47-53 South 5th street, Brooklyn.

## THE RESOLUTION:

(1227-25-S)

WHEREAS, Royal Baking Powder Company, owner, filed, November 25, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 47-49-51-53 South 5th street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 12, 1925 (Order No. 80002-LD), reads:

"1. Arrange the fire escape on rear of building No. 51-3 and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"2. Provide an interior stairway at the south side of building to serve as a required means of exit, extending from first story to roof, with a safe passageway to the street, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

nd  
WHEREAS, the building is non-fireproof, four stories in height, 80 ft. by 87 ft. and 35 ft. 6 in., irregular, in depth, about 4,900 sq. ft. in area. OCCUPIED: 1st story, office, laboratory, 5 persons; 2nd story, filling, 17 persons; 3rd story, screening, 1 person; 4th story, compounding gelatin, persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; two fire escapes on the rear of the building, gooseneck ladders to roof, having fireproof openings along the course thereof, extending from top story to the yard level; with EGRESS from the termination of the fire escape on rear of westerly wing by means of open yard to South 4th street, and from fire escapes on rear of easterly wing by means of fireproof stairways to South 5th street; ROOFS of adjoining buildings 25 ft. lower at west, same level at east; and

WHEREAS, the petitioner contends that the occupancy is small, that a gooseneck ladder is provided from the top balcony of rear fire escape leading to the roof; that the area of the easterly wing of the building is only 1,420 sq. ft.; that the existing exits are adequate; he has also filed a copy of Certificate of Occupancy No. 6006 of 1925, dated May 25, 1925, which permits the building in question to be used as a tenant factory.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a horizontal exit shall be provided between the two sections of the building on each story, and that the stairs of the exterior fire escape be continued from the top story balcony to the roof; and granted on further condition that the building be not increased in height, area or dimension, and that it be maintained in accordance with the certificate of occupancy issued by the superintendent of buildings.

46-25-S.

PETITIONER—David M. Jones, for Flam H. Fuller, et al., owners.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

## THE RESOLUTION:

(1146-25-S)

WHEREAS, David M. Jones, for Elam H. Fuller, et al., filed, November 6, 1925, a petition for variation from the requirements of the labor law, as cited in order of fire commissioner, affecting premises 414-416 West Broadway, Manhattan; and

WHEREAS, the order of the fire commissioner, No. 76537-LD, dated May 6, 1925, reads:

"1. Remove the substandard fire escape on the front of the building or reconstruct same as per Section 274 of Labor Law and Rule 3 of Board of Standards and Appeals adopted May 9th, 1924.

"Among the defects noted are the following: Windows on course not fireproof, self-closing. No drop ladder in guides from lowest balcony to street.

"2. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following: Windows on course not self-closing. Stairway not continued to yard. No fireproof passageway to street."

and

WHEREAS, the building is non-fireproof, four stories in height, 50 ft. by 69 ft. 10 in. in area at the 1st story and 50 ft. by 64 ft. 10 in. in area above; OCCUPIED as a tenant factory, 8 persons on each story. EXITS: An interior wooden stairway extending from the 1st story to the roof; enclosed in brick walls with fireproof doors at openings; a sub-standard fire escape at front; a fire escape on the rear of the building having fireproof openings along the course thereof, extending from the main roof to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of iron steps up to roof of 1st story extension of building adjoining at north; ROOFS of adjoining building one story lower at south, one story higher at north; and

WHEREAS, the petitioner proposes to comply with Item 1 of Fire Department Order No. 76537-LD by removing the substandard fire escape at front; re: to item 2 of said order, the petitioner contends that the egress from rear fire escape is adequate; that the windows on the course of rear fire escape are now fireproof and self-closing; that on June 4, 1913, the fire department approved the present means of egress from rear fire escape and filed a copy of their approval, also a copy of their certification to the superintendent of buildings.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1, on condition that the fire escape shall be retained and that the windows on the course of same shall be fireproof, and that a drop ladder in guides shall be provided from the lowest balcony to the ground; that self-closing fireproof door shall be provided on all stories connecting

# MINUTES

with the interior enclosed stairs; *granted*, as to Item 2, only so far as it affects the egress from the termination of the fire escape on the rear of the building, *on condition* that 45 degree iron steps connecting the lowest balcony of fire escape to the roof of the adjoining premises to the north shall be provided; and *granted on the further condition* that the occupancy shall not exceed twenty-five persons above the 1st story.

THE RESOLUTION:

(1012-25-S)

WHEREAS, Charles D. Thompson, trustee of Estate of Charles Thompson and Mary E. Thompson, owner, filed, October 2, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 42-44 West 39th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated June 10, 1925, read:

Order No. 79720-LF:

"An inspection of premises 42-4 West 39th Street, Borough of Manhattan, shows that the following must be done to comply with Section 279 of the Labor Law:

"1. Install an adequate interior electric fire alarm system in accordance with the rules of the Board of Standards and Appeals and the enclosed approved layout."

Order No. 79722-LD:

"1. Arrange the fire escape on the west side of buildings and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals or carry out a proper alternative method of complying with Section 271 of the Labor law.

"NOTE: Among the defects noted on this fire escape are the following: Windows on course not fireproof nor self-closing. Not screened to a height of 4 ft. 6 in. No steps to sills of openings on course. No safe passageway to the street from the termination. Not accessible to all occupants on second to sixth story inclusive.

"2. Enclose the interior stairway at front of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the cellar to 3 feet above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

Order No. 79723-LD:

"1. Provide exit signs, letters to be at least 8 in. in height, at all means of egress with a red light over all

such exits for use in time of darkness, as per Section 272 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, six stories height, 40 ft. by 98 ft. 9 in. in area. OCCUPIED: 1st story, shoemaker and beauty parlor, 27 persons; 2nd story, perfumes and beauty parlor, 5 persons; 3rd story and 4th story, studios and offices, 13 persons on the two stories; 5th story, offices, dyeing, 10 persons; 6th story, dental laboratory and wigs, 9 persons. EXITS: An open interior steel frame and slate stairway, extending from the 1st story to roof; a fire escape on the west wall of the building to west yard court, having non-fireproof openings along the course thereof, extending from the top story to the corner level; with EGRESS from the termination of the fire escape by means of an iron stairway from second story balcony to fire escapes of buildings adjoining at south and also east; ROOFS of adjoining buildings same level at east, 8 ft. lower at west; and

WHEREAS, the petitioner filed plans showing that the 1st story balcony of the west yard court fire escape connected by means of an iron stairway 18 in. in width with the corner side stairway on the rear of building adjoining at south, also with fire escape on rear of building adjoining at east, he proposes to remove the building from the factory category by changing the occupancy so that the labor law will apply.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the manufacturing use or occupancy at the first story shall be discontinued on or before October 1, 1926, and that the existing manufacturing use or occupancy shall not be increased in the meantime.

471-25-S.

PETITIONER—York Realty Company, Inc., owner.

THE RESOLUTION:

(471-25-S)

WHEREAS, York Realty Company, Inc., owner, filed, October 4, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 615-619 Tenth avenue and 501-503 West 44th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 31, 1925 (Order No. 74867-LD) reads:

"1. Arrange the fire escapes on the north side of building and the openings leading thereto and the windows on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"NOTE:—Among the defects noted are the following: No 45 degree stairway from lowest balcony to west yard. No fireproof passageway from termination of fire escape to street. Windows on course not self-closing.

# MINUTES

"2. Remove the substandard fire escape on the east side of building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, amended May 9th, 1924.

"NOTE:—Among the defects noted are the following: Windows on course not fireproof, self-closing. No 60 degree connecting stairway.";

and

WHEREAS, the building is non-fireproof, three stories in height, 75 ft. by 100 ft. and 50 ft., irregular in depth, about 5,500 sq. ft. in area. OCCUPIED: 1st story, stores; 2nd and 3rd stories, manufacture of fancy metal work, 17 persons on both stories; EQUIPPED with a fire alarm signal system. EXITS: Two interior wooden stairways, extending from the 1st story to roof, the northerly stairs enclosed in wooden partitions and the southerly stairs enclosed in fire-retarding partitions, with fireproof doors at openings; a sub-standard fire escape in court on the west side of the building; a fire escape in court on the north side of the building, having fireproof openings along the course thereof, extending from 2nd story to the 3rd story, a gooseneck ladder to roof, an iron ladder to ground; with EGRESS from the termination of the fire escape by means of a non-fireproof driveway leading to 44th street; ROOFS of adjoining buildings 5 ft. lower at west, same level at north; and

WHEREAS, the petitioner contends, with regard to Item No. 1 of Order No. 74867-LD, that the windows on the course thereof are self-closing; that the existing exit facilities are adequate as they stand.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1 (Order No. 74867-LD), only so far as it affects the stairway from the lowest balcony to the yard, on condition that a fixed iron stairway of not less than 60 degrees shall be provided from the lowest balcony to the yard level, and that egress from the termination at the yard shall be maintained through an open driveway direct to 44th street; and granted on the further condition that the fire escape shall comply with the labor law in all other respects; and that the petition, as to Item 2 (Order No. 74867-LD) be and it hereby is denied.

1231-25-S.

PETITIONER—Herbert Wilson, for Northwest 39th Street Corporation, owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—323-5-7 West 39th street, Manhattan.

APPEARANCES—

For Petitioner: William G. Walters.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(1231-25-S)

WHEREAS, Herbert Wilson, for Northwest 39th St. Corporation, owner, filed, November 28, 1925, a petition for variation from the requirements of the labor law, as cited in the decision of the superintendent of buildings, affecting premises Nos. 323-5-7 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated November 28, 1925, reads (N. B. 297-25, Applic. No. 297):

"11. Fireproof windows should be provided to comply with Section 264 of Labor Law and Rule 503

of Industrial Code. No light of glass should exceed 720 square inches in area.";

and

WHEREAS, the building is fireproof, 12 stories in height, 75 ft. 10 in. by 98 ft. 9 in. in area. OCCUPIED: 1st story, stores; upper stories, light manufacturing, approximately 125 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; and

WHEREAS, there are windows in the front wall of the building on the 1st story, glazed with  $\frac{1}{4}$  in. plate glass; the maximum size of the glass being 8 ft. 6 in. by 8 ft. 8 in. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the 1st story.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows of the 1st story on the street front, on condition that these openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects

1246-25-S.

PETITIONER—Charles J. Nehrbas, for Eagle Improvement Co., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—134-40 West 26th street, Manhattan.

APPEARANCES—

For Petitioner: Charles J. Nehrbas.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(1246-25-S)

WHEREAS, Charles J. Nehrbas, for Eagle Improvement Co., owner, filed, December 4, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 134-40 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 5, 1925, reads (Order No. 86831-LD):

"1. Extend the interior stairway at the east side of building to the roof, as per Sec. 271 of the Labor Law, said extension and the landings and passageways connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 3 ft. above the roof, as per Sec. 271 and 272 of the Labor Law and Rule 2 of the Industrial Code.";

and

WHEREAS, the building is fireproof, 12 stories in height, 84 ft. by 100 ft. in area at 1st story and 84 ft. by 92 ft. in area above; OCCUPIED as a factory building, for the manufacture of coats, suits, furs and dresses; 70 persons on each story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, the westerly stairway extending from the 1st story to roof, the easterly stairway extending from 1st story to top story, enclosed in fireproof partitions with fireproof doors at openings; an exterior stairway on the rear of the building, having fireproof openings along the course thereof, extending from top story to the 1st story, fireproof passageway leading to the interior stairway, thence to 26th street through entrance hall; the exterior fireproof stairway connects at 12th story with the exterior fireproof stairway on the rear of premises adjoining at west, the latter stairway extends to the roof; ROOFS of adjoining buildings 3 ft. lower at west, 30 ft. lower at east; and

# MINUTES

WHEREAS, the petitioner contends that the building is fireproof, erected prior to 1913; that in the year 1919 the bureau of fire prevention rescinded a similar requirement of the labor department, to extend the easterly stairway to the roof; that it would be a serious hardship to the owner if compelled to comply with the order, due to the close proximity of the bulkheads housing the pressure tank and elevator machinery on the roof above the easterly stairway.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

21-26-S.

PETITIONER—W. L. Rouse & L. A. Goldstone, for 15 East 53rd Street Corporation, owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—15 East 53rd Street, Manhattan.

APPEARANCES—

For Petitioner: Herbert Lau.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(21-26-S)

WHEREAS, W. L. Rouse and L. A. Goldstone, for the 15 East 53rd Street Corporation, owner, filed, January 7, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 15 East 53rd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered December 23, 1925, reads:

"5. Provide two exits remote from each other as per Section 270-3 of Labor Law.

"6. Provide two exits from cellar.

"7. Width of vestibule and exit doors leading to street may be not less than aggregate width of all stairways leading to same (Section 270-5 of Labor Law). Fireproof stair enclosure in first story should be continued to building line.

"9. Front and rear windows should be fireproof windows as per Sec. 264-7 of Labor Law and Rule 503 of Industrial Code. Show complete compliance with same.";

and

WHEREAS, the building is fireproof, nine stories in height, 25 ft. by 97 ft. 4½ in. in area on the 1st story and 25 ft. by 90 ft. ½ in. above. OCCUPIED: Cellar, storage; 1st story, stores, 30 persons; 2nd to 9th stories, loft, offices and showrooms, with 25 per cent manufacturing, 30 persons per story, the building being equipped with a sprinkler system; the means of egress consisting of two interior stairways, adjoining each other in a central shaft with landing on the 1st story, one in the open corridor and the other in the open vestibule leading to street; the means of egress from the cellar consisting of an interior stairway leading to the 1st floor store; and

WHEREAS, the petitioner contends that the access doors to the stairways are 25 ft. apart; owing to the small area of the building the doors to the stairs on the rear are 28 ft. from the rear and at the front 45 ft. from the front wall; that the area of the cellar is less than 1,800 sq. ft. and that the cellar is only used for storage; that the vestibule is an open one with no doors at street; the partition between vestibule and store will be of metal and wire glass; that the vestibule is only 14 ft. in length and the opening to street is 4 ft. 9 in. in width; that the occupancy of the

building will be small, approximately one-quarter of the capacity of the stairs, and petitioner requests acceptance of the plate glass of large area in the show windows on the 1st and 2nd stories and the center window in the street front in the 3rd to 9th story, inclusive.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION:

(147-26-S)

WHEREAS, Charles H. May, for Jacob May Realty Company, owner, filed, February 19, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 323 Kosciusko street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated September 12, 1924 (Order No. 64630-LD), reads:

"1. Provide an interior stairway at the north side of building to serve as a required means of exit, extending from 1st story to the roof, with a safe passageway to the street, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"2. Arrange the fire escape on the south side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted are the following: Windows on course not fireproof, self-closing. Doors on course not fireproof, self-closing. Rusted, required two coats of paint.";

and

WHEREAS, the building is non-fireproof, three stories (3 ft.) in height, 25 ft. by 100 ft. in area. OCCUPIED: 1st story, box manufacture, 12 persons; 2nd story, electro plating, 5 persons; 3rd story, glass beveler, shoe manufacture, 7 persons; EQUIPPED with a fire alarm signal system. EXITS: A sub-standard fire escape on the front of the building; and

WHEREAS, the fire commissioner has requested an early hearing of this petition; and

WHEREAS, the petitioner proposes to use the existing openings in the rear wall leading to 850 DeKalb avenue in lieu of complying with Order No. 64630-LD.

*Resolved*, that the board of standards and appeals do hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as Item 2, only so far as it affects the windows on the course of fire escape, on condition that this section of the building shall not be increased above the 3rd story structure, and that

# MINUTES

an exterior iron stairs with solid risers, treads and platforms shall be maintained structurally safe and painted, and *granted* only so long as the use and occupancy remain substantially unchanged other than the paper box manufacturing, which shall be discontinued on or before May 1, 1926; and that the petition, as to Item 1, be and it hereby is *denied*.

Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(1091-25-S)

WHEREAS, John J. Gilmartin, for Louis F. Rhoades, et al., owner, filed, October 26, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 9 North Moore street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 10, 1925, reads (Order No. 84971-LD):

"1. Enclose the interior stairway at the west side of building, serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3 ft above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"2. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following: Windows on course not fireproof, self-closing. No steps from floor to sills opening on balconies. Not screened to height of 4 ft. 6 in. No 45 degree connecting stairways. No counterbalanced stairway from lowest balcony to ground. No fireproof passageway to street."

and  
WHEREAS, the building is non-fireproof, six stories in height, 24 ft. by 72 ft. in area at 1st story and 24 ft. by 37 ft. in area above; OCCUPIED for the manufacture of mirrors, 13 persons above the 1st story. EXITS: An interior wooden stairway, extending from the 1st story to roof; enclosed in wooden lath and plastered partitions with wooden doors at openings; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from main roof to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of a bridge connecting with the rear 2nd story balcony on No. 10 Beach street, and a drop ladder to vacant lot adjoining at west; ROOFS of adjoining buildings 30 ft. lower at east, vacant lot at west; and

WHEREAS, the petitioners contend that there is no inflammable or combustible material on the premises, and that there are only 16 persons in the entire building; and

WHEREAS, this petition was granted by the board at its meeting January 12, 1926, on certain conditions, and petitioner requested a modification of these conditions as to egress from the termination of the fire escape.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 2, only so far as it affects windows on top floor and egress from the termination at the 2nd story, *on condition* that a connected bridge shall be provided at the termination of the fire escape, connecting with the balcony fire escape of premises directly at rear, No. 10 Beach street; that the lowest balcony on No. 9 North Moore street shall be extended to the west with counterbalanced drop ladder in guides from the lowest balcony of the existing fire escape on rear of 9 North Moore street to the open lot or parking space; and *granted* so long as conditions as to occupancy and use remain unchanged; as to Item 1, the petition be and it hereby is *denied*.

THE RESOLUTION:

(1278-25-SA)

WHEREAS, the Empire Valve Company filed, December 10, 1925, a petition for approval of their device known as the Empire Gas Shut Off Valve; and

WHEREAS, a committee of the board inspected this device in operation at 143 Montague street, Brooklyn, and recommended the approval of the device on certain conditions.

Cal. No. 1278-25-SA

Approval of—Empire Gas Shut Off Valve  
March 15th, 1926.

REPORT OF COMMITTEE:

On March 5th the entire Board, as a committee of inspection, accompanied by Assistant Engineer Huber, visited the premises 143 Montague Street, Brooklyn, in the matter of this petition for the approval of a gas shut off device known as the Empire Gas Shut Off Valve. The valve was set up at the gas main in actual operation.

The Assistant Engineer of the Board has made his report, which is attached hereto, describing the construction and operation of the device.

This device has already been approved by the Fire Underwriters Laboratory, which approval is on file in this petition, and the Board recommends the approval of this device as meeting the requirements of the rules of this Board, and as a guide and direction to the administrative officials having jurisdiction in its installation and maintenance, specifically directs that the metal box enclosing the valve shall of not less than 12 gauge metal and that the front of this metal box shall be perforated for not less than 50 per cent of the area, with holes of not less than 1/4 inch in diameter and that the sides, bottom and top shall also be perforated with not less than 1/4 inch holes, to permit the full diffusion of heat under conditions for which the requirement of these gas shut off devices were promulgated in the Code of Ordinances.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
HENRY L. CONNELL,  
JAMES P. HOLLAND,  
JOHN GUILFOYLE.

*Resolved*, that the board of standards and appeals does hereby approve of the device known as the Empire Gas Shut Off Valve when installed in accordance with the gas shut off rules and the report of the committee of inspection.

## \*CORRECTION.

The minutes of the meeting of the board of standards and  
appeals, held Tuesday, March 9, 1926, as they appeared in  
Bulletin No. 11, Vol. XI, are hereby corrected to read as  
follows:

(924-25-BZ)

WHEREAS, Goodhue Livingston, for Empire City Sav-  
ings Bank, owner, filed, September 11, 1925, an application,  
under the building zone resolution, to permit the omission  
of a lawful rear yard as provided for in section 17 of the  
building zone resolution; premises 219-231 West 125th  
street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application  
before the board of standards and appeals, at its regular meet-  
ing, March 9, 1926, after due notice by publication in the  
Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the build-  
ing zone resolution show that West 125th street is in a  
business use and also a "B" area district; and

WHEREAS, the decision of the superintendent of buildings,  
dated July 13, 1925, reads:

"1. A lawful rear yard should be provided as per  
Section 17 of the Zone Resolution."

*Correction—Word "use" omitted in line 11 and inserted  
in line 13, and word "use" changed to "area" in line 34.*

WHEREAS, the existing one-story fireproof building, oc-  
cupied as a bank, is 50 ft. by 89 ft. 11 in. in area; the  
main portion of the building being 50 ft. by 70 ft. 2 in.  
in area and one clerestory (41 ft.) in height; at the rear  
there is a one-story and mezzanine portion about 23 ft.  
high; it is proposed to construct an additional story upon  
this rear portion, thereby forming, at the northwest cor-  
ner of the proposed addition, a portion of the structure  
10 ft. by 17 ft. in area and 14 ft. 6 in. high, within the  
limits of the legally required rear yard; and

WHEREAS, the board concluded that there were practical  
difficulties and unnecessary hardship in the way of carry-  
ing out the strict letter of the building zone resolution,  
and that applicant should be granted relief under section 21.

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* in the application of the area dis-  
trict regulations of the building zone resolution, and that  
the application be and it hereby is *granted on condition* that  
the extension shall not exceed a height of 14 ft. 6 in. above  
the existing rear extension, and shall be restricted in area  
and dimensions to a depth of 10 ft. and a width of 17 ft.  
5 in.; that the rear and westerly gable walls shall be un-  
pierced throughout their entire height and length; and that  
all permits necessary for the prosecution of the work shall  
be obtained within nine months and the building completed  
within eighteen months from the date of this action.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals,  
March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meet-  
ing, December 16, 1919, unanimously rescinded an opinion  
previously expressed and incorporated in a resolution  
adopted by the board on May 28, 1917, in acting on Cal.  
No. 549-17-BZ. This opinion was that a laundry is not a  
permitted use in a business district under the building zone  
resolution. The board unanimously rescinded this expres-  
sion of opinion, inasmuch as a laundry is a factory within  
the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any  
definition therein to the contrary.

*Resolved*, that this shall not be construed to include  
within the prohibited uses specified under Section 4 of  
the building zone resolution a community or neighborhood  
laundry located in the basement or ground floor of a  
building within a business district and containing not more  
than eight (8) rotary washing machines with inside cylin-  
ders not more than 30 in. in diameter by 30 in. in length  
over all nor more than two 20 in. extractors, the 20 in.  
measurement being the diameter of the inside basket, which  
machines and extractors shall be operated solely by elec-  
tric power and do not require the installation of steam  
boiler or plant.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO RULES GOVERNING FIRE EXTINGUISHING APPLIANCES— SPRINKLER SYSTEMS.

[77-25-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals on Friday, March 26, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Rules for Fire Extinguishing Appliances, Sprinkler Rules.

*General Requirements.* The rules contained herein cover the general details of a sprinkler equipment only. Before an equipment is installed or before a present equipment is remodeled, complete working plans should be submitted for approval to Fire Department.

These plans shall be drawn to an indicated scale; give correct address and points of compass; show sectional elevations of the building; and the essential features of the construction, viz., size, location and direction of joists, timbers or other structural members. They shall also indicate the location and size of water supplies, connecting pipes, feed mains and risers, gate, check, alarm and dry-pipe valves, as well as the location, spacing, number and type of sprinklers.

Upon approval of preliminary plans such number of sets of clean, corrected plans on cloth as the Fire Commissioner may require, not exceeding three (3), shall be filed for final approval of the Fire Commissioner. A certified copy of the approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If a standpipe (fire line) equipment is provided throughout the building, the plans shall include a note to that effect.

When entirely completed in accordance with the approved plans and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the sprinkler equipment is approved the applicant will be so advised in writing by the Bureau of Fire Prevention.

All sprinkler equipments shall be installed in a thoroughly workmanlike manner.

**Rule 1. Definition of Automatic Extinguisher Systems.** Automatic extinguisher systems shall consist of a system of piping connected to one or more acceptable sources of water supply, or other extinguishing medium, provided with distributing devices so arranged and located as to discharge and diffuse automatically under the action of heat an effective stream or spray over every part of the interior of the building area in which a fire may start or to which it may be communicated.

**Rule 2. Classification of Sprinkler Systems.** For the purpose of these rules, sprinkler systems shall be classified as:

(a) Automatic Wet Pipe Systems, in which all pipes and sprinkler heads are at all times filled with water;

(b) Automatic Dry Pipe Systems, in which the pipes and sprinkler heads are filled with air, either compressed or at atmospheric pressure, and the water supply is operated by a Dry Pipe Valve as defined in Rule 27 of these Rules.

(c) Non-Automatic Systems, in which all pipes and sprinkler heads are maintained dry with a fire department connection for water supply.

Thermostatic fire alarm with direct connection to Central Office or Fire Department Headquarters shall be provided in connection with all non-automatic sprinkler systems.

**Rules 3. Approved Devices.** Automatic Sprinklers and accessory appliances shall include all devices approved as such by the Bureau of Standards, Washington, D. C.; by the Underwriters' Laboratories, Inc., of Chicago; by the Associated Factory Mutual Laboratories of Boston; and all devices which meet the tests prescribed by the Board of Standards and Appeals.

**Rule 4. Water Supply.** Approved sources of water supply shall be classified as Automatic and Auxiliary.

(a) Automatic Sources shall include the Gravity Tank, the Pressure Tank, [and] the Public Water System, and the Automatic Electric Fire Pump, installed as required under the provisions of Rule 8, hereinafter provided for.

(b) Auxiliary Sources shall include the non-automatic Fire Pump and the Fire Department Connection.

**Rule 5. Gravity Tank.** Gravity tanks shall contain a available quantity of water sufficient to supply twenty-five per cent (25%) of the number of sprinkler heads in the average protected fire area for twenty (20) minutes, but not less than 5,000 gallons; and the bottom of the tank shall have an elevation of not less than twenty (20) feet above the highest line of sprinklers below the main roof. Where the area of a pent house exceeds 2,500 sq. ft. the bottom of the tank shall be required to be not less than 20 feet above the highest line of sprinklers below the pent house roof, but where a pent house contains only pressure tanks this rule will not apply.

Where a tank capacity in excess of [25,000] 30,000 gallons is required by this rule, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Standards and Appeals, except where tanks of unlimited capacities are supported on structures altogether independent of buildings.

The tank shall be filled through a fixed pipe, independent of the sprinkler piping, not less than two (2) inches in size, discharging into the top of the tank, through a by-pass not less than two (2) inches in size around the check valve in the discharge pipe, provided the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute.

The filling pipe shall be carried up inside a frost-proof casing and may extend through tank bottom to discharge at top of tank above full water level. The portion of pipe inside tank must be of brass or copper or other non-corrosive material.

Tanks shall not be fed through sprinkler lines.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, provided that there are separate feed mains from the basement or lowest story and a control valve in each feed line in a pump or engine room.

The overflow pipe shall be not less than two (2) inches in diameter for tanks up to 30,000 gallons capacity and not less than three (3) inches in diameter for larger tanks. The top of the overflow pipe shall be three (3) inches below the top of the staves in wooden tanks and one (1) inch from the top in steel tanks. The pipe may extend through the bottom of tank provided the portion inside tank is of brass or copper or other non-corrosive metal and without joints or it may extend through side of tank. For tanks over roofs overflow pipes shall terminate not more than twenty-four (24) inches above roof and shall be fitted with a 90 degree elbow.

The discharge, heating or filling pipes where exposed to the weather shall be protected from freezing by a frost-proof covering which may be of three layers of one-inch (1") hair felt interspersed with building paper well wrapped and secured and covered with canvas well painted or frost-proof boxing as specified by the National Board of Fire Underwriters.

Easy access to top of each tank shall be provided means of a steel gooseneck ladder substantially constructed and rigidly braced, the top of which shall not tip outward from the vertical at any point.

Tanks above roofs shall be constructed according to the requirements of the Building Code and supporting structure.

# PUBLIC HEARING

tures shall be approved by the Superintendent of Buildings. Tanks not enclosed and exposed to the weather shall be covered with a double roof of acceptable construction consisting of a tight flat cover of matched boards and above this a conical roof which shall be covered with an approved roofing.

Where a gravity tank may supply both sprinklers and yard hydrants it shall not be of less than 30,000 gallons capacity and located on a structure altogether independent of buildings and the bottom shall not be less than 75 feet above the ground level, and not less than 20 feet above the highest line of sprinklers below the main roof of the highest building in a group of buildings.

Rule 6. Pressure Tank. Pressure tanks shall contain sufficient water to supply twelve and one-half per cent (12½%) of the number of sprinklers in the average protected fire area for twenty (20) minutes, but not less than [5,000] 3,000 gallons of water for a wet pipe system where supplemented by an auxiliary water supply, and not less than 5,000 gallons of water for a dry-pipe system. No single tank shall have a capacity greater than 9,000 gallons. The tank shall be kept two-thirds (2/3) full of water under a pressure of seventy-five (75) pounds per square inch, and shall be so proportioned and located that a pressure of not less than fifteen (15) pounds per square inch will be available on the highest line of sprinklers below the main roof when all the water has been discharged from the tank.

[The tank shall be placed either on the roof or in the highest sprinklered story.]

A pressure tank or tanks shall not be located below the highest line of sprinklers supplied by tank or tanks.

Where [a tank] the total capacity of the pressure tank supply is in excess of [25,000] 30,000 gallons as required by this rule, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Standards and Appeals.

The water shall be supplied through a fixed pipe, independent of the sprinkler piping, not less than [two] one and one-half (1½) inches in size [with a one and one-quarter (1¼) inch connection to the tank], or through a bypass not less than [two (2)] one and one-half (1½) inches in size around the check valve in the discharge pipe provided the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute without reducing the pressure in the tank. The tank shall have a fixed metallic horizontal line at the end opposite the glass gauge, or other acceptable device, to indicate the level of the water when the tank is two-thirds full.

The air compressor shall be of sufficient capacity to increase the air pressure at the average rate of one (1) pound in two minutes in each pressure tank.

Rule 7. Public Water System. Direct connection to the city water supply shall be capable of furnishing water at not less than fifteen (15) pounds per square inch static pressure at the highest line of sprinklers under the main roof.

Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each connection shall be as large as that of the main riser and not less than four (4) inches, and shall have a conveniently accessible control valve fixed to it at, or near, the curb, or, when possible, still further away from the building. The control valve shall be fitted with a frost and waterproof box, not less than four (4) feet nor more than six (6) feet below the curb, with a fixed stem extending to a compartment at the level of the sidewalk. The cover shall be bolted to the casing and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be of the indicating pattern, operated by a special socket wrench approved by the department of water supply, gas and electricity.

Where it is impractical to install a control valve box at the curb because of a vault under the sidewalk and within 18" thereof, the control valve may be located in the water supply connection at a point not more than two (2) feet from the point of entry into a vault.

Where a water meter is required in the water supply connection to an automatic sprinkler equipment, it shall be of a type which allows free flow of water and approved by the Department of Water Supply, Gas and Electricity, or a type of fire line meter which has been specifically approved by the Fire Commissioner for use in connection with fire extinguishing equipment.

Evidence establishing the fact that water supply conditions and pressures are as may be required shall be submitted to the Fire Department.

Rule 8. Fire Pump. An automatic electric fire pump as an automatic source of water supply is one approved for such use and controlled by an approved automatic controlling device, which shall be adjusted to maintain not less than 15 pounds water pressure at the highest sprinkler below main roof and in pent houses over 2,500 sq. ft., as provided in Rule 5. And shall receive water supply only from a direct connection to the city water main.

As auxiliary sources of water supply steam or electric standard fire pumps shall receive water supply from a suction tank, a direct connection to the city water main or other approved sources capable of supplying the pump at its rated capacity for sixty (60) minutes. The rated capacity of the pump shall be not less than five hundred (500) gallons per minute, and shall be sufficient to supply twenty-five per cent (25%) of the number of sprinklers in the average protected fire area.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

A reliable source of energy for driving the pump shall be provided. For steam pumps, provision shall be made for sufficient steam power to operate the pumps at full rated capacity, and a steam pressure of not less than fifty (50) pounds shall be maintained at the pump at all times. Where there is more than one boiler, the pipes and valves shall be so arranged to permit the cutting out of any one boiler without interrupting the steam supply to the pump from the other boilers. The boiler room shall be cut off from the remainder of the building by fireproof floor and wall construction with approved fire doors at all openings.

Electrical energy from a public service plant shall be acceptable as a source of energy for driving electric fire pumps. When local power plants supply the energy for operating electric pumps, two motor generator units shall be provided, or one generator unit supplemented by a public service break-down switch. Local electric power plants shall be located in rooms of fireproof construction with approved fire doors at openings.

Rule 9. Sprinkler Discharge. For the purpose of computing the capacity of water supplies, standard one-half (½) inch sprinkler heads shall be assumed to have an average discharge of twenty (20) gallons per minute, and the discharge of larger heads shall be computed proportionately in the ratio of the areas of their respective orifices.

Rule 10. Fire Area. A fire area is any floor space enclosed on all sides by exterior walls or fire walls or a combination of both. The number of sprinklers in the average protected fire area shall be determined by the number of sprinklered stories in such section. In

# PUBLIC HEARING

determining the required capacity of water supplies, the number of sprinklers in the average protected fire area need not include those located in low positions, such as under benches, low shelves, closets and platforms and between cars in car barns.

Rule 11. Fire Department Connection. All automatic sprinkler systems shall be provided with at least one two-way Siamese connection on each street front of the building for connection to the fire department hose. Buildings fronting on only one street shall be provided with at least two Siamese connections when the street frontage of building exceeds [one hundred and fifty (150)] *two hundred (200)* feet [in width].

*Where buildings have frontages on more than one street there shall be a fire department connection on each street front where frontage is not continuous but in all cases where more than one fire department connection is required they shall be located as the Fire Commissioner may direct and shall not be grouped.*

All Siamese hose connections hereafter installed, except those on piers or warehouses intended for fire boat use, shall be three (3) inches in size. Fire boat connections shall be three and one-half (3½) inches in size. All hose connections shall be female, with standard fire department threads.

The inlets shall be placed at least eighteen (18) inches and not more than two (2) feet above the sidewalk, in a horizontal position accessible to the fire department, and shall be provided with a four (4) inch discharge connecting with a four (4) inch pipe to the sprinkler system for three (3) inch fire department connection and with a six (6) inch discharge outlet and six (6) inch pipe for three and one-half (3½) inch fire boat connection. Each inlet shall be provided with a clapper valve machined to a true face.

Each Siamese connection shall be designated by raised letters at least one (1) inch in size, cast in the fitting in a clear and prominent manner and reading for the service designated, viz.: "Base. Spkr.," etc., as the case may be. If the entire building is sprinklered, the fitting shall be marked "Auto. Spkr."

*Siamese hose connections may project through a street wall not more than twelve (12) inches beyond the building line except that where there is an angle formed by the street wall and a check piece or the base of a column, pilaster or ornamental projection, they may be so located that no part extends more than fifteen (15) inches from either side of such angle in accordance with the provisions of the Building Code.*

*In each fire department connection there shall be an approved straightway check valve installed in a horizontal position, unless suitably designed for vertical position, and the piping shall be arranged to drain between the check valve and the outside siamese coupling by either a ball drip having a one-half (½) inch pipe connection and one-half (½) inch orifice and a bronze ball of proper size, or by a three-quarter (¾) inch drip connection, with plugged valve attached, and when necessary arranged to drain to a sewer. A drain connection may be tapped into the body of check valve only when located in a horizontal position.*

Rule 12. Automatic Sprinkler Systems. Automatic sprinkler systems shall be classified as:

(a) One Source Systems, supplied with water from any one of the automatic sources; and

(b) Two Source Systems, supplied with water from a combination of any two of the automatic sources; two pressure tanks with a total water capacity twice that required for a one source supply; direct connection to the city water supply on two different streets, so located that the closing of the controlling valve on one main will not eliminate the main on the other street; or a direct connection to the city water supply and one of the auxiliary sources provided the water supply main is at least six (6) inches in size, the main is fed both

ways and a two (2) inch test pipe at the top of the sprinkler riser shows a flowing pressure of fifteen (15) pounds per square inch between the hours of six a. m. to six p. m.

*A gravity tank and pressure tank, or a gravity tank and pressure tank and one of the automatic sources or two pressure tanks having a total water capacity for a one source supply may be considered as a two-source supply where the occupancy of the building does not conflict with Rules 38, 39 and 40 hereinafter provided for.*

Rule 13. Sprinkler Spacing. Sprinkler heads and lines shall be spaced as herein provided:

Mill Construction. Under mill ceiling (smooth solid plank and timber construction, 5 to 12 foot bays) one line of sprinklers shall be placed in the center of each bay and the distance between the heads on each line shall not exceed the following:

- (a) For Standard one-half (½) inch heads—
  - 8 feet in 12 foot bays;
  - 9 feet in 11 foot bays;
  - 10 feet in 10 foot bays;
  - 11 feet in 9 foot bays;
  - 12 feet in 5 to 8 foot bays;
- (b) For Conran\* one (1) inch heads—
  - 20 feet in 5 to 12 foot bays.
- (c) For Conran\* one and one-quarter (1¼) inch heads—
  - 25 feet in 5 to 12 foot bays.
- (d) Vaults used for the storage of nitro-cellulose products and vaults used for the storage of inflammable motion picture films shall have on standard one-half (½) inch head for each 62½ cubic feet of available storage space, or one (1) inch Conran\* head for each 250 cubic feet of available storage space.

Measurements shall be taken from center to center of timbers.

Ceilings of modified mill construction having bay less than three (3) feet wide shall be treated as open joist construction and sprinkler heads and lines spaced accordingly.

Bay timbers spaced three (3) feet or more on centers, but less than five (5) feet on centers, will require special ruling by the administrative official having jurisdiction.

Joisted Construction. Under open finish joisted construction ceilings, floor, decks and roofs, the sprinkler lines shall be run at right angles to the joists and the heads "Staggered spaced" so that heads on one line will be opposite a point half way between heads on adjacent lines.

(a) For Standard one-half (½) inch heads the distance between lines of sprinklers shall not exceed ten (10) feet and the distance between heads on each line shall not exceed eight (8) feet, the end heads on alternate lines being spaced not more than two (2) feet from wall or partition. Permission may be given by the administrative official having jurisdiction to install but one line of sprinklers, in each bay where girders project below the under side of joists and divide the ceiling into bays ten (10) to eleven and one-half (11½) feet wide from center to center of girders, and the heads shall then be spaced on each line so that the area covered by a single head does not exceed eighty (80) square feet. In all cases where such bays are over eleven and one-half (11½) feet wide, two or more lines of sprinklers shall be installed in each bay as required by the rules for spacing.

\*Wherever the term "Conran head" is used in these Rules, it is to be taken as meaning either a Conran head of the type tested and approved by the Fire Department, or one that has passed similar tests by the Fire Department.

# PUBLIC HEARING

Where girders and joists are flush at the bottom, heads shall be spaced according to the general rule.

(b) For Conran\* one (1) inch heads the distance between adjacent lines shall not exceed twenty (20) feet and the distance between the heads on each line shall not exceed sixteen (16) feet, the end heads on alternate lines being spaced not more than four (4) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty (20) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty (20) feet in width at least two (2) lines shall be installed in each bay and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads the distance between adjacent lines shall not exceed twenty-five (25) feet and the distance between the head on each line shall not exceed twenty (20) feet, the end head on alternate lines being spaced not more than five (5) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty-five (25) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty-five (25) feet in width at least two (2) lines shall be installed in each bay, and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

Smooth Finish, Sheathed or Plastered Ceilings. Under smooth finish, sheathed or plastered ceilings, in bays six (6) feet wide and over (measurements to be taken from center to center of timber, girder or other projection or support forming the bay), sprinkler heads and lines shall be spaced as follows:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twelve (12) feet in width, and the distance between the heads on each line shall not exceed the following:

- 8 feet in 12 foot bays;
- 9 feet in 11 foot bays;
- 10 feet in 6 to 10 foot bays.

Bays in excess of twelve (12) feet in width and less than twenty-three (23) feet in width, shall contain at least two (2) lines of sprinklers; bays twenty-three (23) feet in width or over shall have the lines therein not over ten (10) feet apart. In bays in excess of twelve (12) feet in width, not more than one hundred (100) square feet of ceiling area shall be allotted to any single head.

(b) For Conran\* one (1) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty (20) feet in width, and the distance between the heads on each line shall not exceed twenty (20) feet. Bays in excess of twenty (20) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty-five (25) feet in width and the distance between the heads on each line shall not exceed twenty-five (25) feet. Bays in excess of twenty-five (25) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

Fireproof Construction. The rules of slow-burning construction shall apply as far as practicable. The rules may be modified, however, the intent being to arrange the spacing of heads to protect the contents rather than the ceilings; but in no case shall the distance between a head on one line and a head on an adjacent line exceed the following:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads, 12 feet.

(b) For Conran one (1) inch heads, 20 feet.

(c) For Conran one and one-quarter ( $1\frac{1}{4}$ ) inch heads, 25 feet.

Distance From Walls. The distance from wall or partition to the first head on a sprinkler line shall not exceed one-half the allowable distance between the heads on such line. Additional heads may be required in the narrow pockets formed by bay timbers or beams and wall. Where beams, girders, columns, walls, partitions or other obstructions prevent the effective discharge of water, additional heads shall be installed to effectively sprinkle the area.

Vertical Shafts. In vertical shafts having inflammable sides, heads shall be provided within the shaft in addition to the head or heads at the tops of shafts, as follows:

(a) One standard one-half ( $\frac{1}{2}$ ) inch head for each 200 square feet of inflammable surface.

(b) One Conran\* one (1) inch head for each 400 square feet of inflammable surface.

(c) One Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch head for each 500 square feet of inflammable surface.

Such head or heads shall be installed at each floor when practicable, and always when shaft is trapped. Where practicable, heads shall be "staggered" at the alternate floor levels, particularly when only one head is installed at each floor level.

Pitched Roofs. Under a pitched roof sloping more steeply than one (1) foot in three (3) feet, heads shall be located in peak of roof, and those on either side of the peak shall be spaced according to the foregoing requirements. The distance between heads shall be measured on a line parallel with the roof. Where the roof meets the side wall or the floor line, the heads shall be placed not more than the following distance from such intersection:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $3\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 7 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $8\frac{1}{2}$  feet.

Heads spaced not to exceed the following distance each way from the peak of roof, measured on a line parallel with the roof, may be used in lieu of heads located in peak of roof:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

In sawtooth roof construction, the end heads on the branch line shall be spaced not to exceed the following distance from the peak of the sawtooth:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.

(b) For Conran\* one (1) inch heads, 5 feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

Special Locations and Variations. In special locations, such as over electric generating, power and transforming apparatus, over their controlling devices and switchboards, where water from the fire extinguishing equipment would be detrimental, the sprinkler lines and heads may be omitted at the discretion of the administrative official having jurisdiction, and when in his judgment a slight variation of this rule of spacing is desirable to effect a more efficient distribution of water for fire extinguishing purposes, the sprinkler lines and heads shall be spaced as he may direct.

Rule 14. Sprinkler Position. All sprinkler heads shall be located, wherever possible, in an upright position on top of the pipes, except that sprinkler heads on automatic wet pipe systems may be pendant on concealed piping and when construction or occupancy of a room or enclosure makes it preferable.

(a) Where standard one-half ( $\frac{1}{2}$ ) inch heads are installed sprinkler deflectors shall be parallel to ceilings, roofs or the

# PUBLIC HEARING

incline of stairs, but when installed in the peak of a pitched roof they shall be horizontal. Distance of deflectors from ceilings of mill or other smooth construction, or bottom of joists of open joist construction, shall be not less than three (3) inches nor more than ten (10) inches.

In fireproof buildings, the distance between deflectors and panel ceilings shall not exceed fifteen (15) inches.

Not less than eighteen (18) inches effective clear space shall be left below the sprinkler heads, so that they may discharge an unbroken spray blanket from sprinkler to sprinkler and sides of room when in operation. Any stock piles, racks or other obstructions interfering with such action shall not be permitted. *Sprinkler system piping shall not be used for the support of stock, clothing, etc.*

(b) Where Conran\* heads are installed, the top of head shall be located the same distance below joists or ceiling as specified for deflectors in paragraph (a) of this rule; except that when heads are located under pitched roofs of piers or similar structures, they shall in general be installed in the upright position (not normal to slope of roof) and three (3) feet vertically below the underside of roof. When the administrative official having jurisdiction deems a variation of this rule advisable to obtain a more efficient distribution of water, the heads shall be located with respect to joists or ceiling, as he may direct.

Rule 15. Pipe Sizes. The number of heads on a given size pipe in one fire area in any story shall not exceed the following:

(a) For standard one-half (1/2) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
3/4 inch	1 head
1	2 heads
1 1/4	3 "
1 1/2	5 "
2	10 "
2 1/2	20 "
3	36 "
3 1/2	55 "
4	80 "
5	140 "
6	200 "
7	300 "
8	420 "

(b) For Conran\* one (1) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 inch	1 head
1 1/4	2 heads
1 1/2	3 "
2	4 "
2 1/2	6 "
3	9 "
4	18 "
5	34 "
6	51 "
7	75 "
8	105 "

(c) For Conran\* one and one-quarter (1 1/4) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 1/4 inch	1 head
1 1/2	2 heads
2	3 "
2 1/2	4 "
3	6 "
4	12 "
5	21 "
6	40 "
7	60 "
8	84 "

When it is desired to use pipe of larger size than eight (8) inches in diameter, special ruling will be required by the administrative official having jurisdiction as to the permissibility of its use and the number of heads that may be fed thereby.

Where practicable, it is desirable to arrange the piping so that the number of heads on a branch line will not exceed eight.

When the piping is arranged on the "gridiron" plan, the permissible number of heads may be doubled, provided the feed main is of the size indicated in the schedule for the total number of heads.

Where feed mains supply branch lines of only two heads each, the conditions approach those of long single lines. Such feed mains shall usually be centrally supplied where there are over eight (8) or ten (10) branch lines. Branch lines up to fourteen (14) in number may be fed from end, provided a two and one-half (2 1/2) inch pipe does not supply more than sixteen (16) standard one-half (1/2) inch heads in lieu of twenty (20).

Buildings having slatted floors, or large unprotected floor openings without approved stops, shall be treated as one room with reference to the pipe sizes, and the feed main shall be of sufficient size to accommodate the number of heads called for. Larger pipe sizes than are allowed in the schedule for a given number of heads may be required wherever the construction or conditions introduce unusually long runs of feed mains or many angles. Buildings with blind attics with small unprotected openings to floor below, may be piped from the system on the ceiling of floor below, provided pipe size schedule is not overloaded on sizes three (3) inches or under.

Rule 16. Feed Mains. The size of feed mains shall not be less than the size of riser and shall be arranged to run as direct as possible from source of water supply to riser.

Feed mains for stair or other towers without approved stops between floors, when piped on independent riser, shall be of sufficient size to accommodate the total number of sprinklers in such tower.

Rule 17. Risers. There shall be one or more separate risers in each building and in each section of the building divided by fire walls. Risers shall be arranged to provide "Center Central" or "Side Central" supply to feed main. Each riser shall be of sufficient size to supply all the head on said riser in one story, according to the schedule of pipe sizes in Rule 15.

In buildings of fireproof construction, and for the purposes of this rule, a blank wall, or one in which the opening are protected by standard fire doors, may be considered as a fire wall, if of equivalent construction.

If the conditions warrant, special permission will be granted allowing the heads in a fire section of small area to be fed from the risers in another section, provided the total number of heads in such area does not exceed the following number per floor:

(a) For standard one-half (1/2) inch heads, 48.

(b) For Conran\* one (1) inch heads, 12.

(c) For Conran\* one and one-quarter (1 1/4) inch heads,

Risers shall not be located close to windows, properly protected from mechanical injury and freezing and shall be properly supported on foundations and by floor plates, clamp couplings or hangers.

No connections, such as for sill cocks, house service hose outlets, shall be made with a sprinkler system riser or any part thereof.

Where gravity and pressure tanks feed through a common discharge pipe or "dead riser" to the foot of a riser and an air lock is likely to develop the discharge pipe of the gravity tank shall connect with the discharge pipe, or "dead riser" forty (40) feet below the bottom of the pressure tank.

# PUBLIC HEARING

Rule 18. Pipes and Fittings. All pipe shall be full-weight standard wrought iron or steel threaded pipe, well reamed and screwed up tight into fittings without reducing the waterway. Fittings shall be standard cast iron fittings, and shall be long turn pattern on feed mains and risers.

Such fittings shall be designed and guaranteed for a working pressure of 150 pounds per square inch and must be capable of withstanding a hydrostatic test pressure of 750 pounds per square inch without failure.

All pipe shall be secured to the ceiling, walls and other parts of the building with standard steel, wrought or malleable iron hangers.

Extra heavy fittings shall be employed where the normal pressure in the pipe system exceeds one hundred and fifty (150) pounds per square inch, and shall be designed for a working pressure of 250 pounds per square inch and be capable of withstanding a hydrostatic test pressure of 1,250 pounds per square inch without failure.

All underground pipe shall comply with the specifications for cast iron pipe of the American Water Works Association.

Rule 19. Protection of Pipes and Sprinklers. When exposed to moisture, sprinkler pipes and hangers shall be protected against corrosion whenever found necessary by thoroughly cleaning the pipe of all scale and grease and painting with a coat of red lead and linseed oil paint or other acceptable moisture resistive paint. When exposed to chemical fumes, the pipe and fittings shall be coated with graphite or other approved chemical resistive paint. Care shall be taken not to paint the sprinkler heads.

Supply pipes of risers in low basements or low spaces under ground floors exposed to frost, shall be properly protected by a masonry or wood enclosure, properly heated, or lined with mineral wool, sawdust or tar mixed with granulated cork, extending below bottom of pipe and through the flooring of ground floor, or the pipe shall be protected with three alternate layers of one-inch hair felt and building paper or by other approved method. When of wood, such enclosure shall be constructed double with a layer of paper between the two thicknesses of wood.

Where risers, drains, heating pipes, etc., pass through concrete floors or partitions, they shall be protected with a metal sleeve or be grouted with cement mortar.

Wherever sprinklers are exposed to corrosion, the heads shall be protected with an approved hermetically sealed cover, with an approved wax coating.

Rule 20. Drainage. All sprinkler pipe and fittings shall be so installed that they can be thoroughly drained, and where practicable, all piping shall be arranged to drain at the main drips.

Drains or drip pipes shall be so arranged as not to expose any part of the sprinkler system to frost, and shall be so connected, either by check valves or other means, that they will not [overthrow] overflow domestic service or other connections to the same sewer or house drain, or if carried through the wall and exposed to the weather, they shall be fitted with hoods or down-turned elbows.

Drains, pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet, shall be installed:

- At the base of the main riser;
- At each alarm valve;
- At each dry-pipe valve;
- At each gravity tank;
- At each pressure tank.
- At each fire department connection;
- On each floor, if independent floor control valves are used;

At each supply main, when the water in the same can be removed through any of the above drains. Such drains shall be installed with controlling valves so that flow-tests may be made to determine if the water supplies connections from yard mains to the inside of the build-

ing are in order without causing water damage or overflowing service connections to the same house drain. Any such drain shall be not less than two (2) inches in size except that drains at independent floor valves [may be one and one-quarter ( $1\frac{1}{4}$ ) inches in size] shall be not less than 1 inch in size where floor valves are not over  $2\frac{1}{2}$  inches in size and  $1\frac{1}{4}$  inches where floor valves are larger, and connected to a main drain riser of not less than  $1\frac{1}{2}$  inches in size. The drain at the main riser shall discharge into a cone or sight drain, or if carried through the wall and exposed to the weather, it shall be fitted with a hood or down-turned elbow.

*At an alarm valve at the top of a riser in a down-fed system a drain shall not be required.*

*At each gravity or pressure tank erected above roof of a building there shall be a 4-inch valved drain connection so arranged as to discharge on roof of building. And where a tank is on a separate structure altogether independent of buildings drain connection to be arranged to discharge at ground level.*

On automatic wet pipe systems, the horizontal branch pipes shall be pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet to drain towards the sources of supply with drip valves at the low points.

On automatic dry-pipe systems, branch pipes shall be pitched at least one-half ( $\frac{1}{2}$ ) inch in ten (10) feet.

Rule 21. Test Pipe. [On] In all wet-pipe automatic sprinkler systems a test pipe of not less than  $\frac{3}{4}$  inch in diameter shall be connected directly with each [riser] system but shall be connected to a pipe of not less than  $1\frac{3}{4}$  inches in diameter in upper story and arranged to discharge, through a  $\frac{1}{2}$ -inch brass outlet, preferably to a point where it can readily be seen. With long runs or many angles, size of test pipe [shall] should be increased to one (1) inch or larger. Controlling valve should be located at a sufficient distance from where the test pipe passes through the wall of the building so as to reduce to a minimum the chance of freezing of water in test pipe.

*In all dry-pipe automatic sprinkler systems a  $\frac{3}{4}$ -inch inspector's test pipe shall be installed at the end of the most distant branch line and fitted with a  $\frac{3}{4}$ -inch shut-off valve stopped with a brass plug.*

Rule 22. Pressure Gauges. A four and one-half ( $4\frac{1}{2}$ ) inch double-spring Bourdon pressure gauge shall be provided in all automatic sprinkler systems as follows:

- Above dry-pipe valves;
- Below dry-pipe valves;
- At the pressure tank;
- At the air compressor;
- Above the alarm valve;
- Below the alarm valve; and

In the connections from city water supply.

Provision may be made for taking the pressure both above and below the alarm valve and the dry-pipe valve with only one gauge at each valve.

*A gauge shall not be required at an alarm valve located at the top of a riser in a down-fed system.*

Gauge connections shall be taken from the supply main or riser and not from the two-inch drain or test pipe.

Gauges shall be installed in a suitable place protected from freezing and be controlled by a valve with arrangements for draining. A plugged outlet, not less than one-quarter ( $\frac{1}{4}$ ) inch in size, shall be located between each valve and gauge for purpose of installing the inspector's gauge.

Rule 23. Valves. All valves two (2) inches in diameter and under shall be of brass or bronze, or other approved [non-corrodible] non-corrosive material. Valves over two (2) inches in diameter shall be of brass, or bronze or iron body, brass mounted, or of other approved [non-corrodible] non-corrosive material.

All sidewalk Siamese inlet valves, caps and chains shall be of galvanized cast iron or other approved [non-corrodible] non-corrosive material.

# PUBLIC HEARING

All gate valves shall be solid or double wedge disc, sufficing box pattern with hand wheel, outside screw and yoke, or other approved indicator pattern.

All check valves shall be approved straight way regrinding pattern, so built that the clappers may be readily removed for repairs.

**Rule 24. Water Supply Gate Valves.** The piping connecting each source of water supply with the sprinkler system shall be provided with a gate valve of the outside screw and yoke type, sealed open and tagged to designate its purpose, so located as to control each source of water supply except that from fire department hose connections. All such gate valves shall be located within the building where easily visible and readily accessible and as close as possible to the supply inlet.

**Rule 25. Water Supply Check Valves.** The piping connecting each source of water supply with the sprinkler system, including fire department connections, shall be provided with a check valve.

On two-source systems, check valves shall have a gate valve on each side to permit repair of check without shutting off both supplies, except that where the two sources of supply consist of tanks located above the highest line of sprinklers, a gate valve need only be provided on the downstream side of each check valve.

**Rule 26. Control Valves.** All automatic sprinkler systems shall be provided with a **main control or shutoff valve** arranged to be readily accessible and sealed in the open position; except that when the sprinkler system is fed from water supplies on the roof of the building, independent and readily accessible floor control valves, sealed in the open position, may be installed.

When not more than ten (10) standard one-half ( $\frac{1}{2}$ ) inch sprinkler heads or three (3) Conran\* heads in any automatic wet pipe system are exposed to cold and subject to freezing, shutoff valves may be provided to discontinue the water supply to such heads between November 1 and April 1. A greater number of heads than specified above, located in places which cannot be properly heated, shall be controlled by an automatic dry-pipe valve.

**Rule 27. Dry-Pipe Valves.** A dry-pipe valve shall be taken to mean a valve automatically controlling the water supply of the sprinkler system in such a manner that under normal conditions its piping system beyond the valve is maintained dry, but in the event of fire, the valve automatically releases the water into the sprinkler system, for fire extinguishing purposes.

Dry-pipe valves shall, for the purpose of these rules, be classified as follows:

Type A, in which the valve is actuated by the release of compressed air in the sprinkler piping system, due to the opening of a sprinkler head; and

Type B, in which the valve is actuated by an approved trip under electric control of an approved automatic thermostatic fire alarm system.

Dry-pipe valves shall be located as near as practicable to the sprinkler system in an enclosed and accessible place protected from mechanical injury and freezing.

*When anti-columning pipes are used, they shall be either lead lined or of brass.*

Automatic wet-pipe sprinkler systems in which only twenty-five (25) per cent of the heads are required to be maintained dry for protection from freezing, shall have only such heads under dry-pipe valve control.

(a) When "Type A" valve is installed, the air pressure in sprinkler systems under such dry-pipe valve control shall not exceed forty (40) pounds per square inch, nor be permitted to fall below twenty-five (25) pounds per square inch, nor shall it be less than one-sixth ( $\frac{1}{6}$ ) of the water pressure in any case.

The air compressor shall have a capacity of not less than eleven (11) cubic feet per minute and the air supply to the pump shall be taken, if possible, from a room containing dry air, or it shall be passed through a drying chamber containing calcium chloride, in order to avoid the introduction of moisture into the system.

The air pressure on such dry-pipe systems shall be maintained throughout the year.

Not more than the following number of heads shall be controlled by one "Type A" dry-pipe valve:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

*Where equipped with an approved quick-opening device, the following number of heads may be controlled by one "Type A" dry-pipe valve:*

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

(b) When "Type B" valve is installed the actuating alarm system shall be designed to operate at a temperature lower than that required to open the sprinkler heads, and all connections between the alarm system and the dry-pipe valve shall be adequately protected against injury of any kind.

When required by the administrative official having jurisdiction, the dead end of every feed main in such dry-pipe system shall be provided with an air relief valve or vent so constructed as to be normally open in order to permit the free escape of air from the system, but to close automatically against the escape of water.

Not more than the following number of heads shall be controlled by one "Type B" dry-pipe valve:

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

**Rule 28. Alarm Valve.** All automatic wet pipe sprinkler systems shall be equipped with an alarm valve so constructed that a flow of water through a one-half ( $\frac{1}{2}$ ) inch or larger will operate an electric or mechanical gong.

Dry pipe valves shall be equipped with a reliable device to give either an electrical or mechanical alarm.

**Rule 29. High and Low Water and Pressure Alarm.** Gravity tanks shall be equipped with a device to indicate when the water falls below or rises above the normal level in the tank, with an indicator or alarm located in the engine room near the pump.

All pressure tanks shall be equipped with a device to indicate when the pressure in the tank falls below seventy (70) or rises above eighty (80) pounds per square inch with an indicator or alarm located in the engineer's room [near the compressor].

**Rule 30. Heating of Tanks.** The water in all sprinkler tanks subject to freezing shall be protected by interlocking heating the water or enclosing the tank in a frost-proof house properly heated and lighted.

**Rule 31. Concealed Pipe Systems.** All pipe in concealed pipe systems shall be of standard full-weight wrought iron or steel, painted with two coats of protective paint, one before and one after installation. Such pipe shall be installed in ducts or be encased in cement mortar and shall be inspected prior to concealment. When installed in concealed space between floor arches and ceiling, such pipe shall be supported by hangers and all pipe, fittings and hangers be protected with two coats of paint.

**Rule 32. Preparation of Building.** Floor or wall coverings and other structural defects which prevent the buildup of heated air and retard the automatic action of sprinkler heads shall be provided with the necessary curtain boards and draft stops to permit specific control of the air by the local sprinklers.

Curtain boards shall project at least three (3) inches below the lowest sprinkler.

# PUBLIC HEARING

Rule 33. *Approval of Sprinkler System [Tests]. Before acceptance all automatic sprinkler systems, excluding the water supply tanks, shall be subjected after installation to a hydrostatic pressure of a test of at least fifty (50) pounds per square inch in excess of that which will be normally tried and observed in the sprinkler system, such test pressure, however, never to be less than one hundred and twenty (120) pounds per square inch in any part of the system.*

All pressure tanks shall be tested after erection to a test pressure of one and one-half (1½) times the working pressure. To prevent the possibility of serious water damage in case of a break, the pressure shall be maintained by a hand pump, the main controlling gate being meanwhile closed. Brine or other corrosive chemicals shall not be used for testing systems.

In automatic dry-pipe systems with "Type A" valve connected, an air pressure of forty (40) pounds per square inch shall be pumped up, be held for twenty-four (24) hours, all leaks stopped which allow a loss of pressure of over one (2) pounds per square inch for the twenty-four (24) hours.

In the case of automatic dry-pipe systems with differential "Type A" valve, the valve shall be held off its seat during the test to prevent injuring the valve.

Non-automatic systems shall be tested after installation at not less than fifty (50) pounds per square inch in excess of the pressure necessary to reach the highest line of sprinklers.

All tests of installed systems shall be made by the contractor in the presence of the Fire Commissioner, or his authorized representative.

No piping, devices nor any portion of a newly constructed sprinkler system shall be covered up or permanently concealed until tested by the Bureau of Fire Prevention and approved of in writing, except piping passing through floors, partitions or beams for distances equal to the thickness of such floors, walls, partitions or beams.

Rule 34. *Non-fireproof Business Buildings. Automatic sprinklers required in non-fireproof business buildings under the provisions of Chapter 5, Article 4, Section 72, Code of Ordinances, unless otherwise specifically provided in these rules, shall consist of at least a One Source System.*

Rule 35. *Dangerous or Hazardous Buildings. Automatic sprinklers required in buildings having occupancies considered to be dangerous or hazardous by the Fire Commissioner shall consist of at least a one-source system unless otherwise specifically provided for in these rules.*

Rule 36. *Factories and other Buildings. Automatic sprinklers required in buildings under the provisions of the Code of Ordinances and the Labor Law shall consist of at least a one-source system.*

Rule [35] 37. *Theatre Buildings. Automatic sprinklers required in theatre buildings under the provisions of Chapter 10, Article 25, Section 524, Code of Ordinances, shall consist of at least a One Source System.*

Rule [36] 38. *Firework Storage. Automatic sprinklers required in buildings in which fireworks are stored or sold under the provisions of Chapter 10, Article 6, Section 92, Code of Ordinances, shall consist of a Two Source System.*

Rule [37] 39. *Nitro-Cellulose Products. Automatic sprinklers as required in buildings in which nitro-cellulose products are stored under the provisions of Chapter 10, Article 19, Section 232, Code of Ordinances, shall consist of a system supplied from both approved gravity tank supply and an approved pressure tank supply, except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems, in conformity with the provisions of this rule as in force up to December 1, 1921.*

*In buildings wherein are stored or handled only limited quantities of nitro-cellulose products, not exceeding 500 pounds, the automatic sprinklers may consist of a two source system as provided for in Rule 12.*

Rule [38] 40. *Inflammable Motion-Picture Films. Automatic sprinklers, required in buildings in which inflammable motion-picture films are stored under the provisions of Chapter 10, Article 20, Section 241, Code of Ordinances, shall consist of a system supplied from both an approved gravity tank supply and an approved pressure tank supply except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems in conformity with the provisions of this rule as in force up to December 1st, 1921.*

Rule [39] 41. *Existing Installations and Approvals. Automatic extinguisher systems and devices heretofore approved and accepted by the authorities having jurisdiction shall not be required to conform to the provisions of these rules; and all such systems heretofore installed shall not be required to be altered to conform to these rules so long as the fire hazard due to construction and occupancy of the building is not increased or where substantial additions or extensions in height or area is made to the building when these rules shall apply if deemed advisable or necessary by the Fire Commissioner and the system after inspection is found to be in good working order.*

Rule 42. *Communicating Openings. When a building fully equipped with sprinklers communicates with another not so equipped the openings must be protected by approved fire doors on both sides of the wall, one of which must be automatic.*

Rule 43. *Maintenance Inspections. Automatic sprinkler systems shall be inspected at least once a month by the person in charge of the building, or by other competent person employed by the owner, to see that all parts of the system are in perfect working order, and the fire department connection or connections, if any, ready for immediate use by the Fire Department. A detailed record of each inspection shall be kept for examination by a representative of the Fire Department.*

*There shall be kept available at all times in the premises a supply of extra sprinklers, never less than six (6), to replace promptly any fused or damaged sprinklers. And there shall be one or more employees instructed in the maintenance of sprinkler system.*

Rule 44. *Open Sprinklers. When open sprinklers are required for exposure protection by the Fire Department as specified in the Building Code they shall be installed in accordance with the rules of the National Board of Fire Underwriters. Plans for such installation to be filed with the Fire Department for approval.*

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire of Form 13A, for notices to property owners, such are not to be supplied by this office. Applicant is entitled only to one copy of Form 13A, and is to be filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plaintiff's failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.
